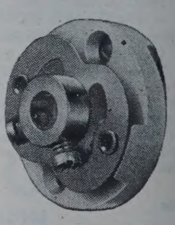
APC-140	140 mmf.	1.62

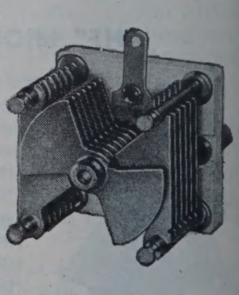
FLEXIBLE COUPLINGS



These flexible couplings are designed for both insulated and non-insulated applications. The FC-46-S is insulated for 6000 volts with silicone treated ceramic, will compensate for considerable shaft misalignment, but will not give springy action. Overall depth 13/16″, diameter 1¼″. The FNC-46-S is a non-insulated coupling for use where insulation is unnecessary. The general design is the same as the FC-46-S but has a heavy metal body instead of ceramic. Overall depth 23/32″, diameter 1¼″.

Code	Net
FC-46-S—Insulated	$0.66
FNC-46-S—Non-insulated	.66

BUTTERFLY CAPACITOR



The new butterfly capacitor is designed for use in VHF and UHF applications where the butterfly design is indispensable. Can be used as a single series unit or as a split stator with grounded rotor. This new butterfly capacitor is ideal for use in transmitters as well as receivers. Has soldered rotor and stator assembly; is plated to resist corrosion; silver plated rotor contact; sleeve type bearing, low-loss ceramic end panel. Approximately 1⅜″ square. Depth behind panel depends on number of plates. Insulated mounting studs prevent rotor from being grounded when mounted to metal.

	MMF. Cap. per Sec.		Series Cap.

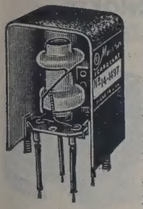
UNIVERSAL ADJUSTABLE COILS



These Adjustable - Inductance Ferrocart (iron-core) coils will replace the Broadcast band coils in practically any receiver. It is no longer necessary to order hard-to-get "exact duplicates" when an Antenna, R.F. or Oscillator coil requires replacement.

Continuously variable in inductance over a wide range, these coils will accurately "track" with the other coils in the receiver when properly adjusted. The exact inductance of the old coil is easily matched by a simple screwdriver adjustment, regardless of the value of the tuning condenser.

High "Q" iron cores used in these coils add gain and selectivity to the receiver. The oscillator coil provides complete adjustment for intermediate frequencies between 175 and 520 kc. May be used in either "cut-plate" tuning condenser or padded circuits. Available shielded or unshielded, furnished with complete instructions. 1¾" square by 2½" high.

UNSHIELDED

No.	Description	List
14-1026	Universal Ant. Coil	$1.75
14-1027	Universal R.F. Coil	1.75

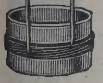
14-7560	Universal Osc. Coil	2.80

SLIP-OVER PRIMARIES



Designed to provide economical replacement of burned out primaries on all types of Antenna and R.F. coils. All windings are high-impedance type for improved performance. Sizes given below are outside diameter of coil over which the replacement winding will fit. Complete instructions for repair and replacement given.

No.	Size	List

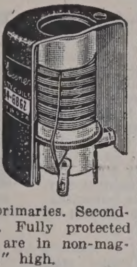
STANDARD ANTENNA R. F. COILS



Standard type air-core coils of superior construction, designed to cover the Broadcast band from 545 to 1620 kc with a 365-mmfd. tuning condenser. These coils make excellent replacement units and are used as original parts by discriminating set-builders and experimenters in the design and construction of Broadcast receivers.

All coils have high-impedance primaries. Secondaries are wound with Litz wire. Fully protected against humidity. Shielded coils are in non-magnetic cans, 1⅞" diameter by 2½" high.

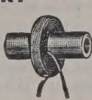
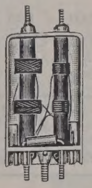
DOWEL TYPE PRIMARY



Popular replacement for burned out primaries in high impedance antenna coils. Universal wound on ¼" dia. by ½" long dowels moisture protected. Inductance 1700 uh.

No. 14-6865 List Price...... .42

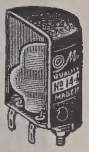
FM-AM "COMPOSITE" I.F. TRANSFORMER



Contains a 455 kc. AM and a 10.7 mc. FM I.F. transformer. Can size: 1⅜" square x 2½" long. Spade bolt mounting.

16-6675 10.7 mc.-455 kc. I.F. Trans., List $4.00

STANDARD OSCILLATOR COILS



High-quality Broadcast band oscillator coils designed for use with any of the Antenna and R. F. coils listed above, using a 365-mmfd. tuning condenser. Frequency coverage is 545 to 1580 kc; units are provided for all popular intermediate frequencies.

Coils are mounted on bakelite base with tinned soldering lugs for connections. Unshielded coils have single-hole stud mounting. All coils are thoroughly impregnated to resist severe climatic conditions. Shielded coils are in cans. 1½" diameter by 1¾" high, black crackle finish.

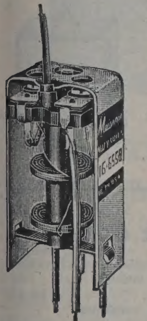
"PLASTIC" I. F. TRANSFORMERS



Particularly suitable for use in small receivers, where space is at a premium and yet superior performance is required, these remarkable transformers are only 1¼" square and 2½" high! Made in a complete series of frequency ranges and positions, they will provide results second to none in any type of receiver.

The one-piece molded plastic coil-form and trimmer-base eliminates many separate parts that were required with other types of construction. The assembly is, therefore, simpler and more rigid. The iron core series are highly rcommended for use in compact receivers and auto sets where only one I-F stage is permitted. It is not recommended that they be used in a two-stage system because of their high-gain which would cause instability and oscillation.

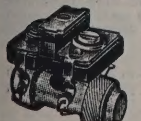
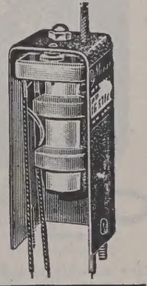
CARTWHEEL I. F. TRANSFORMER



A brand new, ultra-compact, unshielded I-F Transformer, complete with dual trimmers; finds useful application in many types of compact AC-DC or Midget type receivers. Only 1⅜" by 1$\frac{1}{32}$" by 1¼" high; one-piece molded plastic trimmer base; for 456-kc only.

No. 16-6661 List Price $1.40

STANDARD I. F. TRANSFORMERS



The Meissner series of Air-Core I. F. Transformers has been accepted as "standard" for general replacement purposes. Gain characteristics have been designed to correspond closely with average values found in the majority of commercial receivers. All transformers are double-tuned with ceramic-base, mica-dielectric trimmers. Windings are fully impregnated. Well-insulated RMA color-coded lead wires. Bright aluminum finish shield is 1⅜" square by 3" high.

List Price Each $2.10

FERROCART I. F. TRANSFORMERS

Designed primarily as original parts in high-gain receivers of superior quality, these transformers find consistent application in stepping up the performance of old receivers. The special powdered-iron core used in the coils permits higher "Q" with resultant increase in selectivity and gain. All units are double-tuned with ceramic-base, mica-dielectric trimmers. Windings are of high-grade Litz wire, thoroughly impregnated. Shield is bright aluminum finish, 1⅜" square by 3" high.

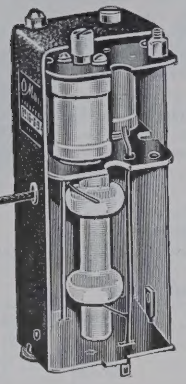
Meissner PRECISION-BUILT PRODUCTS



"ALIGN-AIRE" I-F TRANSFORMERS

The result of years of engineering experience in designing high grade transformers for the finest commercial receivers! The exacting requirements of modern high-fidelity and communications type receivers demand units that can be depended upon under any and all conditions. They must be absolutely stable under temperature and humidity variation and unaffected by vibration. These requirements are all met by the "Align-Aire" I-F Transformer. Provides 3600 degrees of micrometer smooth trimmer adjustment instead of the usual 180 degree rotation! Accurate trimming can thus be readily accomplished. Available with special "Iron-core" design for maximum gain and selectivity. Double-tuned and offered in a complete range of frequencies for any application. Shield cans are black crackle finish, 2"x2"x4¾".

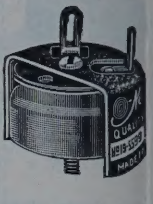
LIST PRICE, EACH **$6.95**

AIR-CORE R-F CHOKES



Accurately wound and individually tested; coils wound on specially treated forms, mounted on bakelite terminal base and thoroughly moisture proofed. Available in shields or without; both single-hole mounting. Shielded chokes have terminals thru top of can so unit may be mounted on inside wall of chassis. Shields are bright aluminum finish, 1⅜" square.

PHONO-OSCILLATOR COIL

For use in building either wireless or direct-connected phonograph-oscillator units for record reproduction through the radio receiver. Knob adjustment permits selection of clear frequency in the broadcast band. Coil is in bright aluminum shield, 1⅜" square by 3½" high.

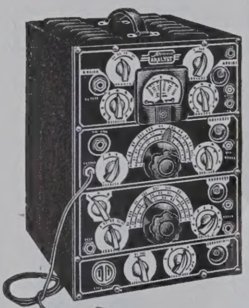
No. 17-9373 List **$2.80**

B. F. O. COIL

For use with standard I. F.'s in superhet receivers. They supply the "beat" note necessary to reception of C. W.; materially aid in tuning and locating weak stations. Mica trimmed. Freq. Range 290-650 KC. Peaked at 456 KC. In 1⅜" sq. x 3½" h. can with knob for pitch control.

No. 17-6753 Net Price **$2.45**

MEISSNER "ANALYST"



THE MODERN SERVICE INSTRUMENT—Undoubtedly the most modern complete servicing instrument on the present day market. Handles the receivers of yesterday, today and tomorrow — with equal efficiency and facility! Entirely fundamental in its testing procedure. Will never become obsolete. **SAVES TIME — SAVES MONEY**—The use of the new Meissner ANALYST will not only permit you to make more money by handling a greater number of service jobs in a given time but it will give you additional assurance that these jobs will "stay sold." **SERVICES BY "SIGNAL TRACING"** — The Meissner ANALYST tests receivers and locates faults by the "Signal tracing" method —proven to be the fastest and most reliable method known at the present time. It is NOT, however, just another signal tracer! It is completely equipped with all devices that might be needed to make simultaneous checks on various parts of the receiver circuit. Five separate and distinct "channels" provide as many different functions; all controls are accurately calibrated with functions clearly indicated.

Complete—Ready to Go to Work

The Meissner ANALYST is completely wired, aligned and laboratory tested. Furnished complete with a full set of 12 tubes, it is all ready to be put into service the minute it is unpacked and connected to the 110-volt line! No alignment or adjustments are necessary—just read the instructions, hook it up and go to work!

Complete Book of Instructions, supplied with the new Meissner ANALYST, gives detailed directions for use of this instrument in locating all kinds of radio troubles.

No. 9-1040—New Meissner ANALYST, complete with tubes, prods, and Instruction Book; ready to operate. **Net Price**......................**$113.85***

F. M. COILS—I. F. TRANSFORMER

Permeability tuned; designed for use on newly assigned F. M. Frequencies. Mounted in 1-7/16" x ⅞" x 1-29/32" can. Tuned to 10.7 mc.

No. 16-6665 List Price **$2.95**

DISCRIMINATOR TRANSFORMER

Mounted in same size can as I.F. Transformer listed above. Permeability tuned to 10.7 mc.

No. 17-3484 List Price **$3.90**

"6SA7" OSCILLATOR COIL

Tapped type coil for currently popular 6SA7 tube. For use with 420 uufd. condenser and padder

14-1033 List **$0.85**

For use with 162 uufd. "cut" section condenser

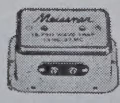
14-1053 List **$0.85**

"UNIVERSAL" ADJ. IND. OSCILLATOR COIL

A truly universal oscillator coil for 455 kc. I.F. Primary is tapped for use with any of 25 different type oscillator tubes. Instructions included.

14-1040 List **$2.00**

NEW MEISSNER WAVE-TRAPPERS



AVAILABLE IN 5 MODELS

6 to 13 mc, 13 to 27 mc, 27 to 54 mc, 54 to 108 mc, 108 to 216 mc

You can now attenuate interfering signals on fundamental or harmonic frequencies with these new, highly efficient tunable wave traps. Several may be connected in series if interference exists on more than one frequency. Efficient with any balanced or unbalanced line from 50 to 400 ohms impedance.

List Price...............**$5.00**

NEW MEISSNER LINE FILTERS

(Grounded & Shielded)

Reject interference from electric shavers, electric fans, food mixers, vacuum cleaners, etc. 300-watt rating.

List Price...............**$6.50**

MIDGET SHIELDED ANT. AND R.F. COILS

A compact, super quality shielded antenna and R.F. coil. Provides full coverage of the broadcast band with a 365 tuning condenser. Special wound litz wire secondaries. High impedance primaries. Capacity coupling used to level gain over frequency range. Coil forms are bakelite ½" diameter; winding protected by wax impregnation. Shields are 1⅜" square x 2" high.

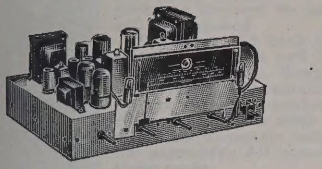
14-2436 Shielded Ant. Coil, List **$1.25**
14-2437 Shielded R.F. Coil, List........................... **$1.25**

MIDGET UNSHIELDED B.C. ANT.—R.F. COILS

Highly efficient antenna and R.F. coils, especially designed for use where space is at a premium. Cover the regular broadcast band with a 365 uufd. tuning condenser. Coils have high impedance primaries and litz wire secondaries. Windings are impregnated for moisture protection and wound on ⅝" diameter x 1¾" long forms.

14-1022 Unshielded Ant. Coil, List **$0.85**
14-1023 Unshielded R.F. Coil, List **$0.85**

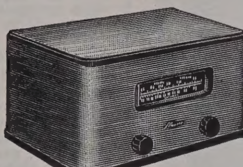
Meissner AM-FM TUNER MODEL 9-1091-C



igh fidelity reception! Covers AM Broadcast Band om 527 to 1620, FM Band from 88 to 108 MC hannels 200 to 300). Frequency response is flat ith plus or minus 2 db from 30 to 15,000 cycles! iput jack provided for crystal or high level mag-tic type phonograph pickup. Extreme sensitivity id selectivity.

ist Price........................$245.00

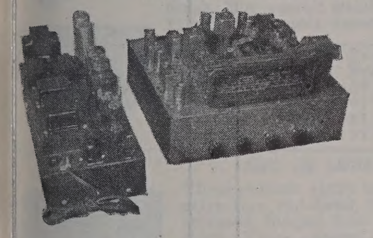
Meissner MODEL 8C FM RECEPTOR



Adds superb frequency modulation to any regular AM set. Precision built for simple connection to your present AM radio. Audio fidelity: Flat within plus or minus 2 db from 50 to 15,000 CPS. Frequency range 88 to 108 MC. Power supply 115 volts AC.

List Price........................$57.50

MODEL 9-1093 AM-FM TUNER AND AMPLIFIER



high-quality AM-FM tuner and amplifier that hard to beat. Power output, 18 watts at less than % harmonic distortion. Audio fidelity flat within us or minus 2 db from 50 to 15,000 CPS. Hum vel 65 db below full output. Slide rule dial is librated in kilocycles (535 to 1620 KC) on the M band and in megacycles (88 to 108 MC) on e FM band. Sensitivity less 20 microvolts.
phonograph input jack controlled by a front vitch is mounted in rear. The circuit is compensated for either magnetic or crystal pickup. The Tuner can also be used with the new GE Reluctance Pick-up because of a new phonograph preamplifier that has been incorporated in the circuit. Simply plug a 6SC7 in the socket provided. The 6SC7 is not supplied. A combination tone control provides bass boost up to 11 db at 40 CPS and treble attenuation up to 13 db at 10,000 CPS. Amplifier is designed for an 8 to 16-ohm speaker. Power supply: 105-125 volts, 50-60 cycles; consumption, 190 watts.

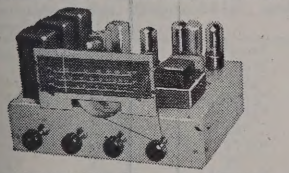
Tube Complement: 3-6SK7, 1-6SA7, 1-6H6, 5-6AG5, 1-6C4, 2-9001, 1-6AL5, 2-6J5, 1-6SN7-GT, 2-6L6 Power Amplifiers, 1 5Y3G Rectifier, 1-5V4G Rectifier and 1-6U5/6G5 Tuning Eye.

Chassis Mounting Space: Tuner — 14⅛″ w. x 12¼″ d. x 8⅜″ h. Amplifier — 7⅛″ w. x 16¼″ d. x 7″ h. (Allow clearance above amplifier for ventilation). Tuner weight is 18 lbs.; amplifier, 27 lbs.

Supplied complete with tubes, two antennas and all hardware required to mount chassis units in cabinet. Antennas consist of a low impedance, 12″ x 16″, noise reducing loop for AM broadcast and an indoor type folded dipole, 300-ohm, for FM broadcast. Cabinet and speaker not included.

List Price........................$310.00

MODEL 6BK 3-BAND AC KIT



requency Range: 535 KC to 18 MC in 3 overapping bands.
ensitivity: 15 microvolts on all bands.
udio Output: 3 watts maximum. 2 watts at 5% istortion.
ntermediate Frequency: 455 KC.
ube Complement: 2-6SK7, 1-6SA7, 1-6SQ7, 1-V6GT and 1-5Y3GT.
ize: Chassis size — 12″ x 10″ x 3″. Mounting pace required — 12½″ w. x 7¼″ h. x 11½″ d.
ower Supply: 105 to 125 and 210 to 250 volts, 0 to 60 cycles. Power consumption, 55 watts.
ontrols: Band switch, combination volume-line vitch, continuous tone control and tuning control.
ial: Slide rule, 5½″ x 1⅜″, calibrated in megarcles on all three bands. Dial edge lighted.
peaker: Speaker not supplied with kit. Any goodiality PM type of speaker may be used which has n impedance of 3.2 ohms and the ability to hanle the power of this set.
ssembly: Easily assembled from detailed pictorial iagram and simplified schematic. Wire, hardare and solder included.
Veight: 8½ lb. actual.

ist Price.........................$67.25

New *Meissner* SIGNAL SHIFTER KIT

MEISSNER
SIGNAL SHIFTER

For the amateur with limited budget, the new MEISSNER Signal Shifter Kit is ideal, making it possible for him to save 50% by building it himself.

Everything is provided including tubes — even wire and solder! All coil strips are furnished, plus a blank for an additional band.

Directions for assembly are comprehensive and clear, supplemented with schematic diagram, a host of photos and pictographs, all large size and easy to read. Directions are so simple to follow that even the beginning ham will have no trouble.

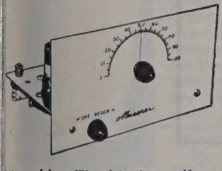
The only two difficult jobs are already completed. The complicated shielded turret assembly and the band spread gear mechanism come already built up — ready to install!

Only equipment needed is a pair of pliers, a screwdriver and a soldering iron.

No difficulty at all will be encountered to exactly duplicate the peak performance of the factory-built model.

Complete Meissner Signal Shifter Kit, Part No. 10-1207, Amateur Net........$64.75

MODEL 2BK BATTERY TRAINER KIT



Circuit: Regenerative grid leak detector with resistance coupled pentode audio stage. • **Tube Complement:** 1-1T4 and 1-3V4. • **Tuning Range:** Shipped with coil to cover the broadcast range of 520 to 1530 KC. Other coils available to cover the following ranges: 175 to 540 KC, 1350 KC to 5.4 MC, 3.5 to 8 MC, 7.9 to 18.5 MC, and 15 to 34 MC. • **Controls:** Combination regenerative control battery switch and vernier tuning control. • **Dial:** 1½″ pointer swings through 180 degrees arc over scale graduated 0 to 100. • **Batteries Required:** Shipped less batteries. Requires 4½-volt "A" battery and 90-volt "B" battery. Battery drain: "A" 50 MA. "B" 5 MA. • **Headphones:** Shipped less phones. Uses any good-quality magnetic type phones having an impedance of 2,000 ohms or more. • **ssembly:** The kit is easily assembled from detailed pictorial diagram and simplified schematic. Wire, ardware and solder included. • **Size:** 7¾″ x 4¼″ tall x 4⅛″ deep. • **Weight:** 1½ lb. actual.

ist Price..$15.50
xtra Coils: 170 to 540 KC and 540 to 1500 KC........................**List Price** 2.10
.4 to 4.50 MC, 3.2 to 8.2 MC, 8 to 18 MC and 15 to 34 MC. **Weight each 1 oz.....List Price** .85

MODEL 3BK AC-DC TRAINER KIT

ircuit: Regenerative grid leak detector with resistance coupled pentode audio stage and AC-DC type ower supply. • **Tube Complement:** 1-6BJ6 and 2-50B5. • **Tuning Range:** Shipped with coil to cover the roadcast range of 520 to 1530 KC. Other coils available to cover the following ranges: 175 to 540 KC, 350 KC to 5.4 MC, 3.5 to 8 MC, 7.9 to 18.5 MC and 15 to 34 MC. • **Controls:** Combination regenaraion control-line switch and vernier tuning control. • **Dial:** 1½″ pointer swings through 180 degrees arc ver scale graduated 0 to 100. • **Power Supply:** 105 to 125 volts, AC or DC. Power consumption, 18 atts. • **Headphones:** Shipped less phones. Uses any good-quality magnetic type phones having an imedance of 2,000 ohms or more. • **Assembly:** Easily assembled from detailed pictorial diagram and simlified schematic. Wire, hardware and solder included. • **Size:** 7¾″ x 4¼″ tall x 4½″ deep. • **Veight:** 1¾ lb. actual.

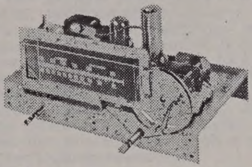
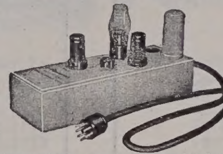
MODEL 8CK RECEPTOR KIT



Frequency Range: New FM band, 88 to 108 MC.
Audio Fidelity: Flat within plus or minus 2 db **from** 50 to 15,000 CPS.
Sensitivity: 40 microvolts.
Audio Output: 3 volts R.M.S. at minimum usable signal input, 30 % modulation. For greater signal inputs, output voltages as high as 15 volts R.M.S. may be obtained without distortion.
Amplifier Requirements: Any high-quality audio power amplfier may be used which has high impedance input (100,000 ohms or greater) and which will produce full output with 3 volts R.M.S. audio input. The MEISSNER Model 4A and 4AK amplifiers are suitable for use with this **Model 8CK FM Receptor.**
Antenna Input Impedance: Standard 300-ohm balanced line.
Controls: Tuning control and combination volume control-line switch.
Tube Complement: 2 type 6AW6, 2 type 6BA6, 2 type 6C4, 1 type 6AL5 and 1 type 6X5GT/G.
Power Supply: 105 to 125 volts, 50 or 60 cycle AC. Consumption, 35 watts.
Dial: Sliderule, 5½″ x 1⅜″, calibrated in megacycles and in channel numbers. Edge lighted.
Assembly: Easily assembled from detailed pictorial diagram and simplified schematic. **Front end factory assembled and aligned.** Wire, hardware and solder included. IF Coils pre-aligned.
Weight: 4½ lb. actual.

List Price..........................$44.95

THE NEW FMX PHASE MODULATOR



The new MEISSNER FMX Phase Modulator is designed exclusively for use with the Model EX Signal Shifter. Combination of the two — the FMX Modulator and EX Signal Shifter — gives the radio amateur a complete low power phone and cw transmitter at a very low price. Higher power, up to one KW, can be obtained with a power amplifier driven by the Signal Shifter.

The deviation control of the FMX Phase Modulator allows a swing of 5 to 10 KC on all amateur frequencies including the 80-meter band. Input for high impedance crystal or dynamic mike is provided.

Any class C amplifier that the Signal Shifter is capable of driving becomes a phase modulated amplifier.

The FMX Modulator is installed in the position normally occupied by the power supply, the latter becoming a remotely located unit.

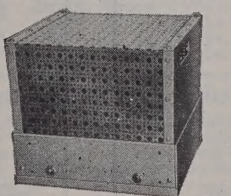
Plate and filament voltages for the FMX are secured from the Signal Shifter power supply.

Tubes required are 6SL7, 6SG7, and VR-150.

The FMX Phase Modulator is another precision-built product, designed by MEISSNER for the discriminating amateur who wants only the best.

Model FMX Phase Modulator, complete, less tubes, Amateur Net....................$15.00

MODEL 4AJ POWER AMPLIFIER



Fidelity: Flat within 2 db from 45 to 20,000 CPS.
Power Output: 20 watts with 1.5% harmonic distortion.
Power Input: 105-125 volts, 50-60 cycles only.
Power Consumption: 87 watts.
Hum and Noise: 150 db below full output.
Output Impedance: 4, 8, 15, 250 and 500 ohms. Unbalanced.
Controls: On-off power switch and pilot lamp on front skirt. All other connections made at rear. Volume control on rear skirt with screwdriver slot adjustment.
Input: High impedance (500,000 ohms) through standard RMA phono jack.
Input Requirements: 3 volts RMS for full output.
Tube Complement: 1-6SN7GT, 2-6L6G, 1-5Y3GT.
Size: 10″ x 8¾″ x 10″ deep.
Weight: 17 lb. actual.
Cover: Well ventilated protective cover.
Finish: Etched aluminum.

List Price..........................$91.25

MODEL 4AK POWER AMPLIFIER KIT

Easily assembled from detailed pictorial diagram and simplified schematic. Wire, hardware and solder included.

List Price..........................$78.50

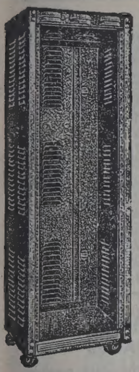
RADIO'S MASTER

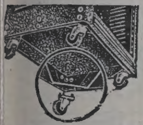
BUD DE LUXE RELAY RACKS



These relay racks are made of 16 gauge steel with 1/8" panel supports. The panel mounting supports are recessed so that no edges of the panel will be exposed.

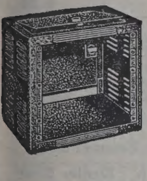
The front and back of the top, the two sides and the door are well louvered to provide adequate ventilation. Snap catches are positioned on the door. A stream-lined appearance is achieved by the use of rounded corners and red-lined chrome trim. The relay rack is shipped knocked-down and complete with all necessary hardware for assembly. All standard 19" panels will fit these racks.

A SPECIAL FEATURE IS THE USE OF FOUR STURDY SUPPORTS ON THE BOTTOM SO THAT CASTERS CAN BE FASTENED DIRECTLY TO THE BASE, THEREBY ACHIEVING READY MOBILITY. Bud RC-7756 casters will fit this unit. Casters are not included in price of cabinet. These relay racks are supplied in either black or grey wrinkle finish. The overall width is 22" and the depth is 17¼" on all sizes listed.



Catalog No.	Overall Height	Panel Space	Shipping Wt.	Dealer Cost
CR-1774	42$\frac{1}{16}$"	36¾"	90 lbs.	$28.50
CR-1771	47$\frac{5}{16}$"	42"	100 lbs.	35.45
CR-1772	66$\frac{9}{16}$"	61¼"	135 lbs.	42.30
CR-1773	82$\frac{5}{16}$"	77"	155 lbs.	50.40

BUD DE LUXE CABINET RACKS



These cabinet racks have rounded corners and attractive red-lined chrome trim. There is a recessed, hinged door on the top with a snap catch. These cabinet racks are made of heavy gauge steel and are of sturdy construction. The three large sizes have a hinged rear door, while the small sizes have a welded panel in the rear.

Adequate ventilation is assured by means of louvered sides and a two inch opening in the bottom of the back extends the entire width.

"NO-SCRATCH" EXTENDED METAL FEET ARE EMBOSSED ON THE BOTTOM TO MINIMIZE MARRING OF A TABLE TOP. These relay racks are furnished in either black or grey wrinkle finish. Depth 14¾", width 22". Will fit standard 19" panels.

CR-1745	36$\frac{13}{16}$"	35"	60 lbs.	21.57

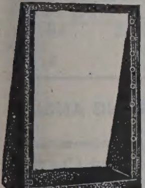
BUD JUNIOR CABINET RACKS

This cabinet rack is a multi-purpose unit that is inexpensive. The cabinet is constructed to accommodate two panels, one is 10½" by 18$\frac{5}{16}$", the other 8¾" by 18$\frac{5}{16}$", these panels are supplied with the cabinet. The BUD Junior Cabinet Rack is spacious enough to accommodate a chassis up to 10" by 17".

The rear of the cabinet is covered by a hinged door with a locking device. The cabinet is furnished in black wrinkle finish only.

Catalog No.	Overall Height	Depth	Width	Shipping Wt.	Dealer Cost
RC-1749A	21¼"	10½"	19⅞"	25 lbs.	$14.50

BUD DESK TYPE RELAY RACKS



Perfect for table mounting of low and medium power transmitters, public address systems, and other electronic instruments. Rack has strong chassis for mounting heavy components. Shipped knocked-down, with necessary hardware, easy to assemble. Standard notched 19" wide panels can be used, panels set in recess so that no edges are exposed. Furnished in black wrinkle finish only. Depth 12".

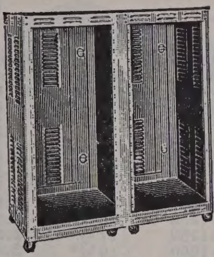
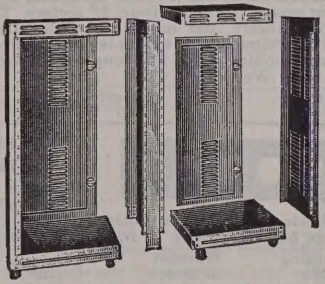
RR-1248	24"	21"	15 lbs.	$5.55
RR-1249	31"	28"	17 lbs.	6.93

NEW BUD ADD-a-RACK SERIES



It has always been necessary to buy special racks without louvers on one side to obtain a maximum of panel space with a minimum of floor space. Now, you no longer need to buy a whole new cabinet when you want additional panel space. Through our new and exclusive Add-a-Rack series, BUD not only offers additional racks at a lower cost, but provides you with a sturdier, better looking assembly.

The illustration at top shows two Add-a-Rack cabinets assembled together. The illustration below shows the unique and ingenious method of adding a unit to your present equipment. Instead of buying an entire new outfit, you purchase only four parts: (1) a door (2) a top (3) a bottom and (4) an Add-a-Rack coupling-unit. The right (or left) hand side of your present relay rack is removed and replaced by the Add-a-Rack coupling-unit: next, a top and bottom is fastened into place, and the side taken from the first rack is fastened onto the second rack which has been added. Place the additional door into position and you have two racks properly and efficiently coupled together. In the same simple way, more racks can be added at any time and every one will be in a CONTINUOUS ONE-PIECE assembly.



This series is available in two ways. (1) a double unit consisting of two racks and the Add-a-Rack coupling unit, (2) Add-a-Rack unit, consisting of a door, a top, a bottom and an Add-a-Rack coupling-unit. These units are furnished with all necessary assembling and panel mounting hardware.

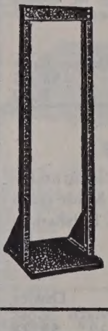
Add-a-Rack Unit	Used to Add-a-Rack to	Dealer Cost
AR-1778	CR-1774	$26.25
AR-1775	CR-1771	32.50
AR-1776	CR-1772	40.75
AR-1777	CR-1773	48.00

Complete unit consisting of the knocked-down parts necessary for two relay racks coupled together.

CR-1779	two coupled relay racks same size as CR-1774	$54.75
CR-1780	two coupled relay racks same size as CR-1771	67.95
CR-1786	two coupled relay racks same size as CR-1772	83.05
CR-1799	two coupled relay racks same size as CR-1799	98.40

Bud RC-7756 Casters will fit this unit. Casters are not included in price of cabinet.

BUD TELEPHONE TYPE RELAY RACKS

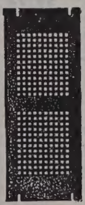


Nos. RR-1263 and RR-1264 are made of 1/8" steel channels, three inches deep and are held together by angle cross pieces of the same material. The design of the base has been improved to incorporate a chassis type bottom, together with the usual side angles, making the rack stronger and more stable.

RR-1265 is heavy duty and is made of heavy channel iron supported by two 3/8" thick iron angles that are bolted to the channels to provide additional support to the unit. Supplied in black wrinkle finish only. All racks accommodate standard 19" panels in accordance with standards set by RMA.

Catalog No.	Height	Depth	Panel Space	Shipping Wt.	Dealer Cost
RR-1263	35½"	22"	31½"	38 lbs.	$14.55
RR-1264	70½"	22"	66½"	48 lbs.	17.40
RR-1265	72½"	15"	66½"	97 lbs.	31.50

BUD VENTILATING GRILLE PANELS



Made of 1/8" thick steel. The grille is stamped into the panel itself, and is recommended for use where additional ventilation is desirable. All panels are 19" long, furnished in either black or grey wrinkle finish.

Catalog No.	Height	Grille Size	Dealer Cost
PS-808	5¼"	3⅜" x 14⅜"	$2.31
PS-809	7"	4⅞" x 14⅜"	2.46
PS-810	8¾"	*3⅞" x 14⅜"	2.70
PS-811	10½"	*5⅞" x 14⅜"	3.00
PS-812	12¼"	*7⅜" x 14⅜"	3.45

* Allows 3½" space for chassis mounting.

BUD CHASSIS MOUNTING BRACKETS

Mounting brackets are essential to insure proper support of the chassis. Formed of heavy gauge steel, cut away at the bottom to provide chassis clearance so that chassis can be mounted flush against panel. Finished in Black. Numbers MB-450 and MB-451 designed for chassis height of 4". Sold in pairs only.

Catalog No.	Height	Depth	Dealer Cost Per Pair
MB-458	6½"	8"	$0.69
MB-448	6½"	10"	.93

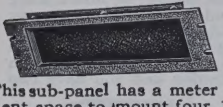
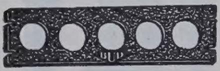
BUD ENCLOSED METER PANEL



PS-439 Meter Panel is designed to give maximum protection to meters. The steel panel has a large cut-out, behind which is mounted a blank Masonite sub-panel. This sub-panel has a meter mounting area of 4⅛" x 15⅛" — sufficient space to mount four 3" meters. The meters are protected by a glass insert that mounts in slides. Due to danger from breakage during shipment, this glass is not supplied with the panel. The glass insert should be cut 16" long x 4⅝" wide. Finished in either Black or Grey Wrinkle.

Cat. No.	Length	Width	Dealer Cost
PS-439	19"	5¼"	$4.68

BUD METER PANELS STEEL AND MASONITE



All meter panels are 5¼" high, 19" wide, available in either black or grey wrinkle finish. Small holes fit either 2" square or round meters, large holes fit either 3" square or round meters.

Catalog No.	Number of Holes	Diameter	Type Material	Dealer Cost

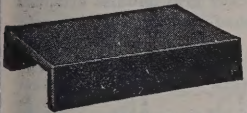
BUD OPEN-END CHASSIS



Primarily intended to be used with the various sizes and styles of Bud metal cabinets, these chassis are ideal for any type of small built-up unit such as a record amplifier, code oscillator, etc. U-shaped construction is used with ends folded over 3/8" for additional strength. Finish is Electro-Zinc Plating.

BUD CODE PRACTICE OSCILLATOR AND MONITOR

CODEMASTER

The BUD CODEMASTER is a real money-saver. No longer do you have to consider your code practice oscillator useless after you have learned the code. A flip of the switch and you have a good CW monitor. This is a really versatile instrument.

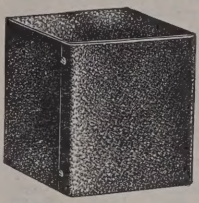
It has a 4" built-in permanent magnetic dynamic speaker and will operate up to twenty earphones.

A volume control and pitch control permit adjustments to suit individual requirements. Any number of keys can be connected in parallel to the oscillator for group practice.

This unit will operate on 110 volts A.C. or D.C. An external speaker may be plugged in without the use of an output transformer. All controls are placed on the front of the unit and all jacks are in the rear. The unit is 6½" high, 5½" wide and 3½" deep. It is finished in black enamel with white lettering.

Catalog Number CPO-128 Dealer Cost **$12.50**

BUD STREAMLINED SCOPE AND UTILITY CABINETS



These are attractive cabinets that are adaptable to a variety of uses. All cabinets are supplied with chassis. Prices shown below include chassis. The chassis height on all except CU-1991 and CU-1992 is 1½". CU-1991 is designed for 3" cathode ray tube and has a hinged cover to provide easy access to tube or other components. Chassis height is 2". CU-1992 is designed for a 5" cathode ray tube and also has a hinged cover. Chassis height, 3".

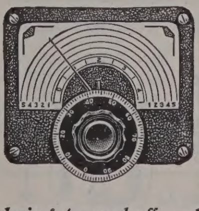
BUD BOX SHIELDS

This shield has many uses: Shielding power transformers and chokes, and for covering and protecting various other components in power supplies, transmitters, receivers and other electronic units.

Top and sides are one-piece steel. No. BS-1244 has perforated steel ends for ventilation. BS-1891 has solid ends. Flanges at bottom provide for mounting. Finished in Black Wrinkle Enamel only.

Cat. No.	Ends	Length	Depth	Height	Dealer Cost
BS-1244	Ventilated	7½"	4½"	5"	$1.45
BS-1891	Solid	7½"	4½"	5"	1.35

BUD VERNIER DIAL—GEARED TYPE



Freedom of back-lash is obtained by the use of spring-loaded laminated steel gears with a ratio of *ten to one*. Dial furnished with three paper dial scales on which calibration marks can be printed. Dial scales are printed with five calibration arcs for wave-band identification and each arc is divided into five equal sections over 180 degrees, which makes each section the equivalent of one rotation of the circular dial, or 100 dial divisions. *Automatic clutch and stop prevents pointer from being turned off scale and eliminates possibility of damage to the gears.*

The dial is furnished mounted, complete with all hardware. An escutcheon outlines the dial scale, which is further protected by a "Plastacele" window. Dial scale assembly mounts independent of the gear unit, and may be removed when desired without disturbing the dial drive.

Mounting area of the dial 5¼" x 5¾". Depth behind panel 1½".

D-1729.................................Dealer Cost **$3.00**

Where materials are specified Black Wrinkle Finish, and Grey is desired, a charge of 15% additional will be made.

BUD MINIATURE AMPLIFIER FOUNDATION

With the increased use of miniature tubes, smaller cabinets can be used when designing a compact amplifier. This amplifier foundation was designed expressly for this purpose. The chassis is a 5″ x 7″ x 2″. The cover is made of perforated metal. A streamlined handle makes this cabinet portable. Finished in black wrinkle.

Cat. No.	Height	Width	Depth	Chassis Height	Dealer Cost
CA-1754	6″	7″	5″	2″	$3.00

BUD ALUMINUM MINIATURE CHASSIS

These small, open end aluminum chassis are just the thing for miniature tube applications or sub-assemblies. Made of hard aluminum with ¼″ flange on bottom, allowing the chassis to be fastened down or a bottom plate to be attached. Extremely useful for small receivers, outboard uses, such as narrow band FM adapters or any use where space is limited. Finish is etched aluminum.

Cat. No.	Depth	Width	Height	Fits Cabinet No.	Dealer Cost

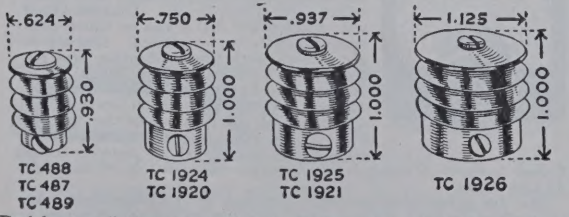
CM-1966	2$\frac{13}{16}$″	3″	.95

Prices slightly higher west of the Mississippi River.

HEAT RADIATING PLATE AND GRID TUBE CONNECTORS



Bud heat radiating connectors fit all sizes of industrial and transmitting vacuum tubes. These connectors serve a dual purpose, not only are they useful to make connections to plate or grid terminals, but they provide a large heat radiating surface that will dissipate heat from the glass seal and tube element.

Eight sizes fit all grid and plate leads and also provide sufficient heat radiation for any tube operating in the range of 50 to 2000 watts. All radiators are machined from special aluminum rod. Edges are rounded to minimize corona loss.

Table below lists Connectors to fit various Tubes

Cat. No.	Hole Size for Lead	Heat Radiating Connectors to Fit the Following Tubes	Dealer Cost

BUD BUTTERFLY TRANSMITTER CONDENSERS

These Butterfly condensers are unequaled for mechanical and electrical balance in push-pull amplifier circuits. Where space behind the panel will not permit the use of our Giant or Master condensers, these dual condensers are ideal.

Rotor and Stator plates are made from .062" thick, highly polished aluminum with all edges rounded and surfaces highly polished to minimize corona loss and danger of peak voltage flash-over Steatite bars are used as insulators.

These condensers are so designed that a pair of single plate neutralizing condensers can be fastened to the end plate. Brackets for mounting coil jack bars are furnished with the condensers. All condensers that have an air gap of .5" are furnished with brackets for kilowatt coils and the condensers that have .3" air gap are furnished with brackets for the mounting of 500 watt coils. The height of the condensers is 6¼" and the width is 7".

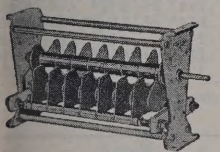
BUD GIANT TRANSMITTER CONDENSERS—SINGLE SECTION



Modern design, plus precision production methods, makes BUD GIANT TRANSMITTER CONDENSERS the first choice of critical engineers for use in such applications as broadcast transmitters, high-power trans-oceanic communications equipment, and many other types of highly specialized electronic devices.

BUD GIANT TRANSMITTER CONDENSERS are built with a sturdy frame consisting of 3/16" thick aluminum end plates, connected by 5/8" diameter duraluminum rods. Formed brackets at top and bottom of end plates provide for mounting these units, and permit placing of associated inductances directly on the condenser.

Rotor and stator plates are accurately stamped from 0.064" thick highly polished aluminum with all edges rounded to minimize corona loss and danger of peak-voltage flash-over. The plates are separated by accurately machined duraluminum spacers that insure a constant air-gap throughout the entire length of the condenser.

The large two-finger rotor-contact spring, made from plated spring brass, assures positive contact with noise-free operation. Steatite bars insulate the stator, and are placed well outside the electrostatic field to keep dielectric losses at a minimum.

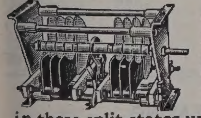
BUD GIANT TRANSMITTER CONDENSERS—DUAL SECTION



These GIANT DUAL-SECTION TRANSMITTER CONDENSERS compare in quality with the GIANT SINGLE-SECTION TUNING CONDENSERS described above, and have the same general constructional features. Insulated tie-rods in these split-stator units eliminate closed loops in the frame.

The rotor-contact consists of four fingers made from heavy-plated spring brass, placed in the center of the rotor assembly under heavy spring tension. This construction reduces series resistance and improves the efficiency of the unit at the higher frequencies.

When these dual condensers are used in split-stator circuits, the capacity is reduced to one-half the listed value and the voltage ratings are doubled.

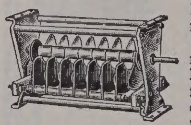
Panel space for mounting Giant Condenser 6¾" wide by 8 13/16" high.

BUD MASTER TRANSMITTING CONDENSERS—SINGLE SECTION



Each condenser is built in a rigid and sturdy frame consisting of two highly polished 1/8" thick aluminum end plates connected by four 5/16" diameter tie-rods. The end-plates have formed angles on top and bottom to facilitate mounting and to enable the associated inductance to be attached directly to the condenser itself.

The rotors and stators are assembled with plates made from 0.051" thick aluminum on which the edges have been rounded and highly polished. These plates are separated by accurately machined spacers. Large surface cone bearings assure proper alignment and smooth running of rotor with correct tension. Laminated, phosphor bronze wiper springs are placed at each end of the condenser bracket to assure positive rotor contact and noise-free operation. The stator assembly is insulated from the unit by large Steatite bars which are placed outside the electrostatic field. Rotor shaft is 1/4" diameter.

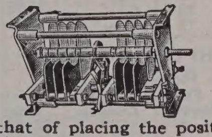
BUD MASTER TRANSMITTING CONDENSERS—DUAL SECTION



While the general style and construction is identical with the single Master units, all tie-rods in this series are insulated by glazed Steatite pillars, thus completely eliminating all closed metallic loops in the condenser frame. A special outstanding feature, developed by BUD engineers, is that of placing the positive double wiping rotor contact between the two sections at the center of the rotor. These features contribute to perfect circuit balance and eliminate the majority of difficulties encountered in ultra-high frequency equipment due to parasitics, circulating currents and poor neutralization. Use BUD condensers throughout and be trouble free.

Panel space for mounting Master Condensers 3¾" wide by 4⅞" high.

OHM'S LAW

$E = IR \qquad R = \frac{E}{I} \qquad I = \frac{E}{R}$

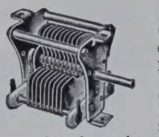
where:
R = resistance in *Ohms*
I = current in *Amperes*
E = electro-motive force in *Volts*

POWER

$P = I^2R \qquad P = EI \qquad P = \frac{E^2}{R}$

where:
P = power in *Watts*
I = current in *Amperes*
R = resistance in *Ohms*
E = electro-motive force in *Volts*

BUD JUNIOR SINGLE SECTION CONDENSERS



Construction of these condensers features BUD electro-soldered plate assemblies, assuring correct plate spacing, overall rigidity, and light weight. Losses are reduced to a minimum by this method of assembly. End-plates are rigidly constructed. Frame has formed angles on top and bottom for mounting the condenser in any position, allowing associated tuning inductance to be mounted on the condenser frame. The edges of the brass rotor and stator plates are rounded and the assemblies are finished in cadmium plating. Steatite insulation is used throughout. Large surface front sleeve bearing, and ball and cup rear bearings, provide consistently smooth operation. A two-finger spring brass pressure contact wiper assures noise-free and positive rotor contact at all times.

The low minimum capacities of these units make them especially suitable for multi-band applications where a high maximum-to-minimum capacity is desirable.

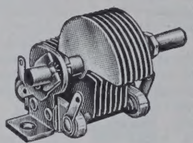
BUD MIDGET CONDENSERS



Small size, sturdy construction and high mechanical and electrical efficiency are the outstanding features. Insulation used is Steatite. Rotor and Stator plates are brass and are electro-soldered to their respective rods. All metal parts are cadmium plated. These condensers have both front and rear bearings and are furnished in either mid-line type plates (straight line wave length), or semi-circular plates (straight line capacity).

BUD "CE" MIDGET CONDENSERS SINGLE SECTION DOUBLE BEARING

These Midget Condensers were designed to meet the rigid requirements in design of efficient ultra-high frequency electronic devices and precision laboratory equipment. Brass rotor and stator plate stacks are assembled into permanent units by means of electro-soldering, which assures long life and accurate plate spacing. End-plates of Steatite insulate the mounting bushings and angles from the rotor and stator assemblies. A large front sleeve bearing and rear ball thrust bearing provide for smooth rotation. Special wiper contact provides noise-free tuning. All metal parts are cadmium plated.

Rotor plates are semi-circular shaped.

Provision for either panel or base mounting.

BUD "CE" MIDGET CONDENSERS SINGLE BEARING

Locking nuts on the rotors of these single-bearing condensers assure trouble-free, portable and mobile operation. A screw-driver slot in rotor provides means of adjustment. Either insulated panel mounting or bracket mounting can be used. General construction is same as "CE" double-bearing condensers.

Catalog Number	Max. Cap. MMFD.	Min. Cap. MMFD.	Air Gap	No. of Plates	Over-all Length	Dealer Cost

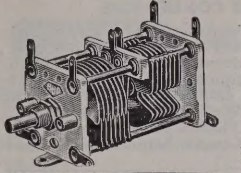
BUD "CE" TYPE DUAL MIDGET CONDENSERS



These well constructed dual condensers are similar in design to the double-bearing "CE" types. They feature a rotor wiping contact placed at center of the rotor assembly to assure maximum efficiency at ultra-high frequency. Opposed rotor construction assures perfect counterbalance and provides even torque at any position of rotation. Steatite insulation eliminates closed induction loop in frame.

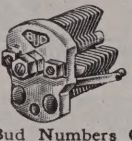
BUD TINY MITE PADDERS



For applications requiring a constant padder capacity under all temperature and humidity conditions, these units are ideal. They lend themselves readily to I. F. transformer applications, fixed tuned circuits for exciters, ganged condenser air trimers, and plug-in-coil padding as they fit inside of standard 1 1/2" diameter coil forms, Bud Numbers CF-125, CF-126 and CF-310. Rotor and stator assemblies are made up of brass plates (0.015" thick) and rods electrically soldered into a solid unit and then are bright cadmium plated. Insulation is Steatite. Each unit may be adjusted in capacity by either a screw-driver or a 1/4" hex. wrench.

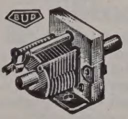
BUD TINY MITE TUNING CONDENSER SINGLE SECTION



This series of condensers has been designed for applications where space or weight are limiting factors and for tuning of ultra-high frequency circuits. Rigid construction, close fitting bearing, positive rotor contact and Steatite insulation are the outstanding features. Cadmium plated, soldered, brass plates and rods insure high frequency efficiency.

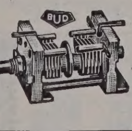
* Denotes double bearing.

BUD TINY MITE DUAL CONDENSERS



The construction of these units is similar to the regular Tiny Mite Tuning Condensers. The two end pieces are held together firmly with two tie-rods.

A separate round plate is soldered on rotor rod to shield the two stator sections. Large surface front-sleeve bearing, and ball and cup rear bearing, provide smooth rotation.

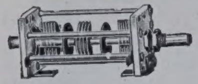
NEW BUD THREE-GANG TINY MITE CONDENSERS



Hams, Radio Constructors and Experimenters can find many uses for these compact, three-gang condensers. Designed particularly for high frequency use, they are adaptable for use in converters, preselectors and receivers covering the Amateur, Television and F.M. bands. Well constructed with soldered brass plates and ceramic brackets. Rotor shaft extended 1/4" at rear. Height $1\frac{5}{16}$". Width $1\frac{3}{16}$". Length behind panel $3\frac{3}{8}$". Mounting holes $2\frac{3}{16}$" apart.

Catalog Number	Cap. Per Section Max.	Cap. Per Section Min.	No. of Plates Per Section	Dealer Cost

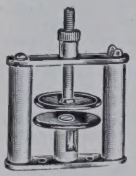
MIDGET TRIMMER CONDENSERS

Primarily intended for antenna coupling, interstage coupling, tracking applications. Base made of ceramic.

Catalog Number	Capacity MMFD. Max.	Capacity MMFD. Min.	Dealer Cost
MT-833	3	36	$ .15
MT-828	94	420	.30

BUD NEUTRALIZING AND HIGH FREQUENCY TUNING CONDENSERS



This line of condensers will fill every neutralizing and high frequency tuning requirement that modern circuits pose. The two-pillar construction makes this unit unusually sturdy and eliminates any possibility of capacity variation due to vibration. The movable plate is adjusted by means of the threaded shaft to which it is attached, and it is permanently locked in any position by the lock-nut provided. Any loose thread is taken up by a special nut and locked to give smooth operation. All metal parts are of aluminum. Plates have rounded edges. Steatite insulation is used.

Catalog Number	Plate Diameter	MMFD. Capacity Max.	MMFD. Capacity Min.	Dealer Cost
NC-1000	$1\frac{27}{32}$"	11	1	$2.25

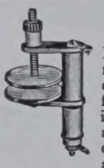
NC-1002	$4\frac{3}{4}$"	27	6	4.55

BUD FEED-THROUGH AND BASE MOUNTED NEUTRALIZING CONDENSERS



In circuits utilizing tubes with the grid lead terminated in the base, feed-through type of neutralizing condenser is particularly suited. One hole is required for mounting of feed-through condensers. Neutralizing condenser illustrated is feed-through type. Plates are made of aluminum, rounded at edges to cut down losses. After proper tuning is attained, movable plate can be locked with the knurled nut.

No. 890 and No. 852 are ideal neutralizers for popular low power beam tubes. No. 890 condenser is base mounted only.

Catalog Number	Plate Diameter	Size Hole for Mtg.	MMFD. Capacity Max.	MMFD. Capacity Min.	Dealer Cost

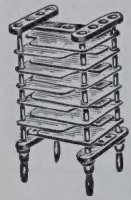
BUD STAT-AIR CONDENSERS



It is difficult to design a radio-frequency amplifier to cover any large frequency range and maintain a proper L/C ratio due to variable condenser limitations. By paralleling the proper Stat-Air condenser in this series with the tuning condenser, this difficulty is easily overcome.

The finish of these electro-soldered brass plate assemblies is cadmium plating, and Steatite insulation is used. They are furnished in either Junior or Senior types.

JUNIOR TYPE—MOUNTING DIMENSIONS—$1\frac{1}{4}$" x $1\frac{1}{2}$"

COMPACT NEUTRALIZING CONDENSERS

In applications where space is the prime factor, these units are ideal for neutralizing and high frequency tuning. Low loss Steatite is used for dielectric. These condensers feature either one hole mounting or fastening to solder lugs provided. All brass parts are nickel plated. A knurled lock-nut permits locking of movable plate.

Catalog Number	Cap. Range in MMFD.	Overall Length	Max. Diam.	Dealer Cost

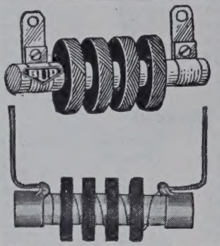
PIE WOUND R. F. CHOKES



Each choke has a continuous winding of silk covered enameled copper wire and the pies constituting this winding are wound on a 1/4" diameter ceramic core. Chokes are made with both strap and wire leads. The CH-876 is a heavy duty choke intended for circuits, such as transmitter plate circuits, where high currents are present. All chokes in this series have an overall length of $1\frac{1}{2}$".

WITH STRAP LEADS

Catalog Number	Inductance mh.	D. C. Resistance	Current Rating	Dealer Cost

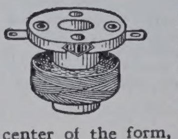
CH-876W	2.5	16 ohms	250 ma	.65

LATTICE WOUND R. F. CHOKES



For all general purpose applications requiring a high quality choke at a reasonable price, this line finds wide acceptance. Each choke is wound from silk-covered enameled copper wire on a white ceramic bobbin. Leads are terminated with two convenient soldering lugs. Chokes can be mounted with a 6–32 screw through the center of the form, and each winding is thoroughly impregnated against moisture. The wide range of sizes fills practically every choke requirement in standard radio circuits. Choke base diameter $1\frac{1}{16}$", distance between ends of leads $1\frac{5}{8}$".

Catalog Number	Inductance mh.	D. C. Res. Ohms	Current M. A.	Height	Dealer Cost

CH-1220	80.	332	80	15/16"	.90

TRANSMITTING CHOKES

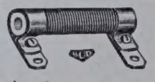
Here are two heavy duty R. F. Chokes that can really take it in high powered transmitter plate circuits. Each choke is wound on 9/16" dia. Steatite rod, has connection lugs and a mounting foot.

All chokes have a heavy ceramic coating which prevents moisture absorption and enables them to withstand momentary overloads without collapsing the individual pies.

Consists of five graduated pies wound in continuous winding. Care has been taken to prevent any of the pies from being resonant on an amateur band and to keep the distributed capacity at a minimum. Overall height $3\frac{1}{4}$".

Catalog Number	Inductance	Current Capacity	D. C. Resistance	Dealer Cost
CH-568	2.2 mh.	1 amp.	5 ohms	$1.65
CH-569	4.3 mh.	.6 amp.	12 ohms	1.50

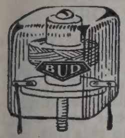
ULTRA HIGH FREQUENCY R. F. CHOKES



These chokes were designed to meet the requirements of builders of ultra-high frequency receivers and transmitters. Consists of ceramic rod with a single layer winding terminated with strap leads at each end. Particularly suitable for use on 2 or 6 meters. CH-570 is supplied with a mounting foot and is sometimes used as a filament choke in certain types of high frequency oscillator and amplifier circuits.

Catalog Number	Inductance mh.	Max. Current	D. C. Resistance	Lengths	Dealer Cost
CH-925	5.7 uh.	750 ma	1.4 ohms	$1\frac{1}{2}$"	$ .28
CH-570	1.5 uh.	1.7 a	0.2 ohms	$2\frac{3}{4}$"	.95

IRON CORE R. F. CHOKES



The efficiency of any circuit requiring an R. F choke will be definitely improved by utilizing one of these chokes with a finely divided molded metallic core. The improved "Q" possible with this construction results from the D. C. resistance of these chokes being from 40 to 50% less for a given inductance than for regular air-core types. Thus, the D. C. voltage drop through the choke is considerably less, yet the choking action is equally as good. Windings are made with silk-covered enameled wire terminated on convenient soldering lugs, and the chokes are mounted in small square shield cans measuring 1⅜" x 1⅜" x 1$\frac{7}{16}$".

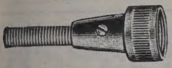
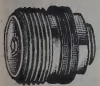
SINGLE CONTACT CABLE CONNECTORS



Positive unbreakable contacts for single-conductor microphone cable are provided by these shielded connectors. Body is made of brass, bright nickel-plated. Accidental disconnections are rendered impossible by coupling ring which, when tightened, insures perfect contact between soldered connections. Cord protectors of steel spring wire will take cables up to 1/4" diameter.

Catalog Number	Description	Length	Bushing Diameter	Dealer Cost
CN-244	Single Contact, Female	2"	23/32"	$ .33
CN-245	Single Contact, Male	1¾"	5/8"	.27

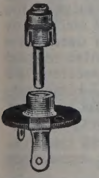
CHASSIS UNIT CONNECTOR



Male connector CN-246 is designed for chassis mounting in connection with CB-244. Where ground to chassis desired, mount in 3/8" hole; to insulate from chassis, mount in 15/32" hole; insulating washers are furnished.

Catalog Number	Description	Dealer Cost
CN-246	Chassis Connector Unit	$ .20

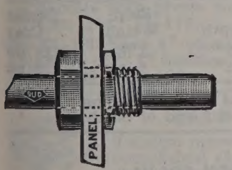
PHONO PLUG AND JACK



This is a pin plug and jack combination that will fit into a multitude of applications: Receivers, auto radio, recording and reproducing equipment, experimental units, etc.

Catalog Number	Description	Dealer Cost
PL-247	Plug	$ .06
JP-248	Jack	.09

PANEL BEARING ASSEMBLIES



Nos. PB-530 and PB-531 consist of a regular 1/4" shaft bearing with 6" and 3" length of 1/4" brass rod inserted and held in place by washers to prevent shaft from shifting. These two assemblies will facilitate the panel control of condensers, potentiometers, etc., which must be mounted a distance from the panel. Bearing fits in 13/32" hole and on panels up to 5/16" thick. No. PB-532 is bearing only without shaft.

Catalog Number	Overall Length	Distance in front of panels	Dealer Cost
PB-530	6"	4¾"	$ .33
PB-531	3"	1¾"	.28
PB-532	Bearing Only	....	.12

SOLDERING IRON TIPS

This tip is made of a special copper base rod. It is 3/8" diameter x 4" long and is made particularly as a replacement for American Beauty Irons. However, it will fit many other types of irons that are designed to accommodate 3/8" diameter tips.

Catalog Number	Fits American Beauty No.	Dealer Cost
IT-372	3138	$ .42

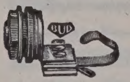
BUD PHONE PLUGS

All metal parts on these excellent phone plugs are machined from brass, and are nickel plated. Unshielded plugs have handles of black bakelite; shielded types have attractive brass knurled handles, bright nickel plated.

No. FP-1946 is supplied *Without a Handle*, and is used as an adapter between a female microphone cable connector and a regular plug jack.

Catalog Number	Contacts	Handle	Overall Length	Bushing Diam.	Dealer Cost
FP-230	2	Bakelite	2¾"	3/4"	$ .30
FP-282	2	Shielded	2⅞"	3/4"	.54
FP-1057	3	Bakelite	2¾"	3/4"	.66
FP-284	3	Shielded	2⅞"	3/4"	.85
FP-1946	2	None	1$\frac{7}{16}$"	$\frac{11}{16}$"	.24

BUD MIDGET JACK



The construction of this jack allows its use in applicatons having limited space behind the panel. The spring brass contact assures a good connection. These jacks come with insulating washers and accommodate standard phone plugs.

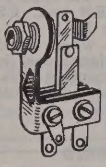
Catalog No.	Type	Distance Behind Panel	Dealer Cost
J-232 A	Open Circuit	13/16"	$ .27
J-233 A	Closed Circuit	13/16"	.33

BUD SMALL JACKS

These panel mounting jacks are desirable for control panels and similar applications where space is at a premium. Parts are accurately machined, with nickel plated finish and contacts are formed from spring brass. Each jack comes complete with insulated washers and will accommodate standard plugs. Overall length 1⅝".

Catalog No.	Contacts	Distance Behind Panel	Dealer Cost
J-1038	2	15/16"	$ .30
J-1058	3	15/16"	.46

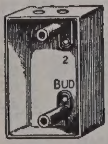
BUD ALL PURPOSE JACKS



Although small in size, this is one of the finest lines of jacks available. The careful design and high quality materials used in these components assure long, dependable service. Circuit opening contacts are made of pure silver and the laminated bakelite insulation prevents breakdown between springs at all ordinary voltages. Supplied with panel insulating washers. Height 1⅞", distance behind panel 7/8".

Catalog Number	Circuit Design	Contact Arrangement	Dealer Cost
J-1324		Open Circuit	$ .30
J-1325		Closed circuit	.36
J-1326		3-Contact open circuit	.39
J-1327		Break contact on tip and ring spring	.42
J-1328		Separate make-contact springs	.42
J-1329		Break contact on tip spring — separate make-contact spring	.48
J-1330		Break-make contact on tip spring	.45

BAKELITE OUTLET BOX AND COVER



This bakelite outlet box is an ideal unit for housing numerous radio and electrical specialties in compact form. The box is 2⅞" wide x 4⅝" long x 1½" high. A solid bakelite cover is available for this item.

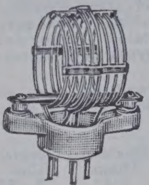
Catalog No.	Item	Dealer Cost
RO-400	Box	$ .54
RO-401	Cover	.15

ALLIGATOR CLIPS

Accurately made; supplied with or without insulated ends. No. CL-485 Clip only. No. CL-486-R Alligator Clip with Red insulated end. No. CL-486-B Alligator Clip with Black insulated end.

Catalog No.	Type	Dealer Cost
CL-485	Regular	$ .06
CL-486	Insulated	.12

BUD 75-WATT TRANSMITTER COILS



These coils are distinguished by their rigid construction, attractive appearance and conservative power rating. The ceramic mounting base keeps the coil a safe distance from the chassis—it also permits easy coil removal without disturbing the winding. All coils are air-wound and mount in 5 prong tube sockets.

OEP and OCP Coils are designed for use in circuits using Pentode tubes with high output capacity such as 6L6, 807, etc.

OEL coils have fixed link and are *not* tapped.
OCL have fixed center link with main winding center tapped.
OLS have adjustable center link, main winding center tapped.
OES have adjustable end link and are not tapped.
OEP have adjustable end link and are not tapped.
OCP have adjustable center link main winding center tapped.

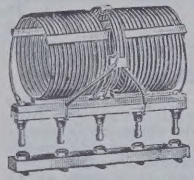
BUD ADJUSTABLE LINK TRANSMITTER COILS



Listed are two types of Coils. CL type of coil has an adjustable CENTER link. ES type of coil has an adjustable END link. The CL and ES can be used where fixed links are specified. No additional cost is involved and more efficient coupling is assured because of this special adjustable link, an *exclusive* BUD *feature*.

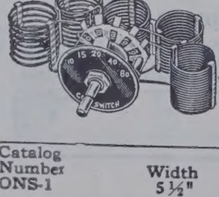
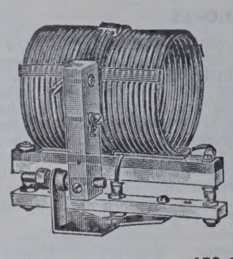
BUD 50 WATT BAND SWITCH ASSEMBLY



ONS-1 — 50 watt, 10–15–20–40–80 meter band switch assembly, ideal for all low-power oscillators, buffer or amplifier stages where the input power does not exceed 50 watts and where capacity coupling is used. A 5-position dial plate with suitable marking is furnished.

Catalog Number	Width	Height	Depth	Dealer Cost
ONS-1	5½"	2½"	3"	$5.40

BUD VARIABLE LINK TRANSMITTER COILS



The most effective method of varying the loading of an R. F. Stage is by the use of a variable link to the plate tank, a feature incorporated in all Bud Variable Link Coils. The link winding is connected to the jack bar into which the coils are plugged, and this link may be used with any of the coils regardless of the band being worked. The link winding is so arranged that it may be readily controlled from the panel by means of an extension shaft if required.

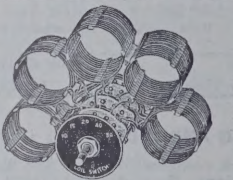
BUD 100 WATT BAND SWITCH ASSEMBLY



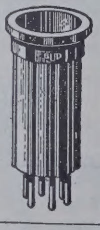
Made in two types, XCS-1 and XES-2. Each unit covers the 10–15–20–40 and 80 meter bands. XCS-1 is designed for use in push-pull plate or grid circuits or where plate neutralization is used. The coils in this assembly are center-tapped and center-linked. A dual section 200 mmfd. condenser is required to tune all bands. The JC-1569 condenser is especially recommended for circuit applications in order to obtain the highest possible efficiency on the high frequency bands.

XES-2 is designed for use in single-ended plate or grid circuits. The coils in this assembly are end-linked. A 100 mmfd. condenser such as Bud JC-1534 is required to tune all bands.

Catalog Number	Width	Height	Depth	Ship. Weight	Dealer Cost
XCS-1	8"	4¼"	5"	3 lbs.	$10.00
XES-2	8"	4¼"	5"	3 lbs.	9.00

* Denotes tube plus circuit plus tank plus output coupling capacity required to resonate coil at low frequency end of band.

PLUG-IN COIL FORMS



Three sizes are available in these Plug-in Coil Forms to suit all requirements. The material used is a special bakelite having a very low loss factor. Eight ribs are molded on the walls of each form to hold the winding away from the form itself and give the coil higher efficiency. Each form has a molded flange at the top to aid in removing the coil from its socket, and the pins fit standard tube sockets.

BUD "VISE-GRIP" TEST PRODS
(Pat. applied for)

No longer is it necessary to use a soldering iron or screw-driver to replace a broken or worn lead on a test prod or plug. To install a wire in this unique, patented prod, merely insert end of wire in hole, screw down handle to finger tightness and a positive contact is assured. By far the fastest, most efficient way of doing this job.

BUD VISE-GRIP TEST PRODS WITH 1" PLASTIC HANDLE

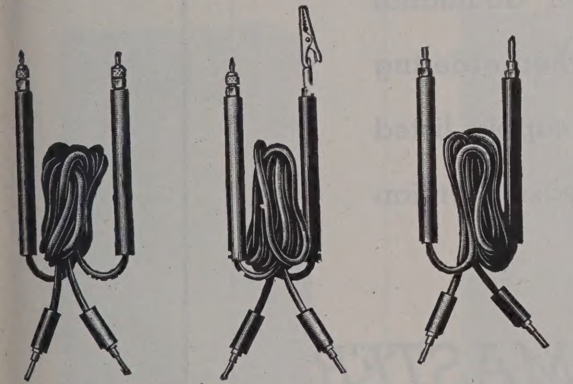
BUD SUPER TEST LEADS

All BUD Super Test Leads use BUD "Vise-Grip" Prods that screw nto the highly polished 4" or 1" plastic handles on each end of the eads. The finest, flexible, kinkless, rubber covered wire obtain-ible is used on all BUD Test Leads.

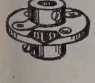


No. TL-178 is supplied with 4" handles at one end of the wires with removable needle points and on other end 1" handle with phone tips.
Cat. No. TL-178......................Dealer Cost $1.10

No. TL-179—4" handles, one with removable needle point and the other with phone tip and removable alligator clip. 1" handles with phone tips.
Cat. No. TL-179.....................Dealer Cost $1.25

No. TL-180 have 4" plastic handles with phone tips on one end. Other end, 1" handles with phone tips as illustrated above.
Cat. No. TL-180......................Dealer Cost $1.00

BUD INSULATED FLEXIBLE COUPLINGS



Tandem operation of two or more units is readily accomplished through the use of these couplers. Direct shaft alignment is not essential, and all couplers are made to fit 1/4" shafts.

Catalog No.	Diameter	Height	Insulation	Dealer Cost
FC-795	1 1/16"	11/16"	Ceramic	$ .39
FC-845	1 1/16"	5/8"	Bakelite	.30
FC-855	1 1/2"	11/16"	Bakelite	.35

BUD HIGH VOLTAGE FLEXIBLE COUPLINGS

A new type spring construction in these couplings permits a wide gap between shaft connections, freedom from back-lash, and unusual flexibility. The springs are attached to glazed Steatite discs 1 1/2" in diameter and 3/16" thick, and the overall diameter of the finished coupling is 1 15/16". Coupling accommodates standard 1/4" shaft. Springs are also attached to Bakelite discs 1 1/2" in diameter.

Catalog No.	Insulation	Dealer Cost
FC-614	Steatite	$ .54
FC-619	Bakelite	.39

BANANA PLUGS AND JACKS

Dealer Cost $ .09

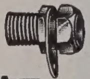
GIANT BANANA PLUGS AND JACKS FOR HEAVY DUTY APPLICATIONS

Giant banana jack, complete with nut and solder lug. For mounting, drill 3/8" hole.
Cat. No. PJ-963
Dealer Cost $ .15

Giant plug, tapped 10–32. Positive spring action assures firm contact.
Cat. No. PL-962
Dealer Cost $ .18

PJ-963



PL-962

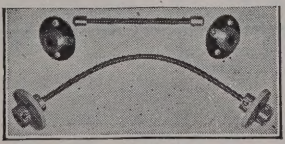
PJ-476A

PL-475A

Giant insulated banana plug jack, complete with insulated washers, solder lug and nut. To mount, drill 1/2" hole.
Cat. No. PJ-476A
Dealer Cost $ .24

High voltage insulated banana plug. Over all length 2 7/8". Excellent for heavy duty applications.
Cat. No. PL-475A
Dealer Cost $ .30

BUD FLEXIBLE SHAFTS AND COUPLERS



When construction necessitates the mounting of condensers or potentiometers away from the panel and at unusual angles, these Flexible Shafts simplify panel control problems. Both lengths are remarkably free from back-lash and will turn at any angle up to 90°.

Nos. FS-859 and FS-860 have 1/4" bushings sweated to each end to fit either plain or insulated couplings. Nos. FS-862 and FS-863 have Steatite insulated couplings attached to each end to fit 1/4" shafts.

Catalog Number	Overall Length	Dealer Cost
FS-859	3 1/4"	$ .33
FS-860	6 1/4"	.42
FS-862	4 1/4"	1.00
FS-863	7 1/4"	1.15

PAR-METAL RACKS · CHASSIS · CABINETS *for* ELECTRONIC APPARATUS

TYPE "C" CABINET RACKS—for 19″ Rack Panels

These are professional type racks that have been used on many commercial installations, and make a DeLuxe job of any amateur or broadcast transmitter. The racks are of all-steel construction, welded into an integral unit, to give a lifetime of service.

All panel mounting screws are concealed by means of a full length corner trim on each side at the front. In keeping with modern design, this front trim is rounded on the vertical corners. The rear corners are finished with regular angle trim. The front of the rack is trimmed with chrome moulding top and bottom. The door has a grille at top and bottom, and is hung on sturdy loose-joint hinges; it is held closed by two flush snap-action catches. Additional ventilation is provided by louvres at the sides. The panel mounting angle irons are 3/16″ thick, with mounting holes accurately drilled and tapped 12/24 thread on multiple 1¼″—½″ spacings. The rack is made from 1/16″ thick cold rolled steel, rigidly braced and reinforced throughout; the bottom is $\frac{7}{64}$″ thick steel. A rectangular opening is provided in the bottom for conduits, leads, etc. A duplex receptacle and outlet box are provided in the back under the door.

FINISHES: Either black ripple or slate grey ripple enamel. Corner trims are supplied in dull black, slate grey smooth enamel, or aluminum grey lacquer at extra cost.

RACKS WITHOUT LOUVRES: To permit racks to be set up in gangs or rows of two or more, the louvres at sides are omitted. Racks may be joined by a flat trim fastened to front of adjacent racks, overlapping both racks. Shipped with corner trim as illustrated; where specified, front joining trim will be substituted in place of corner trim at same price. Front joining Trims cannot be used on racks with front doors.

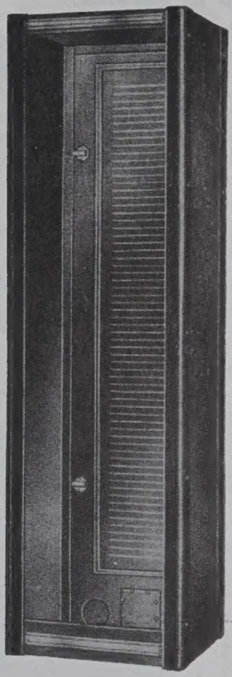
TYPE "C" TRANSMITTER RACKS

STANDARD TYPE—for 19″ & 30″ Rack Panels



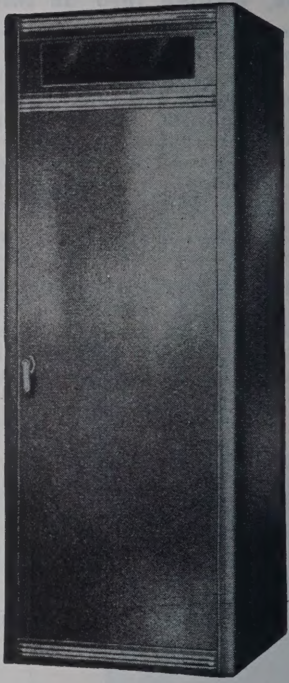
Similar to standard type "C" racks listed on page J-85 except that they have been reinforced at rear corners for use with heavier apparatus. At the rear, knockouts are provided for conduit and 4″ square duct, as well as a double convenience outlet with receptacle. Knockouts are also supplied at sides for conduit, suitable for entry of cables when units are ganged. The rear door, which is removable, has ample louvres for ventilation, and is covered on the inside with mesh screening. Front trim rounded on vertical corners. Racks are regularly supplied with corner trim for use as a single unit, but will be furnished with suitable front connecting strips for ganging in rows of two or more without additional charge.

FINISH: Black ripple enamel with dull black corner trim is standard. Slate grey ripple enamel furnished without additional charge, if so specified. For aluminum grey lacquer finish, add 10% to prices.

PANELS: Type "C" panels to fit the G-2218 and G-2219 racks are listed on page J-89. For cost of 30″ blank panels to fit the G-3024 rack, add 100% to prices of 19″ panels on page J-89.

Catalog No	Overall Size	Panel Space	Clear Depth	Ship. Wt. Lbs.	Net Price
G-2218	76⅛ x 22 x 18″	70 x 19″	16⅞″	270	$96.00
G-2219	83⅛ x 22 x 18″	77 x 19″	16⅞″	290	106.50
G-3024	76⅛ x 33 x 24″	70 x 30	22⅞″	450	159.00

DELUXE TYPE—for 24″ Rack Panels



This rack is undoubtedly the finest standard transmitte rack which we have ever made. It is constructed of 1/16″ sheet steel, with a base of ⅛″ steel, and is reinforced for use with heavy duty apparatus. The meter panel at the top is 7″ high, has a glass front, and is provided with a blank bakelite sub-panel. The inner sides of the rack are reinforced with ⅛″ steel channels, to which may be attached angle brackets to support the chassis. These channels may also be used as wiring ducts.

The rack will accommodate panels 24″ wide; the front panel mounting angles are recessed to allow 2″ clearance behind the front door for dials, knobs, etc. The front door is mounted on concealed hinges; the rear door has loose-joint hinges so that it may be removed. Both doors are equipped with handles, and the front door also has a lock. Blank panels 24″ wide can be supplied at prices listed on page J-89 plus 50%.

No. G-8024

Overall dimensions: 83⅛″ x 30½″ x 27″.
Available panel space: 70″ x 24″.
Clear inside width at front: 24″
Clear inside width at rear: 26½″.
Clear inside depth behind front panels: 23″.
Shipping weight: 540 lbs.
Net Price: **$225.00.**

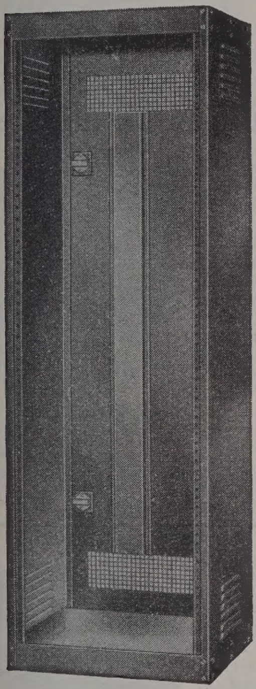
Black ripple enamel finish is optional.

PAR-METAL RACKS · CHASSIS · CABINETS *for* ELECTRONIC APPARATUS

TYPE "A" ENCLOSED RELAY RACKS FOR 19" RACK PANELS

All of the racks on this page are shipped "knocked-down" for easy assembly with all necessary bolts supplied. Made for standard 19" wide panels, they are substantially constructed from 1/16" cold rolled steel; panel mounting angles are of $\frac{7}{64}$" steel, accurately drilled on universal centers for either "Amateur" or type "C" panels, tapped for 10/32 machine screws. Panels fit into a recess, so that edges are not exposed. Louvres in sides and screen sections in rear door provide ample ventilation. Rear door is hung on sturdy loose-joint hinges, and closed by a flush snap catch. Ample panel mounting screws and washers supplied with each rack.

STANDARD TYPE



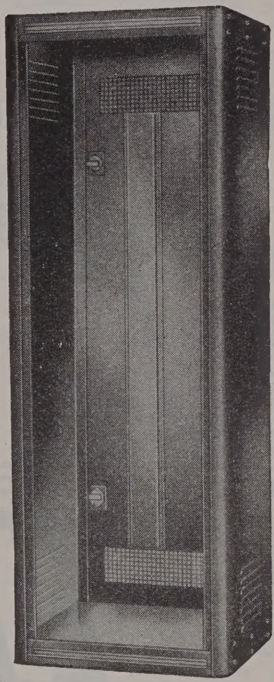
This completely enclosed rack will give your job the "professional appearance" so desirable on transmitters, test equipment, public address systems, etc. It is made in three heights in accordance with specifications below:

*BLACK RIPPLE ENAMEL

Cat. No.	Overall Size	Panel Space	Shpg. Wt. lbs.	Net Price
ER203	42 x21x16½"	36¾"	85	$24.00
ER205	66½x21x16½"	61¼"	120	36.00
ER207	82¼x21x16½"	77"	145	44.10

*Slate grey ripple is optional

ROUNDED CORNER TYPE



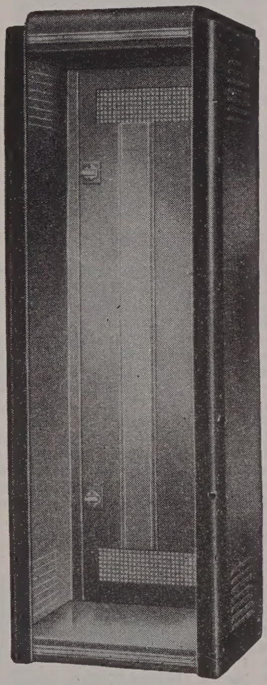
The ideal streamlined rack for your next transmitter or P.A. system. The vertical corners at the front of the rack are rounded, and the top and bottom are nicely trimmed with red striped chrome finished mouldings. The uniform slate grey ripple finish gives the assembly a superb exterior appearance. Combines modern styling and an attractive price.

*SLATE GREY RIPPLE ENAMEL

Cat. No.	Overall Size	Panel Space	Shpg. Wt. lbs.	Net Price
ER213	42 x22x16½"	36¼"	85	$28.50
ER215	66½x22x16½"	61¼"	125	42.30
ER217	82¼x22x16½"	77"	150	50.40

*Black ripple is optional.

DELUXE TYPE



Produced in the new "streamlined" style, this rack is fully in keeping with modern design. The removable vertical corner mouldings are rounded and cover the panel mounting screws, the same as is used on our Type "C" commercial racks. The top, which has also been "streamlined," is perforated at the back to provide additional ventilation. The top and bottom are trimmed with red striped chrome finished mouldings.

*SLATE GREY RIPPLE ENAMEL

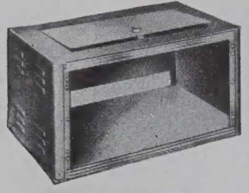
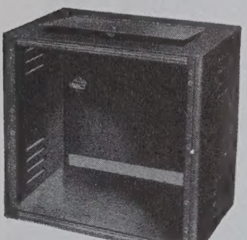
PAR-METAL RACKS · CHASSIS · CABINETS *for* ELECTRONIC APPARATUS

DELUXE TYPE "A" DESK PANEL CABINET RACKS

For Standard 19" Rack Panels
Black Ripple Finish





Streamlined styling. In keeping with our other Deluxe racks, the vertical front corners are rounded and the top and bottom are trimmed with chrome finished mouldings. Panels fit into a recess, so that the edges are not exposed. Panel mounting holes accurately drilled on universal centers, for either "Amateur" or type "C" panels; holes are tapped for 10/32 machine screws. May be used with any chassis up to 13" x 17" in size. All cabinets constructed of $\frac{1}{16}$" thick sheet steel. Louvres provide ample ventilation through sides and back. Piano type hinges are used on the top doors, which are provided with snap catches. Panel mounting screws and washers are furnished. Black ripple enamel is standard. Slate grey is optional at same price.

BLANK STEEL CHASSIS BASES

STANDARD TYPE

Construction is the same as our heavy-duty chassis. Stamped from one piece of cold rolled steel, and have four solid sides with welded corners. Bottom edges are flanged in on four sides to provide additional reinforcement, and they are drilled for bottom plates. The chassis are made from #20 gauge steel, except those marked (*) which are stamped from 1/16″ steel exactly like our heavy-duty type.

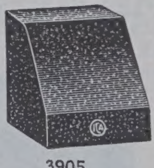
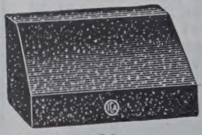
ICA SLOPING PANEL CABINETS

Small—Compact



3905

New streamlined cabinets, rugged, small and compact, have various uses such as speaker cabinets, oscillator cases, input stages, small receivers, teletalk systems, monitors, etc.

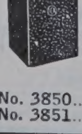


3906

Beautifully designed, with rounded corners and finished in marine gray ripple.

No.	W.	H.	D.	List
3905	4$\frac{3}{16}$″	x 4½″	x 4¼″	$2.15
3906	7½″	x 4½″	x 4¼″	3.85

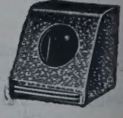
ICA PORTABLE STEEL CABINETS



Ideal for housing oscillators, transceivers, test equipment, etc. Both front and back panels are removable and are held with self-tapping screws which are supplied. Equipped with leather handle. Finished in black ripple.

No. 3850....Size 12″ x 7¾″ x 7″....List $4.25
No. 3851....Size 15″ x 7¾″ x 7″....List 4.95

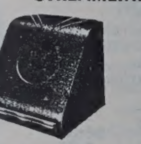
ICA DE LUXE METER CASES



Finished in Marine Gray Ripple Enamel with rounded tops and trimmed with beautiful Chrome band. Available for 2″ or 3″ meters.

No.	D.	W.	H.	Meter Hole	List
3995	4¼″	x 4$\frac{3}{16}$″	x 4½″	2$\frac{3}{16}$″	$2.25
3996	4¼″	x 4$\frac{3}{16}$″	x 4½″	2$\frac{13}{16}$″	2.25

STREAMLINED METER CASES



Modern streamlined cases, with raised "futura" design on top of cabinet. Finished in Marine Gray Ripple Enamel and trimmed with chrome band.

No.	D.	W.	H.	Meter Hole	List
3997	4¼″	x 4$\frac{3}{16}$″	x 4½″	2$\frac{3}{16}$″	$3.00

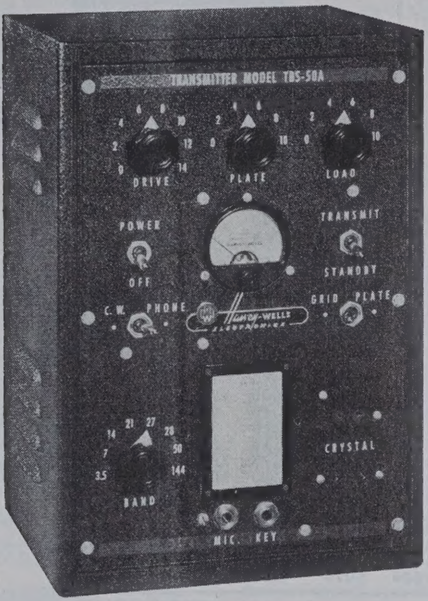
Harvey-WELLS ELECTRONICS, INC.
SOUTHBRIDGE, MASS.



TBS-50 TRANSMITTER

America's Most Versatile Small Transmitter

50 WATTS — 8 BANDS — PHONE OR CW
NO PLUG-IN COILS
80, 40, 20, 15, 11, 10, 6 and 2 METERS

(Completely wired and tested—not a kit)

Everything about the TBS-50 was designed to please any operator of this 50 Watter. Crystal controlled on all bands, yet requires no oscillator or multiplier tuning. Eight bands from 80 to 2 meters with band switch and no plug-in coils. Compact, the TBS-50 serves equally well for fixed station or mobile operation. Will operate from AC power packs up to 450 volts at 275. ma. or dynamotor supply for portable mobile operation. As an exciter unit, R.F. output is capable of driving 1000 watt Class C amplifier. Separate winding on modulation transformer permits audio system to be used to drive 500 watt modulator. Employs Pi antenna matching network. Separate coaxial output terminal for 144-148 Mc. antenna. Power input to final is 50 watts with 450 volt power supply on Bands 1 through 7, 30 watts on Band 8. All circuits are sufficiently broad to tune completely over any band with adequate excitation for any frequency on the first six bands. Retuning may be necessary to cover the entire 6 and 2 meter bands. No tuning adjustments are necessary except those necessary to resonate the final output to the antenna. TBS-50 may be mounted on rack panel with power supply.

CONTROLS: Band Switch, Excitation Control, Antenna Loading, Amplifier Tuning, Power On Switch, Carrier On Switch, Meter Switch, CW-Phone Switch. Antenna network will match non-reactive feeder of approximately 50-500 ohms. Microphone input designed to use inexpensive single button carbon type microphone. Frequency calibration chart on front panel as well as 0-10 ma. DC milliammeter.

TUBES: 6AQ5 Crystal Oscillator, 6AQ5 Buffer-Multiplier, 807 Final Amplifier, 2-6L6 Class B Modulators. In sturdy steel cabinet, 8" wide by 12" high by 8" deep.

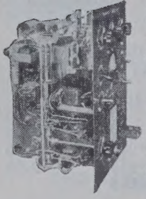
TBS-50 Complete with Tubes.............................. **$99.50**

TBS-50A WITH CRYSTAL-MICROPHONE AMPLIFIER

The TBS-50 amateur transmitter was originally designed to use a simple, inexpensive button carbon microphone. . . . There have been so many requests, however, for a crystal microphone model that we have developed a small three-tube preamplifier which is incorporated in the TBS-50A at time of manufacture. This preamplifier has sufficient gain so that any high impedance microphone having an output level of approximately —50 db can be used.

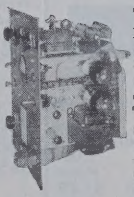
The first speech amplifier tube (6AU6) is pentode connected and feeds the second speech amplifier (6AU6) triode connected. This in turn drives a twin triode (12AU7) as phase inverter which drives the grids of the regular 6L6 modulators.

TBS-50A Complete with Tubes.............................. **$121.25**



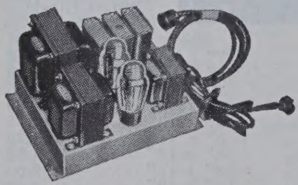
Left side view showing 807 final amplifier, band switch assembly and final tank coils.

Right side view showing 6AQ5 oscillator and multiplier tubes and 6L6G modulators.



POWER SUPPLIES

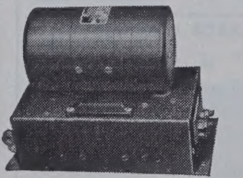
Developed specially for use with the TBS-50 and TBS-50A



APS-50

Delivers 425 volts at 275. ma. and 6.3 volts at 4 amps. With Hi-Lo switch. May be mounted on Rack Panel as shown at right.

APS-50—for 110 volt AC input..........$39.50



DPS-50

For portable operation. Delivers same voltages and current as APS-50.

DPS-50—for 6 volt operation 300 volts 275 ma...............$87.50

DPS-50—for 12 volt operation, same as APS-50............$54.30

RACK PANEL

TBS-1A

Size 12½" by 19" — Specially drilled for mounting TBS-50 or TBS-50A and Power Supply APS-50. In new black crackle finish.

$5.75

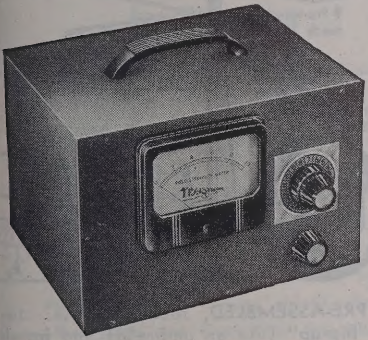
TRANSVISION

INSTRUMENTS
COMPONENTS

Eliminate the Variables in Television Installation with the TRANSVISION FIELD STRENGTH METER

Do not depend on pictures—
Use absolute measurements—
Direct Meter Readings!



Improves Installations!!

Saves ½ the Work!!

Has numerous features and advantages, including — (1) Measures actual picture signal strength . . . (2) Permits actual picture signal measurements without the use of a complete television set . . . (3) Antenna orientation can be done exactly . . . (4) Measures losses or gain of various antenna and lead-in combinations . . . (5) Useful for checking receiver re-radiation (local oscillator) . . . (6) **12 CHANNEL SELECTOR** . . . (7) Amplitudes of interfering signals can be checked . . . (8) Weights only 5 lbs. . . . (9) **Individually calibrated** . . . (10) Housed in attractive metal carrying case . . . (11) Initial cost of this unit is covered after only 3 or 4 installations . . . (12) Operates on 110V, 60 Cycles, AC.

Model FSM-1, complete with tubes . . . Net

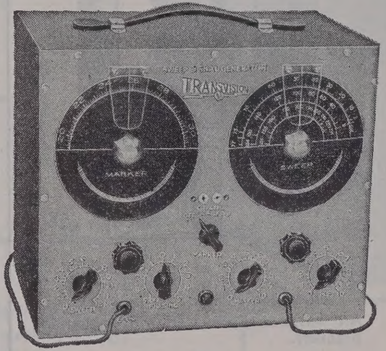
TRANSVISION "SERVICE NOTES"

The Key to Successful Television Servicing

Transvision's "Service Notes" is a compilation of confidential Television Notes and Information, the product of experience with over 20,000 television receivers, now made available to the public.

"Service Notes" is complete with photographs and diagrams. The information is worth a small fortune. The cost is low. Net

TRANSVISION TELEVISION and FM SWEEP SIGNAL GENERATOR

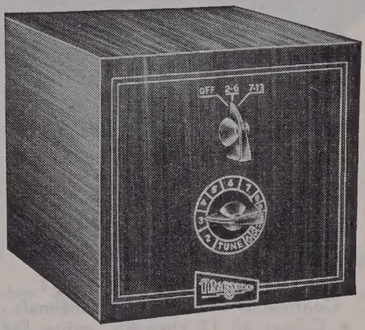


Complete frequency coverage from 0-227 MC with no band switching. . . . Sweep width from 0-12 MC completely variable. . . . Accurately calibrated built-in marker generator.

ADDITIONAL FEATURES: (1) Dial calibrated in frequency. . . . (2) Self-contained markers readable directly on the dial to .5% or better. (No external generator required to provide the marker signals.) . . . (3) Crystal controlled output makes possible any crystal controlled frequency from 5-230 MC. . . . (4) Plenty of voltage output—permits stage-by-stage alignment. . . . (5) Output impedance 5-125 ohms. . . . (6) Directly calibrated markers 20-30 MC for trap, sound and video IF alignment. . . . (7) RF for alignment of traps for IF channels when a DC volt meter is used as the indicating medium. . . . (8) Unmodulated RF signals to provide marker pips simultaneously with the main variable oscillator. . . . (9) Markers can be controlled as to output strength in the pip oscillator. . . . (10) Power supply completely shielded and filtered to prevent leakage. . . . (11) All active tubes are the new modern miniature type. . . . (12) Phasing control incorporated in the generator.

TRANSVISION ALL-CHANNEL TELEVISION BOOSTER

CONTINUOUS TUNING



To **assure television reception in weak signal areas,** or areas which are out of range of certain broadcasting stations, Transvision engineers have designed this new booster. It **increases signal strength on all television channels.** Tunes all television channels **continuously.** Can be used with any type of television receiver. Unusually high gain in upper television channels.

Model B-1......................................List

TRANSVISION Complete Line of TELEVISION COMPONENTS

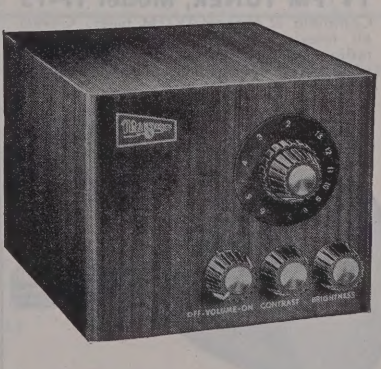
Essential units for building a quality television set . . . Transvision makes available a complete line of high quality parts competitively priced. Included in this line are **Filter Chokes,** all types of **Transformers, Focus Coils, Deflection Yokes, Coils**—and of course major units such as Picture Tubes, Antennas, Lenses, etc., etc.

WRITE FOR COMPONENTS FOLDER P-1

TRANSVISION'S NEW REMOTE CONTROL UNIT — for use with ANY TELEVISION SET

OPERATES *ANY* TELEVISION SET from a DISTANCE up to 50 feet.

Now you can sit back in your easy chair, a comfortable distance away, and operate your TV set. This new Transvision **REMOTE CONTROL UNIT** turns **ANY SET on, tunes in stations, controls contrast** and **brightness, turns** set off. Especially ideal for commercial installations where the TV set is inaccessible.



TUNER UNIT is a high gain, all-channel, **CONTINUOUS TUNING UNIT** (about 50 microvolt sensitivity).

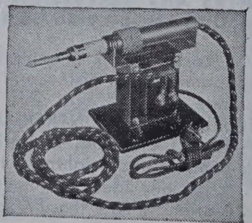
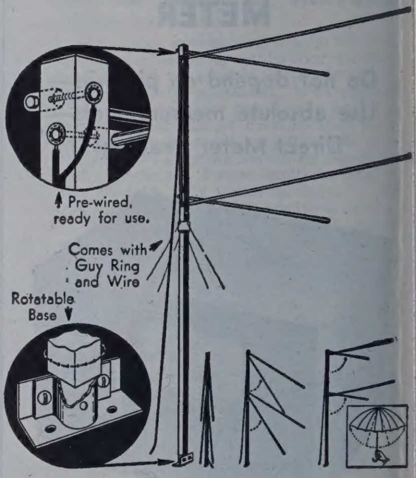
TRANSVISION "SOLDETRON"



FEATHERWEIGHT SOLDERING IRON
3 Ounces—Does Job of 200 Watt Iron—Interchangeable Tips; No Cleaning or Filing; Easy to Use for Every Type of Soldering.

"*Flip-Up*" TV ANTENNA

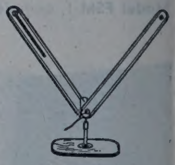


- **PRE-ASSEMBLED,** ready for use. Just "flip-up" (like an umbrella) and **install.**
- **PRE-WIRED**—just connect your lead-in to the two terminals.
- **RECEIVES ALL CHANNELS.**
- **ALL-DIRECTIONAL;** can be oriented for the weakest station in an area with assurance that all other channels will be brought in equally well.
- **EXTREMELY SENSITIVE. Unusual high gain on upper channels.** Ideal for fringe areas.

Completely assembled with rotatable base, 7-ft. mast, guy ring and guy wire.

Additional 7-ft. masts, to build antenna up to 19 ft., at small extra cost.

INDOOR TV ANTENNA



"TELEBIRD"

For Ideal Reception on All Channels - - All-directional Transvision's sensational new "Telebird" is the ideal indoor antenna. Excellent reception on all channels. Eliminates "ghosts". Install it in a jiffy; place it on window sill or anywhere in the room. Will out-perform many outdoor antennas. When not in use, just fold it up and put it away.

VISION FILTER

For 7", 10" or 12" sets. For 10BL or 15" sets.

MAGIC EYE KIT

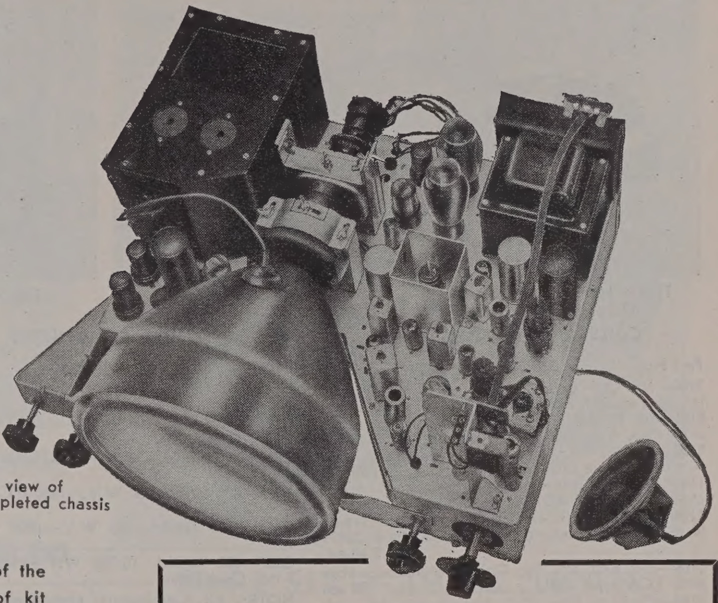
Magic eye kit—for 12/15" deluxe kits only. Includes eye, assembly, escutcheon, instructions.

All Prices on Application

Philmore *Pre-Aligned* TELEVISION KIT

TUNER, VIDEO and SOUND CHANNELS are completely wired and PRE-ALIGNED by Philmore

All components are mounted by Philmore



Top view of completed chassis

Experience has convinced us that pre-alignment of the vital channels is the only satisfactory method of kit assembly. That is why the Tuner, Video and Sound channels are completely wired and fully aligned in our laboratory. We also assemble to the chassis transformers, electrolytic condensers, tubes, high voltage shields, voltage divider shield, chokes. Sockets and other parts are riveted to the chassis which insures good contacts and eliminates any possibility of loose connections.

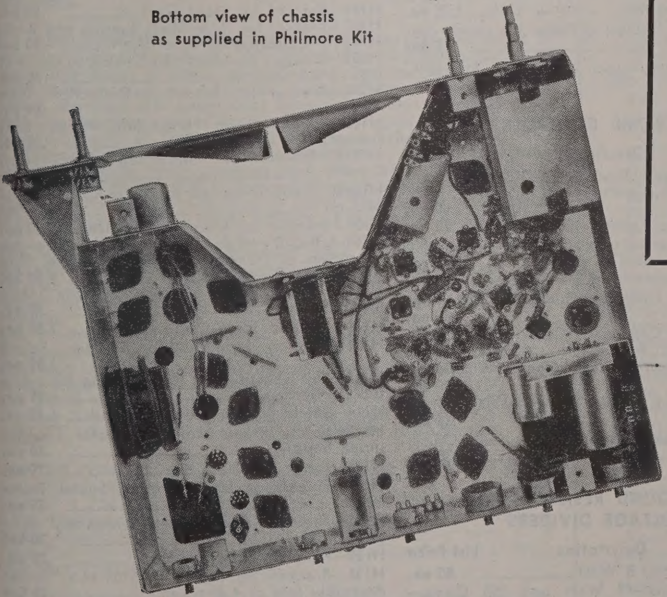
Similar to famous RCA 630TS and 830TS Circuits

Designed for 10″ 12″ 15″ 16″ PICTURE TUBES

SIMPLIFIED STEP-BY-STEP INSTRUCTIONS 36 page manual of instructions on assembly and operation generously illustrated. Six full scale lithographed schematic and pictorial diagrams. All small parts packaged in individual envelopes, clearly numbered and identified on blueprints.

When balance of simple wiring is completed, no further alignments are necessary.

Bottom view of chassis as supplied in Philmore Kit



Features:

- New, WIDER-SCREEN television for BIGGER pictures on all size tubes.
- 30 RCA tubes (inc. rect. and video).
- New, improved daylight viewing.
- Increased voltage power pack.
- Long range reception.
- Complete *ALL*-channel tuning.
- PM Speaker with choke (better tone and volume—no hum).
- Special mounting bracket for 16″ tube available.
- Ideal for custom-built installations.

(Philmore TV receivers also available completely wired and assembled.)

MFD. BY PHILMORE MANUFACTURING COMPANY, INC.

Model 511 — AM-FM RADIO CHASSIS

A Low-Priced Replacement Chassis.
Fits All Types of Console Cabinets.

DEALER - SERVICEMAN.........Net $98.00

I. **Model 511** is a Superheterodyne AM-FM Radio Receiver chassis designed to operate on: 105/125 volts AC; 50/60 cycles. Power consumption: 85 watts.

II. **FEATURES:** 1. AC Superheterodyne AM-FM receiver. — 2. Improved Frequency Modulation Circuit. **Drift Compensated.** — 3. 12 Tubes plus Rectifier and Tuning Indicator. — 4. 3 Dual Purpose Tubes give added performance. — 5. Treble Tone Control. — 6. 6-Gang Tuning Condenser. — 7. Full-range Bass Tone Control. — 8. High-Fidelity AM-FM Reception. — 9. Automatic Volume Control. — 10. 13-watt (maximum) Push-Pull Audio Output. — 11. 12-inch PM Speaker with Alnico V Magnet, 25 watts. 12. — Indirectly Illuminated "Slide-Rule" Dial. — 13. Antenna for AM and Folded Dipole Antenna for FM reception. — 14. Provisions for external antennas. — 15. Wired for Phonograph Operations. — 16. Licensed under RCA patents. — 17. RMA listed. — 18. Multi-tap Output Transformer, 3.2, 8 and 500 ohms.

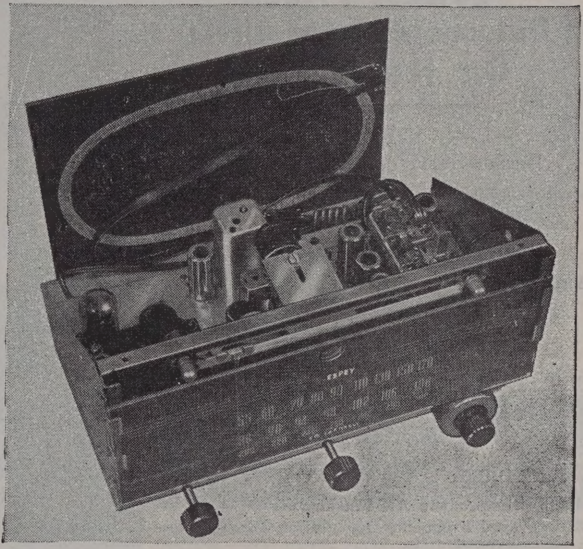
III. **DESCRIPTION:** Model 511 receiver features the latest in postwar engineering design. The FM circuit includes a tuned RF Amplifier stage, 2 stages of high gain Intermediate Frequency Amplification and an advanced design Ratio Detector circuit which provides low noise level between stations, freedom from AM interference, ease of tuning and ample gain for satisfactory operation with an indoor antenna in most urban locations. The AM circuit includes a Tuned RF Amplifier for improved selectivity and freedom from spurious responses. High Fidelity reproduction on FM and AM is insured through well-engineered circuits and the use of high quality parts. The tuning ranges are: Standard Broadcast — 535 to 1720 Kc. FM Band — 88 to 108 Mc.

The large easy-to-read "slide-rule" type dial is illuminated by two pilot lights which also provide illumination for the red plastic dial pointer. A high ratio flywheel drive on the tuning condenser provides smooth tuning throughout the range of the receiver.
The receiver has two antennas; a Loop antenna for Standard Broadcast and a Folded Dipole antenna for the FM band.
Provision is made for connecting an external Phonograph Pickup to the high-fidelity audio amplifier system of the receiver.
The **Multi**-tap output transformer will permit the use of Most Popul**ar** Type Hi-Fidelity Speakers and dividing networks, or to match a standard 500-ohm line for Remote installations.

IV. **TUBE COMPLEMENT:** 1 AM-RF Amplifier tube. — 1 FM-RF Amplifier tube. —1 AM Oscillator, Mixer tube. — 1 IF Amplifier tube. — 1 FM Detector Driver tube. — 1 FM Detector tube. — 1 FM Oscillator tube. — 1 FM Mixer tube. — 1 AM Detector, Audio Amplifier tube. — 1 Audio Amplifier-Inverter tube. — 2 Push-Pull Power Amplifier tubes. — 1 Rectifier tube. — 1 Electron Ray Tuning Indicator tube.

V. **ACCESSORIES:** The Model 511 chassis is supplied ready to operate, complete with tubes, antennas, speaker and all necessary hardware for mounting in a table cabinet or console, including escutcheon.

VI. **CHASSIS DIMENSIONS AND WEIGHT:** Chassis Dimensions: 13½" wide x 8½" high x 10" deep. Carton Dimensions: (2 units) 20" x 14¼" x 10¾". Net Weight: 16½ lbs. each.



Model 512 — AM-FM TUNER

Outstanding AM-FM TUNER, self-powered for use with all types of Audio Amplifiers.

DEALER - SERVICEMAN.........Net $82.15

I. **Model 512** Superheterodyne AM-FM Radio Tuner chassis is designed to operate on: 105/125 volts AC; 50/60 cycles. Power Consumption: 66 watts.

II. **FEATURES:** 1. AC Superheterodyne AM-FM tuning circuit. — 2. Improved Frequency Modulation Circuit, **drift compensated.** — 3. 9 Tubes plus Rectifier and Tuning Indicator. — 4. 3 Dual Purpose Tubes give added performance. — 5. Automatic Volume Control. — 6. 6-Gang Tuning Condenser. — 7. High-Fidelity AM-FM Reception. — 8. Indirectly Illuminated "Slide-Rule" Dial. — 9. Antenna for AM and Folded Dipole Antenna for FM Reception. — 10. Provisions for external antennas. — 11. Wired for Phonograph Operations. — 12. Licensed under RCA patents. — 13. RMA listed. — 14. High and Low Level Audio Output. — 15. Utility Socket provides power for magnetic reluctance pickup pre-amplifier.

III. **DESCRIPTION: Model 512 Tuner** features the latest in postwar engineering design. The FM circuit includes the tuned RF Amplifier stage, 2 stages of high-gain Intermediate Frequency Amplification, and an advanced design Ratio Detector circuit which provides low noise level between stations, freedom from AM interference, ease of tuning and ample gain for satisfactory operation with an indoor antenna. The AM circuit includes a Tuned RF Amplifier for improved selectivity and freedom from spurious responses. High-Fidelity reproduction on FM and AM is insured through well-engineered circuits and high-quality parts.
Line Voltage is made available at two outlets at the rear of the tuner; these are actuated by the tuner on-off switch To facilitate custom installations, B+ and Heater Voltages are made available at a utility socket mounted in the tuner. This is suitable for powering auxiliary pre-amplifiers as used with variable reluctance type pickups. Holes for 2 additional controls are available for the convenience of the user. The tuning ranges are: Standard Broadcast — 535 to 1720 Kc. FM Band — 88 to 108 Mc.
The receiver has two antennas: a Loop antenna for Standard Broadcast and a Folded Dipole antenna for the FM Band.
Provision is made for connecting an external phonograph pick-up to the tuner audio system, for use with all types of amplifier installations. Two audio output channels are provided, one at high level, the other at low level; both are controlled by the tuner volume control.

IV. **TUBE COMPLEMENT:** 1 AM-RF Amplifier tube. — 1 FM-RF Amplifier tube. — 1 AM Oscillator, Mixer tube. — 1 FM Detector Driver tube. — 1 IF Amplifier tube. — 1 FM Detector tube. — 1 FM Oscillator tube. — 1 FM Mixer tube. — 1 AM Detector, Audio Amplifier tube. — 1 Electron Ray Tuning Indicator tube. — 1 Rectifier tube.

V. **ACCESSORIES:** Model 512 chassis is supplied ready to operate, complete with tubes, antennas, and all necessary hardware for mounting in a table cabinet or console, including escutcheon.

VI. **CHASSIS DIMENSIONS AND WEIGHT:** Chassis Dimensions: 13½" wide x 8½" high x 9" deep. Carton Dimensions: (2 units) 20" x 14¼" x 10¾". Net Weight: 14 lbs.

Model 513

I. FEATURES:

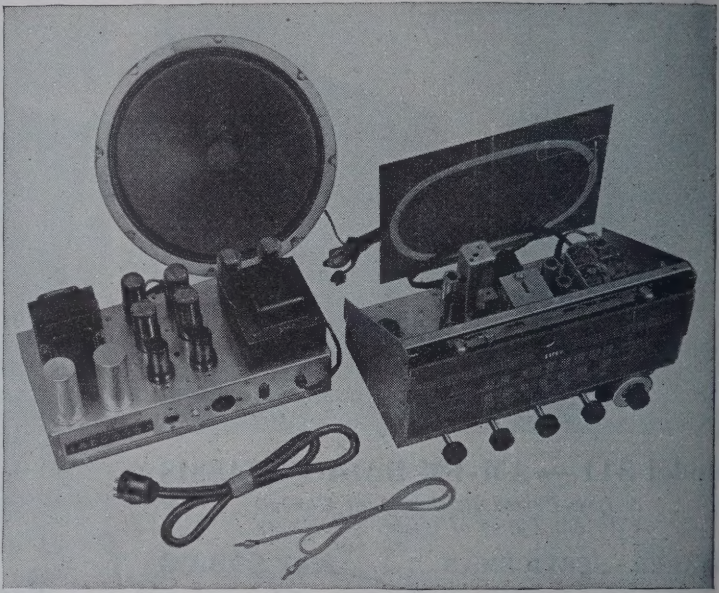
1. Superheterodyne AM-FM circuit.
2. Improved Frequency Modulation Circuit, stabilized against drift.
3. 10 Tubes plus Tuning Indicator.
4. Tuned RF Circuits on AM and FM.
5. 6-Gang Variable Tuning Condenser.
6. Automatic Volume Control.
7. Full Range Bass Boost Control.
8. Full Range Treble Control.
9. Indirectly Illuminated "Slide-Rule" Dial.
10. Fly Wheel Tuning Drive.
11. Antenna for AM and Folded Dipole Antenna for FM.
12. Provision for external antennas.
13. Wired for Phonograph Operation.
14. Utility Socket provides power for magnetic reluctance pickup pre-amplifier.
15. Licensed under RCA.
16. RMA listed.

II. Model 513 AM-FM Tuner employs 10 tubes plus a tuning indicator tube in a superheterodyne circuit. It is designed to operate from an external power supply and feed into an external audio amplifier. (Model 514 DeLuxe Power Supply-Audio Amplifier is specifically designed to work in conjunction with the Model 513 Tuner.) The power requirements for the tuner are 6.3 volts AC or DC at 3.5 amperes, and 200 volts DC at 60 milliamperes.

III. DESCRIPTION: The Model 513 Tuner incorporates the latest developments in engineering design. It is intended for the discriminating listener. Separate, Tuned RF stages are employed on both the AM and FM bands to provide extreme sensitivity and minimize spurious responses. The FM circuit also includes two stages of high-gain intermediate frequency amplification to drive a ratio detector circuit of advanced design. AM: 535 Kc. to 1720 Kc. ——— FM: 88 Mc. to 108 Mc.

IV. TUBE COMPLEMENT: 1 6BA6 AM-RF Amplifier tube. — 1 6BA6 FM-RF Amplifier tube. — 1 6BE6 AM Converter tube. — 1 6BE6 FM Mixer tube. — 1 6C4 Oscillator tube. — 1 6SG7 AM-FM IF Amplifier tube. — 1 6SH7 FM-Ratio Detector Driver tube. — 1 6J5 AM-Detector AVC tube. — 1 6SQ7 AM-FM 1st Audio tube. — 1 6AL5 FM Ratio Detector tube. — 1 6U5 Tuning Detector tube.

V. CHASSIS DIMENSIONS: 13½″ wide x 8½″ high x 9″ deep. Weight: 9½ lbs.



Model 514 Amplifier & Power Supply. **Model 513 AM-FM Tuner.**

Model 514

I. Model 514 DeLuxe Power Supply and Audio Amplifier contains 6 tubes, plus 2 rectifiers in a high gain push-pull amplifier circuit. It is designed specifically for use in conjunction with the Model 513 Tuner, but may be used wherever a high quality audio amplifier may be required. Power requirements are: 105/125 volts AC; 50/60 cycles; power consumption: approximately 150 watts.

II. FEATURES:

1. Parallel Push-Pull Output Circuit.
2. Self-Balanced Phase Inverter System.
3. Extended Range High-Fidelity Response.
4. Inverse Feedback Circuit.
5. 6 Tubes plus 2 Rectifiers.
6. Output Impedance selective for any speaker requirement (4 to 500 ohms).
7. License under RCA.
8. RMA listed.

III. DESCRIPTION: The Model 514 Power Supply-Audio Amplifier employs the best in proven engineering design. Six tubes are incorporated in a balanced phase inverter parallel push-pull amplifier. By the use of an inverse feedback circuit, high-fidelity performance is obtained.

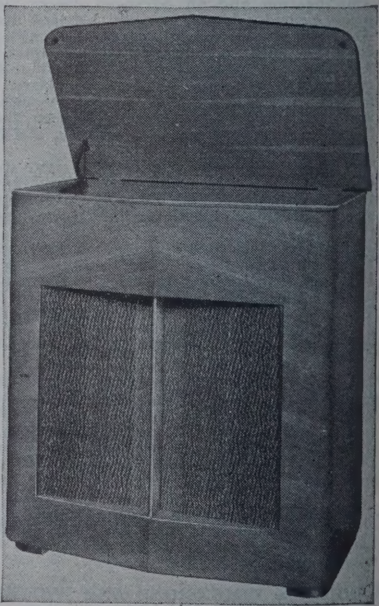
IV. TUBE COMPLEMENT: 2 6J5 Audio Driver tubes. — 4 6V6 Audio Output tubes. —2 5Y3 Rectifier tubes.

V. 13½″ wide x 7½″ high x 7″ deep. Weight 18 lbs.

Model 243 Console Cabinet

Dealer-Serviceman . . . *Net* $53.50

Modernistic, exquisitely finished limed walnut Console Cabinet. Furnished with panels to house ESPEY chassis and standard record changers.

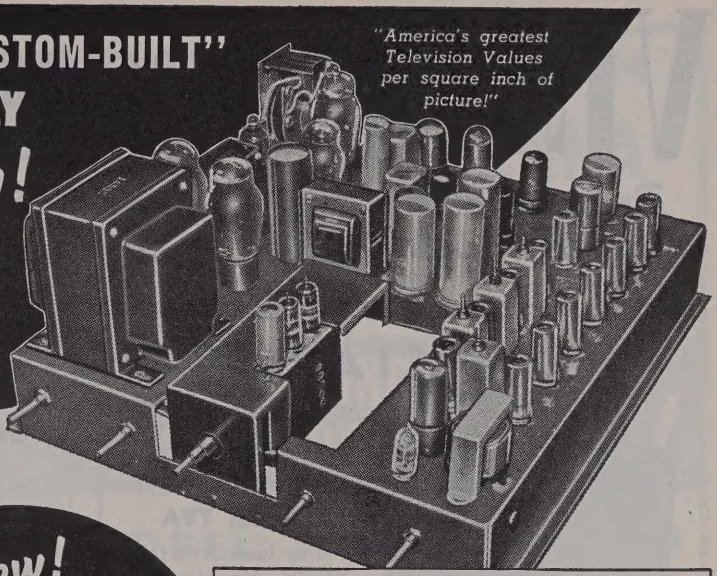


Model 243 — *Open*

Build the finest proven "CUSTOM-BUILT" TELEVISION ASSEMBLY

Faster! More Economically!

when you build with . . .



"America's greatest Television Values per square inch of picture!"

TELEVISION ASSEMBLY CO.

Exclusive T.A.C. "VIVIDeo" *feature!*

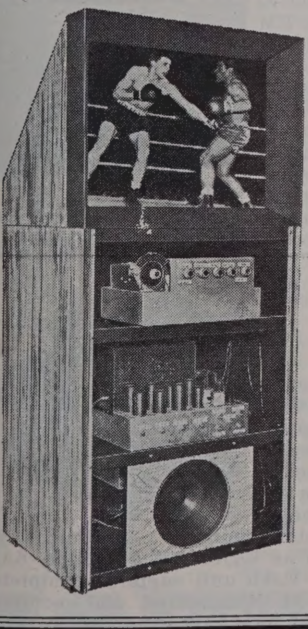
Prewired, pretuned and tubed I.F. sound and video strip (patents pending). An exclusive T. A. C. feature developed by our own research. All on one chassis.

New! Super-Simplified wiring and assembly INSTRUCTIONS!

—The most explicit, easiest-to-follow, most elaborately detailed instructions in television— that even the layman can follow.

CABINETS AND STANDS available with all direct view units. Write for literature.

MODEL P-520 . . . 520 SQ. IN. PICTURE PROJECTION TELEVISION ASSEMBLY



• Bausch & Lomb F: 1.9 Lens • Eastman Kodak Screen • DuMont Inputuner • 37 R.C.A. Tubes • Pre-Wired & Pre-Tuned Picture I.F. & Sound I.F. • Pre-Wired 30 K.V. Tripler Fly Back Power Supply • Automatic Gain Control • Aluminum Coated Top Mirror • Metal Rack • Specially Designed Hood and Picture Frame Supplied • 5TP4 Projection Tube • 12" R.C.A. High Fidelity Speaker • Two Low Voltage Power Supplies.

MODEL P-520
Dealer's net $769.50*

MODEL P-520W
Dealer's net $895.00*

The above unit completely wired and ready to install.

Front and rear panels optional at additional cost.

Champion Models 20" DIRECT-VIEW MODEL with DuMont Inputuner and 20" DuMont Tube

213 SQUARE INCH PICTURE! Prewired Voltage Doubler 14KV power supply, Pre-wired "VIVIDeo" I.F. picture and sound strip (Pat. Pending). ALL channels TV plus ALL FM radio. Continuous tuning. DuMont Inputuner is Prewired. Delivered complete with all components and 30 RCA tubes plus 20-inch DuMont C.R. tube.

MODEL F-201C Dealer's net $566.75*

"M" SERIES STANDARD and CHAMPION Direct-View Models for 10" CR TUBES

STANDARD MODEL

29 tubes, including 13-tube "VIVIDeo" I.F. picture and sound strip (Pat. Pending). This portion completely wired, tested and aligned. Prewired, standard tuner ready to use. Handles ALL channels.

MODEL M-101S Less C.R. Tube $169.50* Dealer's net

CHAMPION MODEL

Same as above except that DuMont Inputuner replaces Standard Tuner. Gets ALL channels TV —PLUS all channels of FM radio.

MODEL M-101C Less C.R. Tube $209.50* Dealer's net

Write for literature on our complete line of 10" 12"-15" standard and champion assemblies.

T.A.C. GUARANTEE

All components are of the finest quality and are fully guaranteed under the Standard RMA Guarantee. All TAC Assemblies are guaranteed to operate when assembled according to directions.

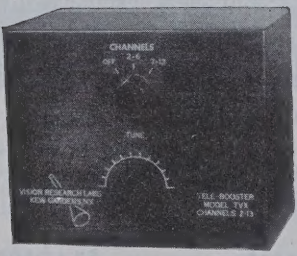
TELEVISION ANTENNA AMPLIFIER

Model TVA

For improved television reception in fringe areas and indoor antenna installations. Model TVA contains two type 6AK5 special high frequency tubes in a unique dual amplifier circuit. Antenna connects through automatically when booster is turned off thus providing normal reception. Supplied complete with tubes in attractive walnut or mahogany cabinet .... **$28.50 List***

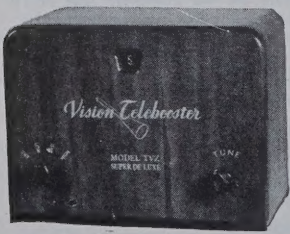


TELEVISION ANTENNA AMPLIFIER

Model TVX

Similar to Model TVA except for extra stage of amplification on the high frequency channels. Model TVX is popular for installations that require unusual gain in the high frequency TV channels (7-13). Complete with instructions.

$37.50 List*

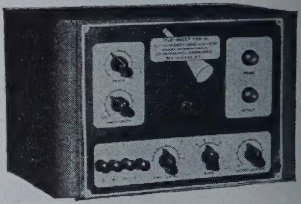


DE LUXE TELEVISION PREAMPLIFIER

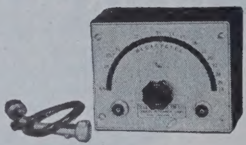
Model TVZ

A three stage gang tuned booster for special installations. Especially useful in extreme fringe areas where quiet noise conditions prevail. Model TVZ contains 3 type 6AK5 tubes in a special patent applied for inductance-capacity tuning system. Housed in walnut or mahogany cabinet with illuminated dial .... **$54.50 List***

SWEEP GENERATOR TSW-50



One of the first popularly priced broad band sweep generators on the market. The TSW-50 employs an electro mechanical type of sweep circuit providing for excellent linearity and wide sweep width. Frequency range from 4 to 220 mc, sweep width range 500 kc to 12 mc. Supplied complete with tubes and cables, housed in an attractive grey crackle cabinet with etched aluminum front plate .... **$68.50 Net**

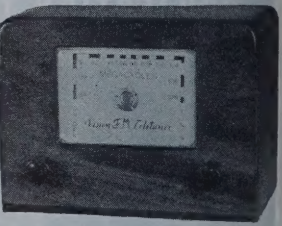


TELEMARKER Model TM-100

An absorption type marker unit for use in conjunction with the TSW-50 or similar sweep signal generators, as a frequency marker on the visual alignment trace.

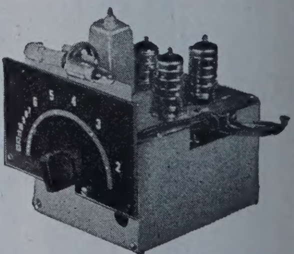
Model TM-100 is connected externally to the sweep generator output lead, covers a frequency range of from 9.5 to 28 mc. Each telemarker is individually calibrated, housed in an attractive grey crackle cabinet with etched aluminum dial and furnished complete with connecting cables .... **$12.50 Net**

FM TELETUNER



A novel converter unit that adds FM reception to your TV receiver. The FM Teletuner connects in series with the TV antenna providing FM reception when receiver is tuned to an unused TV channel (2 or 3). Antenna connects through when tuner is off so as not to effect normal TV reception. Will work on any TV set that does NOT use an intercarrier circuit .... **$29.95 List***

FRONT END TUNER Model TF 701



A unique and compact continuous type television front end tuner featuring a revolutionary method of inductance-capacity variation. Model TF-701 may be used whenever application requires a continuous type tuning system. Contains 6AK5 RF amplifier, 6AK5 mixer, 6C4 oscillator. Each unit supplied completely aligned with calibrated, illuminated dial, complete with technical data but less 6AG5 and 6AK5.

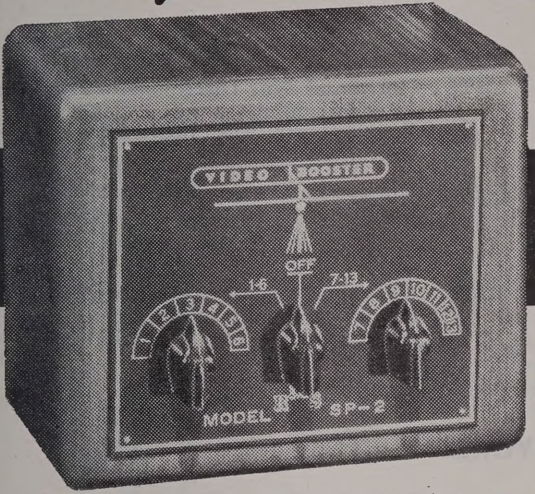
all agree: RMS VIDEO ANTENNA BOOSTER

gives

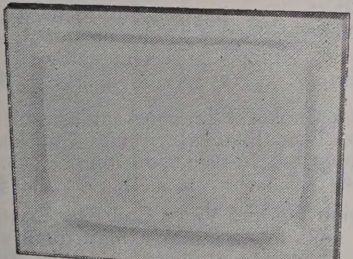
OUTSTANDING PERFORMANCE!



MODEL SP-2 $37⁵⁰ LIST
for ALL CHANNELS

- ★ Just plug in to work, it has a self contained power supply.
- ★ For most local installations any simple indoor aerial in conjunction with RMS VIDEO ANTENNA BOOSTER will give you Television Picture reception as clear as that obtainable with an outdoor antenna!
- ★ Boosts weak station to give you clear, easy to look at pictures.
- ★ Pulls in distant stations with a gain of SIX to TEN TIMES in signal strength!
- ★ Cuts down off-channel interference.

RMS TELEVISION ACCESSORIES

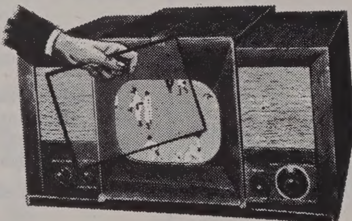


TRANSPARENT UNBREAKABLE PLASTIC MASKS

for Television Tubes

No.	For Picture Tubes	List Price Each
210	10"	$ 9.00
212	12"	9.85
213	12½"	9.85
215	15"	16.00
216	(for new 16" metal picture tube)	26.85
220	20"	35.60

Unbreakable plastic, one piece construction. Crystal clear for perfect vision, contour-designed to fit all types of television picture tubes.



GLAREPROOF TRANSPARENT FILTERS

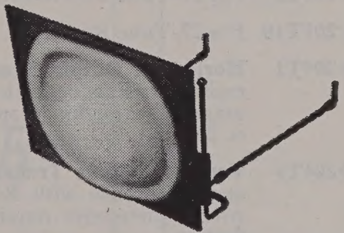
for Television Sets

no glare - no headache
no eyestrain

Can be mounted in any television cabinet, in front of the picture tube. It positively reduces glare and gives image much sharper, clearer definition.

Available in Blue or smoke transparency. Specify when ordering.

No.	For Picture Tubes	List Price Each
307	7"	$1.13
310	10"	1.38
312	12"	1.88
315	15"	3.14



TELEVISION IMAGE ENLARGER LENS

Universal Enlarger for 7" and 10" picture tubes. Can be mounted on table and console models.

- **Shallow Concave Surface—for minimum image distortion**
- **Extremely High Magnification of any television picture**

Sturdily mounted on adjustable brass tubing. Can be moved back and forth, up or down with greatest ease. Does not have to be attached to television receiver. No tools required to set up.

RADIO MERCHANDISE SALES, INC. NEW YORK, N. Y.

RCA ELECTRONIC COMPONENTS

TELEVISION PARTS

CONTROLS

#201R1	**Width Control.** Screwdriver-adjusted variable reactor. Powdered iron core. For use with RCA 211T1 where kinescope anode potential not over 9 KV	$0.70
#201R2	**Projection Width Control.** Features same as 201R1. For use with RCA 211T2 in circuits with kinescope anode potentials up to 27 KV design center	$2.20
#201R3	**Horizontal Linearity Control.** Features spring clip mounting. For deflection circuits using RCA 211T1 and 201D1	$0.80
#203R1	**Horizontal Oscillator and Synchronizing Control-Coil.** A permeability tuned center-tapped oscillator coil for use in Television receivers employing a 6SN7-GT as a combination horizontal blocking oscillator and synchronizing control tube	$1.80

TRANSFORMERS

#201T6	**Power Transformer.** For use in 30-tube TV receivers requiring rectified current of 295 ma. at voltage of approx. 385 volts	$26.00
#201T7	For 24-Tube Receivers	$21.00
#201T8	For 21-Tube Receivers	$19.00
#201T9	For 27-Tube Receivers	$21.00
#201T10	For 27-Tube Receivers	$21.00
#204T1	**Horizontal Output Transformer.** Moisture-resistant. For deflection circuits with 50° mag. deflection kinescopes using RCA 201D1 or 201D2	$20.00
#204T9	**Vertical Output Transformer.** Quiet operation. For use with RCA 201D1 or 201D2 where kinescopes require 50° magnetic deflection	$4.50
#204T3	**Horizontal Output Transformer.** Powdered iron core. For use where electro-magnetic deflection kinescopes with RCA 201D1 yokes are employed	$12.00
#208T1	**Horizontal Blocking-Oscillator Transformer.** Powdered iron core. For use where electromagnetic deflection kinescopes with RCA 201D1 yokes are employed	$3.90
#208T9	**Vertical Blocking-Oscillator Transformer.** Generates 60 cps pulses required to drive the grids of horizontal discharge tubes	$2.50
#208T3	**Horizontal Blocking-Oscillator Transformer.** Similar to 208T1 except that bracket mounting is used in place of potted can construction	$2.75
#208T8	**Horizontal Sync-Discriminator Transformer.** Provides automatic horiz sweep freq control. Couples horiz-sweep oscillator to horiz-sync discriminator	$2.30
#211T1	**Horizontal Output Transformer.** For use with RCA 201D1 and directly-viewed kinescopes requiring 50° magnetic deflection using typical circuits	$9.50
#211T2	**Horizontal Output Transformer.** Designed for use in recommended circuits employing projection kinescope RCA 5TP4. Powdered iron core	$19.00

YOKES

#201D3	**Deflection Yoke.** For use with directly-viewed kinescope requiring 50° magnetic deflection such as RCA 7DP4 and 10BP4	$14.90
#201D2	**Deflection Yoke.** For use with projection kinescopes requiring 50° magnetic deflection such as RCA 5TP4	$13.00

COILS

#202D1	**Focus Coils.** For magnetically focused kinescopes with deflection angles up to 50°, such as 10BP4. Utilizes large conductor size for long life	$7.50
#204L1	**Filament Choke.** Eliminates undesirable RF currents from filament circuit. Consists of self-supported 16-turn coil on ¼" inside diameter	$0.20
#204X1	**Television I-F and Video Coil Kit.** Contains all the coils for building a **high quality receiver.** 15 individual items	$19.50

MISCELLANEOUS

#201E1	**Television Tuner** incorporating RF amplifier, converter and heterodyne oscillator, with 13-channel station selector and fine tuning control. Includes 3 RCA 6J6 tubes	$64.00
#201X1	**Yoke Mounting Hood.** Holds deflection yoke RCA 201D1 on kinescopes such as RCA 7DP4, 10BP4	$1.30
#203D1	**Iron-Trap Magnet. (Coil Type).** Required for RCA 7BP4 and 10BP4. Eliminates ion spot on kinescope screen	$6.50

All prices in effect 5/15/49.

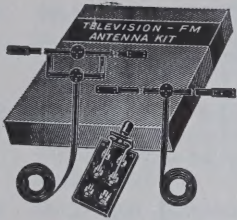
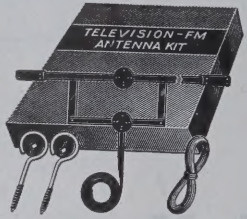
TELEVISION-FM ANTENNAS — ACCESSORIES



ALL-CHANNEL ANTENNA KIT

Designed for INDOOR use. Combination of low band and high band antennas of the flexible dipole type. Includes bakelite double pole double throw knife switch. Each antenna may be separately oriented for the maximum reception of either high or low band. Knife switch permits quick changing from antenna to antenna without disconnecting.

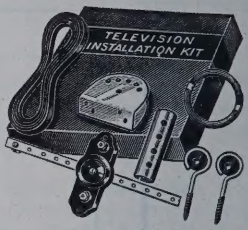
No. 6095..**List $6.95**



ALL-CHANNEL ANTENNA KIT

An outdoor television antenna kit of the flexible dipole type, featuring simplicity of installation. May be placed on roof or other convenient location. Yields effective reception of all television channels. Complete with generous 60 ft. 300 ohm twin lead; special weather-resistant nylon supporting strings; insulated screw eyes.

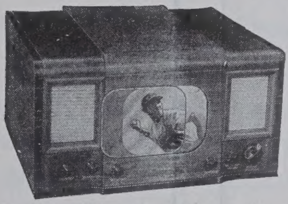
No. 6096..**List $5.95**



ANTENNA INSTALLATION KIT

A handy compact assortment of components to facilitate the installation of any type of outdoor antenna. Especially suitable for television antenna installations. Includes: 60 ft. 300 ohm twin lead—3 Universal Screw Eyes—for either twin lead or coaxial cable—Heavy gauge steel Antenna Base Mount—heavy gauge steel extension mast Coupler—100 ft. sturdy Guy Wire—Lightning Arrester with ground strap.

No. 6159..**List $6.95**



The New ICA TELEVISION FILTER

A sensational improvement that adds to the enjoyment of television reception. A scientifically compounded Filter . . . easy to install . . . suitable for every type of receiver.

The ICA Filter offers these outstanding television viewing features: Dissolves fuzzy grays . . . snaps up blacks . . . sharpens detail . . . restful tinting cuts down eyestrain . . . eliminates glare and room-light interference . . . reduces flickering and picture grain . . . unbreakable. Excellent for daylight reception.

No. 6176— 7″ tube size	List	$1.45
No. 6177—10″ tube size	List	1.95
No. 6178—12″ tube size	List	2.95
No. 6179—15″ tube size	List	3.95
No. 6180—20″ tube size	List	5.95

ICA TURNBUCKLES

Sturdy, steel turnbuckles that afford balanced tension of supporting wires. Especially suitable for antenna guy wires. Assure slack-free, rigid support.

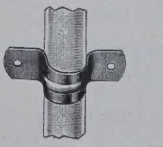
No. 6150—3″ (closed)	List $.25
No. 6151—5″ (closed)	List .35

ICA U-BOLTS

Offer a firm and rigid clamping action for affixing antenna or supporting masts to metal or wooden surfaces. Nuts and washers included. Overall measurements: width 1″; length 2½″.

No. 6153..**List $.30**

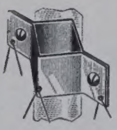
PIPE STRAPS



A useful accessory for supporting antenna masts, etc., against Chimneys, gables, walls or other flat surfaces. Suitable for all masts up to 1″ in diameter.

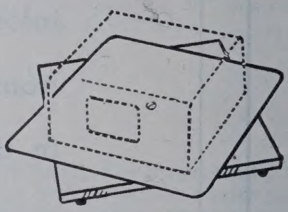
No. 6152..**List $10.00 C**

GUY WIRE CLAMP



Ideal for set-ups requiring guy-wire support. May be located at any position on antenna mast for maximum rigidity. This rugged adjustable steel clamp is suitable for masts ranging from ¾″ to 1¼″ diameters. Includes nuts and lockwashers.

No. 6144..**List $.50**



TELEVISION RECEIVER TURNTABLE

Designed for table model receivers. Permits multi-angle television viewing without lifting or disconnecting set. Eliminates furniture moving, re-connecting of set, etc.

Set is merely placed on turn-table—ready for operation. Finger-tip pressure. Makes complete circle for all-angle viewing. Heavy gauge steel in beautiful "hammered-tone" finish. Finely engineered swivel base unit.

No. 6184..**List $16.50**

ICA TELEVISION SERVICING KIT

A compact handy kit containing 13 of the newest servicing tools especially engineered for general television installation and servicing. Neatly packed in leatherette case. Includes high voltage test prods, dual-bladed trans-aligning tool; coil and trimmer aligner—slim diam. TV "Channel Tuner"; spring-controlled Safe-T-Tester; 4 in 1 Aligning tool; narrow shaft trimmer aligning tool; flexible screw driver and socket wrench; thin-bladed neut. tool for "Admiral," etc., TV sets; slim flexible tuning wand for Zenith, etc., TV sets; tuning wrench for Zenith, etc., TV sets; slim, dual-bladed aligner for "Admiral," etc., TV sets.

No. 6160..**List $16.95**

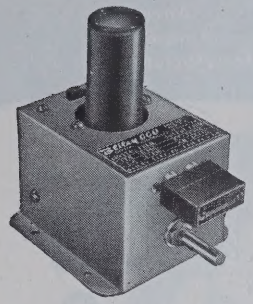
Bliley CRYSTALS AND CRYSTAL CONTROLLED OSCILLATORS



CCO — CRYSTAL CONTROLLED OSCILLATOR — MODEL 2A

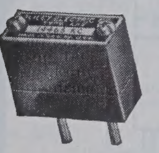
For 2-6-10-11 Meters

With this basic oscillator, employing a 6AG7 tube, the advantages of VHF crystal control are easily achieved. Has direct output on 6-10-11 meters and ample output to drive tripler stage on 2 meters. Single tuning control, bandswitch and crystal socket are mounted on outside of painted metal subchassis with power and output terminals at back. Uses Bliley AX2 20-meter crystals for output on 10 and 11 meters, new Bliley AX3 crystals for 6 and 2 meter operation. Ideal as nucleus for new construction or conversion of existing equipment.

Supplied less tube and crystal **$9.95**

AMATEUR FREQUENCY CRYSTALS

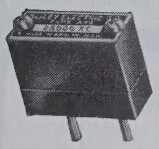
TYPE AX2



These high stability advanced design crystals are plated to insure long term precision and reliability. Calibrated to ±.002% with drift less than .0002% per degree Centigrade. Holder pins spaced on .486″ centers.

Supplied	Range	Price
± 2 Kc	3500— 4000 Kc	$2.80
± 2 Kc	7000— 7425 Kc	2.80
±30 Kc	12500—13500 Kc	3.95
±30 Kc	13580—13714 Kc	3.95
±30 Kc	14000—14850 Kc	3.95

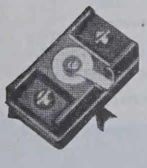
TYPE AX3



A new third overtone crystal unit produced for use in the Bliley CCO-2A. Has exceptionally high activity at operating frequency. Calibration accurate to ±.003% in CCO-2A with drift less than .0002% per degree Centigrade. Plated crystal is mounted in gasket sealed holder with pins spaced .486″ centers.

Supplied	Range	Price
±5 Kc	24000—24333 Kc	$3.95
±5 Kc	25000—25500 Kc	3.95

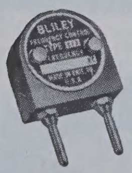
TYPE CF6 455 Kc



Single signal filter crystal unit. Exceptionally low holder capacity permits sharp signal discrimination in filter network of general communications receivers. Frequency 455 Kc free from spurious responses within ±7 Kc.

Price **$4.50**

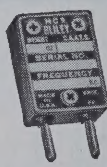
TYPE CF3 455 Kc



Single signal filter crystal unit. Frequency 455 Kc, ±5 Kc—free from spurious responses within ±7 Kc of fundamental. Designed for intermediate frequency filter in general communications receivers.

Price **$5.00**

TYPE MC9 3105 Kc



This unit is suggested for use in private aircraft transmitters operating at 3105 Kc. The crystal is guaranteed to be within ±.02% of 3105 Kc at any temperature between 0° C and 50° C and is factory tested for performance over this temperature range. Plug-in type holder is gasket sealed against moisture and humidity.

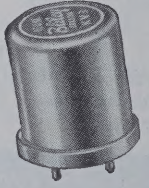
Price **$5.50**

TYPE VX2 3105 Kc

Designed for applications where space is at a premium, this unit is recommended for private aircraft communication at 3105 Kc. Guaranteed to maintain frequency within ±.02% at any temperature between 0° C and 50° C. Solder lug connections permit mounting under chassis and assembly is gasket sealed against moisture and humidity.

Price **$5.00**

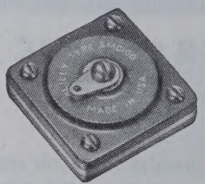
TYPE KV3 100 Kc



A precision crystal designed for use in secondary standards. Crystal is silver plated and mounted between wire supports which are soldered to the plated surfaces. Exceptionally low drift crystal is adjustable to exactly 100 Kc at 25° C when used in recommended oscillator circuit.

Price **$6.95**

TYPE SMC100 100-1000 Kc



Dual frequency crystal provides either 100 Kc or 1000 Kc frequency source. When used in recommended oscillator circuit 1000 Kc frequency is within ±.05% at 25° C and 100 Kc frequency can be adjusted to zero beat at 25° C. Suggested for signal generators used in alignment of radio receivers.

Price **$8.75**

For complete dimensional information consult Bulletin 35 available at any Bliley distributor.

Bliley CCO CRYSTAL CONTROLLED OSCILLATOR

MODEL 1C

For instant channel selection and frequency accuracy, radio service technicians use this Bliley test instrument. It provides direct crystal control for i-f alignment. Write for descriptive Bulletin 32.

Complete with 7 Bliley crystals, tubes and concentric output cable..... **$69.50**

- 28000 to 29700 Kc. for 10 meters.

CHECK SUPERIORITY OF PR Crystals

Stability . . .

Drift characteristics of PR Crystals limited to less than 2 cycles per MC per degree. You get low drift, combined with high output, dependable frequency control. X-Ray orientation guarantees uniform cut for maximum low-drift performance.

Accuracy . . .

Guaranteed accurate within .01 per cent of specified frequency or better. When doubling and quadrupling accuracy is absolutely essential. You KNOW where you are with PRs.

Power Output . . .

PRs are designed to give maximum power output from the exciter stage when operating at the highest permissible voltages. PR Crystals can "take it."

Activity . . .

PRs give you high activity. They "come in" instantly on phone . . . key without chirps, even at high bug speeds, without excessive "backing off."

Unconditional Guarantee . . .

Every PR Precision CRYSTAL is guaranteed unconditionally, by the makers of fine crystals since 1934.

AMATEUR

Note: Crystals Within Amateur Bands Supplied INTEGRAL KILOCYCLES Only.

Type	Tolerance	Price	Schedule
Z-2	.01%	$2.75	B
Z-3	.01%	3.75	B
Z-5	.01%	5.00	B

Crystals for amateur service other than frequencies listed on Catalog Sheet can be supplied as follows:

Type	Range	Tolerances Plus or Minus 5 Kc. Price	Tolerances Plus or Minus 5 Kc. Sched.	Tolerances Plus or Minus .02% Price	Tolerances Plus or Minus .02% Sched.
Z-2, Fundamental	1500 to 10000 Kc.	$2.75	B	$11.00	A
Z-3, 3rd Harmonic	10000 to 20000 Kc.	3.75	B	11.00	A
Z-5, 3rd Harmonic	20000 to 30000 Kc.	7.50	B	13.00	A

NOTICE

Prices on Commercial Crystals are based on quantities of 1 to 10 of the same frequency. For larger quantities write for prices.

Price on crystals below 100 Kc. furnished on request. Tolerance can be guaranteed only when oscillator or circuit diagram is furnished.

To facilitate the handling of your order, please order by type number and indicate permissible tolerance.

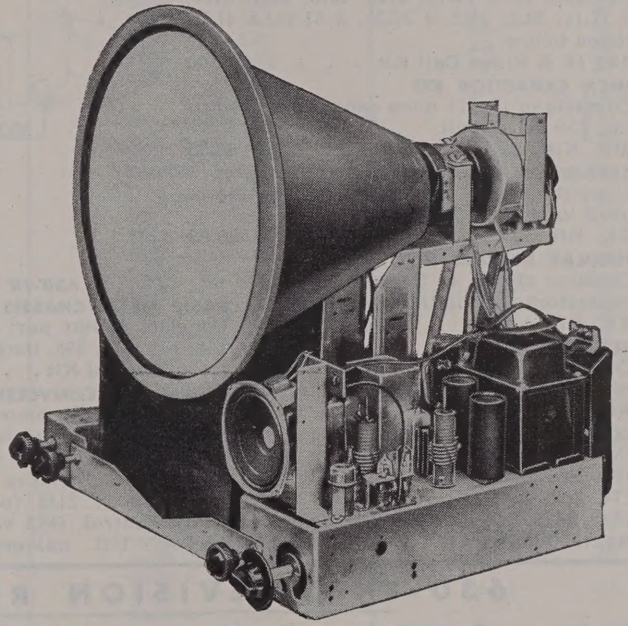
AMERICA'S FINEST TELEVISION KITS

The Only TV Kits with "Circuit-Aligned" Components

- ★ 3 TIMES PICTURE AREA OF 10-INCH TUBE
- ★ 31 Tubes — Voltage Doubler
- ★ Ultra-Simplified Wiring Instructions
- ★ Easily Wired Over a Week-End
- ★ Tech-Master Integrity
  (Only Perfection Is Acceptable)

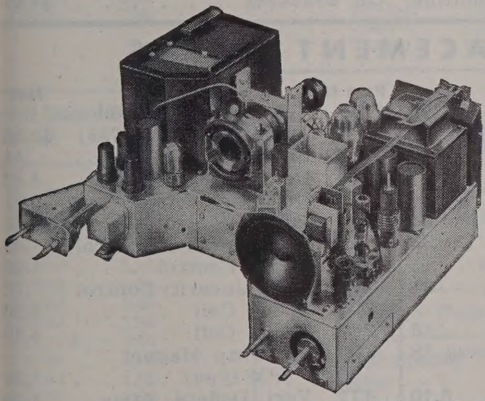
"Super 16"



Tech-Master, pioneer in the TV kit field, scoops the industry again with this "Super-16" TV kit that produces big, BIG pictures of superlative quality. Our engineers utilized our famous 630-TK De Luxe kit as a basis. An 11T5 flyback transformer, a 2D2 focus coil, a 1R4 width control and other fine components PLUS our new Universal Brackets to accommodate kinescopes up to 16 inches have been added.

A clever, and thoroughly sound, voltage double circuit using two 1B3's has been designed by our engineers to provide full voltage and current to drive up to 20-in kinescopes with excellent brilliance, definition and sweep. Ultra-simplified instructions make it possible for practically anyone to wire this kit over a week-end. The famous "Circuit-Aligned" components supplied with our kits keep final adjustments down to a negligible minimum, and these can be performed without additional equipment.

"SUPER-16" 630-TK De Luxe TV Kit, complete with all tubes, parts and instructions.
Less Kinescope . . . . Net **$177.50**



← 630-TK DE LUXE TV KIT

Build your own duplicate of the famous RCA 630-TS with this superfine, 1949 model Tech-Master 630-TK television kit. You will enjoy television at its finest — and save plenty. The Tech-Master kit is complete in all details — major components, all controls, all sockets and terminal strips are mounted in place. Only the interesting and instructive wiring remains to be done from the ultra-simplified wiring diagrams — easily accomplished over a week-end. Furnished with RCA 13-channel front end tuner completely wired, aligned and tested. "Circuit-Aligned" components mean all final adjustments can be made without additional equipment.

630-TK De Luxe TV Kit, all components mounted, complete with all tubes, parts, instructions, less kinescope.
Net **$163.50**

630-TK STANDARD TV KIT

The 630-TK Standard 10″ TV kit is identical with the De Luxe, described above, except that it is offered at a low, economy price because no components are mounted. In every other respect it is the same as the De Luxe model, same quality front end and components, complete instructions.

630-TK Standard TV Kit, complete with all tubes, parts, instructions; less kinescope . . . . Net **$144.50**

TECH-MASTER TELEVISION CABINETS

10″ Table Model Cabinet (illustrated at right), for either 630-TK TV kit. Handsome, sturdy, mahogany finish. With safety glass and Kinescope mounting slides. Completely drilled, ready for installation. **24¾″ x 20″ x 14″ high.** . . . . Net **$42.50**

12½″ Table Model Cabinet . . . . Net **$47.50**

15″ or 16″ Table Model Cabinet . . . . . . Net **$54.50**

15″ or 16″ Mahogany Console Cabinet . . . . Net **$98.50**

15″ or 16″ Formica Console Cabinet in Blonde, Mahogany, Walnut or Ebony Finish . . . . Net **$98.50**

TECH-MASTER PRODUCTS COMPANY

630-TK TELEVISION COMPONENTS KITS

ELECTROLYTIC CONDENSER KIT
Consists of our part numbers 338, 367, 368, 369, 370, 371 listed below.
EK Kit $7.98

BLEEDER RESISTOR KIT
Consists of our part numbers 439, 458, 459, 876 listed below.
BK Kit $4.25

IF & VIDEO COIL KIT
Consists of 2 1K1s, 2K2, 2K3, 2K4, 3K1, 2 2L1s, 3L1, 3L2, 2 3L3s, 2 3L4s, 5 4L1s listed below.
4X2 IF & Video Coil Kit $12.00

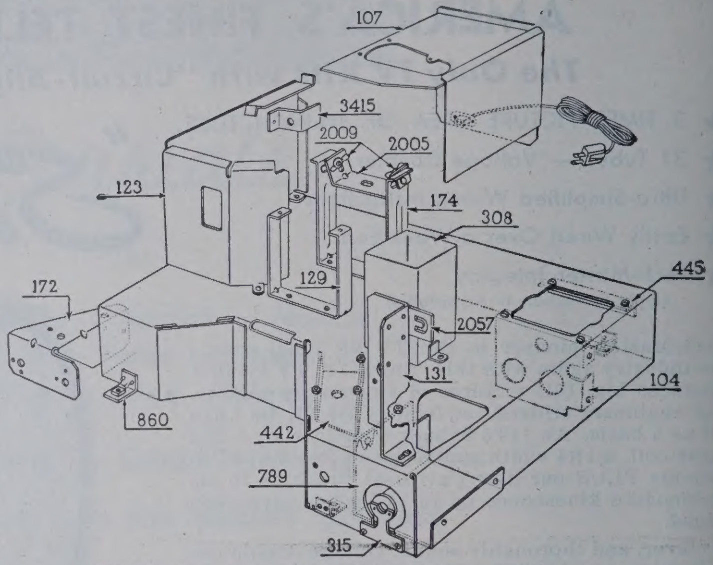
MICA CAPACITOR KIT
Consists of the 14 mica capacitors used in the 630-TS circuit.
MK Kit $3.95

CERAMICON CAPACITOR KIT
Consists of the 25 ceramicon capacitors used in the 630-TS circuit.
CK Kit $5.89

TUBULAR BY-PASS KIT
Consists of the 38 by-pass moulded capacitors used in the 630-TS circuit.
TK Kit $8.85

RESISTOR KIT
Consists of the 107 ½, 1 and 2-watt resistors used in the 630-TS circuit.
RK Kit $8.48

COMPLETE METAL CHASSIS KIT
Consists of our part numbers 1SC, 104, 107, 115, 116, 123, 129, 131, 172, 174, 308, 442, 445, 789, 4 860s, 2004, 2009, 3415, listed below. (Less cord.)
No. 1950 Metal Kit $29.50



630-TK Chassis Assembly (No. 1950 Metal Kit)

BASIC METAL CHASSIS KIT
Consists of our part numbers 1SC, 129, 172, 174, 308, listed below.
No. 500 Metal Kit $7.70

"SUPER-16" CONVERSION KIT
Consists of all components and instructions for converting 630 type TV receivers for use with 15" or 16" kinescopes. Includes 11T5 flyback transformer, 2D2 focus coil, 1R4 width control, DS2 voltage doubler socket, UB universal mounting brackets, 1B3 rectifier, all necessary resistors, condensers, etc., and instructions.
16CK Conversion Kit . . . $33.30
Conversion Instructions, separately, 25c

UB ADJUSTABLE MOUNTING BRACKETS
Kinescope mounting brackets for tubes from 12½" to 16". Mounts on 630 chassis so that face of all tubes up to 16" is in line with front controls.
UB Brackets $4.65

Multi-Section Rotary Switches

APPLICATION—Ideally suited for test equipment, meter switching, and low current switching in industrial applications, including machine tool equipment. Also miscellaneous electronic devices, such as medical equipment, navigation instruments, and radar.

DESCRIPTION—All contacting members are silver plated, except rotor contact slugs, which are solid silver. This insures low contact resistance. The high lift of the contact springs provides a wiping and self-cleaning action to insure good electrical contact. The index spring, made of durable phosphor-bronze reinforced with web, prevents fracture failure and insures long-life operation.

An adjustable stop feature permits selection of the desired number of positions for extremely flexible use. The insulation used in all sections is high-grade phenolic resin. All switches supplied with ⅜″ diameter, ⅜″ long brass bushing, and 2″ long shaft, grooved for easy cutting at popular lengths.

All switches have ½″ spacing between sections, excepting the three and four-section, which have 1″ spacing. If closer spacing is required between sections, the switch can be dis-assembled and spacers cut to proper length.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, and one No. 227 lock washer furnished with each switch. See Miscellaneous Items section for Dial Plates.

PACKAGING—One switch and accessories per display carton.

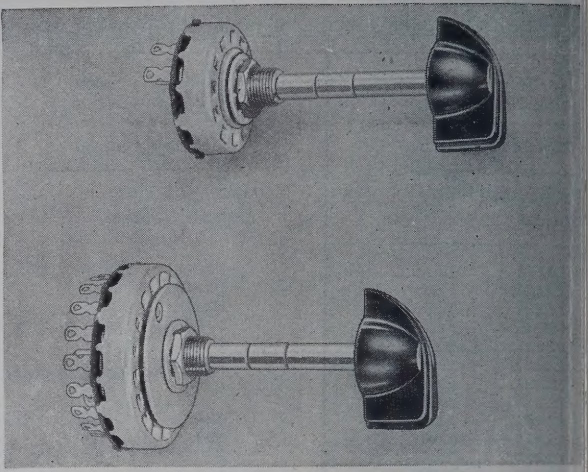
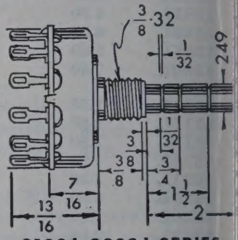
†Will be discontinued when present stocks are exhausted.



Single Section Rotary Switches



3100J-3200J SERIES

APPLICATION—For use in small receivers as tone controls, band selector and antennae switching; also ideal for meter switching in test equipment and many other electronic devices where space is at a premium.

DESCRIPTION—Available in single section only, and in two sizes: 1¼″ diameter, 30° indexing, and 1¹⁄₁₆″ diameter, 20° indexing. All combinations made in both shorting and positive non-shorting action. The 1¹⁄₁₆″ base switch is availabl with the adjustable stop feature. High quality XXX grade o phenolic resin insulation conforming to JAN specifications P-13 All switches supplied with ⅜″ diameter, ⅜″ long brass bushing an 2″ long shaft grooved for easy cutting at popular lengths.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, an one No. 227 lock washer furnished with each switch. See Miscellaneous Items section for Dial Plates.

PACKAGING—One switch and accessories per display carton.

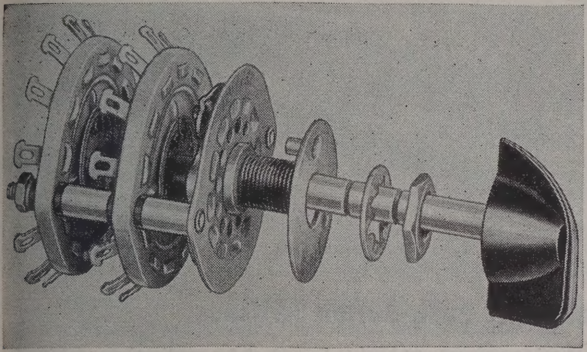
Mallory Page 2 (See Mallory Page 1 for List Prices)

MALLORY SELECTOR, TAP AND LEVER ACTION SWITCHES



Ceramic Section Selector Switches

APPLICATION—These switches are ideal for highly efficient critical radio frequency circuit applications. Suitable for radio receivers and low-power transmitter circuits. They find widespread use in laboratories, by manufacturers of transmitters, receivers, test equipment and other electronic apparatus, and by experimenters and amateurs.

DESCRIPTION—Ceramic insulation minimizes RF losses and retards moisture absorption. Indexing mechanism is the "hill-and-valley" type providing a definite "snap" indexing action. An adjustable stop feature is designed into the index assembly to permit a choice of 2 to 11 positions. All current-carrying parts are heavily silver-plated. The contacts are of the double-wiping, self-cleaning type, which insures low contact resistance over an extended temperature range. All switches supplied with ⅜″ diameter, ⅜″ long brass bushing and 2″ long shaft grooved for easy cutting at popular lengths. All types non-shorting.

The two-section switch has ½″ spacing between sections. The three-section switch has 1″ spacing.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, and one No. 227 lock washer furnished with each switch.

PACKAGING—One switch and accessories per display carton.

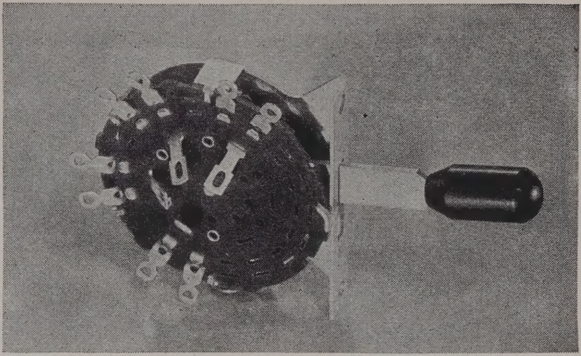
Full Information



Lever Action Switches

APPLICATION—These switches are particularly adapted to centralized radio, sound distribution, public address equipment, and intercommunication equipment for school installations of loudspeaker systems and office communication systems.

DESCRIPTION—The housing and mounting bracket of these switches are one integral part, which assures rigidity, and the design lends itself to the support of the section, thus preventing warping of the section or distortion in alignment of contacts. A smooth contact surface is guaranteed by the use of the exclusive Mallory "wrap-around" method of securing the terminal through the holes in the phenolic resin section. The phenolic resin is high grade for maximum insulation. The 5000 series have elongated mounting holes in the bracket, spaced from 2$\frac{3}{16}$″ to 2⅜″ apart. The 6000 and 7000 series have mounting brackets with round holes spaced 1⅝″ apart. Switches may be mounted singly or grouped in multiple mounting with ¾″ between lever arm centers to facilitate conventional rack and panel installations.

ACCESSORIES—One knob, two 6-32 bolts and nuts are furnished with each switch.

PACKAGING—One switch and accessories per display carton.

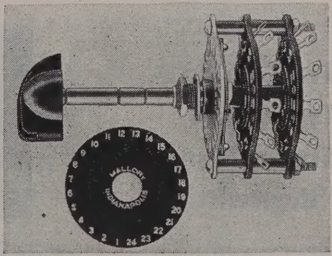
24-Point Non-Shorting Tap Switch



APPLICATION—This switch is particularly useful in test equipment applications where more than the conventional 12-point switch is required.

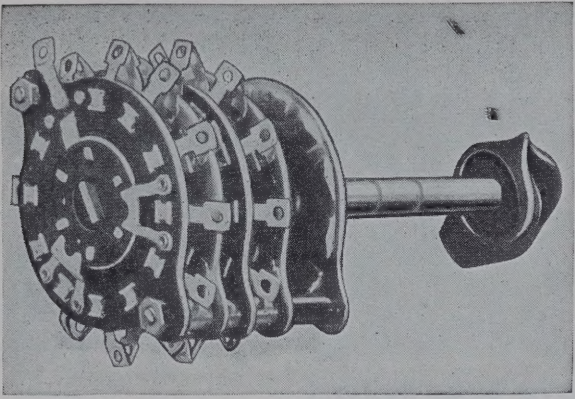
DESCRIPTION—The single circuit 24-point is accomplished through the use of two sections similar in design to the 1300L series switch. The indexing mechanism has no stops and is capable of continuous rotation with a 15° indexing action between positions. Furnished with ⅜″ diameter, ⅜″ long brass bushing and 2″ long notched shaft.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, one No. 227 lock washer, and one No. 394 Mallory Dial Plate furnished with each switch.

PACKAGING—One switch and accessories per display carton.

Catalog No. 13124L

MALLORY CIRCUIT-OPENING, "HAM", AND PUSHBUTTON SWITCHES



Circuit-Opening Switch

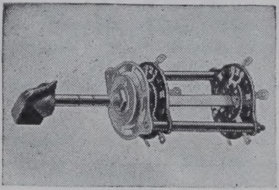
APPLICATION—This switch has found wide application in the construction of test sets, tube checkers, analyzers, and other apparatus where it is desirable to use only one meter.

DESCRIPTION—This is a special design of the series 1200L switch to provide for wiring of multiplying resistors to the switch, so that the switch not only opens the line but also automatically cuts in the proper multiplying resistor. The switch employs the standard 30° index, and is supplied with ⅜″ diameter, ⅜″ long brass bushing and a 2″ long shaft grooved for easy cutting to proper lengths.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, one No. 227 lock washer, and one No. 382 Mallory etched Dial Plate.

PACKAGING—One switch and accessories per display carton.

Catalog No. 1400L



Two-Section Five-Position "Hamswitch"*

APPLICATION—This switch provides a method of using a single meter to measure current or voltages up to and including 5 circuits of an amateur transmitter.

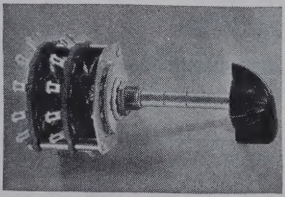
DESCRIPTION—This switch has the basic design of the 1200L series switch. It is of two-section construction with 2¼″ spacing between sections to permit multiplying resistors to be soldered directly to the switch terminals. High insulating qualities and low loss construction permit a conservative rating of 1000 volts RMS AC or 1500 volts DC. 60° indexing between positions and provided with the adjustable stop feature, giving a maximum of 5 positions. Supplied with ⅜″ diameter, ⅜″ long brass bushing and 2″ long shaft grooved for easy cutting at popular lengths.

ACCESSORIES—One Mallory No. 366 knob, one No. 237 nut and one No. 227 lock washer, furnished with each switch.

Refer to Misc. Items Section for special dial plate No. 487.

PACKAGING—One switch and accessories per display carton.

Catalog No. 151L



Two-Section Two-Circuit Six-Position "Hamswitch"

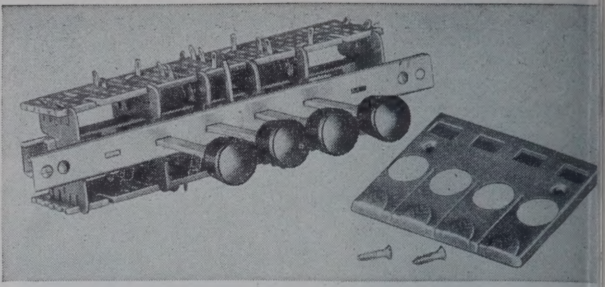
APPLICATION—Where all unused terminals are to be connected together and automatically shorted out.

DESCRIPTION—This switch is of the basic design of series 170C, excepting a phenolic resin insulation is used in the two-section assembly. Through the use of the 330° shorting shoes, all unused terminals are automatically connected. The spacing between sections is ½″. Switch is supplied with adjustable stop feature for 2 to 6 positions. Supplied with ⅜″ diameter, ⅜″ long brass bushing and 2″ long shaft grooved for easy cutting at popular lengths.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, and one No. 227 lockwasher furnished with each switch.

PACKAGING—One switch and accessories per display carton.

Catalog No. 152L



Multiple Push-Button Switches

APPLICATION—This switch is ideal for applications requiring a device for making, breaking, or transferring multiple circuits in automatic station selector tuning, inter-office communication systems, telephone and annunciator systems, set analyzers, tube checkers, and multimeters.

DESCRIPTION—Available from four to eight buttons with ⅝″ spacing between center lines of plungers. Each plunger actuates a phenolic resin slider supporting the various combinations of shoes which engage the stationary contacts. Arrangement of the plunger and latch bar mechanism provides an inter-locking action whereby one or more plungers may be pressed simultaneously, and will remain latched until released by depressing another plunger. Available in both shorting and non-shorting types, and with contact arrangement for both circuit closing and circuit transfer.

ACCESSORIES—Each switch furnished with brown phenolic resin knobs, one attractive statuary bronze escutcheon plate with blank designation inserts, and transparent strip for windows.

PACKAGING—One switch and accessories per display carton.

Ceramic Section "Hamband" Switches

APPLICATION—For transmitter band switching of low power transmitter circuits.

DESCRIPTION—A special ceramic switch designed for transmitter plate circuits using up to 1000 volts DC with power up to 100 watts inclusive. Ceramic insulation is employed in both the section and spacers between sections to obtain highest insulation qualities, and to provide low losses at high frequencies. Available in one to five sections, with each section having one circuit. 90° indexing between positions, and capable of continuous rotation. Supplied with ⅜″ diameter, ⅜″ long brass bushing and 2″ long shaft grooved for easy cutting at popular lengths. All types non-shorting.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, and one No. 227 lock washer furnished with each switch.

Refer to Misc. Items Section for special dial plate No. 488.

PACKAGING—One switch and accessories per display carton.

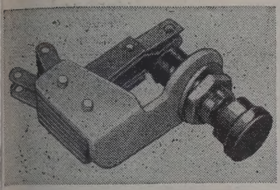
MALLORY PUSH-BUTTON AND JACK SWITCHES



Single Push-Button Switches

APPLICATION—These switches are ideal for a wide variety of applications requiring momentary or permanent contact. Especially adapted for use in laboratories, on test panels, in meter circuits, etc.

DESCRIPTION—Eight different circuit combinations available in either the locking or non-locking types. The locking types keep the circuit closed until the button is pulled out. The non-locking types maintain contact only while the button is held in the depressed position. Excellent electrical characteristics are achieved through the use of the phosphor bronze contact springs and the low resistance silver-plated contacts. The switch frame is steel cadmium plated, and the mounting bushing is nickel plated brass. Will mount in single hole 7/16″ diameter on panels up to 1/4″ thick.

ACCESSORIES—One polished phenolic resin knob, one Mallory 232 nut and one No. 225 washer furnished with each switch.

PACKAGING—One switch and accessories per display carton.

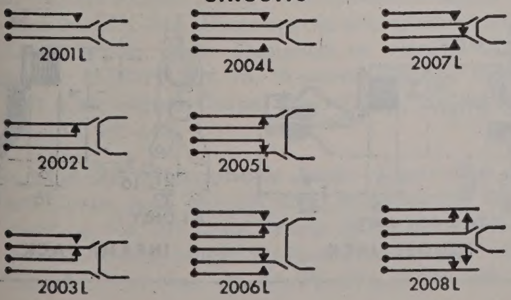
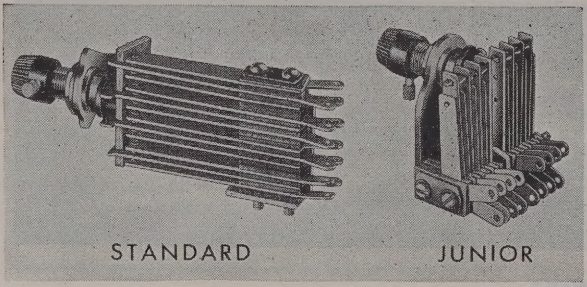
CIRCUITS





Jack Switches

APPLICATION—Ideally suited for use in laboratories, test panels, meter circuits, and other equipment where variable circuit combinations are accomplished through the leaf spring type assembly.

DESCRIPTION—The Standard Jack (or long frame type) may be used where space is no factor, as the frame extends straight back from panel mounting. The spring stack is assembled on a horizontal line with the frame. Constructed with knob and shaft that rotates through the bushing, operating a cam to actuate the spring which accomplishes the circuit switching.

The Junior Jack (or short frame type) is made with the frame supporting the spring stack at right angles. Because of the short springs used, it requires a minimum of space for mounting. The actuation of the springs is the same as for the Standard Switch. Frames on both Standard and Junior types are cadmium plated. Brass bushings and phosphor bronze springs are nickel plated. The fine silver contacts insure good electrical and low resistance contact. Both switch types are suitable for mounting in a single hole 7/16″ diameter on panels up to 1/4″ thick.

ACCESSORIES—One Mallory black phenolic resin knob, one No. 232 nut, and one No. 225 washer furnished with each switch.

PACKAGING—One switch and accessories per display carton.

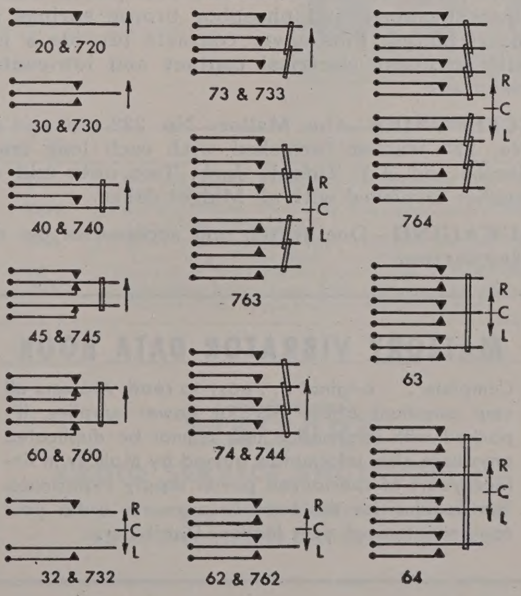
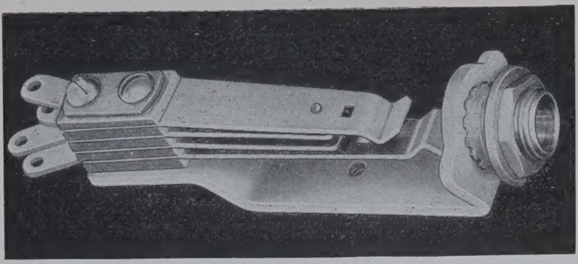
CIRCUITS



MALLORY JACKS



Jacks

APPLICATION—These jacks provide a conventional receptacle where it is desirable to open or close auxiliary circuits by use of a combination of spring assemblies actuated by insertion of connection plugs. Excellent for head sets, hand sets, or microphone cord and plug connections, for meter testing cord and plug connections, or as a receptacle for any device where desirable to connect or disconnect by cord and plug. Fit all Mallory #75 and 76 plugs.

DESCRIPTION—The long frame jacks are provided with a variety of spring combinations. The spring stackups are mounted horizontally to the frame. The jack is designed to mount in a single 7/16″ hole in panels up to 5/16″ thick. Fits all standard Mallory plugs of two and three conductor types.

The Junior Jack (sometimes called "short frame" jack) is made with the frame supporting the spring stack at a right angle with the short springs requiring only 1 5/16″ space back of panel for mounting. Bushings are made to mount in single 7/16″ diameter holes in panels up to 5/16″ thick. Fits all standard Mallory plugs.

The Midget Jack is very compact (with shorter frame and springs than the Junior types), being extremely useful where bare minimums of space exist. Will mount in a single 3/8″ diameter hole in panels up to 1/4″ thick.

The Infant Jack (sometimes referred to as a "pup" jack) is the smallest single circuit jack manufactured to accommodate the conventional 2-way phone plug tip and sleeve connection.

All jacks are made with cadmium-plated frames. Brass bushings and phosphor bronze springs are nickel plated. Fine silver contacts provide a jack with excellent electrical contact and low-contact resistance.

ACCESSORIES—One Mallory No. 232 nut and one No. 225 washer furnished with each long frame Junior and A-1 (Infant) Jack. Two nuts and one washer furnished with all Midget Jacks.

PACKAGING—One switch and accessories per display carton.

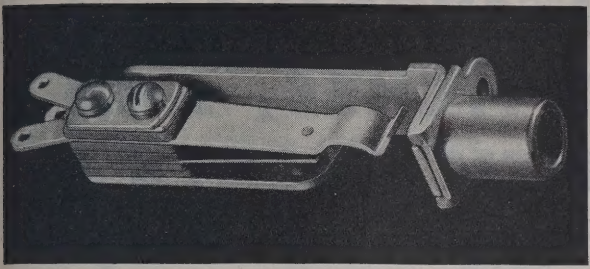
MALLORY JACKS AND PLUGS



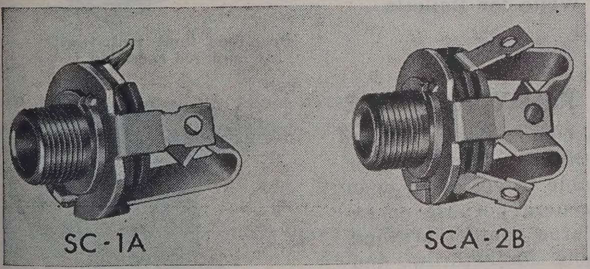
Jacks

APPLICATION—Ideal for telephone switchboard types of applications, as well as industrial applications where a more compact jack is required for close strip panel mounting.

DESCRIPTION—Although limited to three circuit combinations, these jacks serve the same purpose as the Mallory Standard Long Frame Jacks, but employ a special frame angle to provide greater support. The bushing is plain, unthreaded, and the jack is mounted by means of a screw through the panel mounting plate at the base of the bushing. Bushing fits all standard Mallory plugs of two and three conductor types. The springs are assembled horizontally to the frame. The frames are steel cadmium plated. Brass bushings and phosphor bronze springs are nickel plated. The fine silver contacts provide an excellent electrical contact and low contact resistance.

ACCESSORIES—None furnished.

PACKAGING—One jack per display carton.



SC Jacks

No. SC-1A Phone Jack—Equivalent of Signal Corps Jack No. JK-34A. Same spring arrangement as No. 1 Long Frame Jack. Designed to receive following plugs: Mallory No. 75, Western Electric Nos. 47A and 47B; Signal Corps Nos. PL-47, PL-48, PL-55, PL-148, PL-155.

No. SCA-2B Microphone Jack—Equivalent of Signal Corps Jack No. JK-33A. Same spring arrangement as No. 2B Long Frame Jack. Designed to receive following plugs: Western Electric No. 109 and Signal Corps Nos. PL-46, PL-68 and PL-168.

SMALL SWITCHES, LIMIT SWITCHES, AND MAGNETIC RELAYS

SMALL SNAP-ACTION SWITCH, G-E SWITCHETTE CR1070-C103

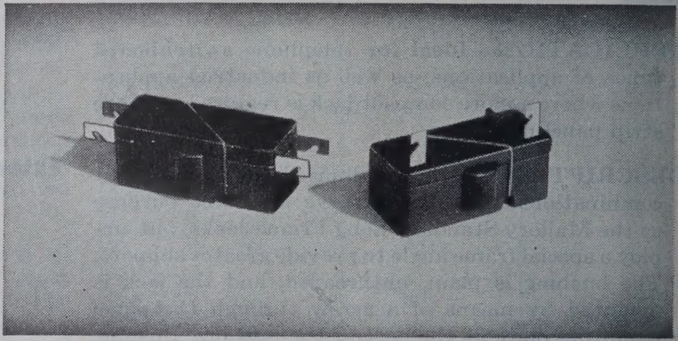
This new, lightweight switch mechanism lends itself especially to applications where space is limited and long life is required.

The Switchette is operated by movement of the spring-return button located in the housing. This button can be actuated by a lever, bellows, or other means. Snap-action, double-break-contact construction gives the G-E Switchette a high current rating and makes it suitable for applications where the vibration is severe.

FEATURES AND ADVANTAGES

1. Small (approximately 1¼ in. by ½ in. by ½ in.) and weighs only 9 grams (0.02 lb).
2. Resists vibration and corrosion.
3. Phenolic-resin operating button provides safety from live parts during operation.
4. Contact tips are 99.95 per cent pure silver.
5. Particularly suited to electronic applications because of negligible amount of contact bounce.
6. Five terminal arrangements are available, including the two shown above.
7. Wide variety of forms available, for example, three basic contact arrangements: single-circuit, normally open; single-circuit, normally closed; and two-circuit, normally open and normally closed. Also many special forms.

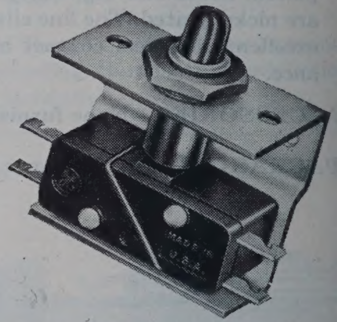
Switchettes are available in ratings up to 10 amperes at 115 or 230 volts a-c. Write for Bulletin GEA-3818.



Switchettes showing two terminal arrangements

LIMIT SWITCH, CR1070-D101

This sturdy, open-type limit switch is operated by a plunger which provides $\frac{7}{32}$-inch overtravel. The contact mechanism of this device is the G-E Switchette, which can be wired to control one normally open circuit and one normally closed circuit. Rated 10 amperes at 230 volts a-c. Write for Bulletin GEA—3821.



Open-type limit switch with push-rod operation

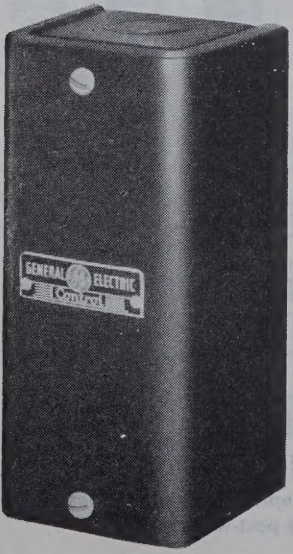
GENERAL PURPOSE RELAY, CR2790-E

The CR2790 relay is a compact, attractively finished device for use either as a motor starter or a relaying unit. Available in either an open form or enclosed in a general-purpose or explosion-proof housing. Three contact arrangements available: single-pole, single-throw; double-pole, single-throw; and double-pole, double-throw. In the open form, all three contact arrangements use the same base, which facilitates mounting. In the enclosed form, the U-shaped cover makes wiring and servicing convenient. Rated 10 amp. continuous, 110/120 volts a-c.

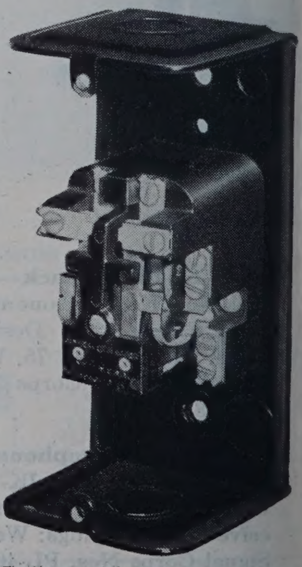
Applications

Control of pilot circuits in response to remote control switch or thermostat, or for direct control of small motors.

As a fractional-horsepower motor starter, or in conjunction with a magnetic switch controlling larger motors, heating or lighting circuits, and signal systems. Bulletin GEC—257.



Enclosed magnetic relay



Enclosed relay with cover removed

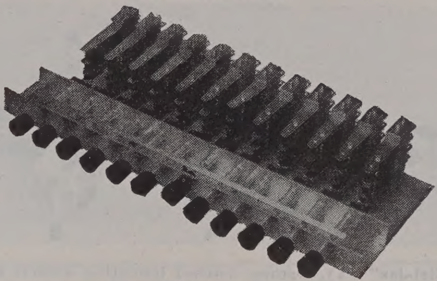
MASTER PUSH-BUTTON SWITCH

Model MPB



A single unit type push-button switch with high power handling ability to give direct push-button control. Furnished in from two to a maximum of twelve positions. Standard frames are: (1) locking, (2) non-locking, (3) release-lock, and (4) accumulative locking with single-button release. Pure silver contacts, phosphor bronze springs. Rating: 5 amps., 125 volts a-c (non-ind.).

HEAVY DUTY ELECTRONIC TIMERS

Promatic Timer

Convenient and compact units for either full or semi-automatic control of industrial processes. Two or more timers control a number of individually timed operations in a predetermined sequence with either self-recycling or manual recycling. Handle 10 amps. at 125 volts, 60 cycles, on DPDT power control contacts. Five ranges: 0.06-1.2, ½-8, ¾-15, 1.5-30, and 3-60 seconds. Plug-in capacitors give ready selection of timing range. Adaptable to use as photo-electric or sensitive relay in non-timing use. $32.00 List

FOOTSWITCHES

Models to meet every need. Type MI has large, inclined foot treadle; type MC operates by pressure of finger, elbow, knee, or foot anywhere on its top plate. Each switch will handle 10 amperes at 125 volts a-c.

Type *Price*	*Type* *Price*	*Action*
MC-11 $5.50	MI-21 $8.80	Normally open, spring return.
MC-12 $5.50	MI-22 $8.80	Normally closed, spring return.
MC-13 $6.00	MI-23 $9.35	Double throw, spring return.
MC-14 $8.25	MI-24 $11.35	First press closes switch contacts; second press opens switch contacts.
MC-15 $8.75	MI-25 $11.85	First press transfers switch contacts; second press restores switch contacts.
	MI-26 $13.00	First half-throw closes 1st switch; second half-throw closes 2nd switch; spring return.

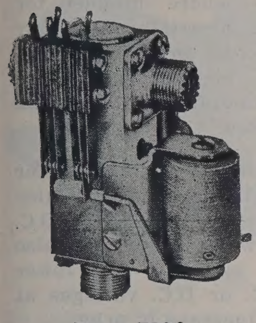
Advance RELAYS

COAXIAL RELAY



Type 7204

This relay, for use with 52 ohm RG coaxial cable, has SPDT internal contacts, rated at 880 watts maximum. If desired, DPDT auxiliary contacts (as illustrated) may be had. Tests on a 52 ohm line show VSWR of 1.02:1.0 at 100 meg.

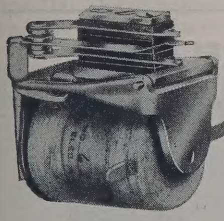
***List Prices:** (Up to 115 V A.C. or 40 V D.C.)

A.C.	D.C.		
7200	8200		$13.75
7204	8204	With auxiliary contacts	17.05

*For higher voltages up to 440 V A.C. or 240 V D.C., or for other Advance Coaxial Relays, see your nearest jobber.

Size (without auxiliary contacts): 1⅜" x 2⅞" x 3½"

MIDGET TELEPHONE RELAY



Type 5203A
"A" denotes
5-amp. contacts

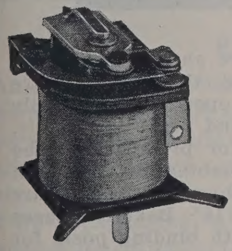
This small, yet sturdy relay is offered in any contact combination from SPST to 4PDT; with ⅛", 1.5 amp. contacts, or with 3/16", 5 amp. contacts. Coils draw from .1 to 2 watts D.C. or 1 to 1½ watts A.C. List prices below are for coils up to 115 V A.C. or 1000 ohms D.C.

A.C.	D.C.		
5201	6201	SPST N. O.	$3.85
5201A	6201A	SPST N. O.	4.07
5203	6203	SPDT	4.12
5203A	6203A	SPDT	4.56
5204	6204	DPDT	4.95
5204A	6204A	DPDT	5.83

For higher voltage coils, up to 220 V A.C. or 16,000 ohms D.C., see your nearest jobber. He can also show you other Advance Telephone Relays.

TINY MITE RELAYS

(FOR D.C. ONLY)



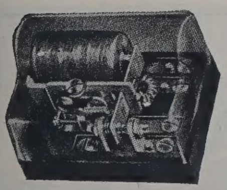
Type 003

In these tiny relays, which require less than ½ cubic inch mounting space, all switching is above ground. Contacts are rated at .35 amperes at 115 V A.C. (non-inductive). Power required is .2 to .5 watt. Coils are available for any D.C. voltage 1 to 80; resistances up to 5000 ohms. Weight: 10 grams. (45 relays per lb.). List prices below are for any coil up to 800 ohms (24 V D.C.). For higher resistances see your nearest jobber.

Type		List
003	SPST N. O.	$2.91
005	DPST N. O.	3.19

Size: 13/16" x 13/16" x 9/16"
(Overall dimensions with lugs as illustrated).
If desired, can be supplied with leads.

ULTRA-SENSITIVE D.C. RELAYS



Type 1200

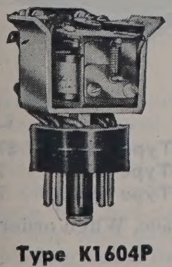
This relay combines many superior features — transparent plastic cover-molded Bakelite base — counter-balanced armature — high overall sensitivity . . . 5 milliwatts for positive operation — 2½ milliwatts with careful adjustment, and light contact load . . . Three adjustments with vernier screws: spring, and each contact. Contacts are SPDT, pure silver rated at 1.5 amperes at 115 V A.C. (non-inductive). Supplied in coil resistances up to 40,000 ohms. **Be sure to specify resistance desired!**

List Prices:

Up to					
2200 ohms	$9.07	8700 ohms	$ 9.90	30000 ohms	$12.65
3500 ohms	9.35	14000 ohms	10.45	40000 ohms	15.40
5500 ohms	9.62	20000 ohms	11.00		

Base Dimensions: 2" x 2 9/16". **Height:** 1½". **Weight:** 6¼ ounces.

PLUG-IN RELAYS



Type K1604P

Any Advance Relay can be Supplied with Standard Speaker Plugs!

To designate that plug-in is desired, add the letter "P" to the type number when ordering. For example type K1604 (illustrated) becomes type K1604P.

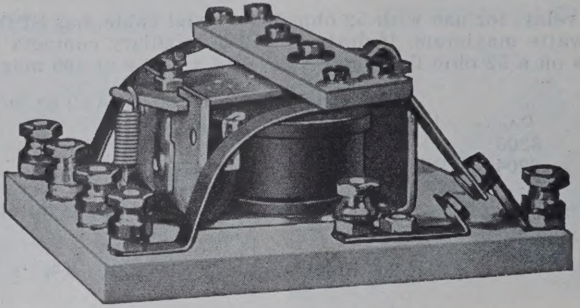
To compute list prices, add to the prices shown elsewhere as follows:

4-5-6-7-8 prong	$2.20
9 prong	2.80
10 prong	3.19
11 prong	$3.63
12 prong	4.07

• *Ask your jobber about Advance Hermetically Sealed or Dustite Relays!* •

Advance RELAYS

TRANSMITTER RELAYS



Type 400

Isolantite model Antenna Change-Over. Designed for use in Amateur Transmitters.

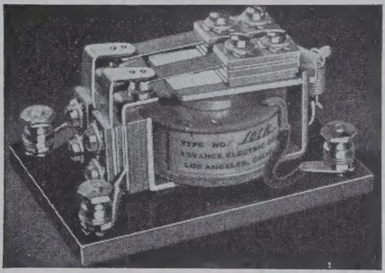
The contact system is Double Pole-Double Throw, using ¼″ Pure Silver contacts, with exceptional wiping action. Three and four pole arrangements are available on special order.

For high radio frequency control. Entirely hum-free where intended for A.C. operation, and highly efficient on D.C. supplies. All metallic parts are cadmium and chromium plated.

Standard coils are for 110V A.C. and may also be used for 24V D.C. However, they will also be supplied for lower A.C. or D.C. voltages at no increase in price.

List Price $10.89

KEYING RELAYS



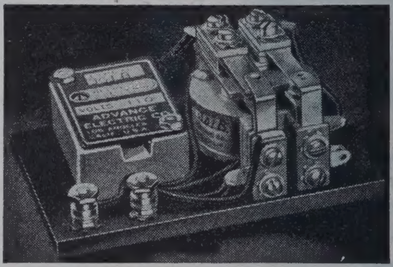
Type 101K—A.C.
Type 201K—D.C.

Designed expressly for use in Keying Circuits where it is desired to use low voltage across the key to control high voltage transmission through the Relay contacts. The heavy duty coil and strong return spring makes possible an exceptional keying speed. Two sets of ¼″ Pure Silver contacts in series allow a carrying capacity of 2500 volts. The complete unit, mounted on a 3/16″ Bakelite base with binding posts for coil connections, has over-all dimensions of 3″ x 2″ x 1⅜″ and is obtainable for A.C. operation to 115 volts or D.C. operation to 60 volts.

List Price **$6.05**

TIME DELAY RELAYS

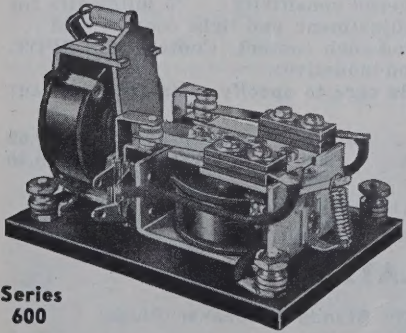
Type 300—N.O.
Type 350—N.C.



Particularly suited for use where short time delays (10 sec. to 1 min.) are required, these Relays are available with both normally open and normally closed thermostats. Types 300 and 350 respectively, the former being widely used for pre-heating tube filaments, etc. The contact combination on both models is Double Pole Single Throw with ¼″ Pure Silver contacts. Mounted on 3/16″ Bakelite bases measuring 3¾″ x 2⅜″ x 1½″ with binding posts for coil connections. Standard operating voltage is 110 A.C. .... **List Price $9.07**

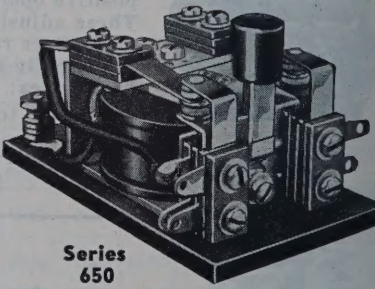
Low voltage units are available on special order.

LATCHING RELAYS



Series 600

These Relays are highly desirable for applications where it is impractical to have the holding coil in constant service. When the coil actuating the contact arrangement is momentarily energized, the armature is locked in the closed position, and may be released electrically (Type 600) or manually (Type 650).

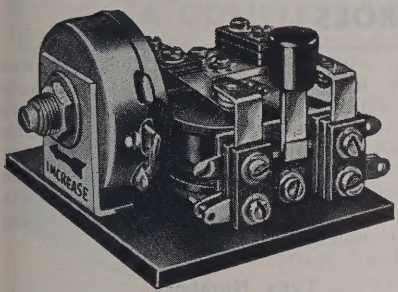


Series 650

	List			List
Type 604B	**$10.56**	Double Pole-Double Throw	**Type 654B**	**$7.86**
Type 605B	**10.28**	Double Pole-Single Throw (N. O.)	**Type 655B**	**7.53**
Type 606B	**10.28**	Double Pole-Single Throw (N. C.)	**Type 656B**	**7.53**

The above list prices are for ¼″ contacts. For 3/16″ points deduct 25c—for ⅛″ points deduct 50c. When ordering these types SPECIFY THE VOLTAGE.

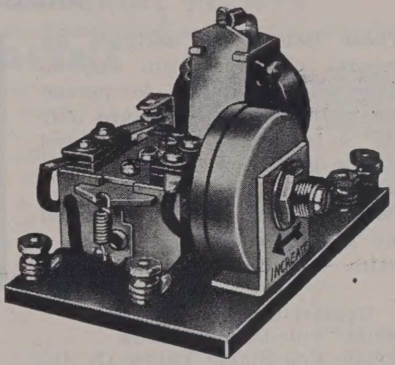
Advance RELAYS



Type 700

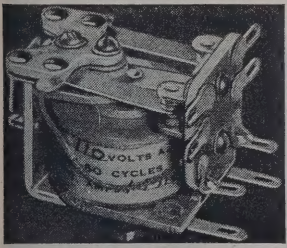
OVERLOAD RELAYS

These Relays are designed to provide accurate and positive protection against current surges and continuous overloads, and both the Manual Reset (Type 700) and Electrical Reset (Type 750) are divided into two classifications: Type "A" allows the Relay to attract on any current value between 250 and 500 mills, and Type "B" for any setting between 500 mills and 1 ampere. When the current flow passes the safety setting, the Double Pole-Single Throw ¼" Pure Silver contacts are opened, breaking the power supply circuit until reset.



Type 750

	List Price
Type 700—Base dimensions 3" x 2½"	$11.16
Type 750—Base dimensions 4" x 2½"	14.52



Series K1500 and K1600

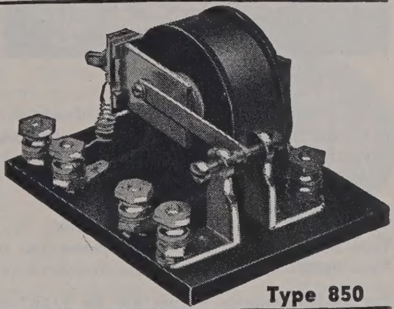
MIDGET RELAY

Of particular interest where size and cost are factors, this new series of Midget Relays, of improved design, incorporates all of the fine construction features typical of the ADVANCE line. This unit measures only 1½" x ¾" x 1⅛" high. Pure Silver contacts are used, ⅛" in diameter. Standard coils are obtainable from 2 to 32 V D.C. and 1 to 115 V A.C. The following switch combinations can be supplied:

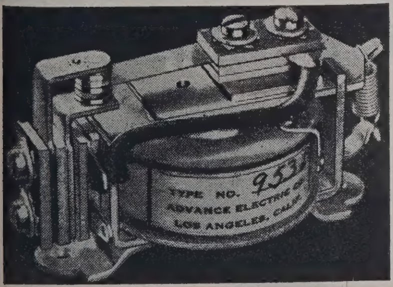
TYPE A.C.	TYPE D.C.	CONTACT COMBINATION	LIST PRICES
K1505	K1605	DP-ST NOR. OPEN	$3.57
K1506	K1606	DP-ST NOR. CLOSED	3.57
K1504	K1604	DP-DT	3.85

ELECTRONIC RELAY

An ultra-sensitive unit for use in electronic tube circuits, providing positive, dependable control on as little as 12 milliwatts. Adjustment screws to change the air-gap between the armature and the pole face, allow operation on a voltage differential of 30%, a condition ideal for electronic applications. The contact combination is Single Pole-Double Throw, employing ⅛" Pure Silver points to safely handle 100 watt non-inductive loads. Obtainable in resistances of 2500, 3000, 5000 and 10,000 ohms at no increase in price.......................................**List Price $7.86**



Type 850



GENERAL PURPOSE RELAYS

Types 951B — 952B — 953B

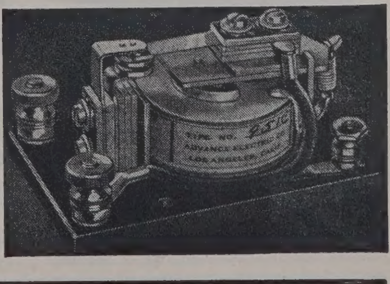
These Relays afford maximum power and efficiency at very low cost. ¼" Pure Silver contacts are standard on the Single Pole-Single Throw (N. O.) Type 951B—Single Pole-Single Throw (N. C.)—952B—and Single Pole- Double Throw—953B—switch combinations. Adequately insulated and entirely above "ground," these Relays may be mounted on any type of panel, quickly and easily, by means of the metal mounting bracket. Coils are obtainable to 115V A. C. or 60V D. C.

List Price $4.23

GEN-E-MOTOR STARTING RELAY

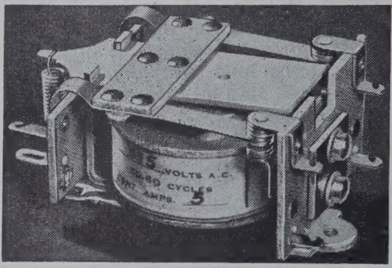
Type 951C

An exceptionally sturdy power transfer Relay, easily capable of handling the heavy current surge encountered on "cold" starts in motor-generator systems. The contacts are ⅜" Pure Silver and have ample carrying capacity for the usual 200-500V converters. Heavy-duty in every phase of construction, this unit is not to be compared with the common five and ten ampere circuit controls. Base dimensions are 3" x 2" and each unit is complete with a braided generator-cable pig-tail and binding posts for all connections. Coils for 5½ to 32V D. C. or 1 to 115 A.C. .... **List Price**....**$7.26**



Advance RELAYS

MIDGET TYPE CIRCUIT CONTROLS



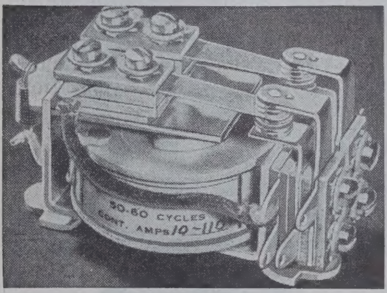
These Relays are designed for general circuit control applications where the space for mounting is limited, and measure only 2½" in length, 1½" in width, and 1¼" in height. A.C. operated Relays in this series require but 4 watts on 50/60 cycle current, and the D. C. models from 1..5 to 2 watts, affording maximum efficiency without sacrifice of power and dependability. Metal brackets (not shown in the illustration) are supplied with all Relays of this type, and except on special order, these models are limited to the following contact arrangements and the usual standard operating voltages:

Type Numbers
Contact Sizes and List Prices

Contact Combinations	3/16"	List	¼"	List
Double Pole-Double Throw	104AM	$6.05	104BM	$6.65
Double Pole-Single Throw (N. O.)	105AM	5.72	105BM	6.32
Double Pole-Single Throw (N. C.)	106AM	5.72	106BM	6.32

The above chart lists type numbers for A.C. operated Relays. D. C. coils may be obtained by changing the series number from 100 to 200. Prices apply to both.

INDUSTRIAL CONTROL RELAYS

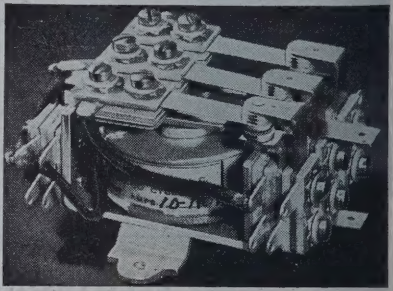


Series 960

Designed mainly for industrial applications — air conditioning, lighting, and power transfer systems, the Series 960 Relays embody all of the rugged construction features demanded in units of this type without sacrificing the desirable qualities of the midget style. Available in the following contact combinations, and to operate on standard A. C. and D. C. voltages.

	List
Type 964B—Double Pole-Double Throw	$6.05
Type 965B—Double Pole-Single Throw (N. O.)	5.72
Type 966B—Double Pole-Single Throw (N. C.)	5.72

For smaller contacts, deduct 25c for 3/16" or 50c for ⅛" points, from the above list prices.



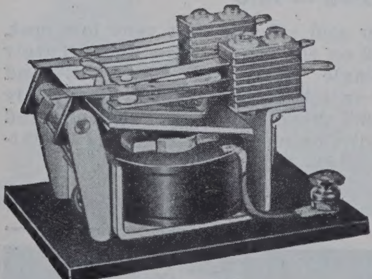
Series 970

Having the same characteristics as the Series 960 Relays, these Three Pole units, Series 970, may be used for fractional h/p 3-phase motor controls, etc. The area required for mounting 2⅝" x 1⅞" for Type 970 Relays, as against 2½" x 1¼" for the Type 960's, is due to the slightly larger frame. The metal brackets are the same in both instances—2-5/16" long, and 2" between centers of the 6/32 mounting holes. Available in the voltages indicated in the preceding series, and in the following contact combinations:

	List
Type 977B—Three Pole-Single Throw (N. O.)	$6.32
Type 978B—Three Pole-Single Throw (N. C.)	6.32
Type 979B—Three Pole-Double Throw	7.26

For smaller contacts, deduct 50c for 3/16" or 75c for ⅛" points from the above list prices.

IMPULSE RELAYS



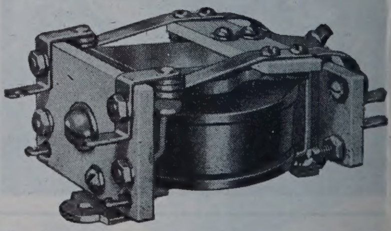
Series 900

This is another type of Relay for use where it is not feasible to have the holding coil in constant service, but differs from the latching types in that it may be controlled with a single push-button. Coils to operate this type of unit are extremely heavy-duty, and are for intermittent (impulse) use only. Available for standard A. C. and D. C. voltages in the following combinations:

	D.P.S.T. List	D.P.D.T. List
With ⅛" Pure Silver contacts	$10.28	$10.89
With 3/16" Pure Silver contacts	10.89	11.49
With ¼" Pure Silver contacts	11.49	12.70

When ordering these type, be sure to specify the input voltage, contact combination, and size of points.

MIDGET TYPE R.F. RELAYS



Series 1000—A.C. Series 2000—D.C.

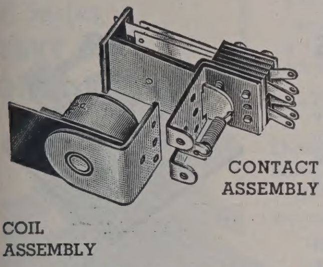
These models are sturdy, compact Double Pole - Double Throw Transmitter Relays, designed expressly for use in all types of mobile - portable communications equipment where space is at a premium. The insulation on this, as on the Type 400's, is Isolantite for both the cross-arm and end pieces, with all holes adequately well spaced to prevent structural weakness and possible "creepage." Coils are obtainable for all A. C. and D. C. voltages, and will operate in any position, the former consuming approximately four watts—the latter, two watts of power. Dimensions are 2¾" x 1½" x 1¼".

List Price **$9.07**

RELAYS BY GUARDIAN

A COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS

SERIES 200—INTERCHANGEABLE



Two basic parts—a coil assembly and a contact assembly—comprise this simple, yet versatile, relay. Coil assembly consists of coil and field piece. Contact assembly consists of switch blades, armature, return spring and mounting bracket. The new midget contact assembly, which is interchangeable with the standard assembly, is also available in either single pole double throw, or double pole, double throw. The standard contact assembly is 2⅞" long, 1¾" high, 1" wide. The midget assembly is 1⅝" long, 1½" high, 1" wide. The four contact assemblies can be used with any one of 13 coils to make a required relay. Contact points are rated at 8 amps., 115 volts, 60 cycles AC, non-inductive load.

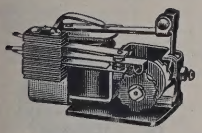
CONTACT PARTS KIT 200-3. Assortment of contact parts to make other switch combinations. May be used with SPDT or DPDT contact assemblies to make 3PST, 4PST, 4PDT combinations, etc. Either contact assembly takes any combination up to four pole double throw. Includes complete assembly and wiring information for all possible combinations. Complete with all necessary hardware. Shipping weight 4 oz.

List Price .... **$1.85 ea.**

RC-100 REMOTE LOCKING CONTROL RELAY



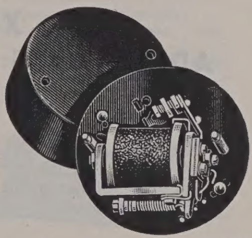
A Guardian development of the momentary impulse locking control relay. The circuit to the coil needs to be energized only long enough to close armature; contacts lock automatically. Each impulse reverses position of contacts. Standard coils operate on 115 volts, 50-60 cycles AC. Coils for other voltage and currents on specification.

Contacts, ¼" fine silver metal rated at 1500 watts at 115 volts, 60 cycle, non-inductive. Can also be used in AC primary circuits of any power supply delivering up to 1 KW. 3" long, 2⅛" wide, 1$\frac{17}{32}$" high.

Applications—break-in control and phone to CW switching. Any circuit control where locking circuits are used.

	Shp. Wt.	List Price
RC-100-AR—(4PST)	8 oz.	**$7.15 ea.**
RC-100-BR—(3PDT) (SPDT) (DPST)	8 oz.	**7.85 ea.**

U-100 AND U-200 ADJUSTABLE UNDERLOAD RELAYS



Sensitive, precise, designed and constructed for long, trouble-free service. Relays are encased in attractive black finished metal containers, protecting them from dirt, dust and maladjustment. Normal current through the coil on the U-100 is 300 milliamperes with an adjustable range of 100 to 200 milliamperes DC. Normal current through the coil on the U-200 is 600 milliamperes with an adjustable range of 200 to 400 milliamperes. Oversize contacts of fine silver, rated for the AC primary of any power supply delivering up to 500 watts.

Radio Application—protection of class "B" audio equipment in case of class "C" load failure, also class "C" amplifier in case of excitation failure.

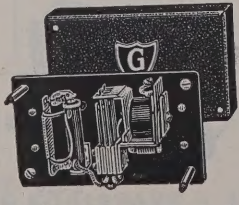
Industrial Application—Any DC circuit where it is desirable to maintain currents above a set value.

U-100 and U-200 are 3$\frac{5}{16}$" in diameter, 2¼" high. Shipping weight 14 oz. .... **List Price $10.75 ea.**

T-100 AND T-110 TIME DELAY RELAYS

Standard coils operate on 115 volts, 50-60 cycles non-inductive AC. Coils available on other voltages on specification. Oversize contacts rated at 1500 watts on 115 volts, 50-60 cycles non-inductive. Can also be used in the AC primary of any power supply delivering up to 1 KW. Adjustable time delay for any period between 10 and 60 seconds.

Applications—Radio. In transmitter circuits to prevent damage of rectifiers and tube filaments by application of plate current before filaments are sufficiently heated. **Industrial.** Any control problem requiring the changing of circuits after a predetermined interval.



GUARDIAN SERIES T-110
TIME DELAY RELAY

T-100—5¼" long, 3" wide, 2¼" high. Shipping weight 1¼ lbs. Laminated construction.

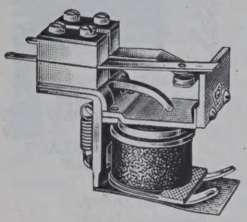
List Price .... **$17.15 ea.**

The T-110 is a compact, sturdy, economical time delay relay for use in applications not requiring the capacities of the T-100. Contact capacity — 1250 watts on 115 volt, 60 cycle non-inductive AC. Can also be used in the AC primary circuit of any power supply delivering up to, and including, 1 KW. Adjustable time delay between 10 and 60 seconds.

T-110—5$\frac{5}{32}$" long, 3$\frac{1}{16}$" wide, 2$\frac{7}{16}$" high. Shipping Weight 8 oz. **List Price** .... **$10.75 ea.**

RELAYS BY GUARDIAN

A COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS



SERIES R-100
H.F. RELAY

HIGH FREQUENCY RELAYS

The Series R-100, R-100B, and A-300 Guardian Relays are primarily designed for high frequency applications. They are low-loss insulated, compact, economical and sturdily constructed. The R-100 and R-100B are AlSiMag insulated, while the A-300 is mounted on a mycalex base with polystyrene contact mounting bar.

Radio Applications — Antenna changeover, break-in, high voltage keying, grid controlled rectifier keying, remote control of receiver and transmitter, and other high frequency applications.

Industrial Applications — Oven control, remote motor control, short wave therapy and diathermy, heating equipment.

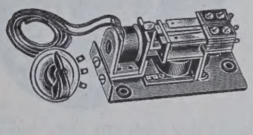
X-300-ER
ADJUSTABLE OVERLOAD RELAY
with Electrical Reset

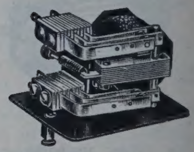


This relay offers positive, precise protection against current surges and continuous overloads — remote panel installation of the control potentiometer simplifying adjustment of relay to operate on any current value from 250 to 750 milliamperes — auxiliary contacts for pilot light indication of "overload" or "clear" position — reset relay can be operated from any convenient point. Voltage drop across overload coil is less than 10 volts at any current value. Insulation between coil and ground rated at 3000 volts.

X-300-ER—4¾" long, 1-15/16" wide, 2" high. Shipping weight 12 oz.

List Price......**$9.25 ea.**

B-100 BREAK-IN RELAY



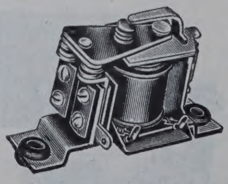
Specially designed for break-in operation on amateur transmitters. Low current drain and compact construction, plus the use of a laminated field piece and armature insuring efficient operation, make the B-100 an ideal relay for this application. Standard coil operates on 115 V., 50-60 cycle AC. Silver contacts rated at 1500 watts, 60 cycles AC non-inductive, and in AC primary circuits of any power supply delivering up to 1 KW.

B-100—2¾" long, 2⅛" high, 2¼" wide. Shipping weight 11 oz.

List Price......**$10.75 ea.**

K-320 KEYING RELAY

A standard coil operates on 6 volts AC. Coils for other voltages on specification at 10% additional to list price. Contacts — special over-size silver. Can handle 5,000 watts on 60 cycle non-inductive 115 volts AC and in AC primary circuit of any power supply delivering up to and including 1 KW. Control capacity — up to 2,000 volts with clean make and break.



Applications—Control of filament center tap keying of any stage having up to 2,000 volts on plate; primary keying or control of power supplies up to and including 1,000 watts; and grid-controlled rectifier keying of 3,000 volt power supplies.

K-320—3" long, 1½" wide, 1-15/16" high. Shipping weight 4 oz.

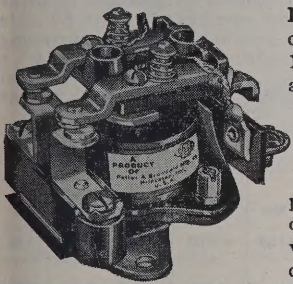
List Price......**$4.50 ea.**

A TRADE-MARK OF QUALITY

Potter & Brumfield

On these pages we list a few of the relay types we class as standard. Stocks of either completed relays or component parts are kept on hand for quick assembly, resulting in unusually prompt delivery and lower prices. From these relays a type can be selected for almost any application where the contact load does not exceed 20 amperes.

PR Series HEAVY DUTY POWER RELAYS



Designed for such power circuits as motor starting up to 1 HP., heater loads up to 20 amperes, remote break-in control of transmitters, electro plating devices, elevator controls, or any control circuit requiring fast positive switching. AC types operate on approximately 10 volt amperes. DC types require approximately 2 watts. Relay contacts on PR3A, PR3D, PR4A and PR4D rated at 20 A, non-inductive load 115V AC or 1 HP, AC. All other relay contacts rated at 15 A, non-inductive at 115V AC. Size approximately 2⅝″ x 2 9/16″ x 2¼″ high. Specify coil voltage and frequency.

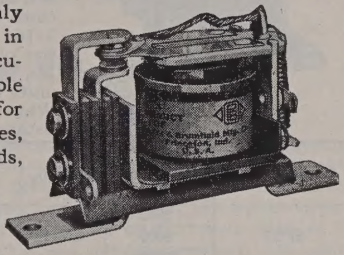
MR Series MEDIUM DUTY POWER RELAYS



Sturdy, compact, highly efficient, for mounting in confined spaces. Particularly adapted to multiple panel mounting. Ideal for safety and signal devices, call systems, heater loads, radio protective circuits, transmitter keying circuits, burglar alarms, photographic applications, electric sign controls, etc. Available in all contact arrangements up to and including double pole double throw. AC types operate on approximately 4 volt amperes and DC types operate on approximately 2 watts. Contacts rated at 8 A, 115V, 60 cycles non-inductive load. Approximate size single pole units 2 15/16″ x 1½″ x 1⅝″ high. Double pole units 2¾″ x 2⅛″ x 1⅞″ high.

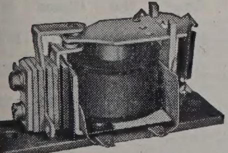
	Add 40c to prices above for coils over 150 volts.				Add 40c to prices above for coils over 55 volts.			

LS Series PLATE CIRCUIT RELAYS



Designed for application where size and cost are important. Often used in photoelectric circuits, temperature control circuits and electronic timing devices. Similar to the LM Series but less sensitive. Available in all resistances up to and including 10000 ohms. Requires .09 watt minimum actuating power.

Single pole double throw, 2500 ohm coil, net $1.90.

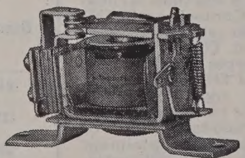
Single pole double throw, 5000 ohm coil, net $2.20.

Single pole double throw, 10000 ohm coil, net $2.45.

Size 2⅝″ x 1⅜″ x 1⅜″ high.

When ordering, specify coil voltage or resistance.

FR Series PHOTO FLASH RELAYS



FR1A FR1D	$3.00	FR5A FR5D	$3.25
FR2A FR2D	2.95	FR7A FR7D	3.95
FR3A FR3D	3.65	FR8A FR8D	3.85
FR11A FR11D	$4.25		

The newly developed electronic photo flash units using a high voltage discharge through a xenon gas filled bulb require a relay of extraordinary characteristics. When the bulb is flashed the contacts must carry an extremely high surge of current without sticking, burning or pitting. The repetitive accuracy must be as uniform as a precision built shutter on a fine camera. Unfailing positive contact is vital to synchronization of the shutter with the 2500 volt capacitor discharge.

The Potter and Brumfield FR relay has been tried and proven under the most severe conditions of temperature, humidity and shock. Special contact material and the finest quality of baked varnish impregnation of coil and other insulating parts combine to give a reliable relay at economy prices. The FR is available in all the contact combinations listed under the MR Series shown on this page up to and including Double Pole Double Throw. Coils are available in all AC voltages up to 230 volts and DC voltages up to 115. Power requirements for coil operation is 1.5 to 2 watts DC and 3 to 4 volt amperes AC. Overall dimensions for single pole types are 2 15/16″ x 1½″ x 1⅝″ high. Double pole types 2¾″ x 2⅛″ x 1⅞″ high.

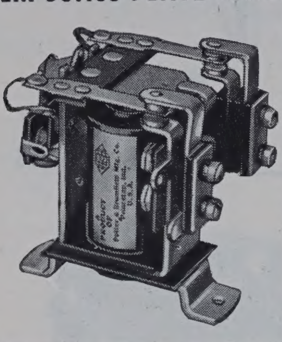
LM Series PLATE CIRCUIT RELAYS



Designed to meet demand for high grade medium cost plate circuit relays in both single and double pole contact arrangements. Large coils are particularly sensitive. The single pole LM operates on as low as .015 watts, the double pole types on .070 watts. Applicable to smoke control, packaging, counting and other electronic control circuits. Contacts supplied are 3/16″ fine silver. Approximate size of single pole units 2¼″ x 1⅜″ x 2⅜″ high. Double pole units 2¼″ x 2⅛″ x 2⅜″ high. When ordering, specify coil resistance.

DESCRIPTION	Coil Resistance Ohms	SINGLE THROW

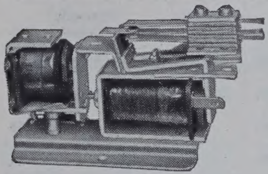
	10000				4.05

EL Series MULTIPLE CONTACT LATCHING RELAYS



Available in all contact combinations up to and including four pole double throw as shown under SU series. Actuating and latching coils are available for DC voltages up to 115 or AC voltages up to 230. Actuating coils require 1.5 to 2.5 watts.

	NET
EL1A EL1D EL2A EL2D	$3.60
EL5A EL5D	$3.75

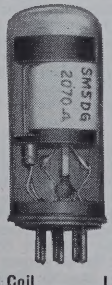
EL15A EL15D EL16A EL16D	$4.75
EL17A EL17D	$5.40

SM Series Super Midget



This subminiature relay weighs less than ½ oz. and is less than ¼ cubic inch in volume. Contacts are SPDT pure coined silver rated at .25 amp. 115 V 60 cy. load. The "D" or voltage operating types can be wound for any specified DC voltage up to 115 and draw approximately .5 watt. The "L" or current operating types can be wound to maximum of 8000 ohms which gives minimum pull-in of 3 ma at 75 milliwatts. "G" version hermetically sealed in miniature tube glass envelope with standard 7 pin base.

List Price	Nominal Coil		List Price	List Price	Coil Resistance Ohms	List Price

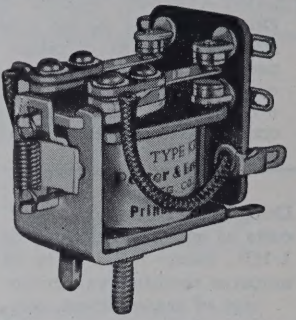
1.90	61 - 75	.0092 - .0075	2.80	2.15	5201 to 8000	3.05

KR Series Small Light Duty



A relay designed for application where size and weight are important. Sturdy and efficient. In applications where operating current is not too limited, the DC types can be adjusted to withstand the vibration encountered in most aircraft applications. Ideal for sub-chassis mounting and switching of RF or AF circuits. Contacts are rated at 3 amperes 110 volts, 60 cycle non-inductive. Approximate size of KR11D 1 3/16″ x 1 11/16″ x 1¼″ high. When ordering, specify coil voltage and frequency.

Description	A.C. RELAYS 6-12-24-115 Volts				D.C. RELAYS 6-12-24-60 Volts

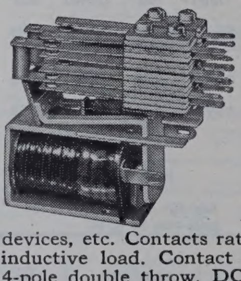
	A.C. coils up to 117 volts at above prices.				Add 25c to above prices for coils of 3500 to 5000 ohms. From 5001 to 6000 ohms add 35c.			

SU Series MULTIPLE LEAF RELAYS



Unique construction provides many valuable features at low cost. Larger coil space permits most efficient winding for higher voltages and lower consumption. May be mounted either vertically or horizontally, terminals easily accessible in either mounting. Suitable for applications such as signal or alarm controls, remote indicators, temperature controls, overload or underload protective devices, etc. Contacts rated at 4 amperes 115 volts AC non-inductive load. Contact combinations up to and including 4-pole double throw. DC types require 1.5 watts actuating power. Dimensions of SU17A (illustrated) are 2½″ x 1 7/16″ x 2½″ high. When ordering, specify coil voltage and frequency.

EXPORT SALES AT 2020 ENGINEERING BLDG., CHICAGO 6, U. S. A.

LEACH RELAY CO.

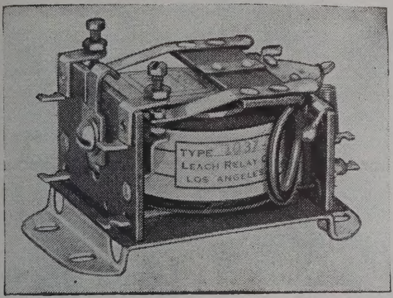
These Leach Relays are considered standard items within the trade. These relays are maintained in shelf-stock supply in order to expedite shipment to jobbers throughout the United States.

For more than thirty years Leach has manufactured quality relays. This vast experience in engineering design and manufacturing ability is incorporated in these standard relay designs.

SENSITIVE METAL BASE RELAY

TYPE 1037 SERIES

This Relay is constructed for sensitive operation, and has ⅛″ pure silver contacts mounted on screws to provide adjustments on top contacts which are capable of carrying 1 Ampere at 115 Volts, AC, Non-inductive. With these adjustment screws, the air gap can readily be adjusted so that the Relay can be set to pull in at some predetermined coil current. It is supplied at DPDT only. Nothing is grounded to the metal base. The minimum reliable coil consumption is .040 watts. It will operate on a good deal less, but the adjustment becomes fairly critical on these low values.



BASE DIMENSIONS: 1½″ x 2-9/16″, overall height 1-11/32″

WEIGHT: 4½ ounces.

RESISTANCES: 5,000 Ohms or 10,000 Ohms.

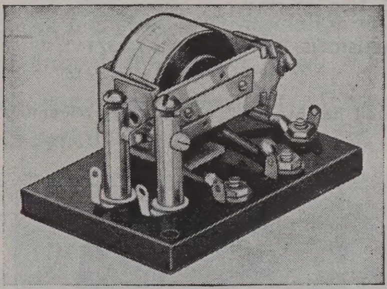
Type No.	
1037	Double Pole, Double Throw, 5,000 Ohms.
1037	Double Pole, Double Throw, 10,000 Ohms.

Be sure to specify coil resistance when ordering.

SENSITIVE DIRECT CURRENT RELAYS

TYPE 1032 SERIES

This Relay is used extensively in closed circuit burglar alarm systems, in the plate circuit of electron tubes, as secondary Relays for micro-ampere Relays, etc. It is a very fine all-around low current, high resistance Relay, capable of withstanding considerable vibration without affecting its operation. It is equipped with an adjustable spring and adjustable stationary contacts, fitted with set screws. All contacts are pure silver and capable of carrying 1 Ampere, 115 Volts, AC, Non-inductive. This Relay is pigtailed to prevent current passing through the hinge part. The contact system is SPDT, and minimum practical coil wattage is .015 watts.



BASE DIMENSIONS: 2″ x 2¾″, overall height, 1-11/16.″

WEIGHT: 6 ounces.

RESISTANCES: 5,000 Ohms or 10,000 Ohms.

Type No.	
1032	Single Pole, Double Throw, 5,000 Ohms.
1032	Single Pole, Double Throw, 10,000 Ohms.

Be sure to specify coil resistance when ordering.

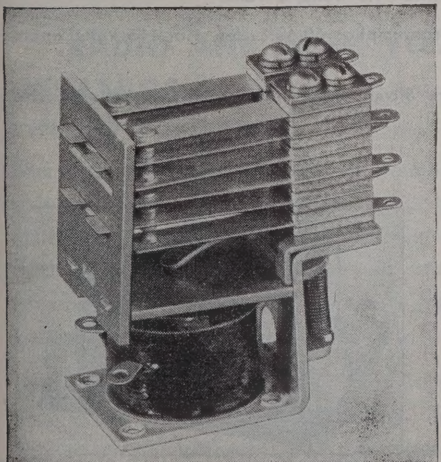
MULTIPOLE RELAYS

TYPE 6 & 7 SERIES

This Relay is the most versatile Relay for its size in the Leach line, and is ideal for industrial and radio applications where currents to be handled by the contact systems do not exceed 8 Amperes at 115 VAC, Non-inductive. By using the desired stationary contacts, many combinations are available. For example, on the 7-4C Relay one could have various combinations of double-pole, single-pole open, single-pole closed, etc., as required. All contacts are pure silver and are mounted on heavy-plated phosphor-bronze pole pieces, which are designed to give a wiping action and positive contact, pressure. Relay provides solder lugs for connecting coil and contact systems.

COILS: 6 Volt Direct Current Coils consume approximately 3 watts, 6 or 115 VAC Alternating Current Coils consume 6V/A approximately.

CONTACTS: Heavy fine silver contacts ⅛″ diameter. Will carry loads up to 8 Amperes at 115 VAC, Non-inductive.



Type Number		
6-C	7-C	Single Pole, Double Throw.
6-2C	7-2C	Double Pole, Double Throw.
6-4C	7-4C	4-Pole Double Throw.

LEACH RELAY CO.

MIDGET RELAYS

TYPE 223-227 & 323-327 SERIES

ENGINEERED in miniature to weigh less than 2 ounces and measures from one to 1¾ inches in length, Leach Midget Relays dependably handle contact loads of up to 2 Amperes at 115 Volts AC, Non-inductive. Because of their space and weight saving factors, Midgets expand the range of control by Relays in many products where previous methods are considered unprofitable.

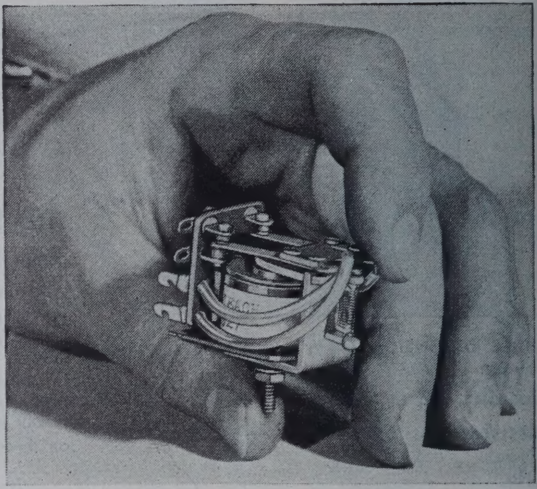
Supplied in a variety of contact arrangements, with moving contact poles insulated from the armature and frame, and with coils for operation on either AC or DC. The high quality, well-known in our standard and larger size Relays, is used throughout.

STANDARD COILS: 6 Volt Direct Current Coils consume approximately .750 watts of Alternating Current 6 or 115 Volts, approximately 4 V/A.

CONTACTS: ⅛" diameter Fine Silver, rated 2 Amperes at 115 VAC, Non-inductive.

DIMENSIONS: SP — 15/16" x 1-13/16".
DP — 1-3/16" x 1-13/16"

Overall height—1¼" not including mounting stud.



MOUNTING: Single No. 6-32 stud, 7/16" long.

WEIGHT: 1.5 ounces approximately.

Type Number

DC	AC	
223	323	SPDT
227	327	DPDT

METAL BASE STYLE

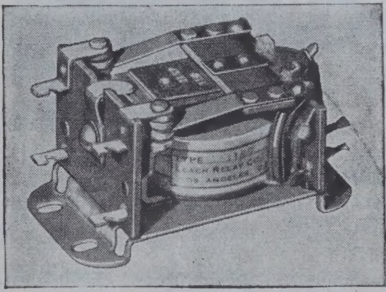
TYPE 1057 & 1157 SERIES

THESE RELAYS are ruggedly built for industrial uses and are fitted with ¼" fine silver contacts for handling heavier currents. Phosphor-bronze, nickel-plated, is used for the pole pieces. Nothing is grounded to the frame. All parts and pieces are so constructed that nothing can twist or turn out of alignment.

DIRECT CURRENT: Coil consumption 1.5 watts, 6 Volts.

ALTERNATING CURRENT: Coil consumption 50-60 cycles, 6 or 115 Volts, approximately 4 V/A.

CONTACTS: ¼" diameter Pure Silver. 12.5 Amperes at 115 Volts AC, Non-inductive.



BASE DIMENSIONS: 1⅝" x 2¾"; overall height 1⅜".

WEIGHT: 5 ounces.

Type Number

DC	AC	
1057	1157	DPDT

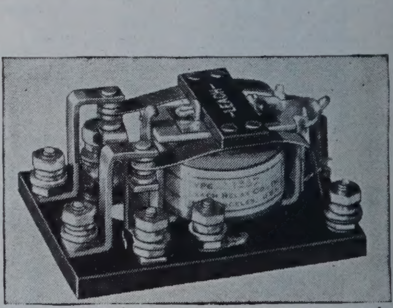
STANDARD SIZE CIRCUIT CONTROL RELAYS

TYPE 1257 & 1357 SERIES

This excellent Relay has many applications where it is not desirable to use solder terminal connections. They are highly insulated and made of the best materials obtainable. The magnetic circuit is exceptionally high grade of magnetic iron, heavily cadmium-plated. The contacts are ¼-inch pure silver, slightly crowned, and are rated at 12.5 Amperes, 115 Volts AC, Non-Inductive.

Ac coils consume 6 V/A, 6 or 115 Volts AC.

DC coils consume 1.5 watts, 6 Volts DC.



BASE DIMENSIONS: ¼" black Bakelite, 2-3/16" x 3"; overall height, 1-7/16"

WEIGHT: 7 ounces.

Type Number

DC	AC	
1257	1357	DPDT

LEACH RELAY CO.

RADIO AND HIGH FREQUENCY RELAYS—ANTENNA TRANSFER

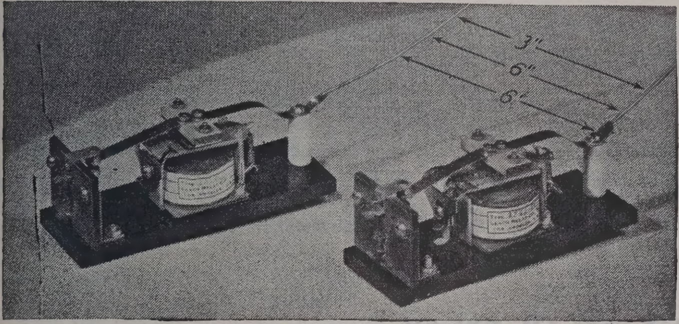
MYCALEX AND ISOLANTITE

TYPE 1623 & 1723

This new idea for antenna change-over eliminates the major drawback of most Relays now used for this purpose. The spacing between leads, heretofore has been limited to the spacing between the Relay contact strips. A pair of the above matched Relays permits any desired spacing between antenna lead-out wires whether 6 inches, or 6 feet.

Maximum high frequency insulation is provided through the use of heavy Mycalex panels, and Isolantite insulators. The Relays are designed with a wide air gap, ¼ inch pure silver contacts with a SPST arrangement.

They will withstand over 4000 volts RMS, 60-cycle hi-spot test between contacts and between contacts and frame on ground.



TYPE 1623-S9 & 1723-S9

These Relays are exactly the same as above, except that a ⅛-inch fine silver SPST Normally Open auxiliary contact has been added. Usually one these relays is paired with one of the above types*, in order to provide the auxiliary contact for the power supply. This may also be used to close a power Relay, for grounding, or for controlling light power circuits.

AC coils consume approximately 6 V/A, 6 or 115 Volts, 50-60 cycles.

DC coils consume approximately 3.5 watts, 6 Volts DC.

DIMENSIONS: 1½" x 4⅝"; overall height, 1¾".

WEIGHT: 6¼ ounces, approximately (each relay).

Type Number DC	AC	
1623	1723	SPDT
1623-S9	1723-S9	SPDT, with ⅛" Aux. Cont.

*Usually one No. 1723 and one No. 1723-S9 are paired for AC use or one No. 1623 and one No. 1623-S9 are paired for DC use.

RADIO AND HIGH VOLTAGE RELAYS

CERAMICS

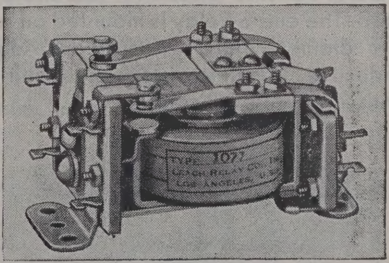
TYPE 1077 & 1177 SERIES

This is an ALSiMag insulated RF Relay designed for more or less universal service, such as police mobile radio, aircraft and amateur instalations. Nothing has been left undone to make this Relay the best of its kind. The pole pieces are nickel-plated, phosphor-bronze. The main contacts are ¼" pure silver. All iron parts cadmium plated. The tension spring is stainless steel.

No. 1077C and 1177C have Auxiliary ⅛" contacts which provide a third center pole on Relay. They are grounded to the frame, but not to the base of the Relay.

WEIGHT: 5 to 5½ ounces.

Type Number DC	AC	
1077	1177	DPDT
1077-C	1177-C	DPDT, with Aux. SPDT.



CONTACTS: ¼" Pure Silver—Double Pole, Double Throw.

COIL DATA: 6 Volts DC, 2½ watts, 6 or 115 Volts AC, 50-60 cycles, 6 V/A.

DIMENSIONS: 1½" wide by 2¾" long by 1½" high.

Mounting hole centers, 2⅜".
Center holes tapped 6-32.
Outer holes clear 6-32.

LEACH RELAY CO.

RADIO AND HIGH VOLTAGE RELAYS

MYCALEX

TYPE 1601-MX & 1701-MX

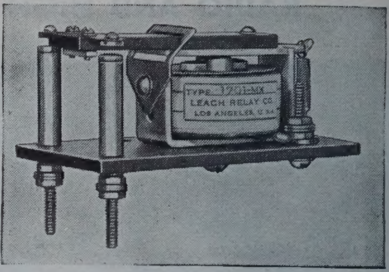
This Relay was designed to control a high voltage radio frequency circuit. Contacts are ¼″ pure silver, SPST normally open, double break. Metal spacers are supplied for mounting.

AC coils consume 6 V/A, or 115 Volts, 50-60 cycles AC.

DC coils consume approximately 3.5 watts, 6 Volts DC.

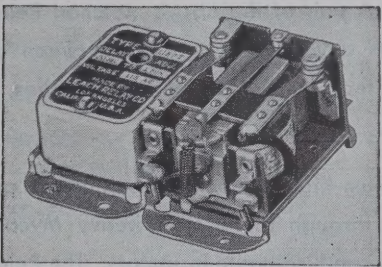
DIMENSIONS: 1¾″ x 3″ overall height, not including studs or mounting spacers, 1½″.

WEIGHT: 8 ounces.



Type Number

DC	AC	
1601-MX	1701-MX	SPST-DB Normally open.



BASE DIMENSIONS: 3¼″ x 2¾″, overall height, 1-7/16″.

Type Number

DC	AC	
1057-T	1157-T	DPDT.

TIME DELAY RELAY

TYPE 1057 & 1157 T SERIES

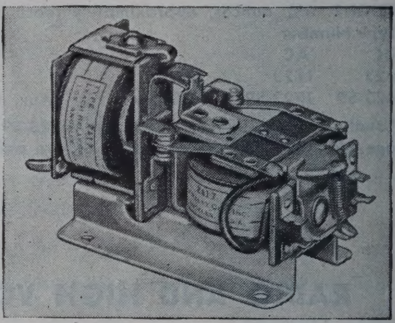
This Thermo Element Time Delay Relay is primarily for use on vacuum tube transmitters, but may also be used for a wide variety of other applications. They are all made DP, which may be used as normally open, normally closed or DT. The contacts are ¼″ pure silver, rated 12½ Amperes, 115 Volts AC, non-inductive. The center pole, as shown, always is used for controlling the thermo element, which provides a variable delay of from 20 seconds to 1 minute. After the coil is energized, the Thermo element drops out of the circuit, cooling for the next cycle.

STANDARD COILS: AC—6 and 115 Volts (6 V/A)
DC—6 Volts—(1.5 Watts)

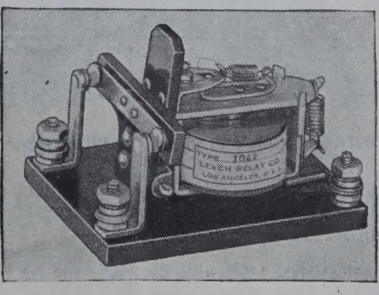
LATCH TYPE ELECTRICALLY RESET

TYPE 2417

This type Relay fits many applications where it is not desirable to have current continuously on the coil. The mechanical arrangement is such that after the pull-in coil is energized the armature closes and locks, closed by a mechanical latch on the armature of the Relay coil. The pole pieces are phosphor-bronze, and canvas-base natural Bakelite is used for the end panels and the pole mounting strip. The entire Relay is mounted on a metal base. The contacts are $\frac{3}{16}$″ diameter pure silver rated 8 Amperes at 115 Volts AC. Non-inductive. This Relay is supplied with 2—6 or 115 Volt AC coils or with 2—6 Volt DC coils.



DIMENSIONS: 1⅝″ x 3⅝″; height 2-1/16″.
WEIGHT: 8 ounces.
Type Number
2417 DPDT.
Specify voltage and whether for AC or DC.



Type Number

1042	SPST Normally closed—double break. Contact rating 10 Amp., 115 Volts AC.

LIGHT DUTY OVERLOAD TRIP RELAYS

TYPE 1042 SERIES

The Relays shown are used as safety devices on electronic apparatus for the protection of the equipment against excessive currents. When current reaches a predetermined value the Relay is pulled in allowing the contacts to snap open and at the same time locking the armature closed. To reset the contacts, the coil circuit must be opened before pressing the Bakelite first finger. These Relays are supplied with the coil circuit highly insulated from the contacts; however, to use them as circuit breakers the coils and contacts may be connected in series.

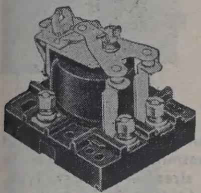
Commonly used for the protection of power tubes. In this service the coil is put in series with the negative side of the plate supply and the contacts are in series with the transformer primary or the coil of the power contactor.

These Relays are all adjustable for the trip-out setting to approximately 20% plus or minus of their designated rating. In ordering it is necessary that you specify the approximate current on which they are to operate. Supplied in 2 standard coils: 250 MA or 500 MA.

RELAYS FOR AUTOMATIC CONTROL

Representative samples of the comprehensive line of relays made by Ward Leonard. The ones illustrated are those particularly adaptable to electronic and the more common industrial applications.

MIDGET MAGNETIC RELAY — TYPE No. 106. — For remote control of A.C. or D.C. circuits. Has wide application for use on power circuits or electronic circuits in which the currents to be controlled do not exceed the ratings of the contacts. May be energized from main line or from an independent circuit. Built on a molded Bakelite base. Front or back connected terminals.



Coil Voltages —
D.C. — 6, 8, 12, 24, 32, 115 volts.
A.C. (60 cycles) — 6, 8, 12, 24, 32, 115 volts. 115 volts.

Contract Arrangement —
Single Pole, Double Break, Normally Open, Normally Closed and Double Throw.
Double Pole, Single Break, Normally Open, Normally Closed and Double Throw.
Double Pole (Common Feed), Single Break, Normally Open, Normally Closed and Double Throw.

Contact Ratings, in Amperes —

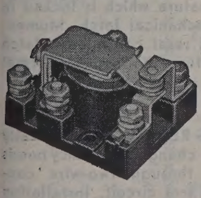
Volts	D. C.		60-Cycle A.C.	
	Single Break	Double Break	Single Break	Double Break
0-24	4	6	4	6
25-115	1*	2	4	6

*0.7 Amperes if Double Throw.

Dimensions — 2″ wide; 2¼″ high; 2⅛″ deep.

Type No. 106 Relays for 3-wire control are also available. Details will be furnished on request.

HEAVY DUTY MIDGET RELAY — TYPE No. 105. — A general purpose relay designed for remote control of the ordinary type of electrical appliances, such as electric heaters, electric signals, electric lights, electrically operated pumps, and most types of electronic equipments. The Heavy Duty Midget Relay is sturdily built on a molded Bakelite base. Heavy, front connected terminals are provided. The Heavy Duty Midget Relay, as a standard unit, is of the open type, but it can be furnished with a steel knock-out box enclosure.



Coil Voltages —
D.C. — 6, 10, 12, 24, 32, 115 volts.
A.C. (60 cycles) — 6, 10, 12, 24, 32, 115, 230 volts.

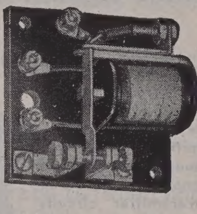
Contact Arrangement —
Single Pole, Single Break, Normally Open, Normally Closed and Double Throw.
Double Pole, Single Break, Normally Open, Normally Closed and Double Throw.

Contact Ratings, in Amperes —

Volts	D. C.		60-Cycle A.C.	
	Normally Open	Normally Closed	Normally Open	Normally Closed
0-24	20	15	20	15
25-115	1	1	20	15
230	0.5	0.5	15	10

Dimensions — Single Pole: 1⅞″ wide; 2⅜″ high; 1½″ deep. Double Pole: 2½″ wide; 2¾″ high; 1¾″ deep.

SENSITIVE RELAY — TYPE No. 250. — For use in applications where a high degree of sensitivity is required such as in electronic circuits. Built on a Bakelite base with large knurled heads and nuts to facilitate adjustment of the contacts and the spring tension on the armature. The use of nickel alloy in the magnetic circuits insures good contact torque at pull-up and crisp drop-out.



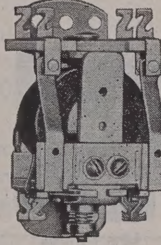
Contact Arrangement —
Single Pole, Double Throw.

Contact Rating, in Amperes —

Volts	D.C.	60-Cycle A.C.
115	0.75	2.0
230	0.5	1.5

Dimensions — 2⅝″ wide; 2⅝″ high; 1⅝″ deep.

MIDGET METAL BASE RELAY — TYPE No. 104. — For use in small radio transmitters, sound equipment, aircraft control circuits, and other similar applications. Available with Bakelite insulation or ceramic insulation. Small size permits installation in limited spaces. Built on a metal base. Vibration resistant up to 10 times gravity when energized. Front connected, solder type terminals.



Coil Voltages —
D.C. — 6, 10, 12, 24, 32, 115 volts.
A.C. (60 cycles) — 6, 10, 12, 24, 32, 115 volts.

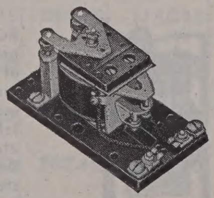
Contact Arrangement —
Single Pole and Double Pote. Various combinations with or without auxiliary contacts.

Contact Ratings, in Amperes —

Volts	D.C.	60-Cycle A.C.
0-24	4	4
25-115	0.5	4

Dimensions — $1\frac{9}{16}$″ wide; $2\frac{11}{16}$″ high. $1\frac{5}{16}$″ deep.

HEAVY DUTY RELAY — TYPE No. 130. — A relay that has heavy current carrying and rupturing capacities for use in A.C. or D.C. circuits. Contact fingers are heavy stiff metal blades with large stainless steel springs for pressure. Large gap contacts with adequate surfaces. As high as four separate circuits may be opened simultaneously with the closing of up to four other circuits.



Coil Voltages —
D.C. — 24, 32, 115, 230 volts.
A.C. (60 cycles) — 24, 32, 115, 230, 440 volts.
Other voltages and frequencies available on special order.

Contact Arrangement —
Various combinations of contacts from one to four poles.

Contact Ratings, in Amperes —

Volts	Direct Current	D.C. with Blowout	A.C. 25 Cycles	A.C. 60 Cycles
0-24	25	25	25	25
25-125	3	20	25	25
126-250	1	10	25	25
251-440	....	....	10	15

Note: Blowouts required for relays that control Direct Current circuits in excess of 23 volts or a current of 1 ampere.

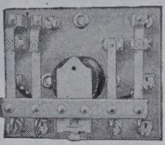
Dimensions — Base dimensions vary according to size of relay. Maximum depth, 3⅛″.

WARD LEONARD · RADIO AMATEUR and INDUSTRIAL RELAYS

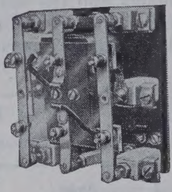
RELAYS FOR THE RADIO AMATEUR

A few examples of Ward Leonard's popular line of relays for use in radio circuits are illustrated here. Information on specifications and prices are detailed in Catalog D-11 which will be furnished on request made to Ward Leonard directly or through one of its agents or distributors.

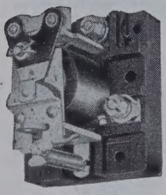
R. F. BREAK-IN RELAYS. — Otherwise known as "Push-to-Talk" Relay for' phone transmitters. Pushing button in control circuit connects proper transmitter circuits and disconnects proper receiving circuits to transmit. Releasing button switches all circuits back to normal position for receiving. Furnished in two sizes, Midget Type for light duty and the Heavy Duty Type.



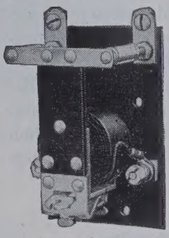
Midget Type



Heavy Duty Type



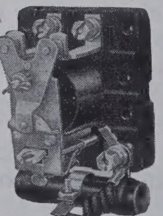
Low Voltage Type

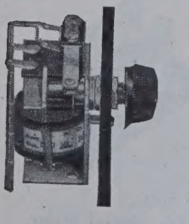


High Voltage Type

KEYING RELAYS.—Low voltage type for center-tap or grid-bias keying. High voltage type for use with grid controlled high voltage rectifier tubes. Use of Keying Relays reduces length of circuit wiring and permits control of keying with key located in convenient position for operating. Capable of keying up to 40 words per minute.

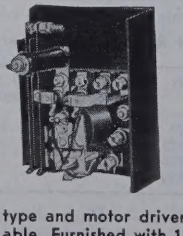
UNDERLOAD RELAY. — Protects against damage to tubes and other components of amplifiers when load failures occur, due, for example, to inability of one or more vacuum tubes to hold the load because of loss of excitation. De-energizing of relay coil when load drops opens contacts and prevents damage to transformers or tubes. Available from stock with coil adjusted to pick up at 100 m.a. to 200 m.a. DC or with coil adjusted to pick up at 200 m.a. to 400 m.a. DC.



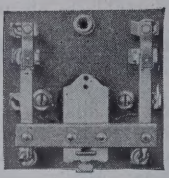


ROTARY RESET OVERLOAD RELAY. — For protection against overloading vacuum tubes of power amplifiers or transmitters. Current surge causes armature to be pulled in, breaking the rectifier primary circuit. A mechanical latch holds the contacts open until the operator closes them by turning the reset knob. Designed for panel mounting. Available from stock with 250 m.a. DC coil and 500 m.a. DC coil.

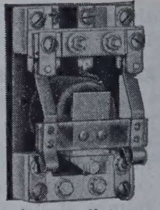
The use of Ward Leonard Relays in an Amateur Rig not only modernizes it, but also improves its efficiency and stability. Short r.f. leads prevent stray currents. Convenient control is provided.



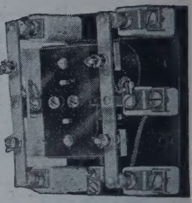
THERMAL TIME DELAY RELAY. — Delays the application of voltage to the plates of vacuum tubes until the filaments have heated. The relay illustrated is adjustable over a range of from 15 seconds to 45 seconds. Other time delay relays — thermal type and motor driven type — are also available. Furnished with 110 volt, 60-cycle AC coil.



Midget Type

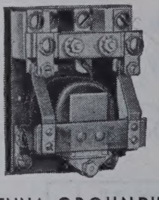


Intermediate Type

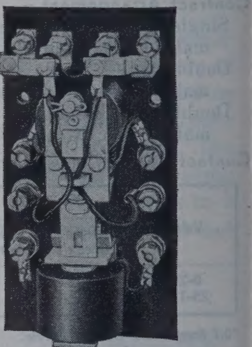


Heavy Duty Type

ANTENNA CHANGE-OVER RELAYS. — Switches antenna to transmit or receive. May also be used to switch transmitter or receiver to either of two antennas. Available in three sizes — Midget Type, Intermediate Type, and Heavy Duty Type. Midget Type built on Mycalex base. Contacts and terminals on Intermediate and Heavy Duty Types (except coil terminals) supported by ceramic blocks. Lucite crossarm used on all types.

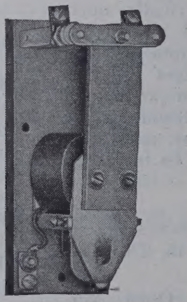


ANTENNA GROUNDING RELAY. — For grounding transmitting or receiving antenna when not in use. Contact arms supported on Lucite crossarm. Circuit contacts and terminals supported on ceramic insulation block. Coil terminals and grounding terminals mounted on Bakelite base. Double pole, double throw contacts, with fixed or adjustable normally closed contacts.

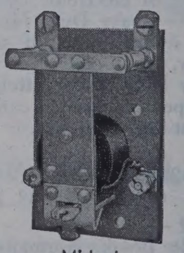


MIDGET LATCH-IN RELAY.—A multi-purpose relay especially useful in circuits where interference might be caused if relay coils were continually energized. Momentary energizing coil "pulls in" armature which is locked in position by mechanical latch. Momentary energizing reset coil releases latch allowing armature to drop to normal position.

BAND SWITCHING RELAYS.-Automatically changes frequency bands through two-wire control circuit. Installation on the relay in the set near the coils eliminates the need for long R. F. leads, such as are required when a panel-mounted switch is used. Mycalex insulation used for base and contact arms. Contacts and terminals spaced to insure against leakage or creepage of high frequency and high voltage in the circuit.

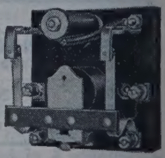


Heavy Duty Type



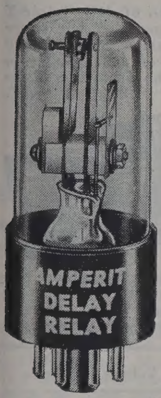
Midget Type

SAFETY RELAY. — A relay that should be installed in every amateur rig. It gives automatic protection against the hazards of high voltages in filter condensers when power supply unit is turned off. Furnished with resistor through which condensers are discharged. Furnished with normally closed contacts which open when transformer primary circuit is closed, energizing relay coil.



THERMOSTATIC AMPERITE DELAY RELAYS

GLASS ENCLOSED • HERMETICALLY SEALED • A.C., D.C., OR PULSATING CURRENT



EXCLUSIVE FEATURES of AMPERITE THERMOSTATIC DELAY RELAYS

- Actuated by a heater.
- Operates on A.C., D.C., or Pulsating Current.
- Hermetically sealed, Amperite Relays are not affected by altitude, moisture or other atmospheric conditions.
- Compact, lightweight and inexpensive.

TECHNICAL CHARACTERISTICS

CIRCUITS: SPST only — Normally open or normally closed.

HEATER WATTAGE: 2 W prox. — Heaters can be operated continuously.

CONTACT RATING: 115 V - 3A A.C. (or 440 V - 1.5A A.C.): maximum voltage across contacts — 1000 V. Maximum voltage between contacts and heater — 1500 V.

AMBIENT TEMPERATURES: Relays are compensated for temperatures of —55° to +70° C.

LIFE: With 115 V - 3A A.C., non-inductive, at least 25,000 operations.

BASE WIRING: Heater — Prongs 2-3; Contacts — 5-7.

LIST PRICE: Standard types of relays — $4.00 each.

DELIVERY: The types shown in bold type are most popular, and usually available from stock. Other types delivered in approximately 3 weeks.

Delay-Seconds	Tolerance Seconds	NORMALLY OPEN CONTACTS						NORMALLY CLOSED CONTACTS					
		HEATER VOLTAGES						HEATER VOLTAGES

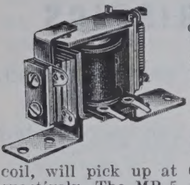
A QUALITY PRODUCT

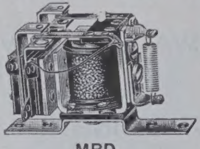
RELAYS
FOR AMATEUR AND INDUSTRIAL USES

NATIONAL ASSOCIATION RELAY MANUFACTURERS

MINIATURE RELAYS



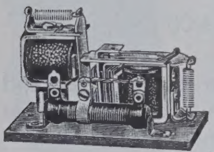
These units are very compact and are especially designed for plate circuit and general purpose control application. Overall dimensions: MR 1⅞" x 1⅜" x ⅞"—MRD 1⅞" x 1⅜" x 1¼". Contacts are fine silver rated 5 amps at 115 V. All AC relays are free from hum and AC chatter. The MR-2 and MRD-2 have 2500 ohm coil, will pick up at 6 ma. and 12 ma. respectively. The MR-5 and MRD-5 have 5000 ohm coils, will pick up at 3 ma. and 7.5 ma. respectively. The drop out value of these relays is approximately 50% of the pick up value.



MRD

Type	A.C.	D.C.	Contacts	Net Prices
MR-2		Plate Circuit	SPDT	$1.50
MR-5		Plate Circuit	SPDT	2.10
MR-6		6 V.	SPDT	1.50
MR-7	6 V.		SPDT	1.59
MR-11	110 V.		SPDT	1.59
MRD-2		Plate Circuit	DPDT	2.70
MRD-5		Plate Circuit	DPDT	3.60
MRD-6		6 V.	DPDT	2.70
MRD-7	6 V.		DPDT	3.00
MRD-11	110 V.		DPDT	3.00

OVERLOAD RELAYS

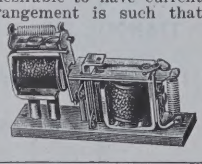


Adjustable overload relays provide accurate and positive protection against current surges and continuous overloads. Contact arrangements SPDT using $\frac{3}{16}$" fine silver contacts. This allows the use of either audible or visual signal to advise of overload. All models are of the electrical reset type which allows remote control resetting of the relay. Size—3¾" x 2" x 1½".

Type	Current Range	Reset Coil	Net Prices
OA-2	250–500 ma.	110 V. A.C.	$4.50
OA-5	500–1000 ma.	110 V. A.C.	4.50
OC-2	250–500 ma.	6 V. A.C.	4.50
OC-5	500–1000 ma.	6 V. A.C.	4.50
OD-2	250–500 ma.	6 V. D.C.	4.50
OD-5	500–1000 ma.	6 V. D.C.	4.50

LATCHING RELAYS

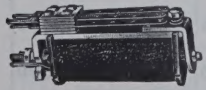
These relays are employed where it is not desirable to have current continuously on the coil. The latching arrangement is such that when the relay coil is energized the armature closes and locks in a closed position by mechanical latching. An electrical impulse on the reset coil releases the armature from the latch and allows the relay to assume its initial position. $\frac{3}{16}$" fine silver contacts. Bakelite Base. Size—3¾" x 2" x ¾".



Type	Reset Coil	Pull-in Coil	Net Prices
LEA	110 Volts A.C.	110 Volts A.C.	$3.75
LEA-6	6 Volts A.C.	6 Volts A.C.	3.75
LED	6 Volts D.C.	6 Volts D.C.	3.75

COMMUNICATION RELAYS

Ideally suited for use in telephone, remote control, signaling, communications circuits etc. High speed operation plus high sensitivity with high contact pressure. Contacts will handle 4 amps at 115 V. non-inductive load. Each relay has one make and one break contact sets. Size—3¾" x 1$\frac{3}{16}$" x 1⅝".

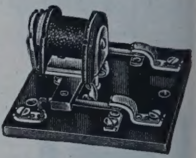


Type	Res. of Coil Ohms	Volts Pick-up	M.A. Pick-up	Net Prices
T10G	10,000	31	3.2	$3.30
T63F	6,300	24	4.0	3.30
T40F	4,000	19	5.0	3.15
T10F	1,000	10	10.0	2.85
T25E	250	5	20.0	2.55

ANTENNA CHANGE-OVER

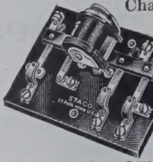
Mycalex Insulation is satisfactory for operation up to 60 MC. Triple-X insulation for operation up to 15 MC. All models use $\frac{3}{16}$" fine silver wiping action contacts rated at 4 amps. These relays are designed with ball-bearing armature pivot and have large contact spacing to assure minimum capacity between contact arms. The armature is designed so as to eliminate AC chatter. Size—3⅛" x 3⅛" x 2$\frac{3}{16}$".

Type	Insulation	Coil Voltage	Net Prices
ABA	TRIPLE-X	110 V. A.C.	$3.00
ABD	TRIPLE-X	6 V. D.C.	3.00
AMA	MYCALEX	110 V. A.C.	4.00
AMD	MYCALEX	6 V. D.C.	4.00



BREAK-IN RELAYS

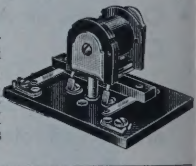
Same type of relay as above only two additional poles are added, one normally open, one normaly closed. This arrangement is perfect for PUSH-TO-TALK control. Contacts etc. identical with Antenna-Change-Over Relay. Size—4½" x 3⅛" x 2$\frac{3}{16}$".



Type	Insulation	Coil Voltage	Net Prices
BBA	TRIPLE-X	110 V. A.C.	$4.20
BBD	TRIPLE-X	6 V. D.C.	4.20
BMA	MYCALEX	110 V. A.C.	6.00
BMD	MYCALEX	6 V. D.C.	6.00

R.F. AND GENERAL PURPOSE RELAY

An excellent relay for R.F. or high voltage remote control. Contacts are $\frac{3}{16}$" fine silver rated 4 amps. Designed with extremely short R.F. path, Ball-bearing armature pivot. All metal parts cadmium plated. RB Series are TRIPLE-X insulated for frequencies up to 15 MC., RM series are MYCALEX insulated for frequencies up to 60 MC. Size—2¼" x 3⅛" x 2$\frac{3}{16}$".

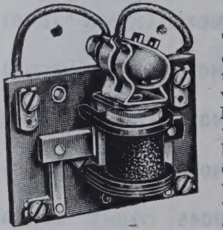


Type	Insulation	Contact Combination	Coil Voltage	Net Prices
RBA-1	TRIPLE-X	SPST (dble-break)	110 V. A.C.	$2.10
RBD-1	TRIPLE-X	SPST (dble-break)	6 V. D.C.	2.10
RMA-1	MYCALEX	SPST (dble-break)	110 V. A.C.	2.55
RMD-1	MYCALEX	SPST (dble-break)	6 V. D.C.	2.55
RBA-2	TRIPLE-X	DPST (sgle-break)	110 V. A.C.	2.25
RBD-2	TRIPLE-X	DPST (sgle-break)	6 V. D.C.	2.25
RMA-2	MYCALEX	DPST (sgle-break)	110 V. A.C.	3.00
RMD-2	MYCALEX	DPST (sgle-break)	6 V. D.C.	3.00

KEYING RELAY

Same specifications as RB Series except that the coil and return spring are faster acting. Follows a "Bug" with ease.

Type	Coil Voltage	Contacts	Net Prices
KBA	110 V. A.C.	SPST (double-break)	$2.10
KBD	6 V. D.C.	SPST (double-break)	2.10
KBA-6	6 V. A.C.	SPST (double-break)	2.10



MERCURY-SWITCH RELAY

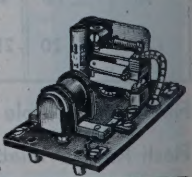
This type relay is used for controlling inductive loads and may be safely used in the presence of explosive dust, gas and vapor. This unit will safely handle a ¼ H.P. motor or its equivalent. This single pole single throw mercury relay can easily be changed from normally open to normally closed by reversing the mercury tube in the clip. In addition this relay is equipped with SPST double break $\frac{3}{16}$" fine silver contact sets which can be used to electricaly lock this relay, or other applications. Mounts vertically with adjusting screws. Size—3⅛" x 2⅞" x 3½".

Type	Coil Voltage	Net Prices
MSA	110 V. A.C.	$3.75
MSA-6	6 V. A.C.	3.75
MSD-6	6 V. D.C.	3.75

TIME-DELAY RELAY

Low cost Thermostatic Time delay relays designed for transmitting and industrial use. Prevents damage to tube filaments due to application of plate current before filaments are thoroughly heated. TD-11 is equipped so that it automatically compenastes for ambient temperature changes. Time delay can be adjusted by means of screwdriver. Stock models are 110 V. AC. Size—3⅛" x 3⅛" x 2$\frac{3}{16}$".

TD-11 (10-60 Sec.)—With compensator...... Net $4.75



SPEED-X

SPEED-X keys, formerly made by Les Logan Co. of San Francisco, Calif., have attained a pre-eminent position as the leading complete line. Now manufactured by JOHNSON, their reputation will be maintained, and improved wherever possible.

HIGH SPEED SEMI-AUTOMATIC KEYS

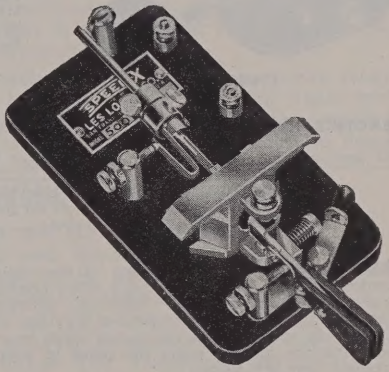
SPEED-X Semi-Automatic Keys are designed and constructed to rigid specifications and are approved by the experienced professional and amateur C. W. operators. They are fully adjustable from lowest to highest speeds. Manufactured in four distinctive and attractive models. Fully guaranteed against any defect in material or workmanship. Bases of all models drilled for stationary mounting.

STANDARD MODEL 114-500. New-Improved Standard Model Semi-Automatic Key mounted on extra heavy steel base 3½" x 6¼" x ½" finished in attractive wrinkle baked enamel. Mounted on four rubber feet to insure stationary position at all times. The finish will not scratch or chip and will last indefinitely. The frame is finished same as base and has five adjustments with lock nuts, assuring dependable operations at all speeds. Vibrator arm, posts, switch and all machine parts heavily plated in beautiful satin chromium. Complete with adjustable weight, ⅛" pure silver contacts, circuit-closing switch and two paddles adjustable to any desired height. Net weight 4½ lbs.

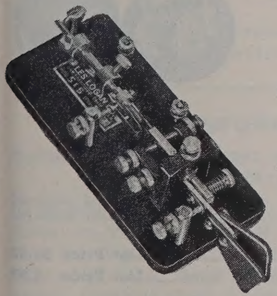
114-500	**List Price $17.50**
114-500-L (Left-handed model)	**List Price 19.50**

MODEL 114-501. Beautiful Chrome finish. Heavy steel base 6¼" x 3½" x ½" with four non-slip rubber feet. Heavy brass connector strips mounted under base. Heavy die cast frame with same finish as base and with five screws for sensitive adjustments. Vibrator is designed to obtain slowest and fastest speeds required by high speed operators. Pure silver ¼" contacts. Pigtail connections to vibrating arm. Perfectly aligned free acting vibrator bearings. Lock nuts on all adjustments. Paddles adjustable to any required height. All machine parts heavily chrome plated, which makes this the most outstanding semi-automatic key on the market. Furnished with circuit closing switch. Net weight 4½ lbs.

114-501	**List Price $25.00**
114-501-L (Left-handed model)	**List Price 27.50**



Nos. 500, 501



114-515

AMATEUR MODEL 114-515. Baked Black Wrinkle Enamel Finished Steel Base 6¼" x 3" x ⅜" with four rubber feet to prevent slipping or tilting. Heavy Brass connector strips. Die Cast Frame finished same as base with adjustable trunion screws. Chromium brass Vibrator has main spring and U-spring made of clock spring for smooth snappy action. Adjustable weight. Two adjustable black fibre paddles. Two sets ⅛" pure silver contacts. Lock nuts for every adjustment. Damping wheel, post screws, springs and terminals chrome plated. Packed in attractive carton. Net weight 3¼ lbs.

114-515	**List Price $12.50**
114-515-L (Left-handed model)	**List Price 15.00**

JUNIOR MODEL 115-510. Die Cast Base 2¾" x 6" x ¾" finished in black wrinkle baked enamel concealing heavy brass connector strips. Frame is same finish as base and all other parts are chromium plated. Vibrator Arm same as Standard model with lots of pep. Adjustable from eight words per minute to as high a rate as desired. Pure silver ⅛" contacts, adjustable weight and two adjustable paddles. Circuit closing switch mounted on base. Being small, compact and streamlined, this semi-automatic key is an outstanding value. A light-weight but sturdily built machine for clean-cut sending. Net weight 2½ lbs.

114-510	**List Price $13.50**

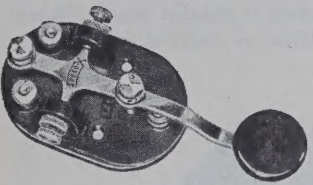
SPEED-X

MOULDED BAKELITE KEYS, BUZZERS, PRACTICE SETS

SPEED-X Moulded Bakelite and Metal Hand Keys, Practice Sets and Buzzers are used throughout the world as standard equipment in amateur and commercial work. Each unit is built according to rigid specifications and is fully guaranteed. All models have holes for stationary mounting. Code card supplied with each individually packed unit.



114-301

AMATEUR KEY 114-301—A general purpose key with moulded black bakelite base. Perfect insulation—adjustable smooth acting bearings — improved spring — nickel key arm — pigtail connections—no current on bearings—1/8'' pure silver contacts. Net Wt. 6 oz.

114-301	**List Price $3.00**
114-301-S—Same as Model 301 with circuit closing switch mounted on base	**List Price 3.50**
114-301-SL with 1/4'' Contacts	**List Price 3.75**

PRACTICE KEY 114-300 — A well-built and inexpensive practice key for the beginner. Moulded Brown Bakelite base and knob. Spring bearings, perfect action, simple adjustments, 1/8'' pure silver contacts. All machine parts nickel plated. Standard Code card furnished. Net Wt. 5 oz.

114-300	**List Price $1.75**
114-300-L with 1/4'' Contacts	**List Price 2.00**

PRACTICE KEY 114-312—Heavy die cast base finished in Gray Wrinkled Enamel. Smooth adjustable contacts. 1/8'' pure silver contacts. Has provision for plugging in our semi-automatic keys when desired. Net Wt. 9 oz.

114-312	**List Price $3.25**
114-312-S—Same as Model 114-312 with circuit closing switch mounted on base	**List Price 3.75**
114-312-SL with 1/4'' Contacts	**List Price 4.00**

PRACTICE SET 114-450—Consists of one constant frequency adjustable buzzer and a standard hand key with 1/8'' pure silver contacts mounted on a moulded brown bakelite light-weight base 6'' x 4''. Adjusting screws, key arm and all machine parts nickel plated. Light Spring for perfect keying. A complete sending and receiving set. Three hook-up diagrams on carton show how this Practice Set may be used singly for code practice and in pairs for point to point communications. Standard Code Card included. Net Wt. 12 oz.

114-450	**List Price $4.50**

BUZZER
KEY
MODEL 450 PRACTICE SET
SPEED-X
SAN FRANCISCO
SPEED-X

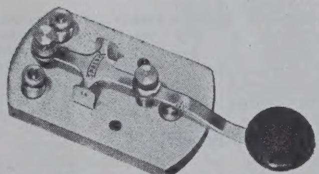
114-450

CONSTANT FREQUENCY BUZZER 114-400—Moulded Black Bakelite Base and Cap eliminates insulation problems. Large pure silver contacts—precision parts hold adjustments. Additional adjustment on vibrator. Resistance 2 ohms. Operates on two dry cells or one "C" battery. A high quality buzzer for all purposes. Net Wt. 3 oz.

114-400	**List Price $2.00**

114-400

HEAVY DUTY METAL HAND KEYS



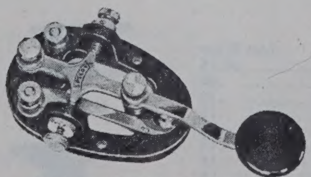
114-300, 114-305, 114-306

METAL HAND KEY 114-305—An inexpensive metal base key with black wrinkled enamel finish. Smooth acting spring bearings and adjustable key arm spring. Key arm and all machine parts bright nickel finish. 1/8'' pure silver contacts. Net Wt. 10 oz.

114-305	**List Price $1.90**
114-306—Same as Model 114-305 with Baked Wrinkle Brass finished base	**List Price 1.90**

STANDARD KEY 114-310—Heavy die cast base finished in black wrinkled enamel. Smooth adjustable bearings. 1/8'' pure silver contacts. Has provisions for plugging in our semi-automatic keys when desired. Net Wt. 9 oz.

114-310	**List Price $3.25**
114-311—Same as 114-310 with Chromium finish base and parts	**List Price 4.00**
114-316—Same as 114-310 with Baked Wrinkle Enamel Brass finish base	**List Price 3.25**
114-316-L with 1/4'' Contacts	**List Price 3.50**



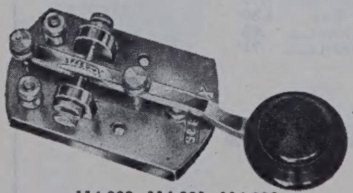
114-310, 114-311, 114-316

STANDARD KEY 114-310-S—Same specifications as Standard model key 114-310 with circuit closing switch mounted on base. 1/8'' pure silver contacts. An attractive high-quality key. Net Wt. 10 oz.

114-310-S	**List Price $3.75**
114-311-S—Same as 114-311 with circuit closing switch mounted on base	**List Price 4.50**
114-316-S—Same as 114-316 with circuit closing switch mounted on base	**List Price 3.75**

HEAVY DUTY KEY 114-320—Black wrinkle enameled extra heavy Die Cast Base. Large sturdy chromium plated key arm with adjustable steel bearings. Heavy brass connector strip concealed under base. Well insulated for heavy duty work. Improved Navy Type Knob and 1/4'' pure silver contacts. Net Weight 12 oz.

114-320	**List Price $4.25**
114-321—Chromium Base	**List Price 5.00**



114-320, 114-321, 114-326

HEAVY DUTY KEY 114-326—Same specifications as Heavy Duty Model 114-320 but base finished in a beautiful Lacquered BRASS finish. Arm and machine parts chromium plated. Well designed spring gives this model a light keying touch. Navy Type Knob and 1/4'' pure silver contacts. Net Wt. 12 oz.

114-326	**List Price $4.25**

The Vibroplex

A SEMI-AUTOMATIC TELEGRAPH AND WIRELESS TRANSMITTING MACHINE

Embodying the latest exclusive features

USED BY THE WORLD'S BEST OPERATORS

Prominent features which have been contributed to the success of the Vibroplex are:

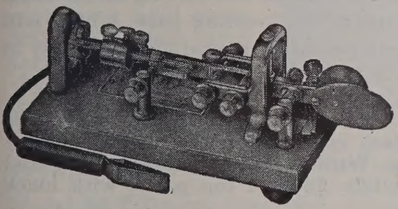
Simplicity • Durability
Perfect control • Easy adjustment
Strong carrier • Ease of manipulation
Adaptability to changing wire conditions
Ability to transmit perfect Morse and Continental signals at high speed

These features, which are found only in the genuine Vibroplex models illustrated on these pages, make for clear, rapid, easy transmission; relieve the arm of strain caused by sending on the ordinary key; rest and strengthen the overworked muscles, and prevent telegrapher's paralysis.

CLEAR, RAPID SENDING MADE EASY

The Vibroplex transmits the same grade of Morse and Continental code as the strongest clearest hand sender, faster than is possible on the ordinary key, and with less than half the labor.

There is no tensing of the muscles, no nerve strain, no pounding on the key in order to make clear, rapid signals. **You simply press the lever — the machine does the rest.**



Your name engraved on base, $1.50
Additional engraving, 15c per letter

New SUPER DE LUXE "PRESENTATION" VIBROPLEX

The Finest Bug Ever Built! 24K Gold-Plated Base Top, Patented Jewel Movement and Super-Speed Control!

New patented adjustable main spring affords wider range of speed than ever obtained before in semi-automatic transmitting key. Beautifully-designed with polished chromium machine parts mounted on a 24K gold-plated base top, colorful red switch knob, finger and thumb piece and precision-machined. This new Super-DeLuxe "Presentation" Vibroplex key at $27.50 affords a life-time of sending enjoyment. Harder than metal, the jewels in this key reduce friction, maintain smoother, easier operation and prolong life.

Amateur Net Price........ $27.50

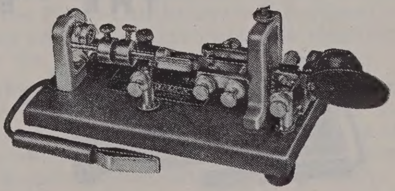
THE *Improved* "ORIGINAL" VIBROPLEX

Suitable for All Classes of Transmitting work Where Speed and Perfect Morse Are Prime Essentials

This great new Vibroplex is a smooth and easy working BUG. It has won fame on land and sea for its clarity, precision and ease of manipulation. Can be slowed down to 10 words per minute or less or geared to as high rate of speed as desired. Maintains the same high quality signal at whatever speed, insuring easy reception under all conditions.

SPECIFICATIONS

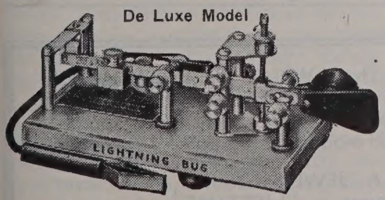
The improved model, single lever. Two pairs of contact points: one for dots, the other for dashes. Weight, 3 lbs. 8 oz. A handsome and efficient transmitting machine, with unlimited sending possibilities. Complete with cord and wedge.



Standard — Polished Chromium top parts, black base. Amateur Net Price.......... $15.95

DeLuxe—Polished Chromium base and top parts, with jeweled movement. Amateur Net Price 19.50

THE "LIGHTNING BUG" VIBROPLEX



De Luxe Model

High Quality Signals at All Speeds

SPECIFICATIONS

Single lever, with improved flat pendulum, instantly adjustable dot contact spring, circuit breaker parallel with pendulum. Two pairs of contact points, one for dots, the other for dashes. Complete with cord and wedge. Weight 3 lbs. 8 oz.

Standard—Polished Chromium top parts, black base. Amateur Net Price $13.95

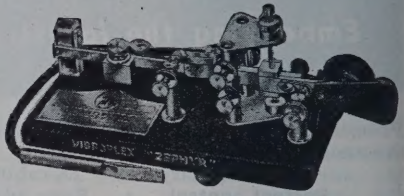
DeLuxe—Polished Chromium base and top parts, with jeweled movement. Amateur Net Price 17.50

The Vibroplex

Telegraph & Wireless Transmitting Machines

THE "ZEPHYR" VIBROPLEX

A Genuine Vibroplex. Slightly Lighter in Weight.
Having Plenty of "Pep" and "Power"



Smaller and more compact but designed in most details the same as the "Lightning Bug" model. Planned to meet the demand for a low priced, efficient and high speed transmitter for telegraph use.

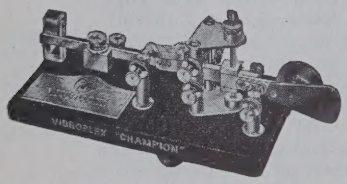
SPECIFICATIONS

Single lever with standard size contact points. Mounted on slightly smaller base. Weight 3 lbs. 2 oz. Equipped with circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.

Amateur Net Price **$12.50**

THE "CHAMPION" VIBROPLEX

For Radio Use Only



Designed to Fulfill the Demand for a Low Priced Radio Transmitter

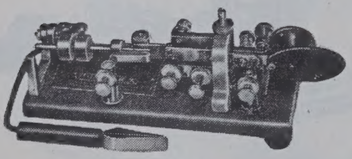
The new "Champion" is an inexpensive transmitter having exceptional sending qualities . . . clarity . . . speed . . . sending ease, which will appeal alike to amateur and professional radio operators. Designed to meet the demand for a low priced Vibroplex in the radio field.

SPECIFICATIONS

Single lever with two pairs of contact points. Mounted on large standard size base. Weight 3 lbs. 8 oz. Without circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.

Amateur Net Price **$9.95**

THE "BLUE RACER" VIBROPLEX



Very similar to the Original Vibroplex except that it is only half the size. Suitable for all classes of telegraph work and in high favor with wireless men.

Small and compact, the "Blue Racer" Vibroplex can be carried around and never be in the way. Embodies the same sending possibilities, the same carrying qualities, the same strength and durability as the larger models. Built especially to meet the demand of telegraphers requiring a small, lightweight and efficient sending machine.

SPECIFICATIONS

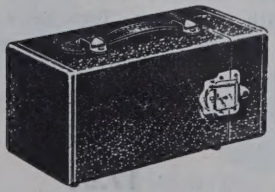
Single Lever. Two pairs of contact points—one for dots, the other for dashes. Weight, 2 lbs. 8 ozs. Complete with cord and wedge.

Standard—Polished Chromium top parts, black base . . . Amateur Net Price **$15.95**

DeLuxe—Polished Chromium base and top parts, with jeweled movement. Amateur Net Price **19.50**

VIBROPLEX CARRYING CASE

Keeps the Machine Free from Dust, Dirt and Moisture
Insures Safe-keeping When Not in Use



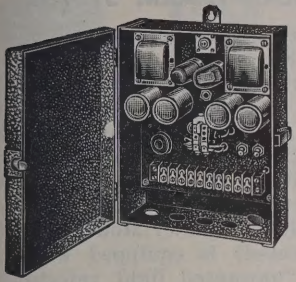
A cloth-lined case, finished in handsome simulated black morocco. Corners are reinforced, adding to its durability and attractiveness. A flexible leather handle makes it more convenient to carry. Has lock and key.

PRICE **$5.50**

The JEWELS used in the DeLuxe Model Vibroplexs are the same as placed in the world's finest precision made watches and instruments.

A JEWEL bearing main lever insures a "LIFETIME" of service and an ease of operation that can only be referred to as "FEATHER-TOUCH" sending.

MODEL 63 MASTER AMPLIFIER

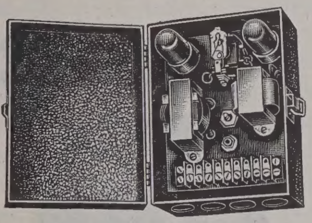


Model 63 Amplifier is especially designed for use with a correct combination of standardized Worner Photo-Cell and Light Source units. However, this Amplifier will operate also from Light Source units, such as daylight, artificial lights, radiant energy from metallic processing, etc.

Model 63 Amplifier is a specially engineered, highest quality unit. It enjoys wide preference as it efficiently meets 95 per cent of industrial requirements and replaces the need of costly individually engineered equipment. Technical details on request.

Model 63 Master Amplifier....................each $85.00

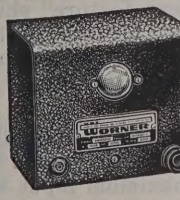
MODEL 64 ECONOMY AMPLIFIER



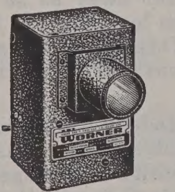
This Amplifier is an economical unit for practically any industrial application where economy is a factor or requires a light beam distance of not more than 50 feet or where the Relay is not required to operate in excess of 250 times a minute. Can be furnished for greater distances or speed, technical details furnished on request.

Model 64 Economy Amplifier....................each $56.00

MODEL 62 R & L AMPLIFIER AND LIGHT SOURCE SET



Model 62-R Amplifier



Model 62-L Light Source

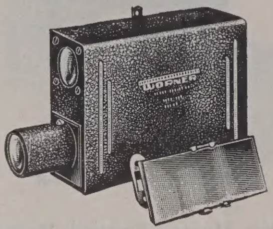
This "two-unit" set has specially designed Light Source unit and an Amplifier unit that includes the Photo-Cell Receiver, Relay and other electrical controls. This combination has proved efficient for countless simple applications for distances from a few inches to 75 feet or where Relay is not required to operate in excess of 300 times a minute.

The "two-unit" set will supervise efficiently on a simple application, such as: Counting or sorting large objects; limit switches; start and stop operations; light density; fire protection; flame control; opening doors, etc.

Model 62 R & L "Two-Unit Set....................per set $70.00
Model 62-R Amplifier only....................each 58.00
Model 62-L Light Source only....................each 18.00

FOTOLECTRIC ANNOUNCER

Automatically Announces the Entrance or Passing of Any Object



Model 61-A

The Fotolectric Announcer unit is designed to project a "beam of light" across any entrance to any room, building or premises. The breaking of this light beam by any person entering will activate a chime or other sound to automatically announce the entrant. Can serve countless purposes and solve most entrance problems efficiently.

Model 61 Fotolectric Announcer includes Light Source and sensitive Photo-Cell units in one compact metal case, finished in black crackle lacquer. Size, 10¾ x 7½ x 2¾ inches.

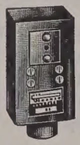
Model 61 Announcer with Chime....................each $31.25

Model 61-A Fotolectric Announcer, the same unit as described above except that it is equipped with an optical system to arrest unwanted light.

Model 61-A Announcer with Chime....................each $34.25

LIGHT SOURCE UNITS AND PHOTO-CELL RECEIVER UNITS

Model 33



Model 23

Model 31

Model 21

The Light Source unit is designed to project the light beam and the Photo-Cell Receiver is designed to pick up the beam and convert its light into electrical energy through the Amplifier unit.

Model 33 Light Source is "standard" for general applications and is most generally recommended. Its light beam covers a distance from a few inches to 50 feet from Light Source to Receiver. Heavy duty, cast iron unit with ½-inch conduit fittings. Gray finish.

Model 23 Photo-Cell Receiver is engineered for use with Model 33 Light Source and has the same case specifications.

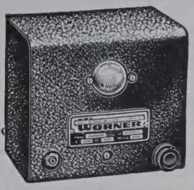
For use in damp surroundings, Models 33 and 23 can be made water-proof at slight additional cost.

Model 31 Light Source is "standard" where a lighter weight case is practical. Its light beam covers a distance from a few inches to 25 feet from Light Source to Photo-Cell Receiver. Case is 18 gauge steel, gray crackle finish. Has ½-inch knockout.

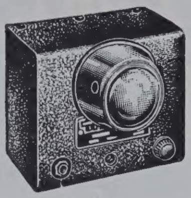
Model 21 Photo-Cell Receiver is engineered for use with Model 31 Light Source and has the same case specifications.

Model No.	Description	Size, Inches	Price, Each
33	Light Source Housing	4¼ x 2¾ x 2¾	$11.00
23	Photo-Cell Receiver	4¼ x 2¾ x 2¾	16.00
31	Light Source Housing	6⅝ x 2 x 1¾	9.00
21	Photo-Cell Receiver	6⅝ x 2 x 1¾	14.00

MODEL 9000 SERIES
FOTOLECTRIC BURGLAR ALARM SYSTEM



Amplifier Model 9100-R



Amplifier Model 9150-R

This series consists of One Master Control Panel operating with one or more (up to 4) Fotolectric Light Source and Amplifier sets. The combination may be used with traps, foil systems and other equipment as used by professional burglar alarm companies, to operate audible or visible alarms.

Any interruption of the light beam operates whatever alarms the user wishes to install. The complete alarm circuit is supervised by the Master Control Panel which is remotely located for operator's convenience.

All Model 9000 series Amplifiers contain the following: Heavy duty transformers 110-120-volt, 50 to 60 cycle, A.C. with dual secondary. Potentiometer type sensitivity control. Meter Jack to determine correct cut-off and plate current in Relay circuit. Electrolytic condensers. Double pole, double throw 5-amp. relay.

Constructed of 18-gauge steel, welded, gray wrinkle finish. Size: 7 x 6¼ x 4¼ inches. (Not weatherproof.)

Model No.	Description	Range per Set	Price, Each
9100	Master Trespass Trap	100 ft.	$70.00
9150	Master Trespass Trap	150 ft.	90.00
9250	Master Trespass Trap	250 ft.	130.00
9500	Master Trespass Trap	500 ft.	225.00

Model 9000 Control Panel, $45.00 list, supplied with plate relays equal to the 9000 series Amplifiers ordered. If 9000 series Amplifiers are ordered without Control Panel, plate relay is supplied with Amplifiers to be mounted in Control Panel.

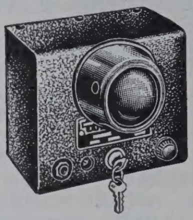
MODEL 7000 SERIES
FOTOLECTRIC BURGLAR ALARM SYSTEM

The Model 7000 series operates in conjunction with professional independent burglar alarm company's central office or local equipment.

The 7000 series Amplifiers are complete with the following scientifically engineered equipment: Tubes. Lenses. Heavy duty shielded Amplifier transformer 110-120 volt, 50-60 cycle, A.C. with dual secondary. Potentiometer sensitivity control. Meter Jack to determine correct cut-off and plate current in relay circuit. Electrolytic condensers. Single-pole, double-throw relay, self-wiping contacts rated at 5 amp. non-inductive at 110-120 volts, 50 to 60 cycle.

Model No.	Description	Range per Set	Price, Each
7100	Remote Cont. Trespass Trap	100 ft.	$70.00
7150	Remote Cont. Trespass Trap	150 ft.	90.00
7250	Remote Cont. Trespass Trap	250 ft.	130.00
7500	Remote Cont. Trespass Trap	500 ft.	225.00

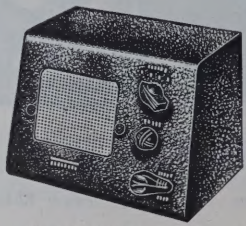
MODEL 5000 SERIES
FOTOLECTRIC BURGLAR ALARM SYSTEM



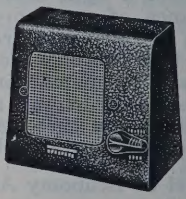
Model 5000 series consists of a Light Source unit and an Amplifier unit. This combination is designed for interior use where a single beam is considered ample protection; it is not intended for use with protective devices such as foil systems, etc. Furnished for 110 volts. Amplifier Model 5150-R (illustrated) is equipped with a scientifically engineered "unwanted light rejector," which materially increases the day-light range of the unit and makes it equal to the night-time range, if equipment is installed so that 90 per cent of the light reaching the Photo-Cell is that guaranteed by the Light Source.

Model No.	Description	Range	Price, Each
5100	Single Beam Trespass Trap	100 ft.	$75.00
5150	Single Beam Trespass Trap	150 ft.	95.00

WORNER
COMMUNICATING SYSTEMS



Models P-359, P-353



Model P-360

All WORNER units operate efficiently as far as 2000 feet unit. Persons at or near Sub-stations when called may answer without leaving their work, from as far away as 25 feet. "Silent feature" shuts out noise in vicinity at Station. 110 volt to 120 volt, A.C. or D.C. Units are shipped complete with wiring diagrams and instructions for easy installation.

Model P-359 Selective Master Station. Handles 1 to 5 Sub-stations. Has 3-tube amplifier. 1 watt output. Contains 5-inch speaker for maximum input without talking directly into unit. In substantial all-metal cabinet; size: 9 x 6¼ x 6 inches. Finished in hammered walnut lacquer finish. Complete with tubes and instructions.................each **$34.75**

Model P-353 Combination Master Station. 2 to 5 units may be used, in any combination of Masters to Masters, or Masters to Sub-stations. Contains 3-tube amplifier. Complete with tubes and instructions.................each **$47.50**

Model P-360 Sub-station. Has 5-inch speaker. Talk-listen switch used by Sub to originate call; not used after Master answers. In substantial all-metal cabinet as illustrated; size: 7¼ x 4 x 6 inches; finished in attractive hammered walnut lacquer finish.

each **$11.50**

TELEPHONE CELL
This dry cell is the original telephone cell greatly improved and is built especially for telephone use. It delivers long service with uniformity and dependability in the highest degree.
A NATIONAL CARBON COMPANY PRODUCT
MADE IN U.S.A.

"EVEREADY" "IGNITOR" DRY CELL NO. 6 — For extra long life and heavy service in all Dry Cell applications. Its exceptionally high quality and recuperative powers have made the "Eveready" "Ignitor" dry cell famous for ignition, radio, bells, buzzers, electric games, toys, lanterns and other battery operated devices.

"EVEREADY" R.R. AND INDUSTRIAL NO. 6 — Especially designed for Railroad and Industrial use where a wide range of service conditions, from extremely heavy to extremely light are encountered.

"EVEREADY" "COLUMBIA" "GRAY LABEL" TELEPHONE CELL NO. 6 — Especially designed for telephone service. Noted for its long life on light drain service.

***Equipped with Fahnestock spring terminals unless screw terminals are specified.*

"EVEREADY" "HOT SHOT" BATTERIES — For all purposes requiring four or more dry cells in series. Particularly adapted for electric fences, gas engines (tractors, motor boats, etc.), blasting, fire and burglar alarms, gongs, bells, annunciators, signals, lights for closets, out-houses, camps, boats, searchlights, etc.

"Eveready" "Hot Shot" Batteries are composed of specially selected cells. Internal connections are securely soldered and the cells are completely insulated against accidental short circuits. Terminals are insulated.

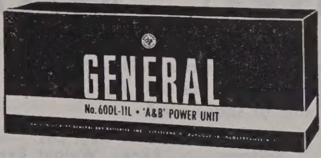
†Pacific Coast Price

be sure with GENERAL DRY BATTERIES

DURO POWER G&B PATENTED

GENERAL dry batteries contain many outstanding advancements such as extra heavy seamless extruded zinc cups, the famous paper thin separator permitting more mix and more active zinc area by utilization of the cell bottom, the curled rim lock seal which seals each cell individually. These features, found only in Generals, assure long shelf life as well as the maximum in dry battery performance.

GENERAL A & B RADIO FARM PACKS



General A-B packs are made with L size cells in the A section. These cells are 40% longer than the largest conventional 1¼″ diameter cell. This construction assures the perfect balance between these "A" and "B" sections for current drains established by the Radio Industry.

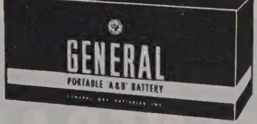
GENERAL PORTABLE A & B PACKS



The small size cells used in portable batteries greatly reflect the benefits derived from General's patented construction. General Batteries deliver more service hours per dollar, therefore you will find them used as original equipment in more battery radios than any other brand.

GENERAL "DuroMite" BATTERIES

New General DuroMite batteries are the finest in battery design and assembly. Thin, well-balanced flat cells are stacked like a roll of wafers. Each stack of cells sealed in its own plastic case, keeping the cells fresh until put in use. Maximum service life can be obtained from minimum of space used.

GENERAL *"Leakproof"* & LANTERN BATTERIES

The New General *"Leakproof"* flashlight cell comes to the market to fulfill the demand of practically every user. This demand is for extra long service, years of shelf life and protection against corrosion damage. The Industrial cell is recommended when light is needed frequently and for long periods.

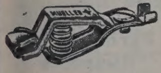
Mueller Electric Co.

CLEVELAND, OHIO

MUELLER BATTERY AND TEST CLIPS

U.S. PATENTS: 1,521,903; 1,686,842; 1,779,442; 1,794,976; 1,965,151; 1,994,251; 1,999,613: 2,074,324; 2,136,814; 2,416,113.

For use in making quick, temporary electrical connections. Packed 10 in a box, half marked + half plain to indicate polarity.
Screw connections



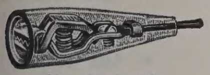
No. 45 PEE WEE

A very small test clip for radio, ignition, meter and similar work. 1½″ long. Jaw spread ⅜″. Steel, cadmium plated.

EACH NET..................$0.07 **LOTS OF 10**..................$0.045

No. 45-C

Solid Copper R.F. Test Clip

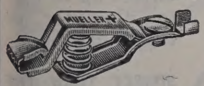


No. 45-C Clip
No. 47 Insulator

Solid copper radio frequency test clip. Phosphor bronze spring, brass screw. Will not heat up in high frequency test work, entirely non-ferrous. 1½″ long.

EACH NET..................$0.10 **LOTS OF 10**..................$0.07

Use **No. 47** Insulator for clips 45 and 45-C.



No. 48-B

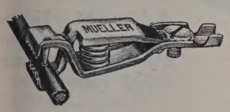
A small test and battery clip for radio use and general testing purposes. 2″ long. Jaw spread ½″. Steel, cadmium plated.

EACH NET....$0.07 **LOTS OF 10**...$0.05

No. 48C—Solid Copper. Same size as 48-B.

EACH NET..................$0.12 **LOTS OF 10**..................$0.085

No. 82 Needle Clip

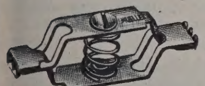


Needle pierces insulated wire. Ideal for quick hookup of truck trailer lighting systems, telephone and signal work. Steel, cadmium plated. 2″ long.

EACH NET..................$0.15
LOTS OF 10..................$0.10

Use **No. 49** Insulator for Clips 48-B, 48-C and 82.

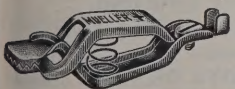
No. 22 Twin-Clip



Jaws on both ends. Great time-saver in test work. Used to hold or rack articles for display or processing. 2″ long. Steel cadmium plated.

EACH NET....$0.10 **LOTS OF 10**....$0.07

No. 27



A high grade test clip with meshing teeth on three sides of jaws. For laboratory and shop test work 2 7/16″ long. Jaw spread ⅝″. Steel, cadmium plated.

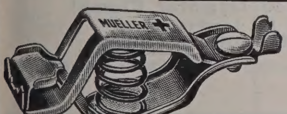
EACH NET..................$0.10 **LOTS OF 10**..................$0.07

No. 27-C—Solid copper. Same size as No. 27.

EACH NET..................$0.18 **LOTS OF 10**..................$0.125

Use **No. 29** Insulator for clips 27 and 27-C.

No. 24-A



A medium sized battery clip. Stands erect on battery post. Lead coated, copper shunt protects spring. 2⅞″ long. Jaw spread 1″. Steel, lead plated.

EACH NET..................$0.14
LOTS OF 10.................. .095

No. 24—Solid copper. Same size as No. 24-A.

EACH NET..................$0.25 **LOTS OF 10**..................$0.18

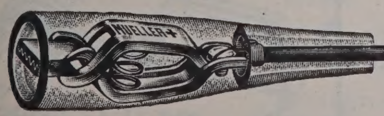
Use **No. 26** Insulator for Clips 24-A and 24.

LARGER SIZES OF CLIPS

	Each Net	Lots of 10
No. 21-A—Heavy Duty Steel, lead plated, 4″ long	$0.21	$0.15
No. 21—100 Amp. Solid Copper, 4½″ long	.61	.43
No. 11A—100 Amp. Steel, lead plated. 6″ long	.75	.53
No. 11—200 Amp. Solid copper. 6″ long	1.17	.82
No. 33—300 Amp. Solid copper. 7¾″ long	2.00	1.40

(Above furnished with lug connections.)

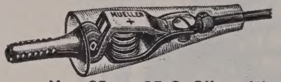
FLEXIBLE INSULATORS FOR CLIPS



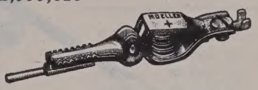
A convenient protection against short circuit and electric shock. Packed 10 in a box, 5 red and 5 black to indicate polarity. Long tail prevents breakage of wire. Constructed so that clip is held in firmly.

CROCODILE CLIPS

U.S. Patent No. 1,999,613



No. 85 or 85-C Clip with No. 87 Insulator



No. 85-T Clip

No. 85—A very small clip with slender, elongated jaws for getting into tight places in radio or electrical test work. Screw connection. 2⅛″ long.

EACH NET..................$0.08 **LOTS OF 10**.................. $0.05

No. 85-C—Same as No. 85, except solid copper. A radio frequency, entirely non-ferrous test clip.

EACH NET..................$0.11 **LOTS OF 10**..................$0.08

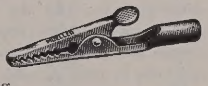
No. 85-T—New Crocodile "Tip-Clip"—equipped with standard phone tip on one jaw, otherwise same as No. 85. Ideal for use as a prod, for ordinary clip connections and for connections to insulated binding posts having non-removable heads. 2⅝″ long.

EACH NET..................$0.16 **LOTS OF 10**..................$0.11

Use No. 87 Insulators for clips 85, 85-C and 85-T. Red and Black. Cover entire clip except nose. Protects against short and shock. Helps to distinguish leads.

ALLIGATOR CLIPS

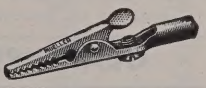
No. 60—CONVENTIONAL TYPE



Accurately made, slim jaws, fine meshing teeth. Convenient, round thumb grip, barrel connection for banana plug. Equipped with small soldering lip. Strong spring with a hard bite. Cadmium plated. 2″ long.

EACH NET..................$0.07 **LOTS OF 10**..................$0.045

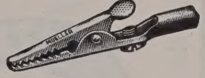
No. 60-S—SCREW CONNECTION



Eliminates necessity for soldering. Otherwise same as No. 60.

EACH NET $0.08 LOTS OF 10 $0.05

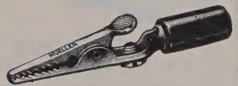
No. 60-CS—COPPER R.F. ALLIGATOR CLIP



Same as No. 60-S except made of solid copper. Has brass screw connection. Ideal for R.F. work. Will not heat up in H.F. circuits. Bright, natural copper finish. 2″ long.

EACH NET..................$0.11 **LOTS OF 10**..................$0.08

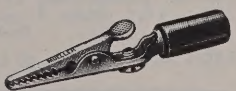
No. 60-HS—STEEL ALLIGATOR CLIP WITH INSULATED HANDLE



Same as No. 60-S except equipped with red and black insulating sleeves on end. Very convenient for distinguishing leads. Has screw connection also. Cadmium plated. 2¼″ long.

EACH NET..................$0.11 **LOTS OF 10**..................$0.08

No. 60-CHS—COPPER ALLIGATOR CLIP WITH INSULATED HANDLE



Same as No. 60-CS except equipped with red and black insulating sleeves on end. Brass screw connection, for R.F. work. 2¼″ long.

EACH NET..................$0.15 **LOTS OF 10**..................$0.10

WEE-PEE-WEE No. 88

Entirely Non-ferrous. Smaller Than Ever! An extremely small clip for fine testing in radio and electrical work. Light-Weight; thin-nosed; spring-temper phosphor bronze. **Ideal for close-wound coils.** 1 11/16″ long; jaw spread ¼″.

EACH NET..................$0.16 **LOTS OF 10**..................$0.11

Use No. 93-P R.F.Insulator.

Insulator No.	For Use with Clip No.	Each Net	Lots of 10

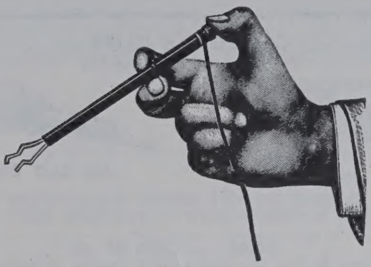
Mueller Electric Co.

THE SNAPPER

A Long Insulated Test Clip and
A "Triple Threat" Radio Tool



U. S. Patent No. 2,074,324

No. 99—7″ Long Insulated

The long tube is of insulating material and is fitted with spring contact jaws on the far end.

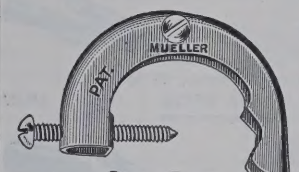
The jaws are operated by a push of the thumb on the near end. Wire is quickly and easily connected in a hole in the insulator knob binding post on the near end.

May be used as (1) A **"Deep Sea" Electric Test Clip**—test contacts with ease, deep in the recesses of radio chassis with no danger of short circuits; (2) An **Electric Contact Prod**—clip jaws may be used to make quick prod contacts, or clip one Snapper on ground circuit and prod with another; (3) A **Retriever**—start small screws and nuts or pick up odds and ends that may accidentally be dropped into inaccessible places.

PRICE....$0.90 EACH Dealers' Wholesale Price, each....**$0.54 Net**

Snappers are generally used in pairs—1 red and 1 black.

CLAMPIPE GROUND CLAMP



CLAMPIPE
U.S. PATENT No. 1,794,976

No. 58

The exclusive patented feature of a U-shaped cross section in combination with a U-shaped clamp gives a rigidity and effectiveness to the ClamPipe that cannot be found in any other make.

The ClamPipe will not bend or lop over when applied to a pipe. The point of the large case hardened screw, cuts through rust, paint or corrosion into clean, fresh metal, insuring a good contact. The Clamp may be installed on a pipe lying flush against a wall. Will not spread open.

The best ground clamp value on the market. Applicable to pipe ⅜″ to 1⅜″ outside diameter.

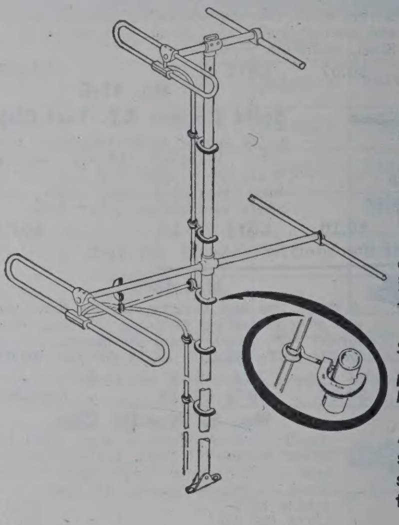
Packed 10 in a box

EACH NET....................$0.13 **LOTS OF 10......................$0.09**

THE "TENNA-CLAMPIPE"

(ClamPipe Trade-mark Reg. U. S. & Can. Pat. Off.)

A Standoff Insulator that clamps on **Quickly—Easily—almost anywhere** for Television and FM Antenna Lead-Ins.



Quickly and Permanently Supports Lead-Ins

- **On antenna masts & cross-arms.**
- **On pipes, I-beams, etc., on basement ceilings.**
- **On any rigid object up to 1⅜″ in diameter or thickness.**

SIMPLY TURN THE SCREW-EYE BY HAND FOR A SOLID, PERMANENT GRIP.

A great time-saver — the installation man's third hand.

Consists of an assembly of the famous Mueller ClamPipe Ground Clamp and a steel screw-eye with an insulating grommet. Holds lead-in wire from 1¼″ to 2½″ away from clamp. Can be applied to any antenna mast, pipe or other object up to 1⅜″ in diameter or thickness.

All metal parts are completely weatherproofed.

Insulating grommet is molded of high quality plastic having superior dielectric and non-absorptive properties. Will withstand exposure to weather.

No. 130 for all types of Flat Twin-lead.
No. 131 for all Coax Cables up to ½″ O.D.

Packed 100 in a carton

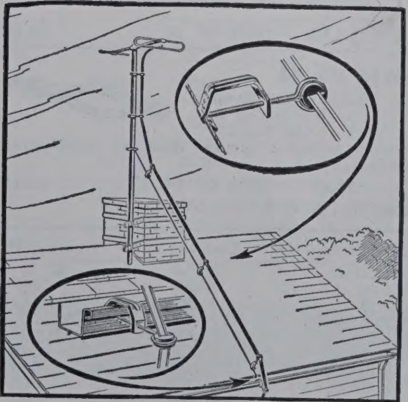
EACH NET...........$0.16 **LOTS OF 10...........$0.11**
LOTS OF 100...........$0.098

THE "TENNA-CLAMP"

A New 3-in-1 Stand-off Insulator Clamp!

Supports TV and FM Lead-ins on
MASTS, PIPES, GUTTERS AND GUY-WIRES

Has same general features and specifications as Tenna-ClamPipe described above except different type clamp channeled on end to take standard guy-wire in addition to pipes.



HAS THESE USEFUL FEATURES —

- One standard size solves many lead-in problems — far more useful than straps or wire bands.
- Brings lead-in to edge of roof — right where you want it — no more "draping" of wire across the roof.
- On those high jobs, come right down a guy-wire — and get around the gutter in the clear.

LOW PRICES!

All packed 100 in a carton

No. 135 For all types of Flat Twin-Lead.
No. 136 For Coax Cables up to ½″ O.D.
EACH NET, $0.13 LOTS OF 10, $0.09
LOTS OF 100, $0.078

Also in these Double Lead-in Types:
No. 135-DB For Flat Twin-Lead.
No. 136-DB For Coax Cables up to ½″ O.D.
EACH NET, $0.25 LOTS OF 10, $0.18
LOTS OF 100, $0.15

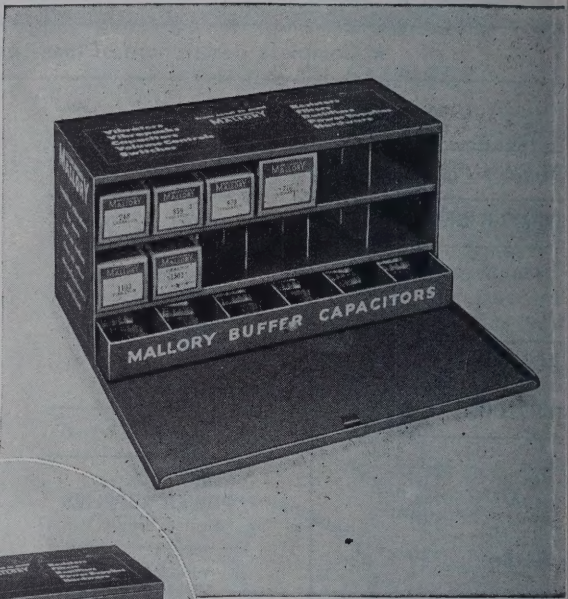
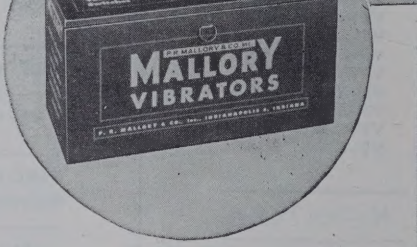
THE MALLORY 2448 VIBRATOR DEA

Here's What You Get:

1. **Six popular Mallory vibrators**
2. **Twelve Mallory buffer capacitors**
3. **Services 75% of your replacement needs**
4. **Simplifies your inventory control**
5. **Extra space for flexible inventory**
6. **Cabinets firmly "stack" together; use as many as you need to handle your stock**



You Get the Cabinet at no Additional Cost... When You Purchase the Vibrators at Your Regular Discount



MALLORY CONTROLS
MALLORY BUFFER CAPACITORS

Picture at right shows how your vibrator cabinet nests with any Mallory Control Deal cabinet. Your vibrator cabinets nest together, too, to handle your complete stock of vibrators. The Mallory Radio Service Encyclopedia is purchased separately.

APPLICATION—The Mallory 2448 Vibrator Deal cabinet assures more speed in vibrator replacement work . . . gives you the advantage of work-bench accessibility . . . simplifies your inventory problems . . . gives you wide coverage with a minimum selection of Mallory vibrators.

GENERAL DESCRIPTION—Consists of 6 of the most popular type Mallory vibrators. Cabinet contains 12 individual compartments, enabling you to make 6 additional selections. A large drawer is divided into 6 sections to hold a large stock of Mallory buffer capacitors. Twelve capacitors come with the 2448 Deal. Cabinet constructed of 28-gauge sheet steel, neatly finished in blue with white lettering and orange trim.

USE IN INVENTORY CONTROL—With the Mallory 2448 Vibrator Deal cabinet in your shop, inventory control is simplified. You keep similar type vibrators together. You determine at a glance which vibrators you need to re-order. This assures an adequate up-to-date supply of Mallory vibrators you need.

CONTENTS—(Complete descriptive information on each of the following vibrators and buffer capacitors may be found on the following page and in the Mallory Capacitor Section page 9, respectively.

Mallory Vibrators, 1 each:
248, 716, 859, 870, 1100, 1501

Mallory Buffer Capacitors, 2 each:
OT-371, OT-372, OT-373, OW-344, OW-345, OW-346

PRICE—When you purchase the vibrators and buffer capacitors included in the Mallory 2448 Vibrator Deal, at your regular discount, you get the cabinet at no additional cost!

NOTE 1. To make this substitution certain wiring changes are necessary. See instruction sheet packed with vibrator or installation note in the Mallory Vibrator Guide and the 6th Edition Mallory Radio Service Encyclopedia.

NOTE 2. An exact duplicate is no longer available. Every effort is being exerted to determine a satisfactory substitute. If a substitute can be made available, your Mallory Distributor will be advised.

NOTE 3. To make this substitution the six-prong socket must be changed to a 4-prong UX base socket and wired to match base diagram 8.

MALLORY TECHNICAL MANUAL

● This simply written, practical book bridges the gap between radio theory and practice. Designed for the radio serviceman, engineer, amateur or experimenter who wants the latest technical information . . . presented so that he can easily apply it to everyday problems.

Contains page after page of information profusely illustrated. It's worth far more than its price.

MALLORY VIBRATORS

These Mallory Vibrators Meet 90% of Your Replacement Need

● The 12 basic vibrator types listed at right cover 90% of your replacement needs. The entire line of Mallory Vibrators has been simplified so that replacements can be made easily and quickly. By effecting substitutions, Mallory is materially reducing the number of vibrators needed to meet your requirements.

This Mallory standardization program means that your distributor stocks fewer vibrator types and more units of each—thus delivery is tremendously speeded up.

The vibrator replacement problem is being simplified but Mallory quality remains the same. Mallory precision vibrators, backed by years of outstanding performance, still offer the dependability, the long life and the trouble-free service that you and your customers expect. It pays to insist on Mallory Approved Precision Products.

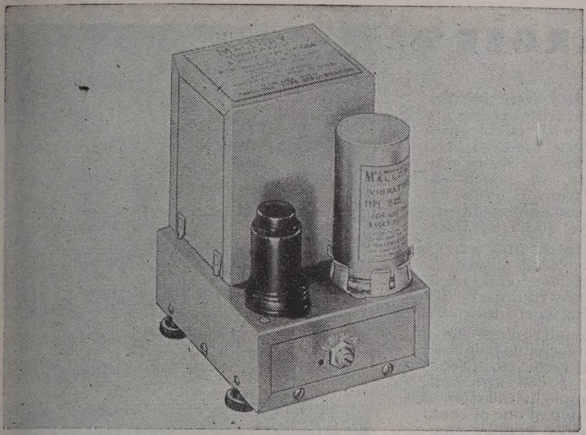
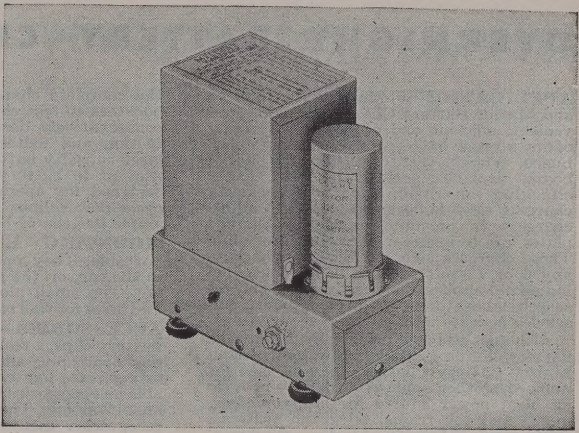
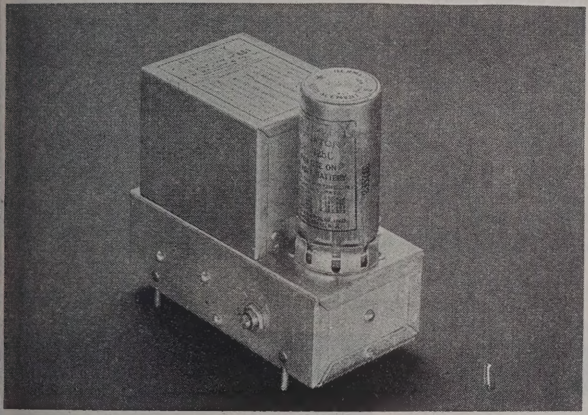
MALLORY VIBRAPACK* POWER SUPPLIES



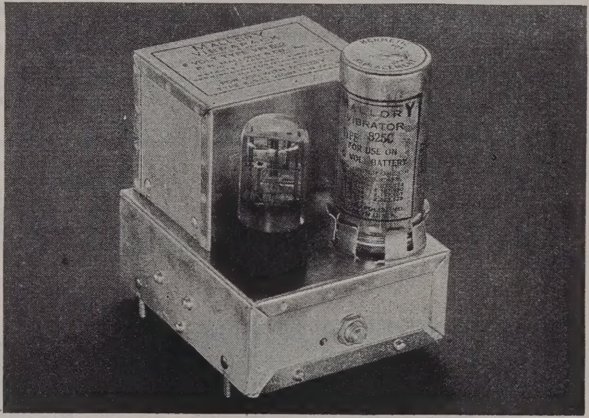
Type VP-554H • VP-F558



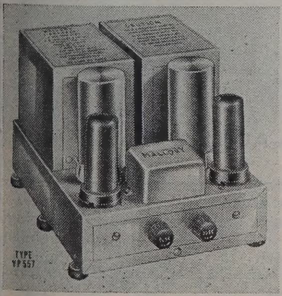
Type VP-552 • VP-G556



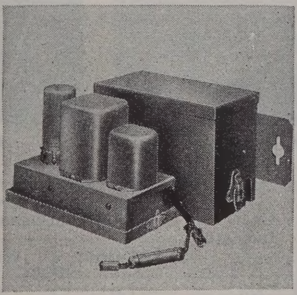
Type VP-551



Type VP-553



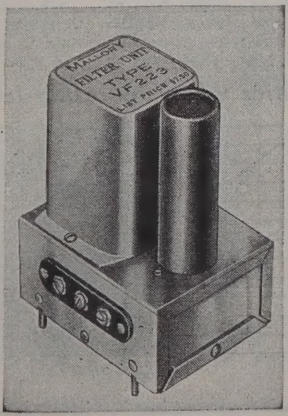
Type VP-555H • VP-557



Type VP-540

Type VF-223 Audio Filter

● A complete audio filter system for use with all single-unit Vibrapacks. Designed to give maximum suppression of hum with minimum voltage drop. Especially recommended for applications which are sensitive to hum, or where voltage regulation is important as in Class "B" audio amplifiers.



NOISE SUPPRESSION

● Vibrapacks are equipped with built-in noise suppression equipment. Type VP-555 also includes an efficient low-frequency hum filter. Type VP-557 incorporates the first input filter condenser only. Other Vibrapacks do not include the high-voltage hum filter. High-voltage filter requirements are similar to equivalent AC power packs.

Catalog Number	Nominal Operating Voltage	Nominal Output Voltage	Maximum Output Current	Type
VP-540*	6.3	250	60 ma.	Self-Rectifying

VP-F558	32.	225-250 275-300	100 ma.	Tube-Rectifier

*Includes complete audio filter.

†Maximum ratings are for mobile transmitter service. For continuous duty with radio receivers where longer vibrator life is essential, reduce maximum output watts ratings to 75% of listed values.

OVERNIGHT BATTERY CHARGERS

APPLICATIONS—Mallory Automotive and Marine Battery Chargers provide convenient, efficient and economical charging of any storage battery used in automobiles, buses, trucks, tractors, taxicabs, small boats, airplanes, and on the farm. Taper charging (an automatically decreasing charging rate) is designed into all Mallory chargers to prevent damage to battery plates and to insure maximum battery life. These chargers also are ideal for charging any 6 or 12-volt storage battery used in industrial applications, engineering and research laboratories, test equipment, and service benches, etc.

Although designed principally for storage battery charging, Mallory Automotive and Marine Battery Chargers may be used for numerous other applications. They provide an ideal power source for electroplating, model and toy trains, telegraph systems, relays and solenoids, vending machines, electric organs, generator fields, etc. In conjunction with an adequate filter they may be used as a power source for farm and portable radio filaments, auto radio receivers, telephone systems, loud speaker fields, exciter lamps, scientific apparatus, etc.

DESCRIPTION—The heart of these chargers is the Mallory Magnesium-Copper Sulfide all-metal rectifier. Unaffected by temperature and able to withstand phenomenal abuse, they provide stable output without adjustment over long life. With an exclusive self-healing feature, Mallory rectifiers have been time-tested and proved to be the most rugged dependable rectifier for battery-charging applications.

Mallory Automotive and Marine Battery Chargers are made in five models to cover the complete charging field from battery boosters to fast chargers. All chargers are conservatively designed with circuit protection and meters where required, and large capacity battery clips for ready connection to battery posts. All models are designed for operation from 115-volt 60-cycle power lines and are equipped with ample lengths of both AC and DC cables.

MOUNTING—All chargers are readily portable. They may be placed anywhere: in the car, on the garage floor, on a bench, etc. The small models are equipped with two holes for wall mounting where desirable.

ACCESSORIES—Although equipped with battery clips, a readily attachable polarized dashboard plug and receptacle (No. R-652) or cigarette lighter plug (R-655) are available as accessories for simple installation in an automobile. The addition of one of these receptacles makes possible simple plug-in connection of the charger to the car battery. Extra battery clips (No. R-653) are available. Automatic timer control (No. R-654) is offered for use with battery chargers to control the charge. It may also be used with many household appliances.

PACKAGING—One charger per cardboard shipping carton.

No. R-652—Polarized Dashboard Receptacle, for use with these chargers.

No. R-653—Extra Battery clips.

No. R-655—Cigarette lighter plug.

No. MMF-12—Specially designed filter for use in conjunction with 6-AC-4, 6-AC-6, 6-AC-10 chargers. Efficiently reduces AC ripple when these chargers are used as a DC power supply. May also be used with 6-AC-60 where max. current does not exceed 20 amps.

MALLORY FAST CHARGERS AND RECTIFIERS

PORTABLE FAST CHARGER

● The Mallory 6-AC-60 Quick Starter is a portable unit providing 2 minute starting service or fast charging of batteries in a few hours.

A Mallory 80 amp Magnesium-Copper Sulfide rectifier stack insures dependable and rugged service. A 6 step charge control switch and ammeter allow charging rate adjustment. To provide automatic charging use the Mallory Automatic Timer Control (R-654).

Rectifier stack and transformer are efficiently cooled by a quiet running fan with an oil-less bearing motor. A convenient rack holds both AC and DC cables. The entire unit weighs only 45 lbs.

The Mallory Quick Starter will provide approximately 100 amp. hrs. charge in 2 hours. It also provides a convenient power supply for test and service equipment for horns, heaters, radio receivers, and electroplating.

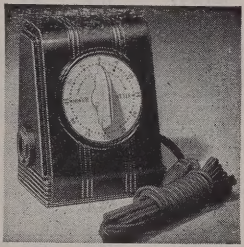
Automatic Timer Control for 6AC60 Charger. Variable time setting up to 60 minutes. Contacts rated 20 amperes, 115 volts AC or 10 amperes, 230 volts, (suitable for DC loads). Also ideally suited to control lights, sunlamps, radios, fans, heating devices and numerous DC loads). Also ideally suited to control lights, sunlamps, radios, fans, heating devices and numerous other electrical household appliances.

Catalog No. 654



MALLORY MAGNESIUM-COPPER SULFIDE RECTIFIERS

PPLICATION—Mallory Magnesium-opper Sulfide Rectifiers are time-tried and roved to be the most rugged, dependable ectifiers for those applications requiring low C voltages at medium and high currents uch as battery chargers and eliminators, lectroplating, motion picture projector arcs, elding, engine starting, circuit breaker relosing, solenoid and relays operation, etc.

ESCRIPTION—Mallory Magnesium-opper Sulfide Rectifiers are all metal in onstruction, ruggedly assembled under high ressure to withstand severe vibrations and hock. There are no bulbs, liquids, moving arts or sparking contacts. Unlike all other ypes of rectifiers, they contain no temperaure-sensitive films or layers, and have phe-omenal ability to withstand abuse and exremes of temperature (—90° to +265°F.). onstant output without circuit adjustments assured over many years of useful life. hould an accidental voltage surge occur, the ctifying film will "self-heal."

COPE AND SIZES—Many sizes are available to supply low DC voltages from watts to ilowatts. A new rectifier engineering data lder is available upon request, covering ther sizes for single phase and three phase pplications, both convection and fan cooled. addition to rectifier stacks, P. R. Mallory Co., Inc. also manufacture a complete line Rectoplaters (distributed exclusively by e Udylite Corporation, 1651 East Grand Boulevard, Detroit 11, Michigan), Rectotruck Chargers (industrial electric truck chargers available through truck agents).

REPLACEMENT RECTIFIERS—The Mallory Magnesium-Copper Sulfide Rectifiers listed on page 53 are only those popular sizes regularly carried in stock, principally for replacement purposes. These same rectifiers, however, may be used for numerous other applications. For example, the IB8R and IB12R rectifiers are ideal for reversing the direction of HO and O gauge model train locomotives respectively, using wound field motors (as illustrated in the wiring diagram, following page). IB12C1J, IS16CB7, and IS16B9 rectifiers may be readily used to assemble tapering battery chargers as illustrated in the wiring diagram. The IS24B9 rectifier may be used to make up a battery eliminator to operate and test modern automobile radio receivers as shown. Other applications immediately suggest themselves, such as electroplating, model and toy train DC power sources, radio filament supplies, chatter-free relay and solenoid operation, electric organ, automotive electrodynamic speaker field supplies, generator fields, telephone and telegraph system power supplies, etc.

MOUNTING—Rectifiers are available in either foot, bolt, or stud mounting, the latter two insulated from mounting means. Refer to note below table for type of mounting on replacement rectifiers.

HARDWARE—Wherever possible or practical, universal mounting hardware is included to assist in the ready replacement of old rectifier types.

PACKAGING—Rectifiers are packed one per display carton.

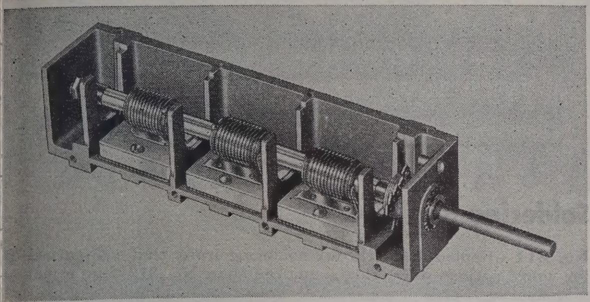
MALLORY SPECIAL COMPONENTS AND MISCELLANEOUS ITEMS



Mallory Inductuner* Type 8301

● The Inductuner is a three-gang, infinitely variable inductance tuning device, designed to provide continuous frequency selection over a range of frequencies from approx. 50 to 240 megacycles, covering the 1¼, 2, and 6-meter bands, as well as all television and FM bands.

Various tuning ranges can be selected by varying the circuit constants, as required. The ten-turn, or 3600° rotation, permits convenient selection of the frequency desired without the use of a bandspread mechanism or intricate gear drive. Band width can be easily controlled by the use of a suitable bandpass circuit.

At the present time the Inductuner has acceptance as the tuning unit in television receivers that offer FM, police, aircraft and amateur reception, as well as the full 13 channels assigned for video transmission.

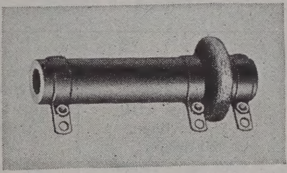
The complete assembly is substantially mounted in a die-cast frame, completely shielded. Size $7\frac{3}{16}''$ long x $1\frac{13}{16}''$ x $1\frac{13}{16}''$.

A technical information bulletin is available on request, containing complete details, electrical characteristics, and suggested circuits.

Inductuner*—Registered trade mark for Mallory variable inductance tuning devices. Manufactured and sold under one or more of the following Paul Ware and Mallory patents: 2,163644, 2,163645, 2,163646, 2,163647, 2,260877, 2,377789, 2,377790, 2,399060, 2,405890. Other patents applied for.

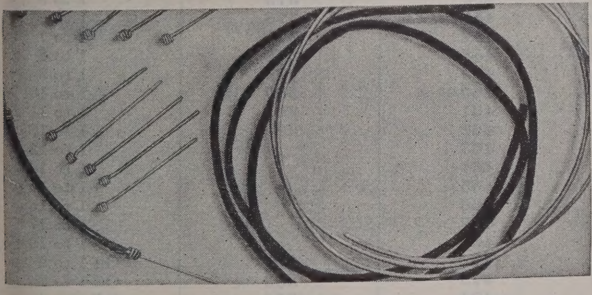
TYPE VC-101

Videocoupler



● The Mallory VC-101 Videocoupler is a compact inter-stage coupling unit for use in the wide-band amplifiers commonly found in television, radar and oscilloscope equipment. It consists of peaking inductances and a load resistance which provide an essentially flat frequency response to 4 mc. per second. It is designed to work into a terminating capacity of 22.5 mmfd. When used with a 6AC7 tube in a proper circuit, a stage gain of approximately 25 may be realized.

Mounting space required: 1¾″ long x ¾″ in diameter; max. dissipation 2 watts; finish, high-temperature enamel. Use a No. 6 bolt through the core for mounting.



Yard-Ohm Resistance Kits

● Each Yard-Ohm Resistance Kit consists of all necessary materials to construct flexible resistors of a wide range of values. The Yard-Ohm Kit provides a real solution to the odd-value resistor problem. In addition to replacement applications, resistors made from the Yard-Ohm Kit are ideal for meter shunts, and for use wherever a high quality flexible resistor is desired.

Each Mallory Yard-Ohm Kit consists of the following: 1 yard spiral wound resistance wire; 1 yard insulated braid; 24 spiral wire leads. The kit is available in eight resistance values.

Dissipation—all types: ½ watt per inch.

Catalog Number	Resistance Value (Ohms per Inch)	Carrying Capacity in Amperes	Catalog Number	Resistance Value (Ohms per Inch)	Carrying Capacity in Amperes
YO-1	1	.707	**YO-50**	50	.100

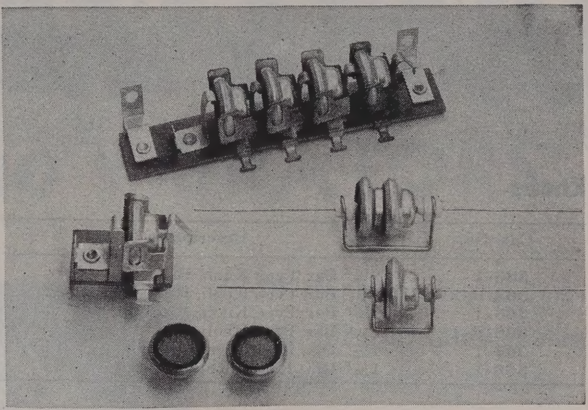
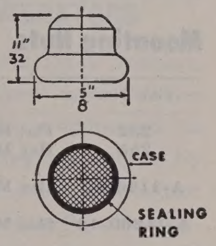
YO-25	25	.141	**YO-500**	500	.031



Grid Bias Cells

● The Mallory Grid Bias Cell is a small acorn-shaped, self-contained device. The metal container or cup is the negative electrode. The black disc is the positive electrode.

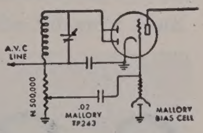
Application



The principal use of Mallory Grid Bias Cells is in the biasing of the first audio amplifier tube in modern high-gain receivers. Diagram of a typical circuit is shown at right. The bias cell does not need to be by passed to ground.

Correspondence is invited regarding the application of Mallory Grid Bias Cells. Special Technical Bulletin No. GBC746 may be obtained on request.

Characteristics



The no-current potential of Mallory Grid Bias Cells is within plus or minus 10% of their rated voltage.

Current—The cell is strictly a potential or voltage cell for biasing class "A" amplifier tubes and should not be used for biasing power tubes or oscillators; or for any circuit where direct current may flow through, or be drawn from, the cell.

Temperature—The cells may be used at temperatures from 0°F to 140°F. The voltage of the cell remains reasonably constant throughout this wide temperature range. It is recommended, however, that wherever possible the bias cell be placed in the coolest location.

Humidity—The cell exhibits no change in characteristics when exposed to a relative humidity of 90% at 120°F.

Impedance—Mallory Grid Bias Cells are non-reactive at audio frequencies. The DC resistance of the cell ranges between 10,000 and 40,000 ohms.

Noise—The cells do not cause noise.

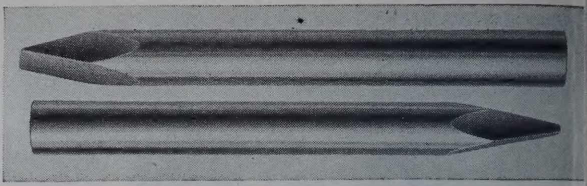
MALLORY
RADIO SERVICE ENCYCLOPEDIA
Page after page of replacement information for all pre-war and post-war receivers.



Soldering Iron Tips

No. 311—Replacement tip for soldering irons that are turned o for short periods only. Heats quicker than No. 312, but is not a long wearing. Made of a special Mallory copper alloy long in use as welding tip material. Nickel plated to resist corrosion. Size—⅜ diameter, 4″ length. Plunger style with "screw driver" point.

No. 312—Replacement tip for soldering irons that are used continuously for long periods of time. Made of a special Mallory copper allo of great hardness and high electrical conductivity. Nickel plated t resist corrosion. Size—⅜″ diameter, 4″ length. Plunger style, wit "screw driver" point.

Dial Plates

For Mallory Circuit Selector, Tap and All-Wave Switches. (Plates to match rotation of Mallory Adjustable Resistors on page 33.)

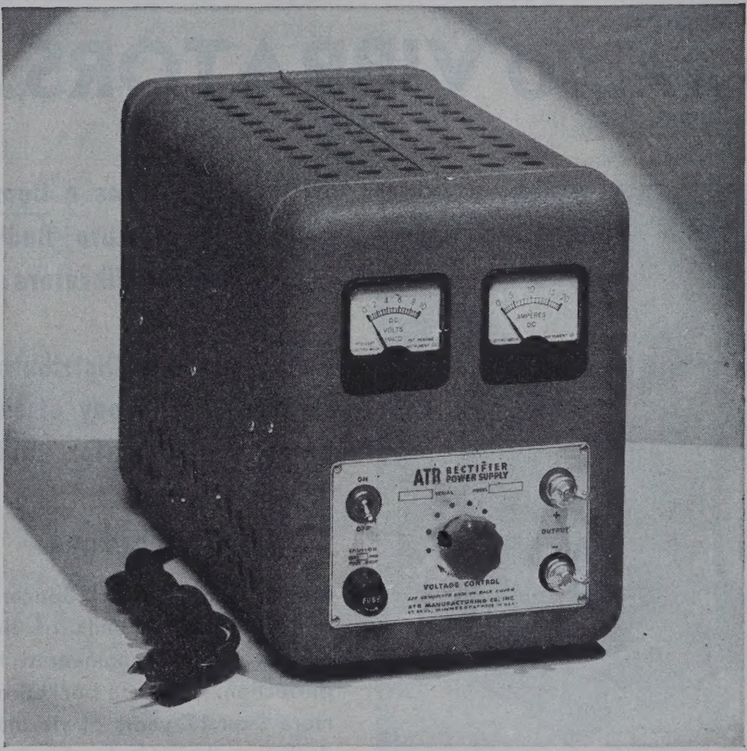
THESE 10 POPULAR ATR VIBRATORS MEET 90% OF YOUR SERVICE NEEDS

ATR • ELIMINATORS • ATR

AMERICAN TELEVISION & RADIO CO.



Illustrates Heavy Duty "A" Battery Eliminator, Type 620C-ELIP, Equipped with Voltmeter, Ammeter and Voltage Control.

ATR "A" BATTERY ELIMINATORS

Specially Designed for Testing and Operating Auto Radios and D. C. Electrical Apparatus on Regular A. C. Lines, 105-125 Volts 50-60 Cycles.

- Fully Automatic and Fool-Proof.
- Eliminates Storage Batteries and Battery Chargers.
- Operates the Equipment at Maximum Efficiency at all Times.
- Delivers Filtered Direct Current at the Correct Voltage for Proper Operation.

SUGGESTED USES:

As a power supply for radio sets, aircraft instruments, relays, motors and other electrical and electronic equipments. In the laboratory, for supplying various low D. C. voltages.

Battery Eliminators may be treated as batteries in the sense that they can be connected in series for higher voltages at the same current output per unit or in parallel for the same output voltage per unit at higher currents.

Equipped with Full-Wave Dry Disc Type Rectifier, Assuring Noiseless, Interference-Free Operation and Extreme Long Life and Reliability.

TYPE 610 ELIB—Rated output 6 volts at 10 amperes. Size 6½" x 9⅛" x 8½"; shipping weight, 22 lbs. Code word, "SELIB".

Net Price........ **$29.70**

TYPE 620C ELIP—Uses dual rectifiers. Size 6½" x 12⅞" x 8½". Shipping weight, 33 lbs. Code word, "HELIN".

Rated Output: 6 volts at 18 amperes or 12 volts at 9 amperes. Either output obtainable by means of simple output terminal switching arrangement.

Net Price........ **$45.90**

All ATR Eliminators have as standard equipment: On-Off Switch, Voltage Control, Meter(s), Fuse Protection, Rubber Mounting Feet, 6-Ft. All-Rubber Cord Set, and Cabinet of heavy gauge metal having attractive grey-wrinkled finish.

ATR RECTIFIER POWER SUPPLY

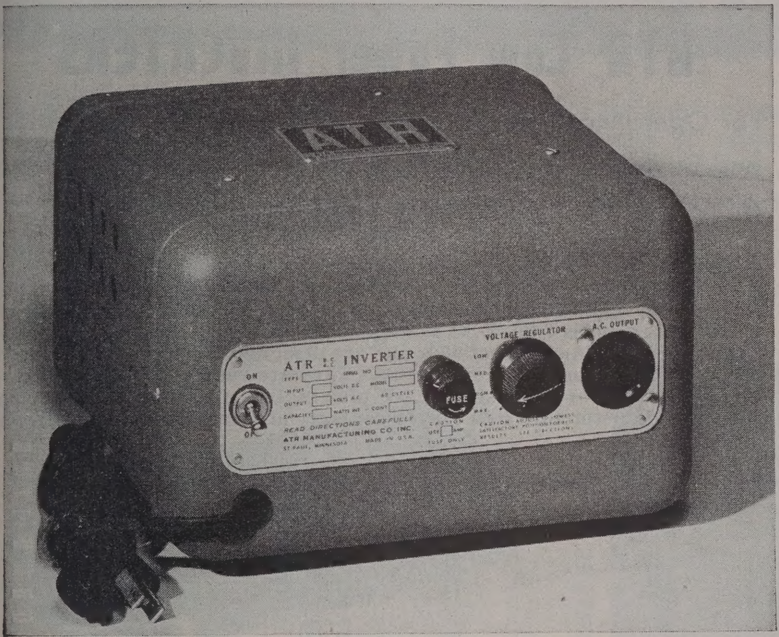
ATR • INVERTERS • ATR

AMERICAN TELEVISION & RADIO CO.



Illustrates all Standard ATR Radio Inverters except types 6 and 12 RSB.

ATR STANDARD AND HEAVY DUTY RADIO INVERTERS

Specially Designed for Operating A. C. Radios, Public Address Systems, Television Sets, Amplifiers, Intercall Systems, and Radio Test Equipment from D. C. Voltages in Vehicles, Ships, Trains, Planes, and in D. C. Districts.

This group of ATR Inverters is specially recommended for use with A. C. radios, amplifiers, and similar electronic equipment, being exceptionally well filtered to insure interference-free radio reception. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life radio operation. All models indicated are equipped with an ATR ten-contact plug-in Inverter Vibrator of new design and construction having dual arms and utilizing eight ¼″ diameter tungsten power contacts and two silver alloy driver contacts, insuring increased long life and reliable service. These Inverters also come equipped with four point voltage regulators, which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal; the operating efficiency is in excess of 85%.

Type	Input D.C. Volts	A.C. Output 60 Cycles	Output Wattage		Code Word	List Price
			Intermittent	Continuous		
6 RSC	6	110 volts	85	75	ARSCD	$44.00

Illustrates Types 6 and 12 RSB Standard Radio and Industrial Inverters only.

Radio frequency interference completely suppressed.

Any of the above type Inverters are available with 220 volt A.C. output at prices 25% higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word "T"; that is, if a 110 volt D. C. Inverter having a 220 volt A. C. output is desired, this would be ordered as Type 110S covered by code word, "GRSCT".

ATR Standard and Heavy Duty Radio Inverters are housed in attractively finished grey-wrinkled metal cabinets.

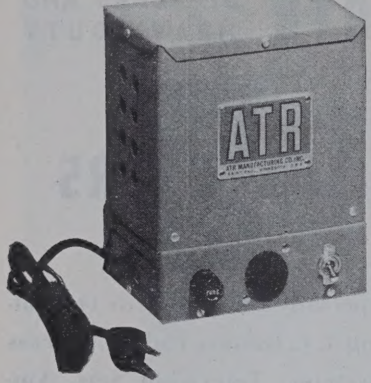
Dimensions of Standard Model Radio Inverters, 8⅜″ x 9″ x 5¼″; Shipping weight, 19 lbs.

Dimensions of Heavy Duty Model Radio Inverters, 6½″ x 11⅛″ x 8½″; Shipping weight, 30 lbs.

For correct replacement vibrator, consult Inverter Vibrator Guide.

ATR • INVERTERS • ATR

AMERICAN TELEVISION & RADIO CO.



Illustrating all Types LID Inverters except Types 6 and 12.

ATR Low Power INVERTERS

For Operating Small A. C. Motors, Electric Razors, Radios, and Devices of Approximately 35 watts Consumption from 6, 12, 24, 32, 110, and 220 volt D. C. Lines.

This line of ATR Low Power Inverters was specially brought out to meet the insistent demand for a good, low power, inexpensive portable Inverter for operating phonograph and other A. C. motors and a host of small A. C. devices from D. C. voltage sources. These Inverters operate at an efficiency in excess of 90% and are designed for operation of loads having a power factor as low as 60%. They are ruggedly built and powered by a special ATR six-contact plug-in Inverter Vibrator utilizing four ¼″ diameter tungsten power contacts and two silver alloy driver contacts.

Type	Input D. C. volts	A.C. Output 60 cycles	Wattage		Code Word	List Price
			Intermittent	Continuous		
6 LID	6	110 volts	40	35	ALIDM	$29.50

24 LID	24	110	50	35	FLIDR	32.50
32 LID	32	110	50	35	CLIDO	32.50
110 LID	110	110	75	50	DLIDP	29.50
220 LID	220	110	75	50	ELIDQ	32.50

Radio frequency interference suppressed.

Any of the above type Low Power Inverters are available with 220 volt A. C. output at prices 25% higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word "T"; that is, if a 110 volt D. C. Low Power Inverter having a 220 volt A. C. output is desired, this would be ordered as Type 110S covered by code word, "DLIDT".

Dimensions, 5⅜″ x 4″ x 6⅝″; shipping weight, 7 lbs.

Replacement Vibrators for any of the above Low Power Inverters are available. Be sure to mention the type number as well as model number when ordering. Consult Inverter Vibrator Guide.

ATR STANDARD AND HEAVY DUTY INDUSTRIAL INVERTERS

For Operating A. C. Motors, Electronic Apparatus, Electrical Testing Equipment, and A. C. Electrical Appliances from D. C. Lines.

These units are specially designed for applications as indicated, permitting the use of standard A. C. equipment on D. C. lines. These Inverters operate at an efficiency in excess of 80% and are carefully built and equipped to give the longest possible life and operating satisfaction. All Inverters indicated utilize ATR ten contact plug-in vibrators, and are also equipped with four point voltage regulators as fully described above. These Industrial Inverters are recommended for use with loads having power factors as low as 60%, and as low as 50% for the "P" Inverters indicated. These Inverters should not be used with Neon signs.

Illustrating Heavy Duty Models Radio and Industrial Inverters except types 6 and 12. Types 6 and 12 Industrial Inverters are illustrated by small cut on page M-23.

Type	Input D.C. volts	A.C. Output 60 cycles	Output Wattage		Code Word	List Price
			Intermittent	Continuous		
6 ISP	6	110 volts	85	75	AISPD	$44.00

220P*-ISP	220	110	300	150	KISPM	57.00

Radio frequency interference not suppressed.

Any of the above type Inverters are available with 220 volt A. C. output at slightly higher prices. In ordering, follow similar directions given above.

ATR Standard and Heavy Duty Industrial Inverters are housed in attractively finished grey-wrinkled metal cabinets.

Dimensions of Standard Model Industrial Inverters, 8⅜″ x 9″ x 5¼″. Shipping weight, 19 lbs.

Dimensions of Heavy Duty Industrial Inverters, 6½″ x 11⅛″ x 8½″; shipping weight, 30 lbs.

For correct replacement vibrator, consult Inverter Vibrator Guide.

*"P" Inverters are corrected for loads having power factors as low as 50%.

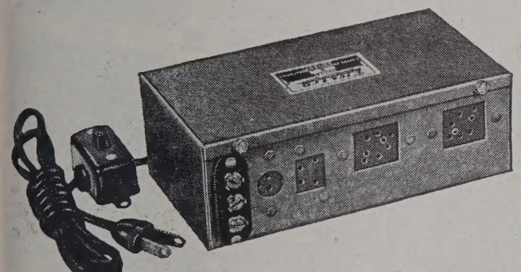
Built-in filter, $10.00 additional.

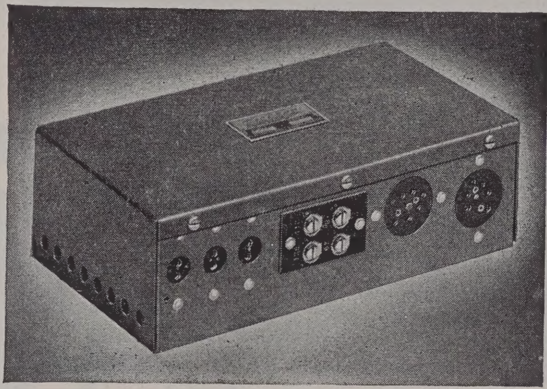
Electro ELECTRICAL AND RADIO EQUIPMENT BATTERY ELIMINATORS *of Distinction*

ELECTRIFY *with* ELECTRO

ow battery radio reception can be enjoyed at its est without the usual grief and expense incurred hen using batteries. Radio can be used for unimited periods without fading. Costs but a few cents er hundred hours of operation.

OUR TYPICAL MODELS are shown on this and the following page. These are ruggedly constituted units of unusually long life—easy to install—no liquids to spill—no moving parts to get out of order and wear out—operate in any position. Completely filtered, hum free and silent in operation. Universal plugs and sockets are provided to accommodate any radio. All units durably finished in blue hammerloid.





MODEL "S" COMPACT
With Selenium Rectifier

perates Any 1.4 Volt — 4, 5 or 6 Tube Battery Radio from 115 Volt, 60 Cycle Source

esigned for sets using 1A7, 1E4, 1N5G, 1Q5G, tubes convert battery radio to an efficient AC receiver ith low operating cost. Fits in battery compartment most radios. Ideal for use in home, hotel, camp or ny place where normal AC is available.

Technical Data

A" Supply Output

5-6 tubes (average)	1.4 V. @ 320 ma.
4 tubes	1.4 V. @ 250 ma.
4 tubes	1.4 V. @ 200 ma.

B" Supply Output

90 Volts DC @ 12 ma. max.

rimary

115 Volts AC @ 60 cycles.

pecifications

Six foot cord and plug — switch in cord.
Size: 2⅜" x 3½" x 6¾".
Weight packed: 3½ pounds.

n and Off switch for permanent mounting — becomes rt of the radio.

LIST PRICE $16.75

MODEL "P" COMPACT

Same as MODEL "S" except has tube rectifier. Also available for 220 Volt operation.

LIST PRICE $15.00

MODEL "F" COMPACT

Operates Any 2 Volt — 4, 5, 6 or 7 Tube Battery Radio from 115 Volt, 60 Cycle Source

For receivers using 1A4, 1C7, 1D5, 1E5, 1F5, 1F7, 1H4G, etc., tubes to change radio into an all-electric set. Inexpensive to operate.

Technical Data

"A" Supply Output

7 tubes	2 V. @ 480 Ma. — 500 ma. max.
6 tubes	2 V. @ 420 ma.
4-5 tubes (average)	2 V. @ 325 ma.

"B" Supply Output

67, 90, 112, 135 Volts DC @ 18 ma.

Primary

115 Volts AC @ 60 Cycles. Also available for 220 Volt Operation.

Specifications

Six foot cord and plug, switch in cord.
Size: 2⅜" x 4½" x 8¼".
Weight packed: 5½ pounds.

LIST PRICE $17.95

MODEL "R" SYNCRO POWER

Same as Model "F" but operates from 6 Volt DC source. Supplied with cord and battery clips. On and Off switch in eliminator turns power on.

LIST PRICE $20.75

ELECTRO PRODUCTS LABORATORIES

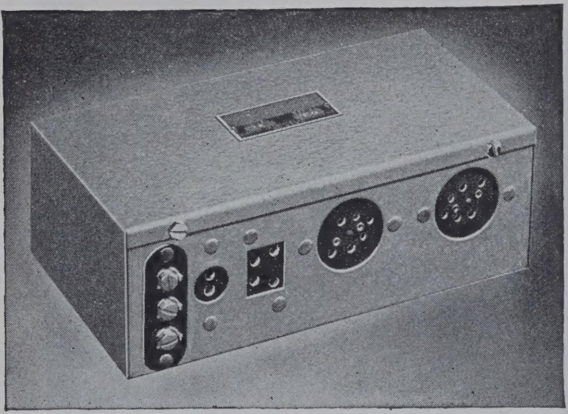
Electro
ELECTRICAL AND RADIO EQUIPMENT

BATTERY ELIMINATORS of Distinction

ELECTRIFY *with* ELECTRO

Now battery radio reception can be enjoyed at its best without the usual grief and expense incurred when using batteries. Radio can be used for unlimited periods without fading. Costs but a few cents per hundred hours of operation.

FOUR TYPICAL MODELS are shown on this and the preceding page. These are ruggedly constituted units of unusually long life—easy to install—no liquids to spill—no moving parts to get out of order and wear out—operate in any position. Completely filtered, hum free and silent in operation. Universal plugs and sockets are provided to accommodate any radio. All units durably finished in blue hammerloid.



MODEL "Q" SYNCRO POWER

Operates Any 1.4 Volt — 4, 5, or 6 Tube Battery Radio from 6 Volt DC Source

This Eliminator is to be used where 115 Volt AC lines are not available. Will provide all "A" and "B" voltages more efficiently and at lower cost from 6 Volt battery. Will operate a 4-tube radio three weeks at 3 hours a day on a single storage battery (100 A.H.) charge.

Technical Data

"A" Supply Output

5-6 tubes (average) .... 1.4 V. @ 320 ma.
4 tubes .... 1.4 V. @ 250 ma.
4 tubes .... 1.4 V. @ 200 ma.

"B" Supply Output

90 Volts DC @ 12 ma. max.

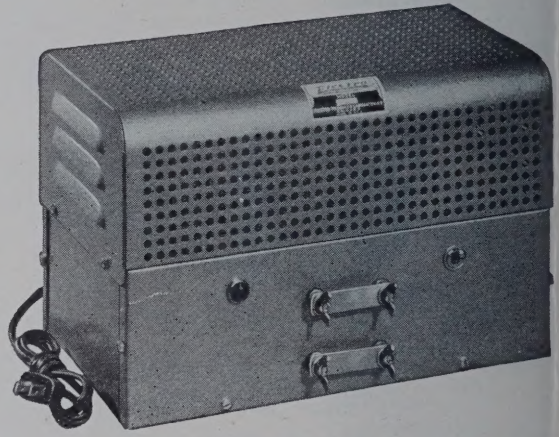
Primary

6 Volts DC @ 0.8 Amp. (for 4-tube radio).

Specifications

Cord and battery clips on primary.
On and Off switch in Eliminator turns power on.
Size: 2⅜" x 3½" x 6¾".
Weight packed: 3½ pounds.

LIST PRICE $18.00



MODEL "A" POWER SUPPLY

Operates latest type auto radios with solenoid tuning and tone controls — also 12 Volt marine and aircraft radios from 115 Volt, 60 Cycle Source. In parallel supplies 6 Volts at 15 Amps. In series 12 Volts at 7½ Amps.

Separately, 6 Volts at 7½ Amps.

Designed especially to do away with the bother of old-fashioned storage batteries. Ideal for the radio service man. Two separately filtered DC output sources are provided for convenience. Heavy duty transformer and chokes; and two large capacity condensers provide excellent voltage regulation.

Technical Data

Output

6 Volts — 15 Amps. continuous.
6 Volts — 25 Amps. max. instantaneous.
12 Volts — 7½ Amps. continuous.
6 Volts — 7½ Amps. two sections continuous.

Primary

Taps on transformers for 105, 115, 125 Volts, 60 cycle AC. Each completely filtered section is separately fused for heavy overloads.

Specifications

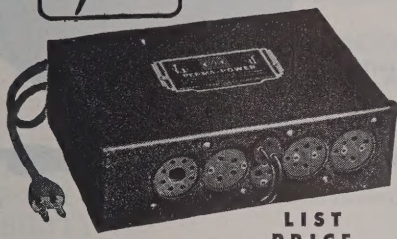
Six foot rubber cord and plug.
Size: 7¾" x 7¾" x 11¾".
Weight packed: 31 pounds.
Electrostatic shield with R.F. line filter.
Large capacity bridge type rectifiers.
Two 2,000 M.F.D. condensers.
Terminals on front of panel with wing nuts.

LIST PRICE $67.50

ELECTRO PRODUCTS LABORATORIES

PERMA-POWER

BATTERY ELIMINATORS



MODEL "A"

for 1½ volt radios with 4, 5, or 6 tubes. Model A has a circuit designed for optimum voltage regulation and changes in line voltages. It maintains practically constant voltage control under varying tube loads, with universal sockets for all battery plugs. Model A will fit all farm battery radios as well as the battery compartments of practically all portables.

LIST PRICE $14.95

Size: 2⅞" x 4½" x 6¾"
Shipping weight: 4 lbs.

PROVIDES

"A" — 1.5v at 200 m.a.
1.35v at 250 m.a.
1.55v at 300 m.a.
1.35v at 350 m.a.

"B" — 90v at 13 m.a.
101v at 8.5 m.a.

MODEL "B"
BATTERY ELIMINATOR

for 6-volt radios, twin-powered. Model B will convert most 6-volt battery radios. Operates on 105-125 volt 50-60 cycle lines supplying "A" and "B" power. Vibrator disturbance eliminated and high fidelity performance assured by sensational new design having two isolated sources; one for the vibrator and one for the filaments. It provides two sources of 6 volts at 1½ amps., or when connected in parallel —3 amps. Screw type terminals.

LIST PRICE $19.95

Size: 3⅝" x 6⅛" x 5½"

Shipping weight: approx. 7 lbs.

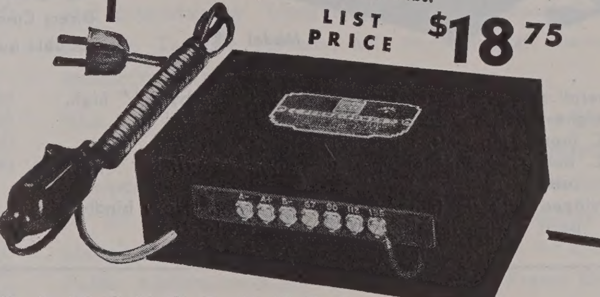
MODEL "E"
BATTERY ELIMINATOR

for 2-volt radios with 4, 5, 6, 7 or 8 tubes. Model "E" has both A and B circuits designed for optimum voltage regulation and changes in line voltage. No distortion or "motor boating."

Model "E" will fit all farm battery radio compartments.

PROVIDES: "A" — 2v at 750 m.a.
"B" — 135v at 25 m.a. tapped at 112v, 90v, and 67v. Screw type terminals.
Size: 2¼" x 4⅞" x 6 13/16"
Shipping weight: approx. 4 lbs.

LIST PRICE $18.75



STEP DOWN TRANSFORMERS

For quick, easy conversion of all standard radios and electrical appliances to 220 volt 50-60 cycle operation. Designed for continuous and reliable performance. 100% safety factor for momentary overloads. Vacuum pressure wax impregnation. Primary connected to U. L. approved 6-ft. cord and plug . . . secondary to female receptacle.

Part No.	Wattage	Overall Dimensions	Mtg. Centers	Weight Net Lbs.	LIST

PRIMARY 235 VOLTS — SECONDARY 117 VOLTS
*Primary has 3 taps at 200, 220 and 240 volts; Secondary 117 volts.

GENERAL TRANSFORMER CORPORATION

MAKERS OF BETTER ELECTRICAL PRODUCTS FOR 20 YEARS

ELECTROX *"Master"* BATTERY ELIMINATOR

Model AR-2

Today's Outstanding D.C. Power Supply Unit, the ELECTROX, Model AR-2, provides the ultimate in humless Direct Current for all-around servicing and demonstrating automobile radios and for all similar applications.

It will operate practically any type or size of automobile radio—whether push button or manually tuned.

It delivers 6 volts of Direct Current free of hum; (less than 3% ripple).

Its D.C. output is adjustable—smooth, humless Direct Current, at the correct voltage is delivered to the individual radio being operated.

Turning the rheostat adjusts the output to 6 volts for any load current between 3 and 15 amperes. This is indicated by the easily read voltmeter located on top of the case. Made by instrument craftsmen to give dependable, trouble-free service.

Overall Dimensions—11½" long, 7¼" wide, 6⅝" high.

Weight—20 pounds.

A.C. Input—115 volts, 1 phase, 60 cycle.

D.C. Output—6 volts, at from 3 to 10 amperes, continuous rating; and from 10 to 15 amperes, intermittent; selectively determined. Negligible hum level, (less than 3% ripple).

Voltmeter—accurate; mounted on top of case for visibility.

Cartridge-type Fuse—easily accessible from outside of case.

Toggle Switch—for A.C. current supply.

Long-life Selenium Rectifier; Condenser; Transformer; Filter Choke.

6 ft. A.C. cord and plug. Wing nut binding posts for connecting DC. leads. Rubber feet.

Steel case—attractive, metallic-brown finish.

Model AR-1

ELECTROX *"Standard"* BATTERY ELIMINATOR

ELECTROX, Model AR-1, is a practical, low-cost D.C. power-supply unit for servicing and demonstrating automobile radios. It is an exceptionally high-grade battery eliminator—compact, rugged, dependable. It delivers Direct Current with very low ripple component, but does not have the adjustable output features embodied in the ELECTROX "Master", Model AR-2.

Overall dimensions—11½" long by 7¼" wide by 6⅝" high.

Weight—20 pounds.

A.C. input—115 volts, 1 phase, 60 cycle.

D.C. output—6 volts at approximately 15 amps, low ripple component.

Equipped with six foot A.C. cord and plug. Heavy binding posts are provided for connecting D.C. leads.

Toggle switch for "ON and OFF."

Cartridge type fuse—easily accessible from outside of case.

Equipment—Condenser, transformer, filter choke, Selenium rectifiers, rubber feet.

Finish—Attractive, well ventilated steel case.

ELECTROX BATTERY BOOSTERS

Designed for safely recharging single storage batteries—small, compact, light in weight but strong. Can be set on floor, shelf or counter or hung on wall. Under ordinary conditions, will recharge battery overnight.

Rectifiers are rugged, long-life Selenium. Ammeter is located in front of case and is easily read. A circuit breaker is supplied to protect against shorts and overloads, having a reset button conveniently located in the front of the case. Complete with 6 ft. A.C. cord and plug, and 5 ft. cord with battery clips for easy connection to batteries. Size: 6¼" x 6" x 7¼".

MODEL BX ELECTROX BATTERY BOOSTER, capacity 6 amperes.

MODEL CX ELECTROX BATTERY BOOSTER, capacity 10 amperes.

MODEL CX has 2/3 more charging capacity than the Model BX at less than 1/3 higher cost.

Model BX

THE SCHAUER MACHINE CO. •

Carter Genemotor

The oldest name in Rotary Power Supplies for Mobile Radio

THE ORIGINAL CARTER GENEMOTOR FOR POLICE-TAXICAB-MARINE AND SMALL AIRCRAFT MOBILE COMMUNICATIONS

OUTSTANDING FEATURES

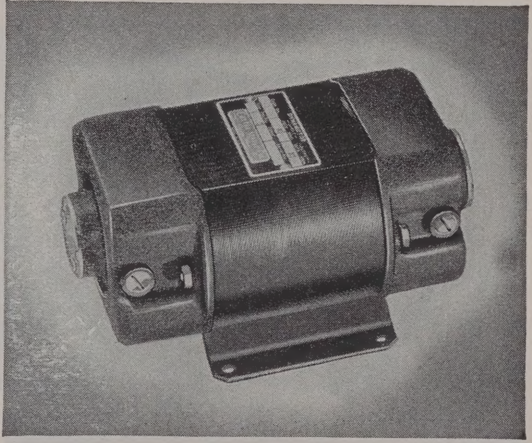
SMALL SIZE—
Simplicity of design permits minimum mounting space.

RELIABILITY—
Designed to deliver over 100,000 ten second transmissions without servicing for most mobile applications.

INSTANT POWER—
Full output in less than 3/10 seconds. No loss of messages due to Dynamotor slugishness.

ARMATURE—
Finest design incorporates transformer laminations, triple insulated wire. Static and dynamically balanced. Diamond-Finished commutators.

VERSATILE—
Carter Genemotor available in *any* input voltage from 5.5 to 115 volt DC.



3″ FRAME GENEMOTOR—7⅛″ LONG, 4⅛″ WIDE, 3½″ HIGH, WEIGHT 10 LBS.

SPECIFICATIONS

The Carter Original Genemotor is the result of over 15 years continuous improvement of design, performance and dependability. Unequalled power for most Police, Marine, Taxicab, Forestry, and small aircraft two-way mobile radio equipment.

The 1½″ Frame Genemotors are the lowest cost Dynamotors available for mobile radio receiver operation. Equipped with oil-less bronze sleeve bearings, lubricated for the life of the unit. The 2″ Frame Genemotors are also sleeve bearing equipped and are designed for mobile Public Address amplifier operation. The 3″ Frame Genemotors fulfill the majority of mobile transmitter requirements. Ball bearing equipped, this model furnishes dependable power to more mobile equipment than any other Dynamotor Power Supply.

Average efficiency 60%, voltage regulation load to no load 25%, ripple 1% unfiltered.

FILTERS—STARTING RELAYS

FILTERS—
Any of the above Carter Genemotors can be furnished with complete filter mounted in metal box mounted below unit. Add "X" to end of code number and following prices. 1½″ and 2″ Frame Genemotor models, $24.00 list, 3″ Frame Genemotor models, $25.00 list.

STARTING RELAYS—
Heavy Duty solenoid contactor starting relays are available for 5.5, 6, 12, 24, 28, 32 and 115 volt DC input. Add "R" to end of code number and $8.00 to list price (Relay draws 1.3 amps at 6 volts).

DUTY RATINGS—
Intermittent duty shall be considered 10 seconds on 20 seconds off. Continuous duty is considered 24 hours per day.

INPUT VOLTAGES—
Any Carter Genemotor can be supplied for special input voltages other than 6 volts. For 5.5, 12, 24, 28, 32 or 64 volt input add $2.50 to list. For 115 volt DC input add $3.50 to list.

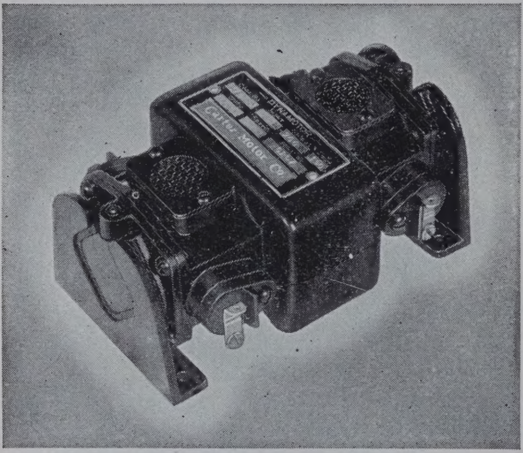
MARINE IMPREGNATION—
Special Marine Impregnation available on all Genemotor models upon request, add $2.00 to list price.

See replacement parts reference chart page for other special models, parts and prices.

Carter *Magmotor*

The oldest name in Rotary Power Supplies for Mobile Radio

THE CARTER MAGMOTOR FOR POLICE - TAXICAB - MARINE AND AIRCRAFT RADIO RECEIVERS-GEOPHYSICAL AND RESEARCH ELECTRONIC EQUIPMENT



Carter Magmotor—5⅝″ Long, 3-11/16″ Wide, 2½″ High, Weight 4¾ lbs.

OUTSTANDING FEATURES

ALNICO FIELDS —

Eliminates field coils and increases efficiency.

SMALL SIZE —

Compact design permits minimum mounting space.

MOUNTING —

Rigid mounting furnished. Rubber shock mounting as illustrated available upon request at no extra cost.

FLEXIBILITY —

Extended shafts available for small power take off. Also available as an AC or DC external driven Generator.

Carter Magmotor is the ideal Rotary Power Supply for Police and Taxicab receivers. PM fields reduce size and increase efficiency. Normal brush life of 2000 to 3000 continuous running hours on models up to 25 watts output. Intermittent duty models are designed for transmitter operation as well as geophysical and research applications. Ball bearing equipped. Average efficiency of receiver types 50%, transmitter types to 65%. Output voltage regulation 20%. AC ripple 1% unfiltered. The Magmotor is also available on special order in extended shaft models as AC or DC generators for 30 watt continuous duty and 50 watt intermittent duty. Special Geophysical models possess high humidity impregnation at no extra cost.

CARTER MAGMOTOR

5⅝″ long, 3-11/16″ wide, 2½″ high, weight 4¾ lbs.

Code No.	DC Input		DC Output		Duty	List Price

MVS415	5.5	19	400	150	Int.	$57.50
MBS415	12	8.5	400	150	Int.	$57.50

AC AND DC GENERATORS —

The Magmotor is available on special order for AC output up to 220 volts at 120 cycles. DC output up to 400 volts 30 watts continuous, 50 intermittent, depending upon armature speed.

EXTENDED SHAFTS —

Available on all Magmotor models add "S" to end of code number and $5.00 to list.

FILTERS —

Available on all Magmotor models, Add "X" to code number and $24.00 to list.

STARTING RELAYS —

Low power models seldom require starting relays because of low drain consumed. Heavy Duty solenoid contactor relays recommended on high output models. Add "R" to code number and $8.00 to list for 6, 12, 24, 28, 32 or 115 volt DC relay. (6 volt relay draws 1.3 amps.)

INPUT VOLTAGES —

All Magmotors can be supplied for special input voltages other than 6 volts. For 5.5, 12, 24, 28, 32, 64 volt input add $2.50 to list. For 115 volt DC input, add $3.50 to list.

DUTY RATINGS —

Intermittent duty shall be considered 10 seconds on 20 seconds off. Continuous duty, 24 hours per day.

MARINE IMPREGNATION —

Available on all Magmotors upon request, add $2.00 to list. Furnished on Geophysical models as standard feature.

MOUNTINGS —

Rigid type mountings furnished as standard base. Rubber shock mounts available upon request at no extra cost.

Carter *Super Dynamotor*

The oldest name in Rotary Power Supplies for Mobile Radio

THE CARTER SUPER DYNAMOTOR FOR AIRCRAFT, MARINE, POLICE AND RAILROAD COMMUNICATIONS

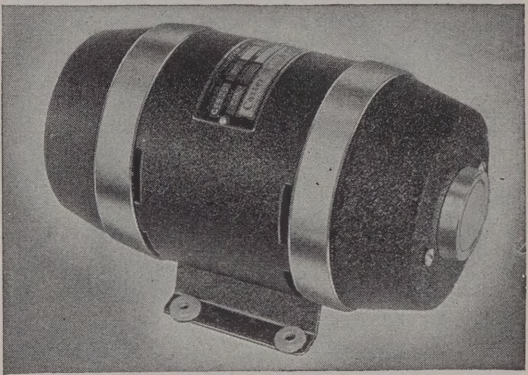
OUTSTANDING FEATURES

ARMATURE —
Triple insulated windings. Additional silk insulation on models over 600 volts. Transformer grade laminations. Static & Dynamically balanced.

ONE PIECE FRAME —
Exclusive cast frame simplifies construction and reduces losses.

COMMUTATORS —
Hard drawn silver alloy copper segments, diamond finished.

BRUSHES —
Engineered for long brush and commutator life, beryllium springs.



Super Dynamotor—8¼″ Long, 4½″ High, Weight 11¾ lbs.

The Super Dynamotor is designed for larger mobile transmitters requiring 150 to 250 watts of Dynamotor power. Specified by leading Airlines, Marine and Police mobile communication manufacturers. Constructed of finest materials and designed to withstand heavy overloads. Triple insulated and baked to assure dependable operation at high voltages. Triple or Quadruple insulated silk covered windings are used above 600 volts output to afford maximum insulation.
Average efficiency, 65%, voltage regulation 25% or less, 1% AC ripple unfiltered.
Cast aluminum mounting base less grommets supplied.

SUPER DYNAMOTOR

8¼″ long, 4½″ wide, 4¾″ high, weight 11¾ lbs.

FILTERS —
Available on all Super Dynamotors. Add "X" to Code Number and $30.00 to list.

STARTING RELAYS —
Heavy duty solenoid contactor relays available for 12, 24, 28 and 32 and 115 volt DC input. Add "R" to Code Number and $8.00 to list.

INPUT VOLTAGES—
Super Dynamotors available in 6 volt (if current drain permits) and 12, 24, 28, 32, 64 volt. Add $2.50 to list. Add $3.50 to list for 115 volt DC input.

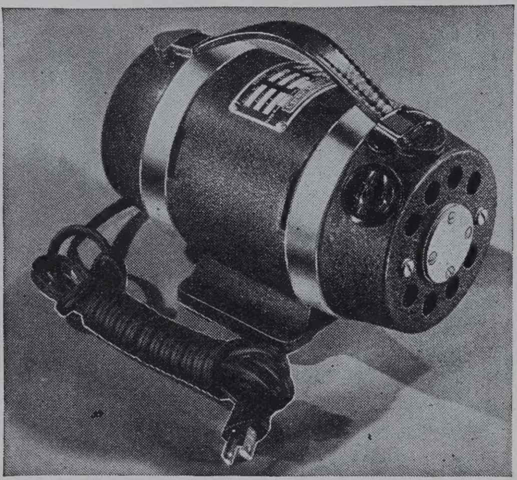
DUTY RATINGS —
Intermittent duty shall be considered 10 seconds on, 20 seconds off. Continuous duty, 24 hours per day.

MARINE IMPREGNATION —
Available on all Super Dynamotors upon request, add $2.00 to list. Furnished on Marine models as standard feature.

Carter Super Converter

The oldest name in Rotary Power Supplies for Mobile Radio

CARTER SUPER CONVERTER—Changes DC to AC for Amplifiers - Radios - High Power Factor equipment



Carter Super Converter, Less Filter, 8¼" Long, 4½" Wide, 5" High, Weight 13 lbs.

Wherever DC to AC Conversion is necessary, the Carter Super Converter provides an efficient and reliable source of AC power. Standard models are designed for high power factor, non-inductive AC loads such as amplifiers, radio receivers, (requires filtered converter), etc. Ball bearing equipped, 3600 RPM. CAUTION: Standard Super Converters will not satisfactorily operate inductive loads such as AC motors, low power factor transformers, etc.

Manually operated frequency controlled Converters available on special order. Maintain 60 cycle output with a + or — 10% input voltage fluctuation.

Special custom-matched Converters are also available for Wire and Tape Recorders, Sound Projectors, 7" Television Receivers, etc. See Carter Selector Chart on next page.

Overall efficiency 60% AC voltage regulation 15%.

HEAVY DUTY SUPER CONVERTER

10¼" long, 4½" wide, 5" high, weight 19 lbs.

Code No.	DC Input Volts	DC Input Amps	AC Output 60 cy. Volts	AC Output 60 cy. (Watts)	Type Duty	List Price

B1025C	12	34	115	250	Con.	81.50

OUTSTANDING FEATURES

SMALL SIZE
Smallest Rotary Converter. Lightweight.

CARRYING HANDLE
Easier to carry, no more "juggling" with a hot unit.

OUTPUT RECEPTACLE
Convenient plug in AC outlet.

ARMATURE
Double wound, insulated ungrounded winding. Built-in cooling fan.

BALL BEARINGS
Sealed ball bearings require no lubrication or attention for life of unit.

SPECIFICATIONS

Carter Super Converter, 40 to 150 watt models 8¼" long, 4½" wide, 5" high, weight 13 lbs. High power factor, 85 to 100%. Less filter.

FILTERS—Available on all Super Converters. Eliminates Converter noise on most frequencies from 560 KC to 54 MC. Filter mounted in cast aluminum housing below Converter. Add "X" to Code Number and $25.00 to list.

FREQUENCY CONTROL—Manually operated frequency control available on all models. Complete with vibrating reed meter, and rheostat control in aluminum housing. Add $60.00 to list.

VOLTAGE-FREQUENCY—220 volt output or 50 cycle available on special order. Add $5.00 to list for each.

See Carter Selector Chart for Wire and Tape recorder, 7" Television receivers, etc., custom-matched Converters.

Carter Selector Chart

The oldest name in Rotary Power Supplies for Mobile Radio

Whenever DC to AC Rotary Converters are used to power wire or tape recorders and other similar recording equipment, output frequency must be perfectly matched to assure proper playback performance. All of the equipment listed has been laboratory-tested and Carter Converters custom-designed for each model. Use this Chart to select the Converter designed for each model. Prices of Selector Chart Converters are the same as standard models of similar code number.

Code letter "W" indicates a recorder type Converter.

Average efficiency 60%. Voltage regulation 15%. 70% Power Factor on wire and tape recorder models. Converters require NO FILTER, except when recorders have radio receivers.

RADIART VIBRATORS

RADIART AERIALS

VIBRATOR BASE DIAGRAM CROSS INDEX

Symbols Used in Vibrator Base Diagrams

A —A hot line into vibrator.
B —By-pass for driving point.
C —External coil lead in shunt vibrator.
P_1—Primary contact, usually, but not necessarily connected to the magnet coil in shunt vibrators.
PP_1—Dual primary contact, closed when P_1 is closed.
P_2—Primary contact, may be the magnet coil connection instead of P_1.
PP_2—Dual primary contact, closed when P_2 is closed.
R —Vibrating reed in single-reed vibrators.
RP—Primary vibrating reed in split-reed vibrators.
RS—Secondary vibrating reed in split-reed vibrators.
S_1 —Secondary contact, closed when P_1 is closed.
S_2 —Secondary contact, closed when P_2 is closed.
* All dimensions given are in inches.
† For further information as to Identifying Characteristics, see information given on each Vibrator type in **Radiart Replacement Guide.**

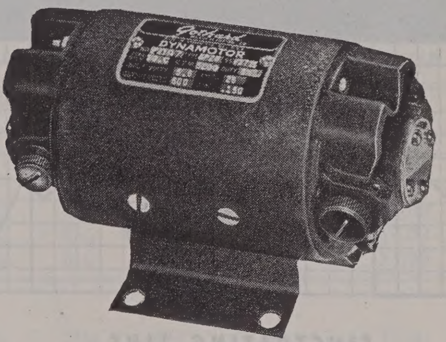
DYNAMOTORS Gothard CONVERTERS



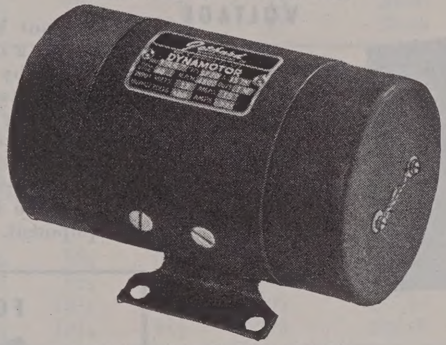
MODEL "GP-26" DYNAMOTOR

GOTHARD DYNAMOTORS

The GOTHARD Model "GP-26" is especially designed and built for Mobile Transmitter applications, intermittent duty. Length 7¼", Diam. 3½", Height 4", Weight 8¼ lbs.

INPUT		OUTPUT			Approx.	App.	List
Volts	Amps.	Volts	MA	Watts	Effic.	Reg.	Price
5.6	24	400	200	80	60%	17%	$77.00
5.6	26	600	150	90	61%	18%	79.50
5.6	29	400	250	100	61%	19%	79.50
5.6	31	620	170	105	61%	20%	79.50
5.6	33	500	225	112	61%	21%	79.50
5.6	34	420	280	118	62%	22%	79.50
6.0	40	400	375	150	63%	25%	82.00

Also supplied for 12, 14, 24, 28, or 32 Volt input
For continuous duty applications, Models GP-12, GP-17 and GP-26 cover wattage ratings from 20 to 80 Watts. Input voltages 6, 12, 24, or 32.
GP-12: Length 5¾", Diam. 3½", Height 4", Weight 5¼ lbs.
GP-17: Length 6¼", Diam. 3½", Height 4", Weight 6 lbs.
GP Models have steel mounting bases; width 4$\frac{5}{16}$".

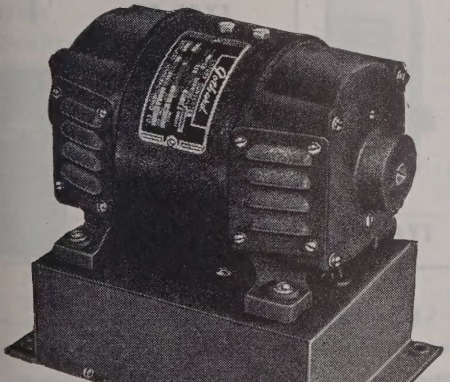


MODEL "SF-20" DYNAMOTOR

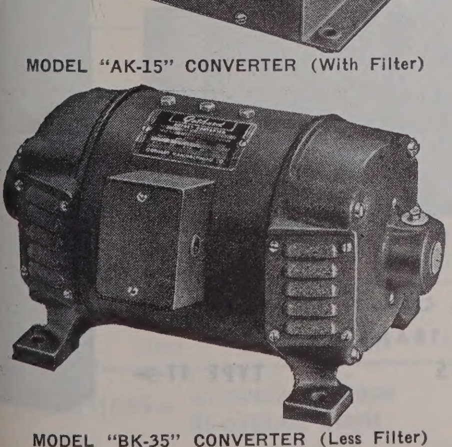
GOTHARD AIRCRAFT DYNAMOTORS

Frame	INPUT		OUTPUT		List			
Size	Volts	Amps.	Volts	MA	Price	Length	Diam.	Weight
DS-12	12	2.6	250	60	$64.00	4¾"	2¾"	2⅞"
DS-17	12	3.6	250	90	71.50	5¼"	2¾"	3⅞"
SP-12	12	4.0	250	100	80.00	6"	3½"	4¾"
SP-17	12	5.2	300	125	87.00	6½"	3½"	5⅝"
SP-22	12	6.4	400	125	91.50	7"	3½"	6½"
SF-20	12	8.4	400	150	104.00	6¾"	4"	8½"
SF-25	12	10.	500	150	123.00	7¼"	4"	9¾"

Above ratings are continuous duty with temperature of 40°C.
Also supplied for 6, 14, 24, 28, or 32 Volt input. "SP" and "SF" dynamotors may be supplied in fan-ventilated construction as types "SPF" and "SFF". Prices upon request.



MODEL "AK-15" CONVERTER (With Filter)



MODEL "BK-35" CONVERTER (Less Filter)

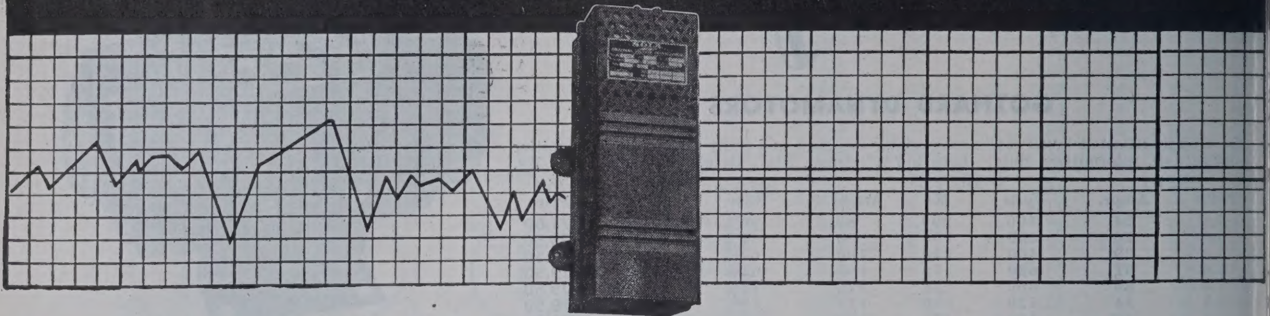
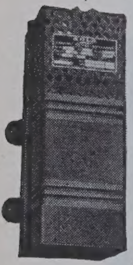
Also supplied for Marine Type Filter, 220 Volt A.C. Output, and automatic frequency control. Prices upon request.

SOLA Constant Voltage Transformers



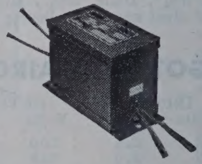
FLUCTUATING LINE VOLTAGE

CONSTANT OUTPUT VOLTAGE



SOLA CONSTANT VOLTAGE TRANSFORMER TYPE 3

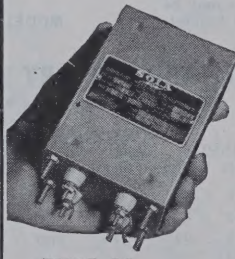
Constant Voltage Transformers are designed to provide a constant output voltage which is unaffected by changes in input voltage. Stabilization is instantaneous and automatic and there are no moving parts. Constant Voltage Transformers also provide isolation between input and output circuits. Low output voltage wave distortion and small size make these transformers especially attractive for use with all types of electronic equipment.



SOLA CONSTANT VOLTAGE TRANSFORMER TYPE 1

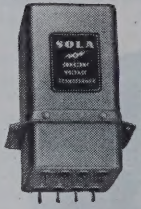
SOLA CONSTANT VOLTAGE TRANSFORMER TYPE 21

FOR CHASSIS MOUNTING



TYPE 11

Output capacities up to 15 VA, with output at either 6.3 volts or 115 volts. Both types are immersion proof and capable of tropical service. Type 12 furnished with separate condenser. Prices include condenser.



TYPE 12

SOLA CONSTANT VOLTAGE TRANSFORMER TYPE 2

SOLA CONSTANT VOLTAGE TRANSFORMER TYPE 22

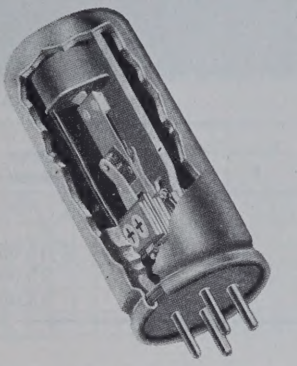
CORNELL-DUBILIER VIBRATORS



FEATURES

- C-D designed electronic micrometric equipment removes guesswork in contact point setting and assures consistent high quality.
- Exclusive C-D pole piece design and armature weight results in a perfectly-balanced unit with greater efficiency.
- Exclusive C-D base mounting results in a full floating unit. That's why C-D vibrators last longer.
- Unit completely enclosed in new floating sock—an exclusive with C-D vibrators. Eliminates usual difficulties found in other vibrators.
- New stack design will take peak voltages of even 4,200 volts with no damage to vibrator.

WARNING: Always check the Buffer Capacitors before installing a new vibrator: Failure to do so will void the guarantee. Always use C-D Buffer Capacitors for replacement.

There's a
POWERSTAT
VARIABLE TRANSFORMER
for *Your* application

PROTECT THE INVESTMENT IN YOUR EQUIPMENT

Recent advances in the electrical field have made more critical the need for precise voltage control equipment designed to protect and to operate highly sensitive and expensive apparatus. Whether the application involves the control of light, heat, sound, power or electronic equipment, there's a POWERSTAT variable transformer to suit every requirement.

OIL-COOLED POWERSTATS

Line Voltage	Output Voltage	Maximum Output Amperes	Output KVA	Frequency	Type
115	135	15.0	2.0	50/60	0-116
		30.0	4.0	50/60	0-1126
230	270	6.0	1.6	50/60	0-216
		18.0	4.8	50/60	0-1226

*When these POWERSTATS are "L" connected so that output does not exceed applied voltage, frequency range is 50/60 cycles.

POWERSTAT Variable Transformers are auto-transformers of toroidal core design, with a movable brush-tap which rotates to deliver a continuously-adjustable output voltage from a-c power lines. Into each POWERSTAT are incorporated superior qualities of top electrical performance, rugged mechanical construction, compact design and durability. POWERSTATS feature zero waveform distortion, excellent regulation, conservative ratings, standard mountings, smooth control and high efficiency. POWERSTATS are available with motor drives for pushbutton remote control, or for use with automatic controllers. A variety of motor speeds is offered.

POWERSTAT VARIABLE TRANSFORMERS • VOLTBOX A-C POWER SUPPLIES • STABILINE VOLTAGE REGULATORS

STABILINE AUTOMATIC VOLTAGE REGULATORS

DELIVER CONSTANT OUTPUT VOLTAGE REGARDLESS OF VARIATIONS IN INPUT VOLTAGE OR LOAD CURRENT

Two types of automatic voltage regulators are built by The Superior Electric Company, designed to maintain constant output voltage to large loads or as a means of obtaining a constant output voltage with zero waveform distortion. Type IE (instantaneous electronic) gives instant correction; Type EM (electromechanical), while not instantaneous, corrects faster than most types of constant voltage regulators.

TYPE IE51002
(Portable)

INSTANTANEOUS ELECTRONIC STABILINES

Completely electronic voltage regulators, instantaneous in action; no moving parts; waveform distortion *never* exceeds 3% output voltage is stable within ± .1 of 1% for wide line variations. Available in cabinet, portable or rack-mounting models.

RATINGS

Input Voltage Range	Output Voltage Range	Frequency in Cycles	Load Range in Amperes	Load Power Factor Range	Rated Output KVA	Type

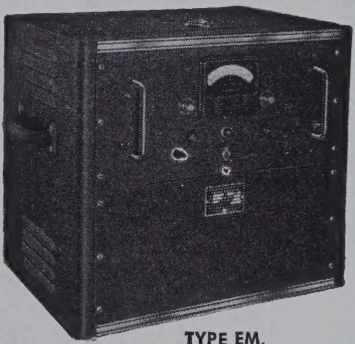
195-255	220-240	50 ± 10%	0-4.5		1.0	IEL5201



TYPE EM,

ELECTROMECHANICAL STABILINES

Consist of an electronic detector circuit controlling a motor-driven POWERSTAT variable transformer. Features: zero waveform distortion, insensitivity to magnitude and power factor of load, no effect on system power factor, no critical adjustments, high efficiency, adjustable output voltage.

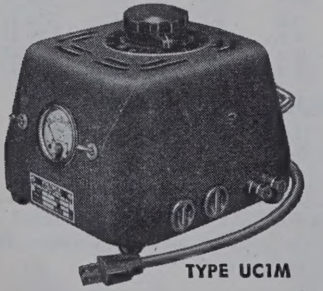
Because of differences in basic design, it's possible to order a STABILINE voltage regulator to meet the requirements of any problem in voltage regulation. If you have a particular problem, write The Superior Electric Company. Our staff of voltage control engineers is available for consultation — at no obligation to you. It's through this engineering service that we can best serve you; that we can design and build voltage control equipment second to none in the electrical industry.

VOLTBOX A-C POWER SUPPLIES: Compact, portable sources of variable a-c voltage for use in laboratory, inspection and maintenance sections and in transmitter workrooms. Two types available: **UC1M** — 115V, 50/60 cycle, 1 phase, output 0-135V, 7.5 amps, 1KVA, **UC2M**—230V, 50/60 cyce, 1 phase, output 0-270V, 3.0 amps, 810VA.



TYPE UC1M

NEW 5-WAY BINDING POST ➡

5 methods of connection. Complete insulation, 30 amp. current capacity, 1000V working voltage. Captive head for convenience. Red or black color. 5 connections:

1. PERMANENT CLAMPING. 2. SPADE LUG. 3. PLUG-IN FOR BANANA PLUG. 4. LOOPING AND CLAMPING. 5. CLIP-LEAD.

STANCOR

The Stancor units listed on the following pages are representative of the most complete stock in the industry available for 48 hour delivery from Stancor distributors. In addition to maintaining the Stancor stock line of more than 400 part numbers, a large part of Stancor's modern production facilities is devoted to the fabrication of special design components for leading manufacturers of radio, television and other electronic equipment. Your inquiries are invited. Quotations will be furnished promptly.

STANCOR TELEVISION COMPONENTS

VERTICAL DEFLECTION OUTPUT TRANSFORMER

Stancor No. A-8115. Interchangeable with RCA type 204T2. Designed for use in typical vertical deflection circuits to couple the vertical output tube to the deflection yoke. May be used in conjunction with RCA type 201D1 yoke and kinescopes such as RCA types 10BP4, 7DP4 and 5TP4. Type N mounting. Dimensions: 3$\frac{1}{16}$″ H x 2½″ W x 2½″ D. Mtg. ctrs., 1$\frac{19}{32}$″ x 2″. Shpg. wt., 2.5 lbs. **List Price $6.00.**

Stancor No. A-8116. Interchangeable with RCA type 204T9. Designed to couple the vertical output tube to the deflection yoke in typical deflection circuits. For use in conjunction with RCA type 201D1 deflection yoke and kinescopes such as RCA types 10BP4 and 16AP4. Type A mounting. Dimensions: 3$\frac{1}{16}$″ H x 2½″ W x 2¼″ D. Mtg. ctrs., 1$\frac{19}{32}$″ x 1¾″. Shpg. wt., 2.2 lbs. **List Price $4.40.**

VERTICAL BLOCKING-OSCILLATOR TRANSFORMER

Stancor No. A-8111. For use in vertical blocking-oscillator circuits for generation of 60 cps. required to drive grids of vertical discharge tubes. Type A mounting. Dimensions: 1½″ H x 2½″ W x 1½″ D. Mtg. ctrs., 2″. Shpg. wt., 0.4 lbs. **List Price $2.50.**

Stancor No. A-8121. Interchangeable with RCA type 208T2. For use in vertical blocking-oscillator circuits for generation of 60 cps. required to drive grids of vertical discharge tubes. Type TD mounting. Dimensions: 1¾″ H x 2$\frac{5}{16}$″ W x 1½″ D. Mtg. ctrs., 1$\frac{15}{16}$″. Shpg. wt., 0.4 lbs. **List Price $3.20.**

HORIZONTAL DEFLECTION OUTPUT AND HV TRANSFORMER

Stancor No. A-8117. For replacement of RCA type 211T1. For use with RCA type 201D1 deflection yoke and kinescopes such as RCA types 7DP4 and 10BP4. Used with one 6BG6-G deflection amplifier, one 6AS7-G or one 5V4-G scanning booster and one 1B3-GT/8016 pulse rectifier (may require filament resistor, adjusted for proper voltage). Auto-transformer primary provides voltage for pulse rectifier supplying kinescope anode potential. Filament winding for pulse rectifier included. Tap on secondary permits connection of width control. Powdered iron core. Max. current rating (RMS): Pri. (1–2), 80 ma; Sec. (4–6), 250 ma. DC resistance @ 25° C (Approx): Pri. (1–2), 107 ohms; (2–3), 200 ohms; Sec. (4–6), 10.1 ohms. Turns: Pri. (1–2), 1,000; (2–3), 600; Sec. (4–6), 315; (5–6), 15. Type HT mounting. Dimensions: 4$\frac{11}{32}$″ W x 3¾″ D x 2$\frac{3}{32}$″ H. Shpg. wt., 1.7 lbs. **List Price $10.10.**

Stancor No. A-8118. For use with one 6BG6-G deflection amplifier, one 6AS7-G or one 5V4-G scanning booster and one 1B3-GT/8016 pulse rectifier (may require filament resistor, adjusted for proper voltage). Use with Stancor DY-1 deflection yoke or equivalent and direct viewing kinescopes, such as RCA types 7DP4 and 10BP4. Max. current rating (RMS): Pri. (1–2), 100 ma; Sec. (4–6), 250 ma. DC resistance @ 25° C (Approx.): Pri. (1–2), 160 ohms; (2–3), 130 ohms; Sec. (4–6), 12.5 ohms. Turns: Pri. (1–2), 1100; (2–3), 660; Sec. (4–6), 345; (5–6), 15. Type HO mounting. Dimensions: 3″ W x 3¾″ H x 2$\frac{1}{64}$″ D. Shpg. wt., 1.2 lbs. **List Price $9.75.**

HORIZONTAL BLOCKING-OSCILLATOR TRANSFORMER

Stancor No. A-8110. Interchangeable with RCA type 208T3. Vacuum wax impregnation for quiet operation. Type A mounting. Dimensions: 1½″ H x 2½″ W x 1½″ D. Mtg. ctrs., 2″. Shpg. wt., 0.4 lbs. **List Price $2.75.**

Stancor No. A-8120. Interchangeable with RCA type 208T1. Generates 15,750 cps. pulse required to drive grids of horizontal discharge tubes. Type TD mounting. Dimensions: 1¾″ H x 2$\frac{5}{16}$″ W x 1½″ D. Mtg. ctrs., 1$\frac{15}{16}$″. Shpg. wt., 0.4 lbs. **List Price $3.90.**

PLATE AND FILAMENT TRANSFORMER

Stancor No. P-8150. For use with type 2X2 rectifier tubes in a conventional half-wave circuit to obtain high voltage supply. Contains filament winding for the rectifier tube. H.V. Secondary: AC volts, 1550; DC ma., 1.5. Rec. filament: 2.5 v—1.75 amp. Type TD mounting. Dimensions: 3$\frac{1}{16}$″ H x 3″ W x 2½″ D. Mtg. ctrs., 2⅜″ x 1½″. Shpg. wt., 1.8 lbs. **List Price $9.75.**

Stancor No. P-8151. For use with type 2X2 rectifier tube in a conventional half-wave circuit to obtain high voltage supply. Contains an extra 2.5 volt filament winding. H.V. Secondary: AC volts, 2400; DC ma., 5.0. Rec. filament: 2.5 v—2 amp. Filament # 2: 2.5 v—2 amp. Type C mounting. Dimensions: 4$\frac{5}{16}$″ H x 3$\frac{9}{16}$″ W x 3⅞″D. Mtg. ctrs., 2¾″ x 2$\frac{11}{16}$″. Shpg. wt., 6.4 lbs. **List Price $14.80.**

Stancor No. P-8152. For replacement of RCA type 201T6, used in RCA model 630TS receiver. High voltage winding designed to deliver 405 volts DC at 295 ma into an 80 mfd condenser input filter following two type 5U4-G tubes in a full-wave rectifier circuit. Copper shorting band reduces image distortion to a minimum by cutting down external magnetic field. Plate supply: AC volts, 365–0–365: DC ma, 295. Rectifier filament: 5.0 v—6.0 amp. Auxiliary filaments: 5.0 v—2.0 amp., 12.6 v CT—5.0 amp. Type M mounting. Dimensions: 3⅞″ W x 4⅝″ L x 6$\frac{1}{16}$″ H. Mtg. ctrs., 3$\frac{3}{16}$″ x 4$\frac{1}{16}$″. Shpg. wt., 16.5 lbs. **List Price $26.25.**

Stancor No. P-8153. For replacement in RCA model 721TS receiver. High voltage winding delivers 360 volts at 250 ma into an 80 mfd condenser input filter following a type 5U4-G tube in a full-wave rectifier circuit. Copper shorting band around core minimizes image distortion by reduction of external magnetic field. Plate supply: AC volts, 365–0–365; DC ma, 250. Rectifier filament: 5.0 v—3.0 amp. Auxiliary filaments; 6.3 v—6.0 amp, 6.3 v—.8 amp, 5.0 v—2.0 amp. Type M mounting. Dimensions: 3⅞″ W x 4⅝″ L x 5″ H. Mtg. ctrs., 3$\frac{3}{16}$″ x 4$\frac{1}{16}$″. Shpg. wt., 12.5 lbs. **List Price $22.00.**

These two transformers are designed to work together as a more economical power supply than is possible with one unit.

Stancor No. P-8154. Plate supply: AC volts, 375–0–375; DC ma, 205. Rectifier filament: 5.0 v—3 amp. Auxiliary filaments: 5.0 v—2 amp, 6.3 v—5.6 amp. Type M mounting. Dimensions: 3¾″ W x 4½″ L x 4¼″ H. Mtg. ctrs., 3¾″ x 3″. Shpg. wt., 9.1 lbs. **List Price $15.20.**

Stancor No. P-8155. Plate supply: AC volts, 225–0–225; DC ma, 90. Rectifier filament: 5.0 v—2 amp. Auxiliary filament: 6.3 v—5.15 amp. Type M mounting. Dimensions: 2$\frac{13}{16}$″ W x 3⅜″ L x 3¾″ H. Mtg. ctrs., 2$\frac{13}{16}$″ x 2¼″. Shpg. wt., 4.5 lbs. **List Price $8.90.**

Stancor No. P-8156. Exact duplicate replacement for RCA type 201T6 used in RCA model 630TS receiver. High voltage winding designed to deliver 405 volts DC at 295 ma into an 80 mfd condenser input filter following two type 5U4-G tubes in a full-wave rectifier circuit. Copper shorting band around core minimizes image distortion by reduction of external magnetic field. Plate supply: AC volts, 365–0–365; DC ma, 295. Rectifier filament: 5.0 v—6.0 amp. Auxiliary filaments: 5.0 v—2.0 amp, 12.5 v CT—5.0 amp. Type M mounting. Dimensions: 3$\frac{13}{16}$″ W x 4¾″ L x 6⅝″ H. Mtg. ctrs., 3$\frac{3}{16}$″ x 4$\frac{1}{16}$″. Shpg. wt., 16.5 lbs. **List Price $25.50.**

Stancor No. P-8157. Exact duplicate replacement for Motorola part number 25C484095 used in models VK106, VT105 and VT107. Designed for use with dual full-wave rectifiers and filters to supply two outputs simultaneously: 5U4-G (395 volts DC at 195 ma across 40 mfd input) and 5Y3-GT (212 volts DC at 105 ma across 40 mfd input). Plate supply #1: AC volts, 385–0–385; DC ma, 195. Rectifier filament: 5.0 v—3.0 amp. Plate supply #2: AC volts, 235–0–235; DC ma, 105. Rectifier filament: 5.0 v—2.0 amp. Auxiliary filaments: 6.3 v—7.65 amp, 6.3 v—0.6 amp, 5.0 v—2.0 amp Type M mounting. Dimensions: 3¾″ W x 4½″ L x 4¾″ H. Mtg. ctrs., 3″ x 3¾″. Shpg. wt., 11.1 lbs. **List Price $21.00.**

OUTPUT TRANSFORMER

Stancor No. A-8114. Matches single type 6K6 tube (7,600 ohms—32 ma) to a 3.2 ohm voice coil. Type A mounting. Dimensions: 1⅜″ H x 2⅜″ W x 1⅜″ D. Mtg. ctrs., 2″. Shpg. wt., 0.4 lbs. **List Price $1.65.**

FILTER CHOKE

Stancor No. C-2325. Rated inductance, 2 hy. (min.). Rated DC, 200 ma. DC resistance, 60 ohms. Test volts, 1500 RMS. Core, ⅞″ x ⅞″. Type A mounting. Dimensions: 2¼″ H x 3¾″ W x 2¼″ D. Mtg. ctrs., 3⅛″. Shpg. wt., 1.8 lbs. **List Price $2.90.**

Stancor No. C-2326. Rated inductance, 1 hy. (min.). Rated DC, 300 ma. DC resistance, 43 ohms. Test volts, 1500 RMS. Core, ⅞″ x ¾″. Type A mounting. Dimensions: 2¼″ H x 3¾″ W x 2¼″ D. Mtg. ctrs., 3$\frac{5}{16}$″. Shpg. wt., 1.7 lbs. **List Price $2.90.**

DEFLECTION YOKE

Stancor No. DY-1. Replaces RCA type 201D1. For use with direct viewing kinescopes requiring 50° magnetic deflection, such as RCA types 7DP4 and 10BP4. Provides required retrace time when used with deflection circuits employing horizontal output transformers equivalent to RCA types 211T1 and 211T3, and vertical output transformers equivalent to RCA types 204T2 or 204T9. Performance checked to close linearity limits. Type DY mounting. Shpg. wt., 1.2 lbs. **List Price $7.50.**

FOCUS COIL

Stancor No. FC-10. Interchangeable with RCA type 202D1. Designed for magnetically focused kinescopes with deflection angles up to 50°, such as RCA type 10BP4. The large center hole of the coil provides ample clearance between core and kinescope neck, allowing for tipping and displacing axis when necessary. For best performance, a rheostat adjustment of the operating current should be used. Type FC mounting. Shpg. wt., 2 lbs. **List Price $7.50.**

TRANSFORMERS

REACTORS POWER PACKS TRANSMITTERS

Stancor's Universal Power Transformers represent the last word in efficient transformer construction. They are designed for compactness without sacrificing efficiency.

Four universal brackets permit their being mounted in either vertical or horizontal position. Transformers equipped with 8″ flexible RMA color coded leads and static shields.

All of the above transformers are for operation on 117 volts, 60 cycles.
Other voltage and frequency combinations available on special order. Write for quotations.

Tube Checker Transformer

Especially designed for use in modernizing older types of tube checkers. Ideal for other testing equipment and laboratory. Packed with wiring instructions giving color coding of leads.

Universal Interstage Transformers—Split Secondaries

Stancor No.	Application	Turns Ratio	D.C. Pri. Ma.	Type Mtg.	Dimensions H	Dimensions W	Dimensions D	Mtg. Ctrs.	Wgt. in Ctn.	List Price
A-4773	Universal	3:1	10	TD	2 11/16″	2¾″	2 3/16″	2⅜″	1.5	**$6.00**
A-4774	Universal	3:1	10	S	2 5/16″	2⅞″	1¾″	2⅜″	1.5	**4.05**

May be used as plate to grid; push pull input or push-pull interstage replacement transformers. Have 3:1 over all ratio, however, primary is center-tapped and secondary has split winding, thus permitting ratios of 1:1, 3:1 and 6:1. Transformers may be used in either step-up or step-down applications.

Tone Control Unit

The necessary components for a dual tone control circuit to provide both bass and treble attentuation when used in conjunction with two dual 250,000 ohm potentiometers. Contained in Hi-Fi-type W-1 cast case for shielding against hum pickup and provided with 12 Flexible Coded Leads for direct connection in the circuit. Dimensions H.3 1/2″ x W.2 3/4″ x L.3 1/16″. Packed with complete instructions for installation and use.

Testing Autoformer

Incorporates a convenient tap switch to permit variable voltages from 90 to 150 volts. Primary equipped with 5 ft. approved cord and plug. Secondary connected to female receptacle. Locking screw mounted on switch.

Stancor No.	Secondary Voltage	Primary Voltage	Output Watts	Type Mounting	Dimensions H	W	D	Wgt. in Ctn.	List Price
P-6299	90, 100, 110, 120, 130, 140, 150, @ 50–60 cy.	115V	150	KA	3⅞"	3¼"	4¾"	8.0	**$14.95**

Step-Down Autoformers

These transformers are excellent units to be used with standard apparatus on 220-250 volt lines. May also be wired to step up 110-125 volts to 220-250 volts for test purposes or other applications.

* Mounted in special can and equipped with cord, plug and receptacle.

Isolation Transformers

These transformers are designed with an electrostatic shield to isolate line noises and interference from the apparatus being used. They are suitable for screen test booths, electrical therapeutic machines, medical instruments, beauty parlor equipment, electric furnaces, amateur transmitters, etc. Each unit complete with a 6 ft. cord and plug and a female receptacle. Units in first group are straight isolation types; second group are step-down isolation units. Tap switch controls primary voltage, except on Nos. P-6123, P-6125, P-6389 and P-6390.

STANCOR TRANSFORMERS

REACTORS POWER PACKS TRANSMITTERS

Plate Transformers

This group of transformers is designed primarily to deliver the rated D.C. voltage and current outputs when used with full-wave mercury vapor rectifier tubes in conjunction with a two section filter employing choke input and two 2 mfd. condensers working into a resistive load.

Generous coil and core design result in a transformer with above average regulation and efficiency. Phenolic terminal boards and heavy duty ceramic insulators assure protection from voltage breakdown.

Stancor's Power Pack - Model 752

CONTINUOUS OUTPUT RATING—6 Volts @ 12.5 Amperes D.C.—5% max. ripple at full load.

INTERMITTENT OUTPUT RATING—25.0 Amperes D.C. For use with push-button or floor-switch magnetic tuning of all popular car radio receivers.

CONTINUOUS VOLTAGE CHECK—Built-in voltmeter for visual checking of output voltage.

ADJUSTABLE VOLTAGE CONTROL—Tap switch provides selection of proper output voltage for various loads.

CONSERVATIVE RATING—Built with heavy duty components throughout.

HIGH OVERLOAD CAPACITY—Low internal resistance—good voltage regulation provide high output current capability for intermittent loads.

CONTROL PANEL—Readily accessible at front of case.

STURDY STEEL CASE—Featuring mechanical strength—neat appearance.

User's Net $43.90

Filament Transformers—Single Secondary

This group of filament transformers represents a complete listing of all commonly used electrical and physical specifications for units of this type. All transformers except those especially indicated have center taps. They are designed to provide accurate voltage output at rated loads with good regulation. Generous insulation provides a safety factor over and above the test voltage as indicated. Each group of transformers by voltage ratings is available in several convenient mounting styles which lend themselves to most applications.

TRANSFORMERS

REACTORS · POWER PACKS · TRANSMITTERS

Listings cover two distinct groups of transformers, universal or Poly-pedance and specific types. The latter group covers the most frequently used ratios, core sizes and mounting styles. They should be used in permanent installations whenever possible since their design permits the best efficiency and fidelity for units of this type. Poly-pedance transformers are ideally suited for use in experimental or temporary equipment, such as schools, laboratories, etc., since they are provided with a large number of taps to permit the user to secure the widest practical range of impedance match. All units represent outstanding values.

TRANSFORMERS

REACTORS POWER PACKS TRANSMITTERS

Two distinct groups of driver transformers are shown. Tapped or Poly-pedance and specific or fixed ratio types. Poly-pedance units are especially designed for experimental and laboratory work where it is desirable to change the turns ratio to optimum value. Two power ratings one of which is applicable to circuits employing inverse feedback and two line drivers are available. Specific types are listed in the most frequently used ratios, core sizes and mounting styles. They should be used wherever possible in permanent installations because their design permits the best effiiciency and fidelity for units of this type.

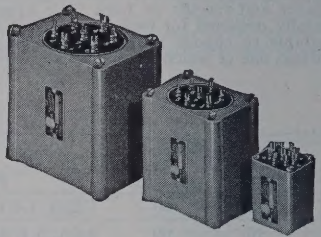
STANCOR'S HF—WF HIGH FIDELITY AUDIO TRANSFORMERS



These new units will enhance the performance of the finest amplifier circuits, speakers, microphones and pickups. Vacuum impregnation and potted construction insure long life due to excellent protection against moisture. Sturdy cast cases are finished in flat gray enamel and contain four threaded holes at each end for flush mounting.' Stud type terminals are provided on a phenolic panel with all terminals plainly marked for easy identification.

Wide range frequency response from 20 to 20,000 cps. within ±1 db for the HF units and from 30 to 20,000 cps. within ±2 db for the WF units.

Proper coil and core design reduces harmonic and intermodulation distortion to a negligible amount.

Special coil construction reduces leakage inductance and distributed capacity; results in uniform high response.

Balanced hum-bucking construction and/or high permeability magnetic shielding minimize hum pickup.

Nickel alloy laminations result in improved low frequency response in the smaller units where size and space are at a premium.

CHICAGO

NEW EQUIPMENT

POWER TRANSFORMERS FILTER REACTORS

CHICAGO TRANSFORMER DIVISION * ESSEX WIRE CORPORATION

POWER TRANSFORMERS

The power transformers in the CHICAGO New Equipment Line are designed to provide plate and filament supply for from two to sixteen tubes in a wide range of applications. They are conservatively rated and will deliver full rated current and voltage with minimum temperature rise well within RMA-recommended limits.

FILTER REACTORS

The CHICAGO filter reactors listed below have current ratings particularly suited for use with the power transformers above them, but will give equally satisfactory service in any other correct application. Their design provides maximum inductance for given current rating in the smallest practical size of unit.

FILAMENT TRANSFORMERS — S-Type Mounting

CHICAGO New Equipment filament transformers provide voltage and current ratings for heating a wide range of popular tubes.

Those with secondaries rated for less than 6 amps. have solder-lug terminals as shown in the S-type mounting; those with secondaries rated at more than 6 amps. have screw-type terminals. Filament Transformers Nos. F-210 and F-210H are specially designed for high voltage rectifier filament supply. They have screw-type terminals, insulated on the secondaries with ceramic bushings.

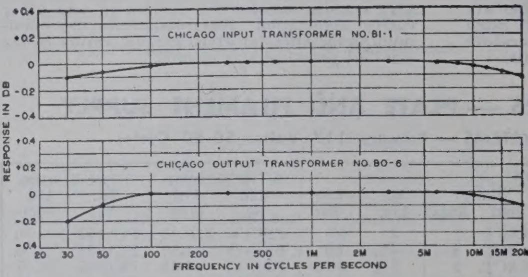
AUDIO TRANSFORMERS

CHICAGO TRANSFORMER DIVISION * ESSEX WIRE CORPORATION

FULL FREQUENCY RANGE AUDIO TRANSFORMERS

Frequency Response within ±½ db, 30 to 15,000 Cycles



The frequency response curves at left are typical of these CHICAGO transformers. This, plus a very low percentage of distortion over the full range and their high grade construction, recommends them to all users of fine, broadcast quality audio components.

Input units have hum-bucking core construction and inner alloy cases for extra hum shielding.

For Full Frequency Range DRIVER and MODULATION TRANSFORMERS, see page N-20

*Split and balanced windings. †0 to 10 ma. D.C.
‡Has tertiary winding to provide 15% inverse feedback.

DETAILS OF NEW EQUIPMENT LINE MOUNTINGS

The New Equipment Line offers these exclusive features: (1) Uniformity of mounting — all but the largest units have CHICAGO's famous **Sealed in Steel** constructions; (2) Choice of two alternate mountings, the S-Type and C-Type, in most categories.

A third construction, the B-Type mounting, is used for the Full Frequency Range audio units, where fine wire windings deserve the highest degree of sealing against moisture.

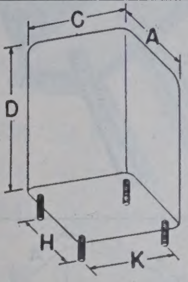
All three mountings achieve: 1. "Steel wall" protection against corrosive moisture; (2) Efficient shielding; (3) Unsurpassed strength to withstand shock and vibration; (4) Compactness; (5) Clean, streamlined appearance.

C-TYPE MOUNTING — Moisture-resistant compound surrounds coil and core. Ten-inch, RMA-color-coded leads, ends stripped and tinned for easy soldering. Flange-mounted drawn steel cases.

S-TYPE MOUNTING — Precision-fitted steel base-covers and terminal boards, plus compound filling, keep moisture out. Solder-lug terminals are clearly identified, easy to use. Drawn steel cases are flange-mounted.

B-TYPE MOUNTING — Steel bases are bonded into the drawn steel cases by deep-seal soldering to make units completely moisture proof. Stud-mounted cases take minimum chassis space. Convenient, compact, pin-type terminals.

B-TYPE MOUNTING



B-TYPE MTG. DIMENSIONS

Case Size	Dimensions in Inches A	C	D	H	K

HIGH Q CHOKES

for Dynamic Noise Suppression Circuits (S-Type Mounting)

Two efficient reactors, inductance values .8 and 2.4 henrys respectively, are designed for noise suppression circuits, but can be used in any tuned circuit requiring the given inductances. Inductance values accurate within ±5% with up to 15 ma. dc. Minimum Q of 20. Mounted in identical drawn steel cases.

Cat. No.	Inductance	List Price
NSI-1	.8 hy.	$7.50
NSI-2	2.4 hy.	7.50

PUBLIC ADDRESS RANGE AUDIO TRANSFORMERS

Frequency Response within ±1 db, 50 to 10,000 Cycles

Driver and output transformers in this CHICAGO series are designed for three general power levels to fit a wide range of application. Up-to-date secondary impedances match 600 or 150-ohm lines, 16, 8, and 4-ohm speakers. (16/8/4-ohm taps also suitable for 20/6/3.2-ohm speakers.) Output transformers have tertiary windings for 10% inverse feedback that minimizes distortion and provides extra audio watts without loss of fidelity.

COMMUNICATIONS RANGE AUDIO TRANSFORMERS

Frequency Response within ±1 db., 200 to 3,500 Cycles

These transformers are specifically designed for use in receiving and transmitting equipment such as amateur, police, railroad, and aircraft types, where clear voice reproduction is desired. All units, excepting one, are offered in both S- and C-Type mountings. Check the advantages of these Sealed in Steel mountings for protecting the units against deterioration from atmospheric moisture in the field, and for adding to the appearance of any gear.

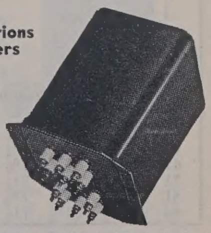
MODULATION TRANSFORMER CMS-1

for Communications Transmitters

Freq. Range, 200 to 3,500 Cycles



CHICAGO's No. CMS-1 Modulation Transformer and matching Driver Transformer No. CDS-1, at left, are ideally suited for use in ham and commercial speech transmitters. No. CMS-1 will deliver 250 watts of Class B audio power from P-P 203A's, 211's, 805's, 75TL's, etc. to a Class C load with response variations not exceeding ±1 db. over the stated frequency range. Primary impedances, 9000/6700 ohms ct; secondary, 8900/6000/4000 ohms. Case size F13. Wt., 22 lbs.

No. CMS-1........List Price, $40.00

DRIVER AND MODULATION TRANSFORMERS

For Full Frequency Range Broadcasting

Ideally suited to the small-to-medium size, high fidelity broadcast station, three matched sets of driver and modulation transformers provide frequency response within ±1 db. over the full 30 to 15,000-cycle range. A uniformly low percentage of distortion proven in use. Three specially designed modulation reactors complete the sets.

CONSTRUCTIONS

BX-TYPE MOUNTING — Flange mounted case with steel base solder-sealed in. Bushing-insulated screw terminals in the tops of the cases.
SX-TYPE MOUNTING — Flange mounted cases with precision-fitted steel bases. Bushing-insulated screw terminals out the bases of the units.
FS-TYPE MOUNTING — Heavy duty frame-and-shield construction. Screw terminals on the primaries; bushing-insulated terminals on the secondaries.

WC-TYPE MOUNTING — Large oil-filled cases, made of heavy, welded steel plate. High voltage type, bushing-insulated terminals.

DRIVER TRANSFORMERS

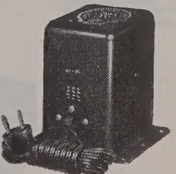
ISOLATION TRANS-FORMERS



CHICAGO Isolation Transformers are designed for a dual purpose: (1) To supply 115 volts isolated from a line of above/below normal, or normal, voltage — primary switch sets for 125/115/105 volts, 50/60 cycles; or (2) For use in servicing to eliminate shock hazard, by isolating chassis ground from line ground (particularly important on "hot" AC-DC television sets.) Also provide 125 and 105 volts on the secondary for locating doubtful tubes, etc.

CHICAGO

EXACT REPLACEMENT TELEVISION TRANSFORMERS

POWER TRANSFORMERS

No. TP-365. Supplies 405 volts d-c @ 295 ma. into an 80 mfd. cond. input filter with two 5U4G's. Plate supply: 362-0-362 v. a-c, 295 ma. d-c. Filaments: 5 v., 3 amp (Rec.); 5 v., 2 amp; 12.6 v., 5 amp, CT. Type TH mtg. 17 lbs.

No. TP-383. Supplies 390 volts d-c @ 230 ma. into an 80 mfd. cond. input filter with a 5U4G. Plate supply: 383-0-383 v. a-c, 230 ma. d-c. Filaments: 5 v., 3 amp (Rec.); 5 v., 2 amp; 6.3 v., 9 amp. Type TH mtg. Wt., 13½ lbs.

No. TP-393. Supplies 393 volts d-c @ 270 ma. into a 90 mfd. cond. input filter with two 5U4G's. Plate supply: 366-0-366 v. a-c, 270 ma. d-c. Filaments: 5 v., 3 amp (Rec.); 6.7 v., 4.5 amp. Type TH mtg. Wt., 10½ lbs.

No. TP-400. Supplies 400 volts d-c @ 205 ma. into a 90 mfd. cond. input filter with a 5U4G. Plate supply: 374-0-374 v. a-c, 205 ma. d-c. Filaments: 5 v., 3 amp (Rec.); 5 v., 2 amp; 6.3 v., 5.6 amp. Type TH mtg. Wt., 9 lbs.

No. TP-210. For use with TP-400. Supplies 210 volts d-c @ 90 ma. into a 40 mfd. cond. input filter with a 5Y3. Plate supply: 233-0-233 v., a-c, 90 ma. d-c. Filaments: 5 v., 2 amp (Rec.); 6.3 v., 5.3 amp. Type TH mtg. Wt., 4½ lbs.

No. TP-410. Supplies 390 volts d-c @ 240 ma. into a 40 mfd. cond. input filter with a 5U4G. Plate supply: 385-0-385 v. a-c, 240 ma. d-c. Filaments: 5 v., 3 amp (Rec.); 5 v., 2 amp; 6.3 v., 8.6 amp. Type TH mtg. Wt., 12 lbs.

No. TP-450. Info 40 mfd. cond. input filters, delivers 395 volts d-c @ 195 ma. with a 5U4G, 212 volts d-c @ 105 ma. with a 5Y3GT. Plate supply: 364-0-364 v. a-c, 195 ma; 229-0-229 v. a-c, 105 ma. d-c. Rec. Fil: 5 v., 3 amp; 5 v., 2 amp. Other Fil: 5 v., 2 amp; 6.3 v., 8.25 amp; 6.3 v., 0.6 amp. Type TH mtg. 12 lbs.

VERTICAL SCANNING OUTPUT TRANSFORMERS

No. TSO-1. Couples vert. output tube to deflection yoke. Pri. Imped: 19,000 ohms @ 30 v., 60 cycles, with 13 ma. d-c. Ratio (Pri:Sec) is 10:1. Mtg. Type FV, Wt., 2½ lbs.

No. TSO-2. Similar to TSO-1. Ratio (Pri:Sec) 8:1. Mtg. Type FH, Wt., 2½ lbs.

No. TSO-3. Very similar to TSO-1. Mtg. FV.

No. TSO-4. Similar to TSO-1. Pri. Imped: 18,000 ohms @ 30 v., 60 cycles, with 10 ma. d-c. Mtg. Type FV, Ft., 2 lbs.

* Indicates unit designed for condenser input. All other units should be used choke input. If used with condenser input, the D.C. current rating of these items should be reduced to 70% of that specified.

POWER LINE AUTO TRANSFORMERS

Type No.	Input	Output	Capacity Volt-Amperes	Case No.	Weight	List Price
T-219	88 to 130 volts	115 volts	500	5A	10 lbs. 1 oz.	$23.50

All power transformers are designed for 115 volt, 50 to 60 cycle operation. For any other voltage 50 to 60 cycle operation add 25% to list prices. For 115 volt 25 cycle operation, add 60% to list prices. For any other voltage 25 cycle operation add 100% to list prices. Case sizes for 25 cycle application are different from those specified for standard 115 volt 50 to 60 cycle operation.

MODULATION TRANSFORMERS—THE "FIVE" SERIES

SNC universal modulation transformers are specifically designed to provide maximum application possibilities per type. All units are provided with two indentical secondary windings, permitting series or parallel operation. Changes in the ratio can be readily accomplished, when desired, without removing the unit from the chassis. Most units available in either air cooled or compound filled cases.

NOTE

Basic mounting types are classified as "A," "B," "C," "D," "E," "F," "G," "H," "J," and Bx.

Explanation of Suffix Symbols
L = Leads
T = Lugs
P = Cord and Plug
SP = Switch, Cord and Plug

Skillful Engineering, latest production techniques and highest quality materials . . . backed by careful workmanship, exacting step-by-step inspection and rigorous final testing . . . are combined in every SNC transformer to provide a quality product that gives MORE in dollar value.

POWER TRANSFORMERS—THE "EIGHT" SERIES

All units conservatively rated for operation on either 50 or 60 cycles and contain an electrostatic shield between primary and all other windings

PLATE TRANSFORMERS—THE "SEVEN" SERIES

All SNC plate transformers have dual secondary ratings. Most units available in either air cooled or compound filled cases. All units contain electrostatic shields between primary and high voltage windings.

Type Number	Primary Voltage	Pri. V.A.	Secondary R.M.S. Voltage	D.C. Voltage From Filter*	D.C. Current	Mtg. Style	Dimensions A	B	C	D	E	Net Wt.	List Price

*All units may be operated with simultaneous loads—provided the total D.C. current of the two loads does not exceed the rating listed.

FILAMENT TRANSFORMERS—THE "FOUR" SERIES

Most SNC Filament Transformers are constructed to provide two identical center tapped secondary windings and offer a minimum of three applications. They provide three-fold the number of possible applications of ordinary filament types. A few are single secondary units and are so designated. All have 117 V. 50/60 cycle primary.

THORDARSON TRANSFORMERS

NEW STREAMLINED SERIES

This is the new Thordarson post-war series of Transformers and Chokes. Every unit has been designed for utmost efficiency and adaptability. Many of the engineering and production advancements developed by Thordarson during the war, are used in producing this line.

The new lamination alloys and insulating material, incorporated in this series, results in superior performance and a greater factor of safety without an increase in size or weight. Consequently, some types are smaller and more compact without sacrificing efficiency or performance.

Finished in baked grey enamel and fitted with matched mounting styles, the units present a uniform appearance. This is especially desirable where several Transformers and Chokes are mounted on the same chassis.

Types for Radio Receiver Replacement, Amateur Radio, Sound Systems and allied applications, can be selected from this listing.

It is essential that the class C R.F. load be properly matched to the class B modulator tubes for a maximum transfer of speech energy with low distortion. Thordarson Multi-Match modulation transformers have sufficient flexibility to enable the engineer or amateur to adjust the impedance ratio of primary to secondary, to meet any practical condition of operation. This feature forestalls the possibility of the modulation transformer becoming obsolete due to changing the modulator or class C tubes. The use of new tubes or a change in class C voltage and current will not necessitate the need of a new modulation transformer, providing the power capacity is adequate. Complete charts and instructions for proper matching are supplied with each unit.

PLATE TRANSFORMERS

The new Thordarson plate transformers are designed to deliver the rated D.C. voltage from a two-section filter which includes the voltage drop in the rectifier tubes and chokes. Two current ratings are indicated, "Continuous Commercial Service" (CCS) and "Intermittent Commercial or Amateur Service" (ICAS). These dual ratings make it possible to select the plate transformer exactly suited for each application.

* Secondary voltages changed by means of primary taps.

† Designed for double rectifiers and will deliver both secondary ratings simultaneously. If only the lower voltage taps are used the current rating is equal to the current rating of both windings.

CHOKES—REACTORS

Universal Types—Swinging and Smoothing

Thordarson Universal Chokes are designed for use both in the input and smoothing positions. Where the current taken from the power supply is essentially constant (not varying more than a few percent) the chokes should be selected so as not to exceed the rated D.C.-M.A. If the current fluctuates considerably, as is the case where the power supply furnishes a class B modulator stage, the chokes should be selected so as not to exceed the rated D.C.-M.A. rating under the steady state of operation, and not to exceed the Max. D.C.-M.A. rating when the modulator stage is fully excited.

These are truly universal chokes suitable for use in power supplies requiring either input, swinging or smoothing types.

The tapped Splatter Chokes are used between the modulator and Class C stage for eliminating objectionable side band splatter. Full instructions and circuit diagrams are supplied with each unit.

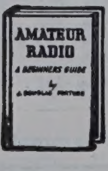
THORDARSON LITERATURE



TRANSFORMER MANUAL: A complete book containing literature on Radio receiver replacement transformers, Sound amplifiers, amateur transmitters and current Thordarson catalogs. Bound in heavy blue and orange loose leaf cover permitting addition of future Thordarson releases. Manual No. 340—50 cents.

TRANSFORMER CATALOG: A complete listing of Thordarson transformers, chokes, voltage changers, and regulators for receiver replacement, amateur radio and sound amplifiers. Tables and curves give complete data on application and characteristics of output, modulation and other transformers and chokes. Catalog 400—Free.

TRU-FIDELITY TRANSFORMER CATALOG: Complete technical data on Thordarson broadcast units. Includes audio transformers, filters, line equalizers, filament transformers, filter reactors, plate transformers, and modulation reactors and transformers. Highest quality units that satisfy the requirements of discriminating engineers, broadcast stations and laboratories. Catalog 500—Free.

AMATEUR RADIO: Carefully prepared and edited to make learning of Radio, by all beginners, easy and interesting. Presents fundamental theory and instructions for making code practice oscillators, receivers and transmitters. Has 160 pages and over 100 illustrations and drawings. Heavy book cover, finished in wear-resistant blue cloth and imprinted with gold lettering. Amateur net price—75 cents.

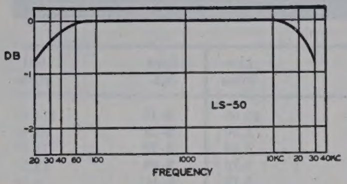
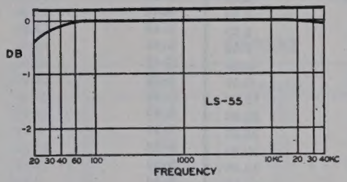
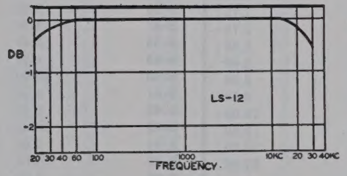
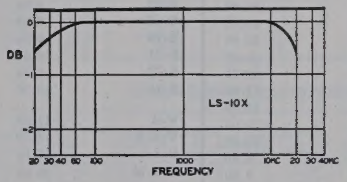
LINEAR STANDARD AUDIO TRANSFORMERS

The ever increasing use of wide range equipment for broadcast service has reached the point where the major limiting factor is the frequency range of the transformers employed. UTC Linear Standard components represent the closest approach to the ideal transformer from the standpoint of uniform frequency response, low wave form distortion, high efficiency, thorough shielding, and dependability.









LINEAR STANDARD AUDIO UNITS FEATURE:

UNIFORM FREQUENCY RESPONSE . . . at low frequencies, is effected through the use of HIPERM-ALLOY, a STABLE nickel iron alloy of very high initial permeability. Uniform high frequency response is the result of multiple section interleaved windings arranged in a semi-toroidal coil structure. This, plus special winding methods and insulations, assures a minimum of distributed capacity and leakage reactance.

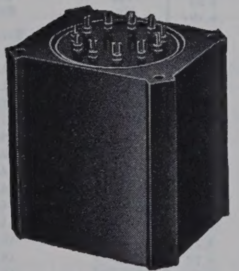
UTC LINEAR STANDARD transformers are the ONLY audio units with a **GUARANTEED** uniform response . . . ± 1. DB from 20 to 20,000 cycles.

MINIMUM HUM PICKUP . . . is accomplished through the use of a hum balanced, semi-toroidal, coil structure which affords maximum neutralization of external fields. In addition, all low level units employ an internal high permeability alloy case as well as the high conductivity outer case for maximum shielding. For very low level applications, units whose code numbers end in X employ quadruple alloy shielding, making possible a transformer with the lowest inductive pickup commercially available.

NEGLIGIBLE WAVE FORM DISTORTION . . . is a function of proper impedance matching, minimum phase shift, and low flux density. These elements have been given great attention in the design of Linear Standard units. It is interesting to note that an output transformer reasonably flat from 20 to 20,000 cycles may show serious distortion at 30 and 10,000 cycles. For this reason, UTC high level units have a frequency range better than guaranteed value in some instances up to 50,000 cycles.

MULTIPLE TAP WINDINGS . . . make possible a wide combination of impedance terminations without impairing fidelity or efficiency. Precision winding methods result in winding accuracy of .1% . . . perfect balance of inductance and capacity . . . exact impedance reflection. For all practical uses, 500 ohm termination may be used for 600 ohm requirements. For maximum efficiency and balance, 250 ohm lines are recommended to be connected to 200 ohm terminations.

DEPENDABILITY . . . is a function of external and internal structure. Linear Standard units are housed in rugged die cast cases of precise dimension with reversible mounting to permit above chassis or subchassis wiring. The solid terminal posts on low absorption bakelite are arranged in a circular layout so that a round chassis hole will clear all terminals. Coils are vacuum baked and impregnated. Semi-hermetic sealing is accomplished through the use of a high adhesion compound poured through the large opening opposite the terminal board after controlled preheating of the unit for full compound penetration.



LS-1 CASE

Length	3⅛"
Width	2⅝"
Height	3¼"
Mounting	1¹⁵⁄₁₆" x 2⁷⁄₁₆"
Screws	6-32
Cutout	1⅞" dia.
Unit Weight	3 lbs.

LOW IMPEDANCE TO GRID TRANSFORMERS

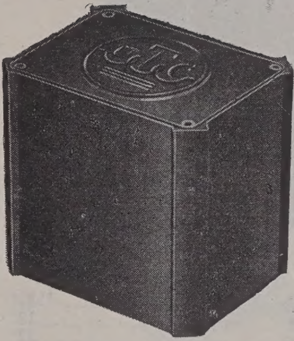
Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbalanced DC in prim'y	Case No.
LS-10	Low impedance mike, pickup, or multiple line to grid	50, 125/150, 200, 250, 333, 500/600 ohms	60,000 ohms in two sections	20-20,000	+15 DB	—74 DB	5 MA	LS-1
LS-10X	As above.	As above	50,000 ohms	20-20,000	+14 DB	—92 DB-Q	5 MA	LS-1
LS-12	Low impedance mike, pickup, or multiple line to push pull grids	50, 125/150, 200, 250, 333, 500/600 ohms	120,000 ohms overall, in two sections	20-20,000	+15 DB	—74 DB	5 MA	LS-1
LS-12X	As above	As above	80,000 ohms overall, in two sections	20-20,000	+14 DB	—92 DB-Q	5 MA	LS-1
LS-14	Low impedance mike, pickup or parallel mixer to grid	2.5, 5.5, 10, 15, 22, 30, 38, 60 ohms	60,000 ohms in two sections	20-20,000	+15 DB	—74 DB	5 MA	LS-1
LS-14X	As above	As above	50,000 ohms	20-20,000	+14 DB	—92 DB-Q	5 MA	LS-1
LS-15	Three isolated lines or pads to one or two grids	30, 50, 200, 250 ohms each primary	60,000 ohms overall, in two sections	20-20,000	+15 DB	—74 DB	5 MA	LS-1
LS-15X	As above	As above	As above	20-20,000	+14 DB	—92 DB-Q	5 MA	LS-1
LS-18	High level multiple line to push pull grids	50, 125/150, 200, 250, 333, 500/600 ohms	50,000 ohms overall, in two sections	20-20,000	+30 DB	—50 DB	5 MA	LS-2
LS-26	Bridging line to single or push pull grids	5,000 ohms	60,000 ohms in two sections	15-20,000	+20 DB	—74 DB	0	LS-1

The values of unbalanced DC shown will effect approximately 1.5 DB loss at 30 cycles.
* Comparison of hum balanced unit with magnetic shielding to normal uncased type.
Q Quadruple alloy magnetic shield.

(Refer to Page N-37 for UTC Prices)

INTERSTAGE AUDIO TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbal-anced DC in prim'y	Case No.
LS-19	Single plate to push pull grids like 2A3, 6L6, 300A. Split secondary	15,000 ohms	95,000 ohms; 1.25:1 each side	20-20,000	+17 DB	—50 DB	0 MA	LS-1
LS-20	Single plate to single grid	15,000 ohms	60,000 ohms; 2:1 turn ratio	20-20,000	+14 DB	—74 DB	0 MA	LS-1
LS-21	Single plate to push pull grids. Split primary and secondary	15,000 ohms	135,000 ohms; turn ratio 3:1 overall	20-20,000	+14 DB	—74 DB	0 MA	LS 1
LS-40	Single plate to push pull grids. Split secondary	15,000 ohms	135,000 ohms; turn ratio 3:1 overall	30-20.000	+20 DB	—74 DB	8 MA	LS-1
LS-22	Push pull plates to push pull grids. Split primary and secondary	30,000 ohms plate to plate	80,000 ohms; turn ratio 1.6:1 overall	20-20,000	+26 DB	—50 DB	.25 MA	LS 2
LS-25	Push pull plates to push pull grids. Medium level. Split primary and secondary	30,000 ohms plate to plate	50,000 ohms; turn ratio 1.3:1 overall	20-20,000	+17 DB	—74 DB	1 MA	LS-1
LS-26	Bridging line to 1 or 2 grids	5000	60,000 in two sections	15-20,000	+20 DB	—74 DB	0	LS 1

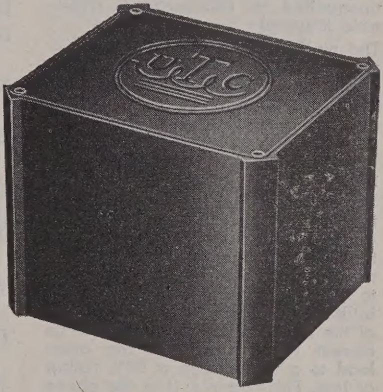


LS-2 CASE

Length	4 7/16"
Width	3 1/2"
Height	4 3/16"
Mounting	2 11/16" x 3 11/16"
Screws	8-32
Cutout	2 3/4" dia.
Unit Weight	7.5 lbs.

MIXING TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbal-anced DC in prim'y	Case No.
LS-30	Mixing, low impedance mike, pickup, or multiple line to multiple line	50, 125/150, 200, 250, 333, 500/600 ohms	50, 125, 200, 250, 333, 500/600 ohms	20-20,000	+17 DB	—74 DB	5 MA	LS-1
LS-30X	As above	As above	As above	20-20,000	+15 DB	—92 DB-Q	3 MA	LS-1
LS-31	Three isolated lines or pads to multiple line	30, 50, 200, 250 ohms each primary	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	+15 DB	—74 DB	5 MA	LS-1
LS-31X	As above	As above	As above	20-20,000	+14 DB	—92 DB-Q	3 MA	LS-1
LS-32	Mixing, low impedance mike, pickup, or parallel mixer to multiple line	2.5, 5.5, 10, 15, 22, 30, 38, 60 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	+15 DB	—74 DB	5 MA	LS-1



LS-3 CASE

Length	5 13/16"
Width	5"
Height	4 11/16"
Mounting	4 3/16" x 5 1/32"
Screws	10-3
Cutout	3 3/4" dia.
Unit Weight	15 lbs.

PLATE, CRYSTAL, PHOTOCELL, AND BRIDGING TO LINE TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbal-anced DC in prim'y	Case No.
LS-27	Single plate to multiple line	15,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	30-12,000 cycles	+20 DB	—74 DB	8 MA	LS-1
LS-50	Single plate to multiple line	15,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	+17 DB	—74 DB	0 MA	LS-1
LS-51	Push pull low level plates to multiple line	30,000 ohms plate to plate	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	+20 DB	—74 DB	1 MA	LS-1
LS-38	Crystal microphone pickup to multiple line, with internal equalizer	100,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	Equalized for crystal	+14 DB	—74 DB	0 MA	LS-1
LS-39	Photocell, high-mu triode, diode or overbiased detector to multiple line	100,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	+14 DB	—74 DB	0 MA	LS-1
LS-150	Bridging transformer from 50 to 500 ohm line to line	4,000 ohms, bridging	50, 125/150, 200, 250, 333, 500/600 ohms	15-30,000	+20 DB	—74 DB	1 MA	LS-1
LS-151	Bridging transformer from 50 to 500 ohm line to line	16,000 ohms, bridging	50, 125/150, 200, 250, 333, 500/600 ohms	15-30,000	+22 DB	—74 DB	1 MA	LS-1

SPECIAL LS UNITS

Custom built LS units are available for any frequency from ½ cycle to 300 Kc. and for levels from —160 DB to 100 Kw. One of the many unusual LS designs is described below.

HYBRID AND REPEAT COILS

Type No.	Application	Pri. and Sec. Impedances	± 1 db from	Max. Level	Hum* Reduction	Max. Unbalanced DC in prim'y	Case No.
LS-140	Line to line for isolating balanced and unbalanced circuits; balanced for maximum reduction cross talk (70 DB)	500/600 ohms split 500/600 ohms split	30-20,000	+10 DB	—92 DB Quadruple alloy shield	0 MA	LS-1
LS-141	Three sets of balanced windings for hybrid service, centertapped	500/600 ohms 500/600 ohms	30-15,000	+10 DB	—74 DB	0 MA	LS-1
LS-142	Line to line and to push pull grids for hybrid service	500/600 ohms 500/600 ohms 60,000 ohms	30-15,000	+10 DB	—74 DB	0 MA	LS-1
LS-143	High efficiency ring and talk repeat coil, for low frequency ringing	500/600 ohms 500/600 ohms	Efficient 15/12,000 cycles	+25 DB	—74 DB	5 MA	LS-2

BOLOMETER TRANSFORMER

Frequency Range
½ cycle to 20 cycles
Primary Impedance..........10 ohms C. T.
Secondary Impedance
.75 megohms C. T.
Secondary Impedance
.75 meghenries
Shielding..........for —160 DB operation
Case..........RC-112 (See pg. N-48)
Type D-1515..........Net Price $80.00

(Refer to Page N-37 for UTC Prices)

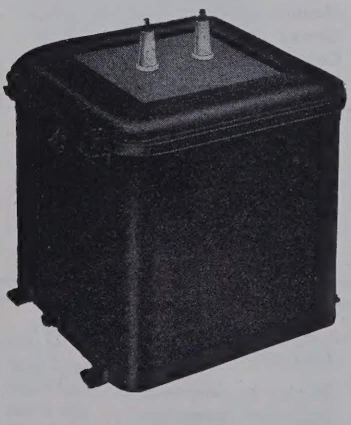
LS-6 CASE

Length	15¾"
Width	13"
Height	22"
Mounting	7⅜" x 14 5/16"
Mounting Hole	⅜" dia.
Unit Weight	350 lbs.

OUTPUT TRANSFORMERS

Linear Standard output and matching transformers employ large cores of high permeability steel and precisely balanced, highly interleaved coil structures. The frequency response and harmonic distortion are unequalled in commercially available material.

The multiple tap windings afford a wide range of impedances for every application. The impedance values given are for one load. Where it is desired to feed two loads simultaneously, with equal power, it is necessary to connect the loads to terminations of half the impedance value. For example, if it is desired to split the output between a 500 ohm line and a 15 ohm voice coil, connect the the 500 ohm line to 250 ohm termination and the 15 ohm speaker to the 7.5 ohm termination. If the bulk of the output is desired in one of the loads, connect this load to its correct termination and the other load to a termination of 20% rating or less. For example, if in the above case, the speaker were used solely for monitoring, connect 500 ohm line to 500 ohm termination and 15 ohm voice coil to 2.5 ohm termination.



LS-7 CASE

Length	20⅜"
Width	17¾"
Height	26"
Mounting	11⅝" x 19⅜"
Mounting Hole	⅜" dia.
Unit Weight	500 lbs.

DRIVER TRANSFORMERS

Type No.	Application	Primary Impedance	Reflected Secondary Impedance	± 1 db from	Max. Level	Max. Unbalanced DC In Primary	Case No.
LS-5	Driver, multiple line to class B 838's, 805's, ZB-120's, 203A's and similar tubes	50, 125, 200, 250, 333, 500/600 ohms	2,000 ohms; 1:2 overall turns ratio	20-20 000	+36 DB	5 MA	LS-2
LS-6	Driver, push pull 45's, 59's, 2A3's, 6A5G's, etc., to push pull 845 or 211D grids	5,000 ohms plate to plate	2.25 primary impedance; turns ratio 1.5:1 overall	20-20,000	+33 DB	5 MA	LS-2
LS-7	Push pull 56, 6C5 or similar plates to A prime 45's, 42's, 6F6's, 2A3's, 6L6's	30,000 ohms plate to plate	.45 primary impedance turn ratio 1.5:1 Pri. to Sec.	20-20,000	+25 DB	1 MA	LS-2
LS-47	Driver from push pull 2A3's, 6A5G's, or 300A's to class B 838's, 203A's, 805's, or ZB120's	5,000 ohms plate to plate	.1 pri. impedance turns ratio., Pri./½ Sec. 3.2:1	20-20,000	+33 DB	5 MA	LS-2
LS-48	Driver transformer push pull 845's to 204 or 849 grids in class B.	12,000 ohms plate to plate	.038 pri. impedance turns ratio, Pri./½ Sec. 5.1:1	20-20,000	+42 DB	15 MA	LS-3
LS-49	Push pull parallel 2A3, 6A5G, or 300A tubes to four 838, 203A, 805, or ZB120 tubes.	2,500 ohms plate to plate	Ratio Pri./½ Sec. 4:1 and 2.5:1	20-20,000	+39 DB	10 MA	LS-3

OUTPUT TRANSFORMERS TO LINE AND VOICE COIL

Type No.	Primary will match following typical tubes	Primary Impedance	Secondary Impedance	*±.2 db from	Max. Level	Case No.
LS-52	Push pull 245, 250, 6V6, 42 or 2A5 A prime	8,000 ohms	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	15 watts	LS-2
LS-54	Same as above	8,000 ohms	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	15 watts	LS-2
LS-55	Push pull 2A3's, 6A5G's, 300A's, 275A's, 6A3's, 6L6's	5,000 ohms plate to plate and 3,000 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20 000	20 watts	LS-2
LS-57	Same as above	5,000 ohms plate to plate and 3,000 ohms plate to plate	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20 000	20 watts	LS-2

LINEAR STANDARD POWER EQUIPMENT

In choosing power components for broadcast and commercial equipment, the first factor to be considered is dependability. Linear standard power components are very conservatively designed for maximum reliability. Designs provide for low temperature rise 40°, and high insulation safety factors. Only the finest of materials and workmanship are used throughout.

The low power components of the Linear Standard series are housed in the familiar rectangular LS case with top or bottom mounting facilities. High power components are housed in end castings which completely protect the winding, while directly exposing the laminations for maximum heat transfer.

All units have a deep grey finish to obtain the highest heat radiation co-efficient. Large components (up to 250 KVA) are housed in oil tanks.

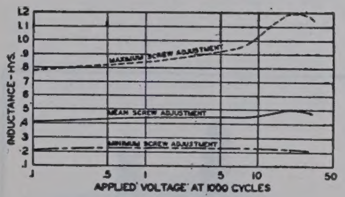
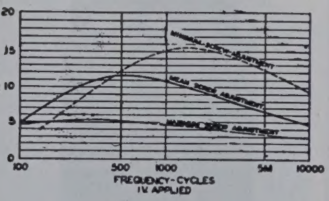
UTC
VARIABLE INDUCTORS

UTC type VIC variable inductors offer a revolutionary approach to the problem of tuned audio circuits. By adjusting a set screw in the side of the case, an inductance value of +90%, —50% from mean value is obtainable. Setting is positive. Effective Q for a wide frequency range and variation of inductance with applied AC voltage are shown on the illustrated curves, for a typical VIC unit.

The VIC inductor is housed in a rugged die cast case 1$\frac{11}{32}$" long, 1¼" wide and 1$\frac{7}{16}$" high with mounting centers on terminal board side $\frac{13}{16}$" by $\frac{29}{32}$". Weight is 5½ oz.





Type	Mean Hys	Type	Mean Hys.

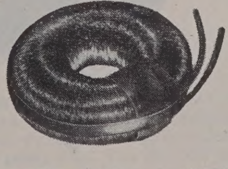
There are many applications in the audio, carrier, and supersonic fields requiring inductors of high Q and great stability. The HQ series of permalloy dust toroid units developed for these applications have remarkable characteristics.

HQA coils have maximum Q (100) at approximately 5,000 cycles. **HQB** coils have maximum Q (200) at approximately 4,000 cycles. **HQC** coils have maximum Q (200) at approximately 30 Kc. **HQD** coils have maximum Q (200) at approximately 60 Kc. The stability is excellent and types are available for all high Q applications from 300 cycles to 300 Kc.

Stability is excellent. For the HQA-7 coil illustrated inductance change is less than 1% for applied voltages from .1 to 25 volts. For the HQB-5 coil illustrated the inductance change is less than 1% for applied voltage from .1 to 50 volts. DC is permissible through the coil. Inductance is virtually independent of frequency, temperature, and vibration.

Hum pickup is extremely low due to the toroidal winding structure . . . 70 microvolts per gauss for the HQA, 140 microvolts per gauss for the HQB. The cased toroid structure permits close spacing of units, effecting a coupling attenuation of approximately 80 DB.

All HQ coils are hermetically sealed. Units are laboratory adjusted to 1% tolerance.



UNCASED HIGH Q TOROIDS

We can supply any of the Toroids listed without case. Deduct $1.50. Specify type and inductance value when ordering.

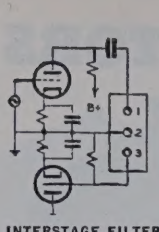
SPECIAL TOROIDS

Sizes other than those shown in our stock list can be supplied on special order at price of next highest value.

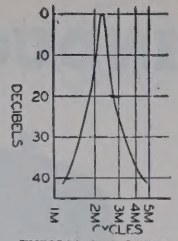
---

*This value of D.C. will drop the coil inductance 5%. Values of D.C. below this will show proportionately (linear) less inductance drop. For example HQA-8 will drop ½% in L with 6.5MA.

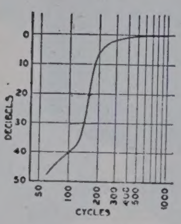
UTC INTERSTAGE FILTERS



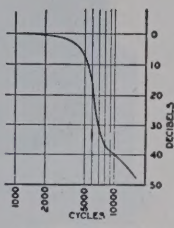
INTERSTAGE FILTER CONNECTIONS



TYPICAL BPI CURVE



TYPICAL HPI CURVE



TYPICAL LPI CURVE

Case for interstage filters same as HQB illustrated on preceding page.

Interstage filters lend themselves to effecting gain simultaneously with their frequency discrimination. UTC manufactures three basic types of filters for such application with a nominal impedance of 10,000 ohms to be used in a circuit as illustrated.

Type **BPI (band pass), LPI (low pass), and HPI (high pass)** interstage filters are not carried in stock, but are available from standardized designs and components. They are available for any frequency from 200 to 10,000 cycles. Order by type followed by frequency as: LPI-2500, which designates a low pass filter—2500 cycles cutoff frequency. For low impedance circuits (500/600 ohms), order as BPL, LPL or HPL in similar manner. Output of BPL is to grid; LPL and HPL to 500/600 ohms.

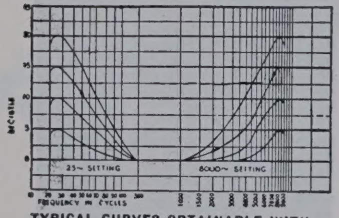
All interstage filters are housed in **hermetically sealed cases** identical in dimensions to HQB, but cutout is 5/8 x 2 inches. Dual alloy shielding reduces hum pickup to 150 MV per gauss at 60 cycles.

BPI units have 2:1 gain. They are sharply peaked, having approximately 2 DB attenuation at plus or minus 3% from mean frequency and attenuations of approximately 40 DB per octave. They are adjusted to zero phase shift at mean frequency.
HPI units have loss of less than 6 DB at cutoff frequency. At .67 cutoff frequency the attenuation is 35 DB and at .5 cutoff frequency, 40 DB.

LPI units have loss of less than 6 DB at cutoff frequency. At 1.5 cutoff frequency the attenuation is 35 DB and at twice cutoff frequency, 40 DB.

BROADCAST AND RECORDING EQUALIZERS AND FILTERS

500/600 ohms

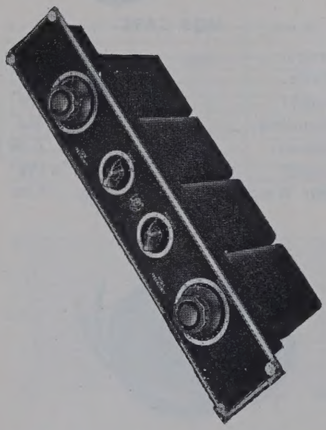


TYPICAL CURVES OBTAINABLE WITH 3A OR 3AX EQUALIZER

3AX UNIVERSAL EQUALIZER

The universal characteristics of the **UTC 3AX** equalizer have made it the most popular item for broadcast and recording equalization. This unique unit, with which most communications engineers are already familiar, is an accurately calibrated, quickly adjustable, combined low and high frequency equalizer. The low frequency controls include a switch for adjusting the maximum equalization frequency to **25, 50, or 100 cycles** and a calibrated T-pad for exact adjustment of the amount of equalization. The high frequency portion of this unit includes a switch to set maximum equalization point at **4000, 6000, 8000, 10,000 or 15,000 cycles,** and a similar calibrated control reading directly in DB. **Equalization up to 25 DB** available at any frequency selected.

Through a unique arrangement of compensating pads, changes in adjustment of the 3AX equalizer do not affect the insertion loss (50 DB). This permits rapid changes in tone color, with negligible change in volume. Where rapid change-over is required in service from one line to another, or from recording to play back, it is merely necessary to predetermine the required setting. The actual adjustment of the controls can be taken care of almost instantaneously. The construction is of the depressed chassis, etched panel, rack mount type. Thoroughly shielded against inductive pickup with UTC Trialloy Shielding. Dimensions of panel 3½" x 19". Depth 7½". Weight 15 lbs.



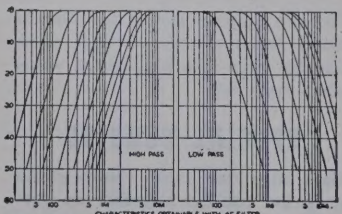
3A UNIVERSAL EQUALIZER

The **3A** equalizer is identical to the 3AX described above, except that it does not incorporate the compensating pads for constant insertion loss. The insertion loss is roughly proportional to the amount of equalization employed. All other characteristics identical with the 3AX unit, this item weighs 10 lbs.

4C SOUND EFFECTS FILTER

The use of filters to obtain unusual sound effects is now finding wide application in broadcast technique. The **Model 4C Filter** was originally developed for one of the large broadcast chains, and is now used extensively by most broadcast stations. Two controls are provided on the 5¼" x 19" panel, which is similar in appearance to the 3AX unit. The weight of the 4C unit is 20 lbs.

The **low pass** switch can be set for cutoff frequencies of **100, 250, 500, 1000, 2000, 3000, 4000, or 5000 cycles.** The **high pass** switch has identical frequency points. The great number of cutoff frequencies provides for a wide latitude of tone control. If desired, though not normally necessary, external potentiometers may be inserted in the circuit for attenuation control.



CHARACTERISTICS OBTAINABLE WITH 4C FILTER

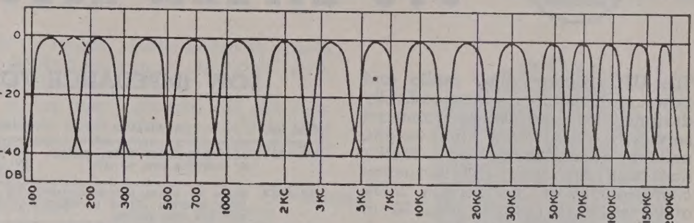
5A BOOST-DROP EQUALIZER

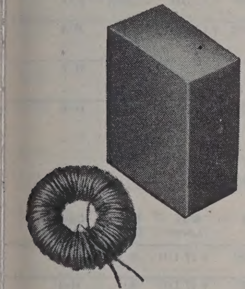
The **5A** equalizer, ideal for recording and reproduction, incorporates the 3A equalizer with control for drooping highs and lows where required. Up to **15 DB** attenuation can be effected at **25, 50, or 100 cycles** for the low end and **4000, 6000, 8000, or 10,000 cycles** for the high end.

UTC CUSTOM TOROID COIL FILTERS

UTC manufactures permalloy dust toroid filters for all applications. The stability of the inductors plus precision adjustment makes these filters ideal for all critical applications in the audio, carrier, and supersonic fields.

The curve illustrated shows a group of filters affording sixteen separate bands in the audio and supersonic region with 35 DB attenuation at the cross-over points. These have also been supplied spaced further apart (40 DB cross-over), with intermediate bands, permitting flat top band pass action for any selected range from 100 cycles to 200 KC.



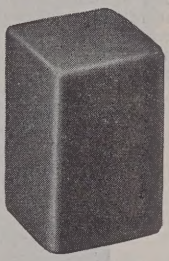


SUB-OUNCER PERMALLOY DUST TOROIDS

Weight ½ ounce uncased .8 ounce hermetically sealed. These miniatured HQE coils have characteristics similar to our standard HQA, C, and D coils with little reduction in Q considering minute size.

SUB-OUNCER TOROID FILTERS

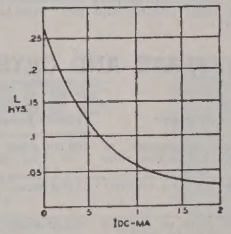
Filters employing SUB-OUNCER toroids and special condensers represent the optimum in stable miniaturized filter performance. The unit shown ... 1 x 1 x 2 ... employs 5 coils and 6 condensers for a complete band pass filter ... weight 6 ounces.

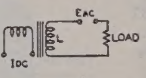


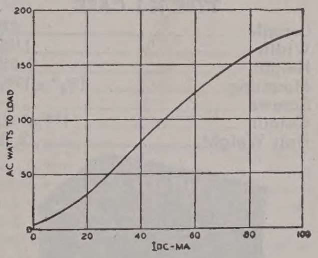
UTC SATURABLE REACTORS

Saturable reactors are used extensively for both power control and phase control. The left curve is that of a small (1" cube) sensitive unit indicating the variation of inductance with saturating DC. The right curve is that of a moderate size power control reactor indicating power to the load with saturating DC.

These units are supplied to customer's specifications only ... for all applications.

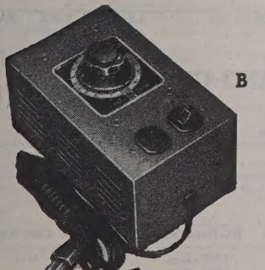






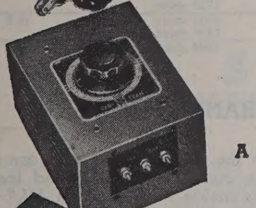
UTC VARITRAN CONTROL UNITS

For controlling: Rectifier output . . . motors . . . heaters . . . lights . . . line voltage



B

The UTC Varitran is a simple autotransformer whose turns are arranged on one layer with the insulation removed so that every exposed turn may be used as a tap of the winding. A special non-fusing contact can be moved to any position on the winding, permitting the exact voltage desired to be obtained. The regulation and efficiency are excellent and no distortion of wave form occurs. The output voltage is independent of load. In addition to its many laboratory uses, the Varitran is widely employed for controlling electric ovens, fans, soldering irons, furnaces and heaters, for photographic and enlarging lighting control, for life tests of lamps and for dimming illumination.



A

VARITRAN RATINGS

Standard Varitrans are designed for 115 or 230 volt service. The respective output voltages are 0-130 and 0-260 volts. The Varitran autotransformer current and wattage rating is based at 115 volts (115V. models). As the voltage is reduced, the wattage output is reduced correspondingly. The maximum current can be taken at any point from 0 to 20 volts and from 95 to 130 volts. Between 20 and 95 volts the current capacity tapers off from the two ends to approximately 60% of the rated maximum current at the 65 volt point. The mounting facilities are at both top and bottom of each unit to assure ease of mounting on panel, chassis or for laboratory bench service.

UTC HIPERM ALLOY TRANSFORMERS

The UTC Hiperm alloy audio and power transformers are specifically designed for portable and compact service. While light in weight, neither dependability nor fidelity has been sacrificed. The frequency characteristic of the Hiperm alloy audio units is uniform from 30 to 20,000 cycles. They incorporate a Hiperm-alloy nickel iron core and hum balanced coil structure. The rugged die cast case is of high conductivity alloy finished in grey, arranged for mounting with the terminals either up or down. DC in Prim'y shown is maximum unbalanced.

UTC MICROPHONE CABLE TRANSFORMERS

UTC cable transformers are designed to be inserted in the cable circuit, and are ruggedly constructed to withstand mechanical abuse. The cable connections (supplied less cable) are made through spring strain relief to terminal boards inside the end caps. 1½" diameter . . . 2½" long . . . ½ lb.

Type MC-1—primary tapped 30/50 and 200/250 ohms, secondary to grid, standard fidelity.

Type MC-2—primary tapped 30/50 and 200/250 ohms, secondary to grid, high fidelity.

UTC MIKE/HIGH IMPEDANCE ADAPTOR is designed to match low impedance sources to an amplifier having high impedance input. Will match any source from 50 to 600 ohms, effecting a 15:1 step up ratio (225:1 impedance ratio). The plug on MA-1 goes into jack on amplifier . . . the plug from mike goes into jack on MA-1. Flat 40-10,000 cycles. Rugged die casting ⅞ x 1⅛ x 2⅛.

Type MA-1—primary 50 to 500 ohms . . . 15.1 ratio . . . jack input . . . plug output.

(Refer to Page N-37 for UTC Prices)

ULTRA COMPACT AUDIO UNITS

The UTC Ultra compact audio units are small and light in weight, ideally suited to remote amplifier and similar compact equipment. High fidelity is obtainable in all individual units, the frequency response being ± 2 DB from 30 to 20,000 cycles.

All units except those carrying DC in Primary employ a true hum balancing coil structure, which combined with a high conductivity outer case, effects good inductive shielding. The die-cast (Type A) case provides for top or bottom mounting. Maximum operating level + 10 DB.

Type No.	Application	Primary Impedance	Secondary Impedance	± 2 db from
A-10	Low impedance mike, pickup, or multiple line to grid	50, 125/150, 200/250, 333, 500/600 ohms	50,000 ohms	30-20,000
A-11	Low impedance mike, pickup, or line to 1 or 2 grids	50, 200, 500	50,000 ohms	50-20,000 multiple alloy shield for extremely low hum pickup
A-12	Low impedance mike, pickup, or multiple line to push pull grids	50, 125/150, 200/250, 333, 500/600 ohms	80,000 ohms overall, in two sections	30-20,000
A-14	Dynamic microphone to one or two grids	30 ohms	50,000 ohms overall, in two sections	30-20,000
A-16	Single plate to single grid	15,000 ohms	60,000 ohms, 2:1 turn ratio	30-20,000
A-18	Single plate to two grids. Split primary, can also be used for P.P. plates	15,000 ohms	80,000 ohms overall, 2.3:1 turn ratio overall	30-20,000
A-19	Single plate to two grids 8 MA unbalanced D.C.	15,000 ohms	80,000 ohms overall, 2.3:1 turn ratio overall	50-20,000

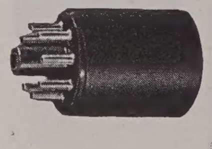
Screws	2-56



PLUG-IN (P) CASE

Diameter	1 3/32"
Height	1 15/32"
Socket	Standard Octal

UTC OUNCER components represent the acme in compact quality transformers. These units, which weigh one ounce, are fully impregnated and sealed in a drawn aluminum housing ⅞" diameter . . . mounting opposite terminal board.

Ouncer items are ideal for portable broadcast, hearing aid, aircraft, concealed service, and similar applications. High fidelity characteristics are provided, uniform from 40 to 15,000 cycles, except for 0-14, 0-15, and units carrying DC which are intended for voice frequencies from 150 to 4,000 cycles. Maximum operating level 0DB.

"P" series units are identical to the UTC OUNCER units but are sealed in bakelite housings with plug in base to fit standard octal socket. While of submersion proof design, these units weigh but two ounces. Oversize pins in the base make it impossible to dislodge these units from their sockets, even when used upside down in portable equipment.

SUBOUNCER UNITS

FOR HEARING AIDS . . . VEST POCKET RADIOS . . . MIDGET DEVICES

TC Sub-Ouncer units weigh only ⅓
unce. Through unique construction,
owever, these miniature units have
erformance and dependability charac-
ristics far superior to any other com-
arable items. The coil is uniform layer
ound of Formex wire . . . On a molded
ylon bobbin . . . insulation is of cellu-
se acetate . . . leads mechanically an-
hored . . . core material Hiperm-alloy
. entire unit triple (waterproof) sealed.
he frequency response of these stand-
rd items is ± 3 DB from 200 to 5,000
ycles.

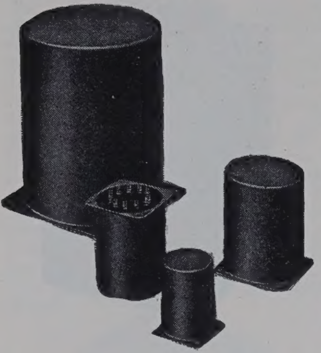
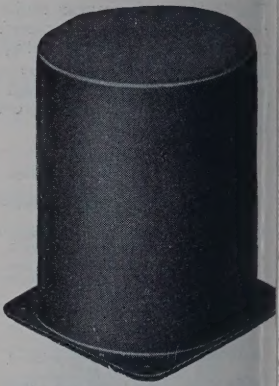
(Refer to Page N-37 for UTC Prices)

UTC COMMERCIAL GRADE COMPONENTS



The commercial grade series of transformers incorporate conservative design and rugged construction to assure dependability under continuous service operation in industrial and commercial grade communication equipment. These units are mounted in uniform drawn cases finished in light grey enamel, and intended for chassis mounting. All items are poured with special sealing compound in addition to vacuum impregnation of coil structures. The CG line was developed to replace our very popular PA series in a more rugged construction, with professional appearance. Type numbers are identical with the PA units except for the prefix "CG".

CG-134, 135 and 136 are of the hum-bucking type to assure low hum pick-up. All audio components are linear. ±1½ DB from 60 to 8,500 cycles (no unbalanced D.C.). Parallel feed low level interstage units with 50,000 ohms and .25 mfd. 200 ohm windings on input transformers are balanced and may be used for 250 ohm circuits.



INPUT, INTERSTAGE, MIXING AND LOW LEVEL OUTPUT TRANSFORMERS

UNIVERSAL INTERSTAGE EQUALIZER

This new UTC unit is the ideal device for any application requiring frequency response correction. Designed to be connected between two triode audio stages or will match a hign impedance (5000 to 30000 ohms) source to grid.

The CGE-1 equalizer is not a simple R-C tone control, but employs resonant circuits to permit low or high end equalization without effecting mid-frequencies. With controls in center, no equalization is effected. Moving one control to left increases bass; to right, drops bass. Moving other control to left increases highs; to right drops highs. Controls are independent so that bass may be raised and highs dropped simultaneously, etc Amount of equalization is continuously adjustable, up to 15 DB. The insertion loss effected is equal to the combined low frequency and high frequency settings plus 6 DB, or a maximum of 36 DB. Unless existent gain of equipment to which CGE-1 is added is high, an additional audio stage may be required.

This unit comes complete so that controls with etched panel (calibrated in DB) can be mounted on a chassis (2½ inch minimum) or a panel with case containing the electrical elements held by etched panel screws.

CGE-1 Panel Dim. 2⅜ x 4. Wt. 2 Lb.

DYNAMIC NOISE SUPPRESSION INDUCTOR

Incorporates two accurate High Q coils (.8 hy. and 2.4 hy.) for use in dynamic noise suppression circuits. Excellent circuit accompanies unit. Type CG-50. RC-75 Case.

CG VARIMATCH OUTPUTS FOR P. A.

Universal units designed to match **any tubes** within the rated outp power, to line or voice coil. Output impedance 500 200, 50, 16, 8, 5, 3, 1. ohms. Primary impedance 3000, 5000, 6000, 7000, 8000, 10,000, 14,000 ohm

Case No.	Audio Watts	Typical Tubes	Case No.
CVP-1	12	42, 43, 45, 47, 2A3, 6A6, 6F6, 25L6	**RC-100**
CVP-2	30	42, 45, 2A3, 6L6, 6V6, 6B5	**RC-125**
CVP-3	60	46's, 50's, 300A's, 6L6's, 801, 807	**RC-150**
CVP-4	125	800's, 801's, 807's, 4-6L6's, 845's	**RC-152**
CVP-5	300	211, 242A's, 203A's, 838's, 4-845's, ZB-120's	**RC-175**

CG VARIMATCH LINE TO VOICE COIL TRANSFORMERS

The UTC VARIMATCH line to voice coil transformers will match any voic coil or group of voice coils to a 500 ohm line. More than 50 voice coi combinations can be obtained, as follows:

.2, .4, .5, .62, 1, 1.25, 1.5, 2, 2.5, 3, 3.3, 3.8, 4, 4.5,
5, 5.5, 6, 6.25, 6.6, 7, 7.5, 8, 9, 10, 11, 12, 14, 15,
16, 18, 20, 25, 28, 30, 31, 40, 47, 50, 63, 69, 75.

Where speakers are to be connected in groups to one transformer, it i preferable that parallel connection be used to eliminate the possibility o multiple resonance. If two speakers of different impedances are connecte in parallel, the lower impedance speaker will develop greater power. I connected in series, the higher impedance speaker will develop greate power.

Type No.	Audio Watts	Primary Impedance	Secondary Impedance	Case No.
CVL-1	15	500 ohms	.2 to 75 ohms	**RC-87**
CVL-2	40	500 ohms	.2 to 75 ohms	**RC-125**
CVL-3	75	500 ohms	.2 to 75 ohms	**RC-150**

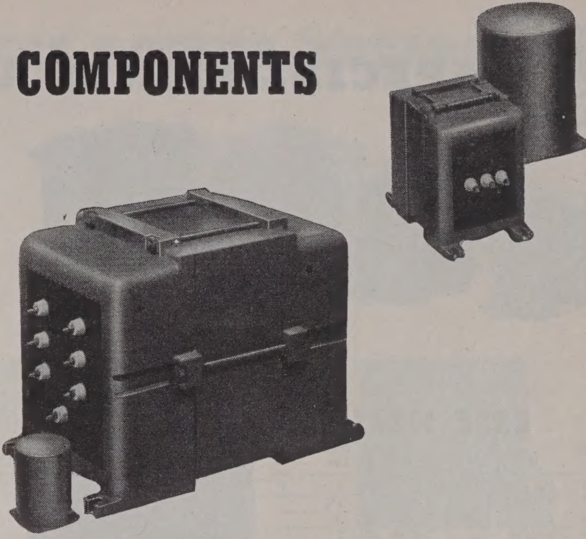
CG VARIMATCH LINE AUTOFORMERS

UTC Varimatch Line Autoformer will match one to ten 500 ohm lines o CGL windings to the 500 ohm output of an audio amplifier. The CGA-1 to 12 autoformers have impedances of 500, 250, 167, 125, 100, 83, 71, 6 50 ohms.

Type No.	Audio Watts	Case No.
CVL-10	15	**RC-87**
CVL-11	30	**RC-125**
CVL-12	60	**RC-150**

(Refer to Page N-37 for UTC Prices)

COMMERCIAL GRADE COMPONENTS



UTC CG power transformers, Varimatch units and chokes are designed to A.I.E.E. commercial standards. Ratings are conservative for continuous duty. Designs provide temperature rise less than 55 degrees C Units are tested for breakdown at twice maximum working voltage plus 1000 volts. Plate transformers are given a surge test of 250% normal voltage at 200 cycles. All items are vacuum impregnated and sealed with special insulating compound.

The conservative design and manufacturing procedure of these units make them suitable for virtually all types of commercial equipment as well as ideally suited for quality amateur and public address service.

CG VARIMATCH MODULATION UNITS

Will match any modulator tubes to any RF load.

The ever increasing number of vacuum tubes available for audio and RF applications has increased the difficulty of obtaining transformers suitable for matching to the various correct tube loads. If a standard transformer having a limited impedance range is purchased and used for a specific purpose as the "nearest thing" available, comparatively high distortion is inevitable. While a 20% mismatch caused by such an occurrence does not represent a serious loss in power, it greatly reduces the undistorted power available from a class B modulator because optimum plate load is not reflected to the tubes. The UTC Varimatch transformer eliminates this difficulty through the use of a combination of tapped windings affording an extremely wide range in impedance matching. Designs provide that for any load impedance employed, full class C plate current can be carried by secondary winding

Primary impedances from 500 to 20,000 ohms
Secondary impedances from 30,000 to 300 ohms

Type No.	Max. Audio Watts	Max. Class C Input	Typical Modulator Tubes	Case No.

VARIPOWER AUTO-FORMERS

Designed for line voltage control, filament control and reduced power operation. Output voltage from 0 to 130 volts, 50/60 cycles. Varipower units permit control of filament voltage at the **tube socket** to within 2½% of desired value simultaneously with line voltage control and plate voltage control. Can be used to reduce or increase voltages on filament transformers. Taps at 25, 55, 75, 95, 100, 105, 110, 115, 120, 125 and 130 volts permit output voltages from 0 to 130 volts in 5 volt steps.

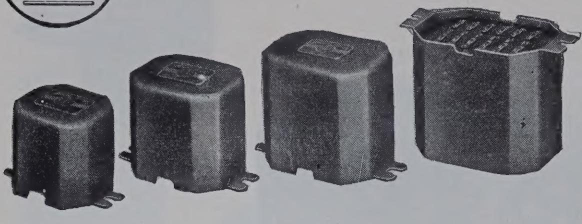
SPECIAL SERIES AUDIO TRANSFORMERS



UTC Special Series transformers are specifically designed for amateur and popular-priced PA service. The Special units are finished in a rich, commercial type medium gray enamel. A recessed terminal strip is provided permitting above chassis or breadboard wiring in addition to standard chassis type wiring. The universal windings provided on driver, matching and output transformers assure a maximum of flexibility. Modulator output units will carry the DC current of the class C stage for any of the impedances available and will match practically any audio tubes to any RF load within the power rating of the transformer. Large components are housed in formed cases with top or bottom mounting. All units are vacuum impregnated — compound filled

CASE SIZES

Type No.	H	W	D	M	Wt. Lbs.

* Above manufacturers' rating, but frequently employed by amateurs.

UTC SPECIAL SERIES POWER EQUIPMENT

UTC Special Series power supply components are designed specifically for amateur and popular-priced PA service. The ratings are based on such applications and recommended for intermittent service. For commercial applications, CG or LS grade components should be employed. Tapped coil structures on power and bias supply transformers afford maximum flexibility, permitting a given transformer to be used with many circuits and types of tubes. Do not affect standby service by interrupting high voltage center tap.

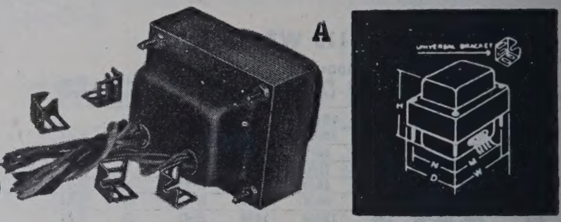
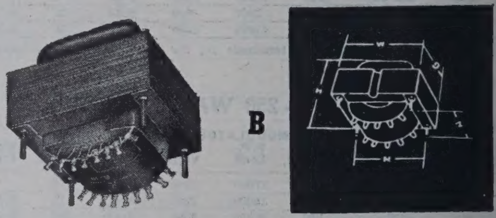
The UTC replacement type transformers represent the culmination of years of development in this field All units are vacuum sealed against humidity with special impregnating materials to prevent corrosion and electrolysis. Shells and brackets are finished in attractive high lustre black enamel

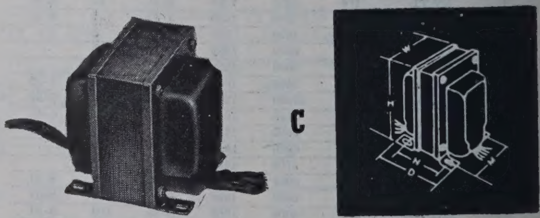
The UTC shells and universal brackets employed make possible a latitude in mounting dimensions never approached heretofore Using Varitap coil construction a minimum number of transformers have been developed to cover any requirement in the replacement field.



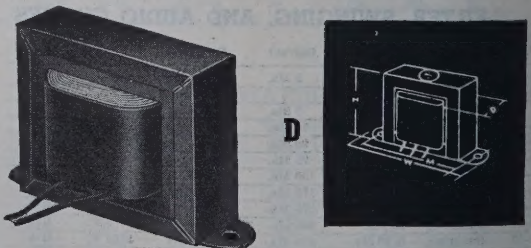
Through unique construction the five UTC VARITAP DUPLICATE replacement transformers will service as many types of radio receivers as the 15 or 20 units more customarily employed for such service. The universal feet may be used for upright or horizontal mounting, or eliminated for flush mounting.



UTC FLUSH TYPE transformers are husky units designed for low temperature rise and good regulation. By employing a Varitap universal coil structure, the five units described are universal in application. The rugged solder terminals permit ease of circuit change for the experimenter.

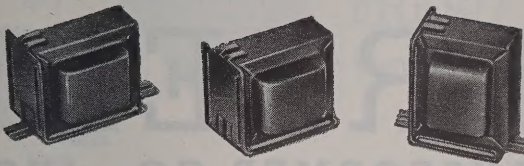


UTC VERTICAL power transformers are unusually attractive in appearance, having smooth drawn cases finished in high lustre black enamel. The Varitap coil structure assures flexibility of application.

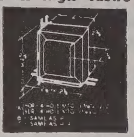


Channel frame chokes, audios, and filament transformers are conservatively designed. Standard black enamel mounting channels are employed. Coils are tropic-sealed by vacuum-pressure method.

(Refer to Page N-37 for UTC Prices)



Varitap Duplicate audio units are extremely attractive, the double shells and universal mounting brackets being finished in high lustre black enamel. The figure A units use the UTC universal bracket. This bracket makes possible four hole horizontal or vertical mounting and two hole, channel type, horizontal or vertical mounting. The coils of these units, in addition to efficient design and mechanical shielding, are vacuum impregnated and sealed with a special compound to assure complete protection against adverse climatic conditions.



SHIELDED UNIVERSAL MOUNTING AUDIO TRANSFORMERS AND FILTER CHOKES

Type No.	Application	Description	Fig.	Wgt. Lbs.
R-23	1 plate* to 1 grid	3½:1 ratio	A	1
R-24	1 plate* to 2 grids	2:1 ratio	A	1

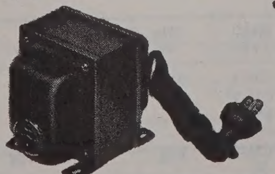
R-39	10 watt line Matching Transformer	250, 500, 1,500 ohms to 2, 8, 15 ohms	2⅞	1⅜	1-11/16	2⅜	¾
R-40	25 watt line Matching Transformer	250, 500, 1,500 ohms to 2, 8, 15 ohms	4⅛	2¼	2⅝	3-9/16	2½

* Will match tubes like 27, 37, 56, 6C6 triodes, 6C5. Can be used with high mu triodes with loss in low frequencies.

STEP DOWN AUTO-TRANSFORMERS

With 6 foot cord and female receptacle
220-240 to 110-120 Volts—50/60 Cycles

Type No.	Application	Wgt. Lbs.
R-41	85 watt capacity	4
R-42	125 watt capacity	5
R-43	175 watt capacity	5½
R-44	250 watt capacity	6½
R-45	500 watt capacity	12
R-46	1200 watt capacity	18
R-64	2500 watts, no cord	30

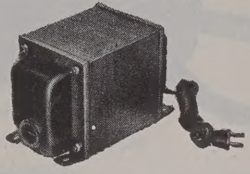


ISOLATION TRANSFORMERS

Ideal for isolating line noise, AC-DC sets, etc. Excellent electrostatic shielding. 2000 volt breakdown test. Six foot cord and female receptacle.

Primary 110-120 volts, 50/60 cycles—Secondary 110-120 volts

Type No.	Rating	Wgt. Lbs.
R-72	40 watts	4
R-73	100 watts	6
R-74	250 watts	12
R-75	600 watts	20
R-76	1200 watts	30
R-77	2500 watts (no cord)	70



EXPORT VOLTAGE ADAPTER

Complete with cord and plug and special locking switch providing for line voltages of 105, 115, 125, 135, 150, 210, 230, 250 volts; 42 to 60 cycles. Output voltage 115.

Type No.	Rating	Wgt. Lbs.
R-47	85 watts	4½
R-48	150 watts	5½

LINE VOLTAGE ADJUSTERS WITH METER

The perfect answer to abnormal or fluctuating line voltage. Adjust switch so that meter reads at red line and you know that your equipment is working at correct voltage.

These units combine a tapped auto-transformer with a switch and meter in a compact, rugged assembly.

The nine tap switch provides for line voltages of 60 to 140 volts on 115 volt output models and 160 to 240 volts on 230 volt output models. All units are designed for 50/60 cycle service and come complete with 6 foot input cord and plug and outlet receptacle.

Type No.	Primary Voltages	Sec. Volts	Watts	Wt. Lbs.

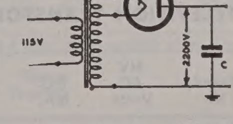
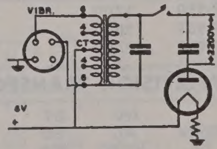
PHOTO FLASH TRANSFORMERS

Can be used for either standard (Amglo type) or trigger (Sylvania type) multiple flash bulbs. Circuit details included with transformer, or on request.

PF-1 Primary for 115 volts, 50/60 cycles. Secondaries for power supply delivering 2200 volts DC to condenser up to 100 Mfd. (30 Mfd. charges in 4 Sec.) Compound sealed in G-3 case $2^1/_8$ x $2^3/_4$ x $2^1/_2$ inches high. Weight 2 Lbs.



PF-2 For portable photoflash service. Primary tapped for 4 volt or 6 volt battery (full wave vibrator). Secondary for power supply delivering 2200 volts DC to condenser up to 60 Mfd. (30 Mfd. charges in 8 sec. with 6 volts or 14 Sec. with 4 volts). Compound sealed in G-3 case. Weight 2 Lbs.



PF-3 Trigger Transformer 15 KV peak

OUTPUT TRANSFORMERS
REPLACEMENT and H.O.T. *Series*

FREED TRANSFORMER CO., INC.
BROOKLYN 27 NEW YORK

Designed for delivering the maximum audio frequency power from an amplifier to a load (voice coil or line). Good frequency response and low harmonic distortion are the quality factors of the H.O.T. output transformers. Fully enclosed shielded type with leads. All H.O.T. series transformers have multiple secondary impedances.

AMPLIFIER AUDIO TRANSFORMERS

Designed for amplifier and transmitter audio circuits. To be used for Class "A" applications.

Fully enclosed shielded type construction, conservative design and good frequency response are the quality features of the amplifier audio transformers.

PARALLEL FEED AUDIO REACTORS

Designed to eliminate the direct current component in the primary of audio transformers to be used as plate coupling reactor where the use of a high resistance is objectionable. Low distributed capacity insures excellent high frequency response.

AUDIO TRANSFORMERS — C SERIES

A quality line of transformers used in Public Address amplifiers and transmitters. Uniform case design, universal mounting, conservative ratings, vacuum impregnation of coils and moisture proof sealing of all these transformers is one of the outstanding features of the C Series Audio Transformers.

Low level input and output transformers have a balanced hum bucking coil construction. The frequency response of all these units is flat within ± 2 db from 60 to 10,000 cps.

THERMADOR TRANSFORMERS

Superior materials, workmanship and performance have established these Thermador transformers as America's finest. Designed, engineered and produced by the West's largest manufacturer of transformers, the name Thermador guarantees their rugged, precision construction and their longer life.

REPLACEMENT TRANSFORMERS

Adaptable to a Particular Job: The transformer models listed have been engineered to cover the replacement field for both the old and new home radio receivers. The new line affords the widest range of application for use in receivers, amplifiers and small transmitters.

Thermatite Treated to Withstand Heat and Humidity: THERMADOR transformers are Thermatite treated, which is a well tested and approved form of vacuum impregnation. This treatment, proved on thousands of transformers under severe climatic conditions, gives these units the resistance to withstand extreme conditions of humidity and heat.

STUDIO QUALITY TRANSFORMERS

THE HI-FIDELITY series of audio equipment listed above represents the highest degree of quality yet attained in audio transformers. In addition to the absolute moisture elimination provided by "Thermatite" treatment, THERMADOR hi-fidelity transformers have the following advantages:

Wide Frequency Range: Transformers of the SQ series are linear within one db. from 20 to 20000 cycles.

Balanced Winding. THERMADOR transformers are constructed to give the best practical magnetic, capacity and resistive balance. In designs where capacity balance is important, each winding is made up of two symmetrical coils. Input transformers are supplied with a static shield between primary and secondary.

Low Harmonic Distortion: THERMADOR transformers are designed to offer the proper load impedance to the tubes with which they operate. Maximum primary inductance, low leakage reactance and low flux densities in the core permit unusually low harmonic levels.

Catalog with case types illustrated is available upon request. For full information write to:

STACO Transformers are compact and modern in design. Only the highest quality silicon lamination steel is used which assures cool operating transformers. Each coil is layer wound with the best quality enameled wires, each layer is insulated with heavy insulating material, each coil is varnished impregnated and high temperature baked. High Voltage Breakdown Test is performed on each coil and transformer in accordance with existing RMA Specs. This combination of high quality materials plus the finest workmanship is assurance of better and lasting performance at highest operating efficiency, yet costs no more than average.

Finishes: Mount type #1, Black baked enamel, Mount type #2, Black baked enamel, Mount type #3, Natural Buffed Aluminum, Mount type #4, Black Wrinkle baked enamel.

Peerless Electrical Products Division of Altec Lansing Corporation presents two new lines of transformers. The standard commercial line includes power, filament, plate, isolation, television, input, interstage, bridging, output, impedance matching transformers and power chokes. The commercial line of audio transformers have a flat frequency response within ±1 db from 30 cycles to 15,000 cycles, the power transformers are conservatively rated for a maximum heating rise of 55°C., and the output transformers are conservatively rated to give full rated power within ± 3 db from 30 cycles to 10,000 cycles.

The superb new audio line of 20-20 transformers covers input, interstage, bridging, output and impedance matching transformers which are unsurpassed in any market. The 20-20 line of audio transformers have a flat frequency response within ±1 db from 20 cycles to 20,000 cycles and have good transmission up to 50 KC. The output transformers are conservatively rated to give full rated power within ±3 db from 20 cycles to 20,000 cycles.

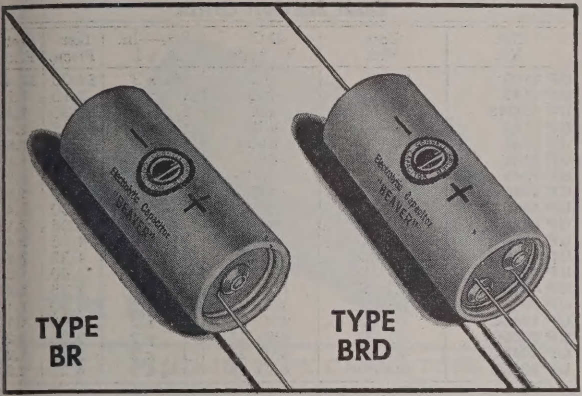
CORNELL DUBILIER

TUBULAR CAN-TYPE DRY ELECTROLYTIC CAPACITORS



"BLUE BEAVER"* CAPACITORS

Types BR and BRD "Blue Beavers" are the most popular electrolytic capacitors employed for all applications where units are required for convenient mounting in small spaces beneath a chassis or connected directly in the wiring assembly. They are small in physical size and self-supporting by means of strong, bare tinned-copper wire leads, while the larger sizes may be mounted with a metal strap.

MINIATURE TUBULAR CAPACITORS

Type BBR "baby BR-type capacitors" are designed for use in compact apparatus such as hearing aids, pocket radios and other small assemblies. They are hermetically sealed in tubular aluminum containers and ideally suited to meet requirements in low voltage circuits.

Cat. No.	Cap. Mfd.	D.C. W. Volts	Size—Ins. Dia. x Lth.	List Price	Net Price

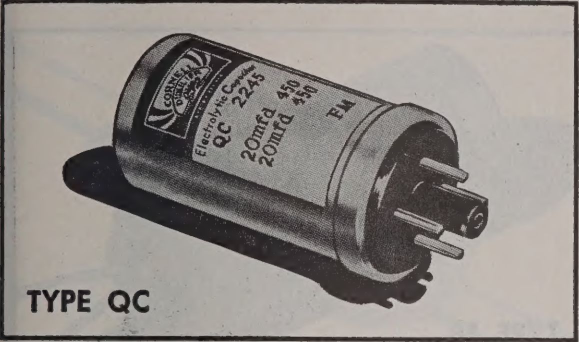
ROUND CAN DRY ELECTROLYTIC CAPACITORS



PLUG-IN TYPE CAPACITORS

Type QC Capacitors are hermetically sealed in round aluminum containers and provided with a four-pin octal base mounting in order to be readily removed and replaced in standard octal base tube sockets.

Cat. No.	Cap. Mfd.	D.C. W. Volts	Size—Ins. Dia. x Lgth.	List Price	Net Price

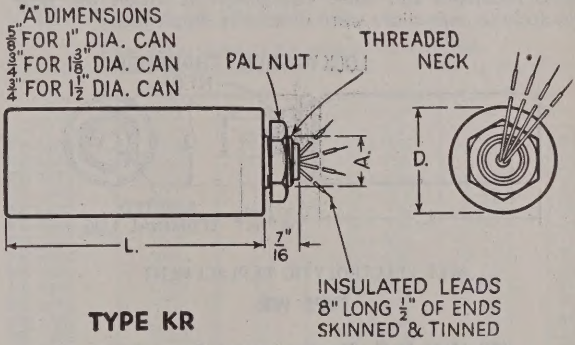
SCREW-NECK TYPE CAPACITORS

Types KR and KRC single-hole mounting units are compact etched foil type dry electrolytic capacitors furnished in round (inverted mounting) aluminum cans. Available in single, dual and triple sections with color-coded leads. Made in all popular voltage ratings for use in A.C.-D.C. or voltage-doubler midgets and A.C. operated sets.



TYPE KR

Cat. No.	Cap. Mfd.	D.C. W. Volts	Size—Ins. Dia. x Lth.	List Price	Net Price
KR 105	50	25	1 x 2½	$1.75	**$1.05**
KR 204	4	250	1 x 2½	1.55	**.93**
KR 208	8	250	1 x 2½	1.60	**.96**

REPLACEMENTS FOR WET-TYPE UNITS

These dry electrolytic capacitors furnished in round aluminum cans are offered as substitutes for replacement of wet electrolytic units which have been discontinued in manufacture during the war. The limited range of capacities listed below cover practically all applications in standard radio receivers and other equipment in which wet type electrolytic capacitors were originally employed.

ELECTROLYTIC CAPACITORS - DEELEY

"ELECTROLYTIC CAPACITORS"

By PAUL McK. DEELEY

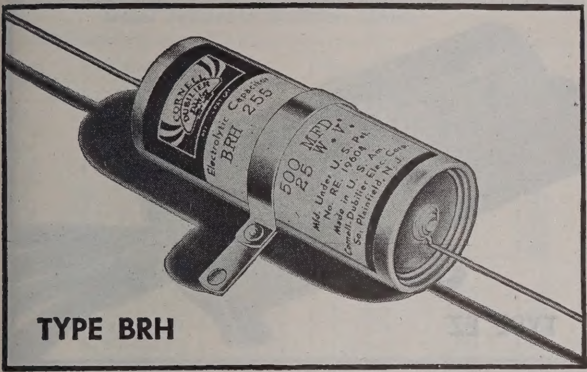
Here in one masterly volume, "Electrolytic Capacitors," you will find a wealth of th- most practical information ever published on the subject of electrolytic capacitors.

Never before has the technician been offered a manual so complete and so comprehensive at this price—**$1.00 net,** formerly $3.00. "Electrolytic Capacitors" should be in every radio man's professional library and technical file.

This instructive book supplies the reader with specific information concerning the many factors involved in the theory, design and construction of electrolytics. It is profusely illustrated and describes all applications of electrolytic capacitors. 300 pages, size 5½″ x 7⅞″, cloth bound hard cover. Every page is a gold mine of facts and data.

This 300-page book is yours postpaid—for only........................ **$1.00 net**

HIGH CAPACITY DRY ELECTROLYTIC CAPACITORS

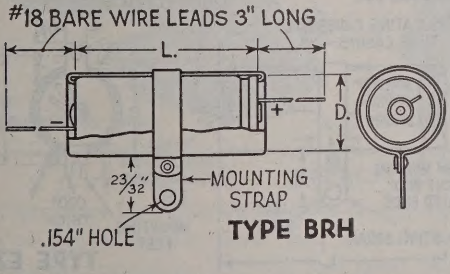


TYPE BRH

METAL TUBULAR TYPE CAPACITORS

These compact C-D etched foil electrolytic capacitors have been especially designed for all applications requiring high capacity units operating in low voltage D.C. circuits. They are widely employed in portable radio power rectifying circuits, electric fence devices, telephone and D.C. timing circuits. Units are available in standard capacities and voltage ratings for all uses.

Hermetically sealed in pure aluminum cans with an external cardboard insulating sleeve, these units are provided with metal mounting strap and bare wire leads for convenient wiring into any circuit assembly. They are constructed identically the same as Type BR "Blue Beavers" except all units are provided with a mounting strap.



TYPE BRH

TYPE FB

INSULATED CAN CAPACITORS

Type FB capacitors in round aluminum cans are designed for high capacity, low voltage applications, and are especially popular as replacements in motion picture sound equipment, and other low voltage circuits. All units are provided with lug terminals on a moulded bakelite cover and furnished with an external cardboard insulating sleeve for protection against short circuits.

Type FB is same as FA except lug terminal.

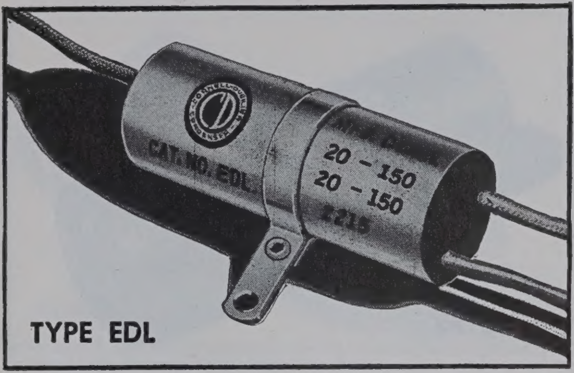
CARDBOARD TUBE DRY ELECTROLYTIC CAPACITORS



CARDBOARD TUBE UNITS (Formerly Type BRL)

Type EDL Capacitors are dual and triple common negative units in cardboard tube containers with wax-filled ends. Capacities, voltages and polarity of the leads are clearly defined by color coding stamped on the cardboard tube casing. Units are provided with insulated wire leads brought out at both ends of the unit. A mounting strap around the center of the cardboard tube casing enables mounting the unit with one screw under the chassis assembly.

UNIVERSAL-MOUNTING UNITS

Type EZ capacitors are especially popular for radio servicing where low cost replacements are required. They are designed with mounting feet for upright mounting to replace inverted can-type units, spade-lug units, or may be mounted beneath the chassis by means of the mounting strap provided around the center of the cardboard tube casing. In any instance, the unused mountings may easily be cut off.

These units are without doubt the most practical all-around replacement capacitors available and incorporate C-D etched foil features in design and construction. They are completely sealed in moisture-proof cardboard tube casing, filled with special wax compound, and provided with insulated wire leads eight inches long. All units are clearly stamped with capacities, voltages and color code designation of leads.

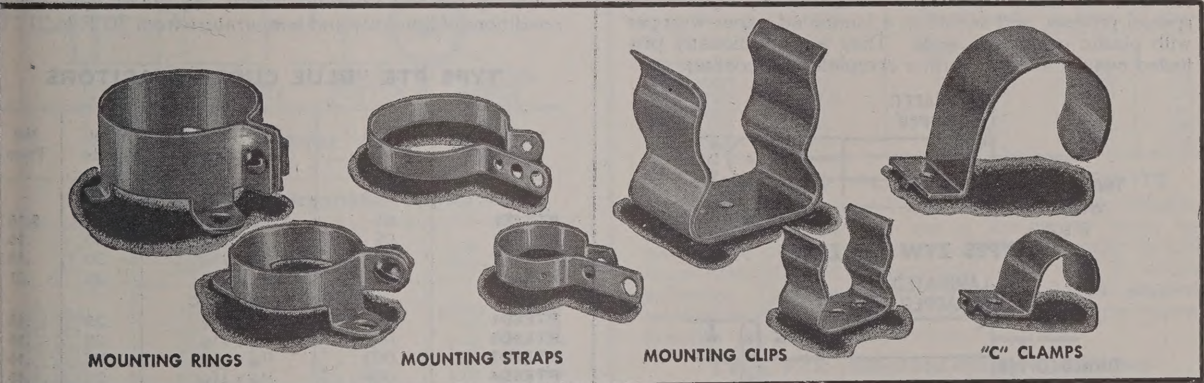
*First section separate, others common negative.

Explanation of Terminal Connections

In all cases only a single common negative lead is provided to all sections in multiple section capacitors listed under the heading of Common Negative Units. Separate Section Units are provided with separate negative and separate positive leads.

In triple and quadruple section capacitors with separate sections, indicated with an asterisk (*), the very first capacity listed is a separate section, having separate negative and positive leads, while all other capacities shown are connected to a single common negative lead with separate positive leads to each section.



CAPACITOR MOUNTING HARDWARE

Additional hardware for mounting all types of electrolytic capacitors as well as tubular paper units is available as shown in the accompanying diagrams and listed below.

Part No.	Description	List Price	Net Price

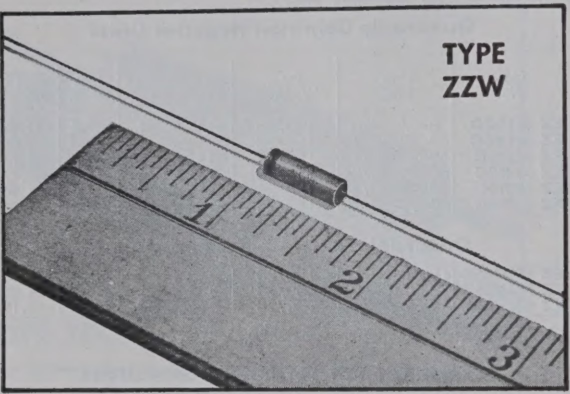
CORNELL DUBILIER

TUBULAR PAPER CAPACITORS



MINIATURE TUBULAR CAPACITORS

Types ZYW, ZZW, and flat type ZNW, tiny tubular paper capacitors are especially suited for use in very small electronic assemblies, such as hearing aids, pocket radios, etc., where minimum space and weight are essential. These capacitors are the result of Cornell-Dubilier developments for the VT radio proximity fuze for shells and bombs made for the Navy during the War and today find many applications in ultra compact electronic equipment of all kinds. All units are non-inductively wound, wax impregnated by special process, and sealed in a laminated paper wrapper with plastic compound ends. They are additionally protected against moisture with a complete wax coating.

"BLUE CUB" MOULDED CAPACITORS

These "Blue Cub" moulded plastic tubulars are especial designed for use in television sets, auto radio, a.c.-d.c. se and other equipment where high temperatures are e countered. No shock, no vibration is too much for the They are Vikane* impregnated **with leads welded to th capacitor section** and sealed in solid mold constructic with final seal-dip of special moisture-proof compoun Capacity remains constant within 5% under most seve conditions of humidity and temperature from 70°F. to 212°

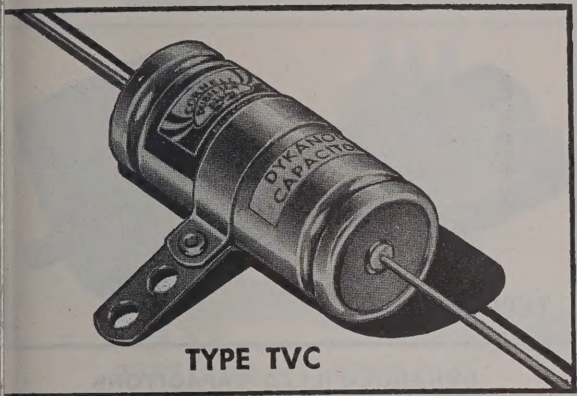
TUBULAR TELEVISION CAPACITORS



OIL-IMPREGNATED METAL TUBULAR UNITS

Type TVC capacitors are compact tubular metal can type units designed to withstand severe climatic conditions. They are non-inductively wound, impregnated with Dykanol "B" to maintain high insulation resistance.

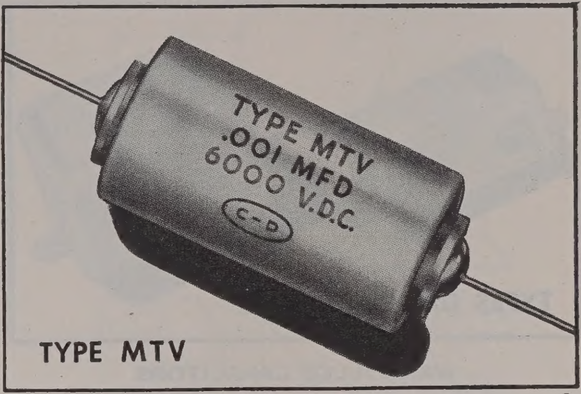
*For units provided with insulating sleeve over metal tube add 10c to list price. When ordering add "–6" to Cat. No. (Example TVC 4D5–6).



OIL-FILLED METAL TUBULAR UNITS

Type MTV capacitors are impregnated and filled with oil in hermetically sealed metal tube containers and provided with an insulating cardboard sleeve cover. They are small size units especially designed for use in assemblies where high temperatures are encountered, such as television receivers and similar high voltage equipment.

TYPE MTV—Oil-Filled Capacitors

"BLUE CUB" PLASTIC TUBULAR UNITS

Type PTE capacitors are Vikane* impregnated to withstand high voltage breakdown test at low power factor and moulded in plastic for permanency and durability to withstand humidity and temperatures up to 300° F. without softening. They are provided with **wire leads securely welded to the capacitor section** which insures against possible opens and intermittents.

DOUBLE-BUILT CARDBOARD TUBULAR UNITS

Type DSTH tubular capacitors are designed to meet the high voltage circuit requirements of television receivers, ocilliscopes, and similar high voltage electronic equipment. They are thoroughly impregnated in Vikane*, wax filled and completely enclosed in **two separate concentric-wrapped, wax-sealed cardboard tube casings.** They provide an extra wide margin of safety factor and reliable performance in all circuits within their rated operating voltages and temperature up to 185° F.

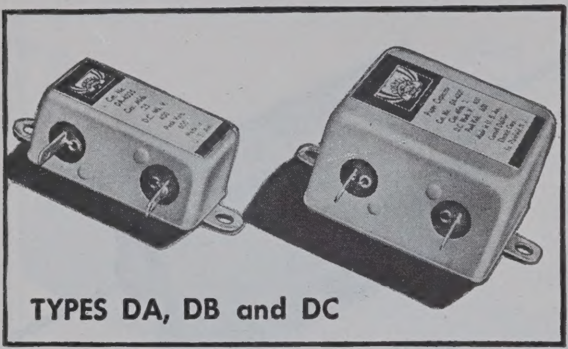
DRAWN METAL SHELL PAPER CAPACITORS



TYPES DA, DB and DC

WAX-FILLED CAPACITORS

Types DA to DC capacitors are non-inductively wound and wax-potted in drawn metal shell containers. They are available in a large variety of ratings for radio frequency bypass, audio frequency coupling and bypass functions. Lug terminals are amply insulated. Integral with casing, the mounting feet allow ease of assembly.

In the single and dual section capacitor units, the terminals are insulated from the container. The duals have three terminals, the common lug being on the left. In the triple section capacitors, the common terminal connection is grounded to the metal case.

All units are wound with the highest grade pure aluminum foil and multi-laminated kraft tissue, thoroughly dried under vacuum pressure, impregnated in the finest grade wax compound, oil-cooled, and potted in a special wax compound. Conservative D.C. ratings of these capacitors by triple testing assure dependable service in operation.

TYPE DYR

DYKANOL-FILLED CAPACITORS

Type DYR Dykanol Bypass Capacitors are non-inductively wound and meet the need for dependable capacitors of fractional capacities that will operate efficiently in R.F. and A.F. bypass, audio frequency coupling and A.C. circuits under all humidity conditions and at temperatures up to approximately 85° C. (185° F.). They are built to stand an immersion test in hot water and have been specially designed to fill the severe requirements of aircraft, submarine, marine and tropical applications for maximum capacity and voltage in minimum space, where quality and reliability are of paramount importance. They are impregnated and filled with Dykanol "G" and sealed in metal cases with leakproof riveted terminals.

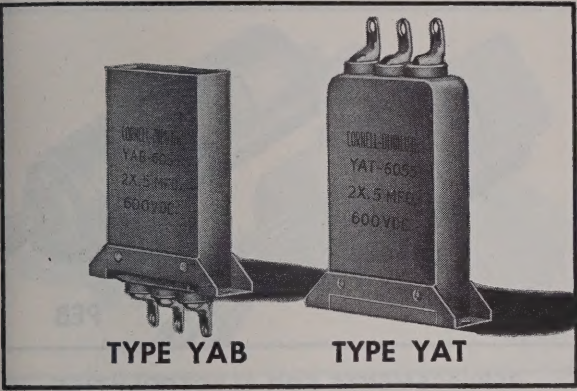
DRAWN METAL SHELL PAPER CAPACITORS



TYPE YAB TYPE YAT

COMPACT DYKANOL CAPACITORS

Types YAT and YAB are impregnated and filled with Dykanol "G" (chlorinated diphenyl) a synthetic, non-inflammable, non-oxidizable liquid compound which is unaffected by wide latitude of temperature changes or voltage stresses. They are especially suited for use in bypass, audio frequency coupling circuits and other applications where conditions of high humidity and temperatures are encountered.

Units are sealed in drawn metal shell containers and provided with leakproof terminals either on top or bottom of the can containers, designated as Types YAT and YAB accordingly. All units are provided with rugged metal mounting brackets which provide rigid mountings. Two or more units may be mounted close together in an assembly. Single section units are provided with two terminals while dual and triple section units have three terminals. In single and dual section units terminals are insulated from the metal container. The third terminal of dual section units is the common terminal and marked for identification. In triple section units the common terminal connection is grounded to the metal case.

Types WAT and WAB Capacitors are smaller size units of similar construction and electrical characteristics but only supplied in single section units with two terminals. These units are ideally suited for use in assemblies where space is limited and multiple units may be mounted close together for compactness.

UNCASED PAPER CAPACITORS

Type RMJ uncased capacitors are made available to repair paper dielectric filter blocks which were used in the early models of A.C. operated radio sets. Also useful in the elimination of electrical interference caused by pushbuttons, bells, buzzers, and similar applications in radio, electronic and electrical devices.

Special capacitor units can be made up and potted into suitable containers by servicemen to fulfill many requirements.

MOTOR GENERATOR AMMETER AND BUFFER CAPACITORS

The mechanical design of C-D Auto Radio Capacitors insures against damage by the high temperatures and excessive vibration existing under the hood of an auto. Special units such as these are designed for certain particular installations. Thus, for instance, Ford generator capacitor, FC-2P5V, has a special mounting bracket while others are also provided with special mountings and terminals.

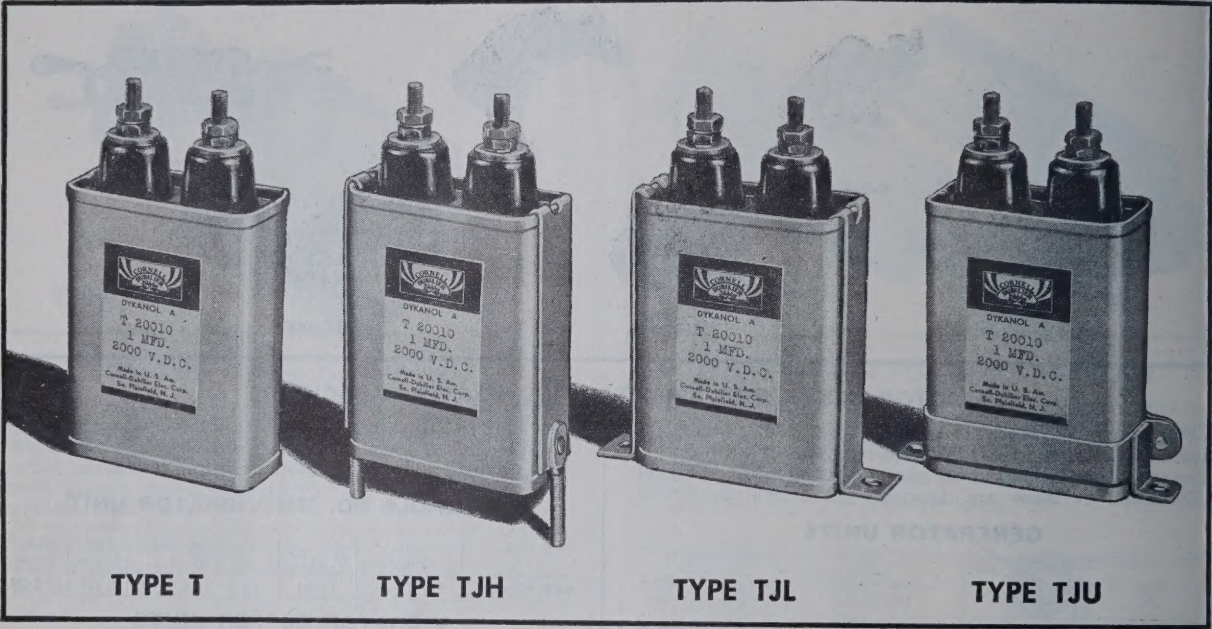
DYKANOL TRANSMITTING CAPACITORS



TYPE T CAPACITORS WITH VARIOUS TYPES OF MOUNTINGS

Type T-series Dykanol transmitting capacitors are the finest and most dependable units obtainable for use in all amateur, broadcast and commercial equipment. Units are provided with well insulated terminals, and mountings desired as shown in the accompanying illustrations. These units are standard in thousands of broadcast and government stations all over the world, and also employed in all types of sound equipment, television receivers and transmitters, and other electronic apparatus.

Type T capacitors are thoroughly impregnated and filled with Dykanol "G" (chlorinated diphenyl), a non-inflammable, fireproof, non-oxidizable liquid compound which provides a high factor of safety and exceptionally long life at high temperatures.

In the past, organic oils, resins, and waxes were used as paper impregnants in electrical insulation. Because of the variation of these natural materials, uniformity of results could be desired only and not attained. The concentrated attention of chemists and electrical engineers was turned toward the development of non-organic, synthetic substitutes and new substances, the properties of which could be controlled and modified as desired. The chlorinated diphenyls were recognized as outstanding among the rapidly increasing number of synthetics available. Of these compounds, continued research pointed to one narrow group, that known as Dykanol "G," the characteristics of which were particularly suited to the capacitor art. This material, having the lowest power factor compatible with the highest dielectric constant, is used as the impregnant in Type T capacitors.

For the dielectric separator in Type T capacitors, only the highest grade of kraft paper is used, ranging in thickness from .0003 to .001 of an inch for a single sheet. Three or more layers of paper dielectric as a separator between foil members are always used. The higher voltage units use as many as six or more layers. This multiple lamination builds a high safety factor into Type T capacitors.

All paper is manufactured to meet rigid specifications and is subjected to a series of tests at the C-D laboratories before acceptance for use in these capacitors. The paper must be of exceptionally high quality to pass the tests. In order to determine its many characteristics, tests are made for porosity, tensile strength, effect of heating, conducting particles, dielectric strength, ash content and ash analysis, acidity or alkalinity, soluble impurities, general appearance, and mechanical considerations such as yield, thickness, width, etc.

Due to the use of Dykanol "G" and multi-layer kraft capacitor tissue in these units, many outstanding advantages are thus gained, i.e., small size, light weight, low dielectric stress and long life at higher operating temperatures. The size is reduced due to the high dielectric constant of Dykanol "G" which also affords reduction in weight. A low dielectric stress is obtained as the result of efficient use of container volume, and the high specific inductive capacity of the impregnant. And since the dielectric stress is low, the life of the unit in operation is greatly increased. The synthetic liquid impregnant employed in these capacitors does not oxidize or deteriorate like commonly used organic oils. For complete listing of Type T-series, see next page.

For higher voltage units, ranging from 6000 to 25,000 v.d.c., write for data and prices on Type TK capacitors.

TYPE DESIGNATIONS—Type T (basic units) are without mountings. To order Types TJH, TJL or TJU with mountings as shown above, add letter symbols of type mountings desired to Cat. No. as follows:

TYPE T—(Basic unit) without mountings.
TYPE TJH—With screw spade-lug brackets.
TYPE TJL—With mounting foot brackets.
TYPE TJU—With universal mounting strap.

Prices below include mounting brackets or universal mounting strap when ordered according to these type numbers.

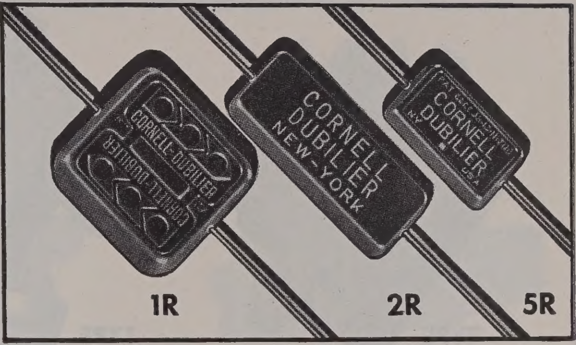
Notes On Ordering Special Units

The listing above gives the range of capacities available from stock. Intermediate capacities, not exceeding the maximum as listed for each type, can also be furnished upon request.

Standard capacity tolerance is plus or minus 20%. Also available, on order, in plus or minus 10%, 5%, 3% and 2% tolerance ratings (or within 1 mmfd.—whichever is greater). For capacity tolerance of: 10% add 10% to list prices; 5% add 20% to list prices; 3% add 40% to list prices; 2% add 75% to list prices.



HIGH-STABILITY "SILVER-MIKE" UNITS

Types 1R, 1DR, 2R and 5R "Silver-Mike" silvered mica capacitors are designed for use in high Q electronic circuits where frequency stability and minimum loss must be maintained. They are ideally suited for use in circuits where the LC product must be maintained constant, and particularly adapted for use in tuning IF transformers, push-button tuning circuits and other similar applications. Standard units are moulded in low-loss red bakelite.

Notes on Ordering Special Capacitors

Type No. Suffix	
	STANDARD TOLERANCE is plus or minus 10%. Also available on order in plus or minus 5% and 2%. For capacity tolerance of: 5% add 15c to list prices; 2% add 40c to list prices.
"L"	MOULDED IN LOW-LOSS BAKELITE available on order. Add "L" to Cat. No. (example: 4L-22060; 9L-11010). Add 25c to list prices.
"S"	SPECIAL SALT WATER IMMERSION SEAL AGAINST HUMIDITY. To order, add "S" to Cat. No. (example: 4S-53010; 9S-12050). Add 10c to list prices.
"T"	HEAT AGEING TREATMENT for stabilizing capacity over extremely wide temperature changes, minus 40° C. to plus 70° C., furnished on special order. Add "T" to Cat. No. (example: 4T-12010; 9T-21020). Add 15c to list prices
"LST"	TO ORDER A COMBINATION OF ABOVE FEATURES, add letters specified to Cat. No. (example: 4LST-12040; 9LST-13020). Add 50c to list prices.
	INSULATION RESISTANCE—Brown Bakelite, 20,000 megohms per unit—Low-Loss Bakelite. 40,000 megohms per unit. Low-Loss Bakelite provides higher Q and lowers the power factor.
"4E"	SMALL METER BRACKETS adapted for Weston Model 301 meters, add "E" to Cat. No. (example: 4E-22050). Add 20c to list prices.
"9A"	UNTAPPED MOUNTING HOLES. Standard units are tapped for 6-32 and furnished with round head screws. For untapped mounting hole, .144" diameter (No. 6 clearance), add "A" to Cat. No. (example: 9A-11030).
"9F"	HIGHER VOLTAGE CONSTRUCTION, rated 6,000 v.d.c. test, 3,000 v.d.c.—1500 v.a.c. operating. Capacity range limited. Moulded in low-loss Bakelite, BM 262. The thickness of these units, or "A" dimension, is 7/16" for capacities up to .002 mfd. and 3/4" for capacities from .0022 to .005 mfd. max. To order, add "F" to Cat. No. (example: 9F-63050, the numeral "6" designating 6,000 volts test). Prices of "9F" units are double the list prices shown.
"9R"	HIGH STABILITY UNITS—Special high stability units, comprising low-loss Bakelite, BM 262, temperature aged and sealed construction for use as low power master oscillator tank capacitors or accessory positions. These units are fixed and permanent in characteristics, having a capacity-temperature coefficient of approximately plus .003% (30 parts per million) per degree C. To order, add "R" to Cat. No. (example: 9R-52020). Prices of 9R units are double the list prices shown.

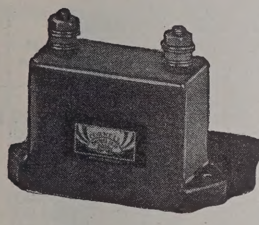
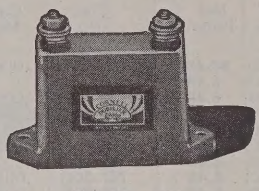
TYPE 4E

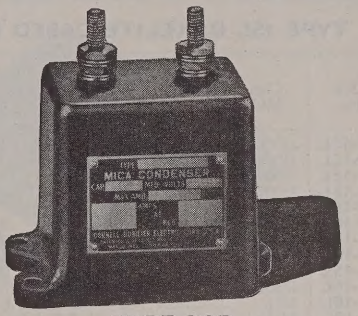
BAKELITE CASED MICA TRANSMITTING CAPACITORS



TYPE 6

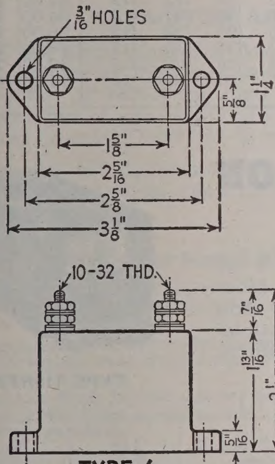


TYPE 15L

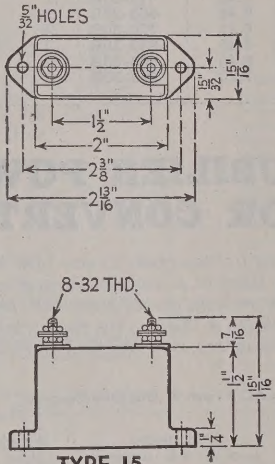


TYPE 30B

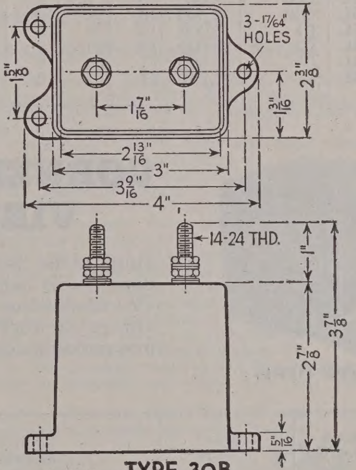
BAKELITE CASED MICA CAPACITORS



TYPE 6



TYPE 15



TYPE 30B

Types 6, 15L and 30B Mica Capacitors in moulded bakelite cases are designed for a wide variety of radio frequency applications where size and weight are at a premium, such as in aircraft, portable equipment, low-power transmitters and the earlier stages of high-power transmitters. They are specially suited for use as grid, plate, coupling, tank and by-pass functions. These units are among the smallest types employing the patented series-stack construction permitting their use on higher r.f. voltages.

Notes on Ordering Special Capacitors

Type 15L units are available only in low-loss Bakelite (BM-262 or equivalent) cases. Types 6 and 30B may be had in either standard (brown) or low-loss (yellow) Bakelite cases. When ordering low-loss units, add "L" to Çat. No. (example: 217-6L; 604-30BL). Add $1.00 to list price for Type 6. Add $1.50 to list price for Type 30B.
STANDARD CAPACITY TOLERANCES—Plus or minus 5%. Tolerance of 2% can be furnished on special order. Add $1.50 to list price for Types 6 and 15L. Add $2.00 to list price for Type 30B.
OPERATING AMBIENT TEMPERATURE—Up to 60° C. maximum.
SALT WATER IMMERSION SEAL—To order, add "S" to Cat. No. (example: 246-6S; 726-15LS; 113-30BS). Add to list: $.30 for Types 6 and 15L. Add to list: $.50 for Type 30B.
"H" Type—These units have been developed for use where excellent retrace and low temperature coefficient are required. Over a range of −40° C. to +70° C. the capacity temperature coefficient is approximately +.003% per degree C. A limited range of capacity and voltage ratings is available. Made only in low-loss Bakelite and sealed for immersion test. To order, add "H" to Cat. No. (example: 6H, 15H, 30BH). Add to list: $4.00 for Type 6. Add to list: $2.00 for Type 15L. Add to list: $5.00 for Type 30B.
TYPE 6K—This unit is a still further refinement being a compensated unit which can be made with a positive, zero or negative coefficient within the limits of +.003% to −.005% per degree C. over a temperature range of from −40° C. to +70° C. Type 6K is available in a limited range of low capacities and voltage ratings. "K" Type includes low-loss Bakelite and immersion seal. When ordering Type 6K, temperature coefficient must be specified. (Type 6 only) Add to list Price: for plus or minus 5%—$12.00; for plus or minus 3%—$13.00; for plus or minus 2%—$14.00; for plus or minus 1%—$18.00.

TYPE 110R10

CORNELL-DUBILIER POWERCON VIBRATOR CONVERTERS

Think of the new sales opportunities open to you now that you have the dependable name of C-D in back of a complete line of converters. More TV installations! More work on farm power supplies! Marine work! And always you work with confidence in the quality, dependability and trouble-free performance of these converters, because they're typical C-D products.

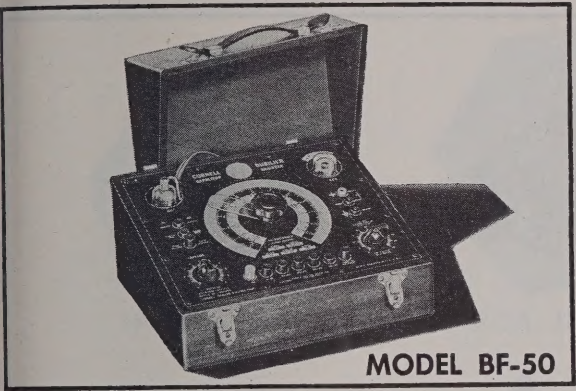
CORNELL DUBILIER

CAPACITOR TEST INSTRUMENTS



MODEL BF-50

CAPACITOR ANALYZER

The Model BF-50 Capacitor Analyzer quickly and accurately measures all important characteristics of all types of capacitors. It offers the most accurate and thorough capacitor test of any instrument of its type, and may be operated on any 110-volt, 50-60 cycle power line.

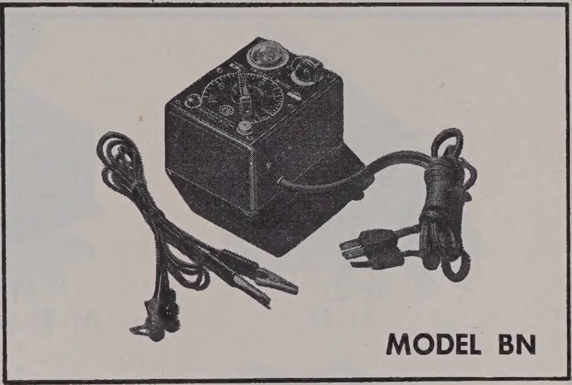
The analyzer will determine the true condition of all paper, mica and electrolytic capacitors, including A.C. motor starting types.

Features of Model BF-50 Analyzer

1. Measures Capacity—Accurately measures capacity of paper, mica, air, electrolytic and motor-starting capacitors from .00001 to 240 mfd.
2. Measures Power Factor—Measurements of power factor from zero to 50 percent on all types of electrolytic capacitors including motor-starting types.
3. Employs Wien Bridge—Assures permanent accuracy of capacity and power factor measurements. Readings not affected by line voltage variations.
4. Indicates Insulation Resistance—Insulation resistance measurements of paper and mica capacitors up to 1500 megohms. Also measures many types of insulation.
5. Indicates Leakage—Measurements of leakage of electrolytic capacitors by means of built-in direct current power supply.
6. Visual Eye Leakage Indicator—Provides simplified and reliable leakage tests on all types of capacitors. Enables measurements to be made rapidly.
7. Detects Defective Capacitors—Character measurements, such as leaky, shorted, open, high and low capacity, and high power factor on all capacitors.
8. High Sensitivity on All Measurements—Amplifier for capacity, power factor and leakage tests provides sharp and accurate readings. Amplifier built-in Analyzer.
9. Balance Sensitivity Control—Provides sharp or broad balances for quick and accurate readings. All readings are made simply and directly.
10. Direct Reading Linear Scale Calibration—Provides simplified measurements. All scales on panel uniformly spaced, easy to read, thus avoiding possible errors in using multipliers or charts.
11. Push-Button Switching—For convenient and simplified adjustments, all tests and circuit changes are made by means of modern push-button switches.
12. Visual Eye Bridge Balance—Visual detector gives positive indication of bridge balance for convenient, simplified and accurate capacity and power factor measurements.
13. Six Color-Coded Scales—Accurately calibrated, six color-coded scales. Uniformly spaced over total spacing of sixty inches. Easy to read. No "blind" spots.
14. General Purpose Instrument—May be used to check continuity capacity between circuits, insulation of transformer windings and other types of coils, etc.
15. Self-Contained—Portable—An instrument complete in itself, requiring no external standard, headphones, meters or accessories. A portable unit, for 110 volt, 50-60 cycle operation, supplied in walnut cabinet, removable cover, with carrying handle. Size, 6½ x 12 x 9¾ inches. Weight, 9 pounds.

MODEL BF-50 CAPACITOR ANALYZER
Net Price complete with tubes........................ **$42.65**

Replacement Tubes for Use in Model BF-50:
6E5—List Price $1.80—Net Price $1 08
12A7—List Price $2.65—Net Price $1.59



MODEL BN

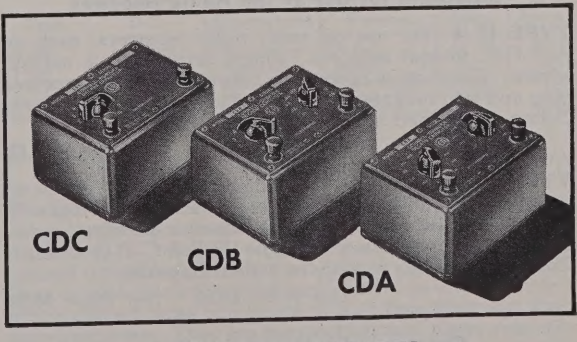
CAPACITOR BRIDGE

Features of Model BN Capacitor Bridge

1. Measures Capacity—Accurately measures capacity of paper mica electrolytic and air capacitors from .00001 mfd. to 50 mfds.
2. Indicates Power Factor—Power factor of electrolytic capacitor indicated by means of visual eye detector tube.
3. Detects Defective Capacitors—Detects open and short circuits, high and low capacity, and high power factor.
4. Checks Circuit Continuity—May be used as continuity meter. A handy instrument for checking circuits, coils, transformers and many other uses. For operation on 110 volts, 60 cycles.
5. Employs Wien Bridge—Employs Wien Bridge circuit for all measurements. Accuracy independent of line voltage variations.
6. Visual Eye Bridge Balance—Dual type visual bridge balance for accurate measurements facilitates quick tests on service jobs.
7. Direct Reading Scale—Direct reading ranges with all scale markings directly in microfarads. Clear reading dial scale. All capacity calibrations marked on panel. No charts or multipliers required.
8. Self-Contained—The Capacitor Bridge is complete in itself and requires no headphones, standards, external meters, etc.
9. Extremely Compact—The unusually small size of this bridge makes it particularly handy for portable use—3⅝" x 5" x 3" weight 2 pounds.
10. Attractive—Supplied in attractive walnut Bakelite case complete with detachable test leads and useful instruction booklet.

MODEL BN CAPACITOR BRIDGE
Net Price complete with tubes...................... **$20.35**

Replacement tubes for use in Model BN Bridge:
6AF6G—List Price $2.20—Net Price $1.32
12A7—List Price $2.65—Net Price $1.59



CAPACITOR DECADES

C-D Capacitor Decades provide accurate standards over a wide range of capacity. May be used in groups of the three decades, shown above, or used individually for maximum flexibility. Each decade is furnished with calibration chart giving exact capacity values for all scale markings, extending use to more precise measurements.

Rated Voltage—600 D.C.—220 A.C.

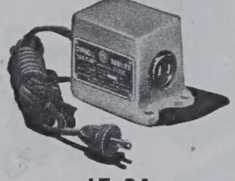
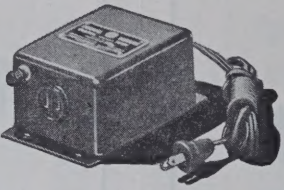
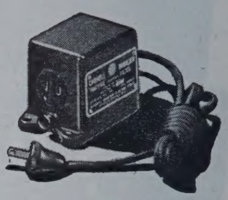
QUIETONE INTERFERENCE FILTERS



IF-21

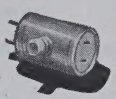


IF-18



IF-19

IF-4 & IF-5



IF-6

IF-22

IF-20

RADIO AND APPLIANCE QUIETONES

Most satisfactory results are obtained when Quietones are installed at the source of the interference. A Quietone installed in connection with an offending appliance corrects the noise caused by that appliance.

Where source of interference cannot be located a Quietone connected in the electric supply line of the radio receiver will alleviate, if not fully correct, the condition. When a Quietone is installed, interference will be greatly reduced. Remaining interference usually enters receiver through the antenna system.

Quietones for Use at the Radio Receiver

TYPE IF-4—For use on small radio receivers, such as A.C.-D.C. midget sets, etc., where noise level is not too severe. Connects in power line between the radio receiver plug and wall receptacle. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut, or green finish.
List Price $1.10 Net Price **$0.66**

TYPE IF-18—For use in connection with all radio receivers where noise level is severe. Furnished in Bakelite case (see colors). Employs highly effective all-wave capacitive-inductive type filter. Ratings: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory or walnut Bakelite.
List Price $8.35 Net Price **$5.01**

Quietones for Use at Appliances

TYPE IF-5—For small electrical appliances such as food mixers, hair dryers, etc., where radio interference is of low intensity. Plug type filter. Convenient to install. Rating 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut or green finish. List Price $1.10 Net Price **$0.66**

TYPE IF-6—For all types of home electrical appliances where interference is of moderately low intensity. Installed between appliance and power supply line with short return lead which reduces radiation. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut or green finish.
List Price $1.75 Net Price **$1.05**

TYPE IF-18—An efficient all-wave capacitive-inductive sectional band type filter for use in connection with all types of electrical appliances where interference conditions are severe. Provided with frame connection for reduction of radiation. Furnished in Bakelite case (see colors). Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case, walnut finished.
List Price $8.35 Net Price **$5.01**

TYPE IF-19—Capacitive-inductive type filter for use where interference is severe. Frame connection provided. Furnished in Bakelite case. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case. Ivory or walnut finish.
List Price $7.00 Net Price **$4.20**

TYPE IF-20—For use on small electrical appliances where interference is very low. Simply connected to cord plug of appliance and plugged into wall receptacle. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case. Ivory or walnut finish.
List Price $0.75 Net Price **$0.45**

TYPE IF-21—All-wave capacitive-inductive type filter for use on appliances where return lead to the frame of appliance cannot be made, such as shaver, barber clippers, etc. Furnished in Bakelite case. Rating: 110 V.A.C.-D.C. 1.6 amps. Colors—Bakelite case. Ivory or walnut finish.
List Price $4.00 Net Price **$2.40**

TYPE IF-22—For use in connection with electric shavers of all standard types. Line cord and plug provided with Schick and Packard type adapters which fit practically all type shavers. (Specify type desired when ordering.) Type IF-22A for Schick, Knapp Monarch, and similar type shavers. Type IF-22B for Packard, Zephyr, Remington-Rand and Ronson type shavers. Rating: 110 V.A.C. 5 amps. Colors—Bakelite case. Ivory or black finish.
List Price $2.75 Net Price **$1.65**

INDUSTRIAL QUIETONES

Although atmospheric disturbances in many instances cause radio noises, this condition is not the principal source of annoying noises. With the average radio receiver, noise is generally caused by the operation of electrical appliances or apparatus which create high frequency oscillations known as "man-made static". Many types of equipment cause minute sparks as a result of a change in electrical conditions within the device, which are essential to its operation. In effect these appliances act as miniature radio transmitters, setting up a disturbance which may affect radio receivers at a considerable distance.

It is highly desirable to correct noise conditions at the source as one filter properly installed at this point may eliminate the noise in a number of radio receivers. Where it is impossible to locate the equipment which is causing the interference a Quietone installed at the receiver will correct the noise in that receiver.

The Quietones listed below will correct radio noise conditions caused by motors, generators, elevators, stokers and many other types of industrial electrical apparatus. They are designed for convenient mounting, and contain highest quality capacitors, with lowest possible impedance internal connections. There are no current limitations for (CP) Capacitive Quietones.

Fluorescent Light Quietones

Among the Quietone Interference Filters especially suited to correct noise conditions caused at fluorescent lights, as well as other electrical appliances, are types IF-6, IF-24 and IF-54, the former being a very convenient plug-in arrangement that fits the receptacles of floor and table lamps.

Type IF-24 Quietone is a dual capacitive type filter for use on fluorescent light and other electrical equipment where noise conditions are not too severe. It is contained in a round metal casing ⅞″ diameter by 2″ long and provided with insulated wire leads 8″ long.

Oil Burner Ignition Quietones

For heavy duty filtering service on oil burners and other equipment such as stokers, motors, refrigerators, etc., Quietone type IF-7A is recommended for efficient results. This unit is mounted close to the equipment causing the interference with wiring in BX or conduit.

Type IF-54 Quietone is a capacitive-inductive filter which provides extremely high attennation over a wide range of frequencies. This unit is housed in a drawn metal container 2″ x 2″ x 1⅛″ high, and provided with insulated wire leads 6″ long. It is rated at 2 amps. 110-220 V.A.C. or D.C.

Fluorescent Light Quietones

Type	Volts A.C.—D.C.	Connections	Housing	List Price	Net Price
IF-6	110	Plug-in	Metal	$1.75	**$1.05**
IF-24	110	Flex-Leads	Metal	1.10	**.66**

Capacitive (CP) Quietones

Type	Volts A.C.—D.C.	Connections	Housing	List Price	Net Price
IF-25	110–220	Flex-Leads	Metal	$4.50	**$2.70**
IF-26	110–220	Flex-Leads	Metal	6.00	**3.60**
IF-11	110	BX	Cutout Box	12.00	**7.20**
IF-12	220	BX	Cutout Box	16.50	**9.90**
IF-14**	110–220	BX	Cutout Box	22.50	**13.50**

** All Quietones listed above with exception of IF-14 are for single phase circuits. IF-14 is for 2 or 3 phase circuits. The Quietones listed below are for the more severe radio noise conditions caused by motors, generators, elevators, diathermy, oil burners, etc. They are designed for convenient mounting and quick connection to these machines. They consist of low-loss coils and highest quality capacitors which correct noise conditions in both broadcast and short wave receivers. They are the most efficient filters available for heavy duty application. All capacitive-inductive (CI) Quietones are for single phase circuits.

Capacitive-Inductive (CI) Quietones

A.C. MOTOR STARTING REPLACEMENT CAPACITORS

Types ETB and JDS Electrolytic Motor-Starting Capacitors are universal replacement units for use in standard makes of oil-burners, refrigerators and other motor driven equipment. The list of units below simplifies the selection of the capacitor required when the capacity, voltage rating, and size are known.

In many cases where a round can-type unit is to be replaced a smaller size capacitor of the same capacity and voltage rating may be selected as a replacement. The smaller size unit may be wrapped tightly with ordinary corrugated paper and fitted into the capacitor housing on the motor. While only the most widely used range of capacities are listed below, Type ETB 110 V.A.C. capacitors can be supplied in intermediate capacities from 10 mfds. to 480 mfds.

Write for complete A.C. Motor Starting Replacement Capacitors, Catalog No. 163.

TYPE JDS—110 VOLTS A.C. 50-60 CYCLES

Cat. No.	Cap. Mfd.	Dimensions—Ins. L. x W. x T.	List Price	Net Price

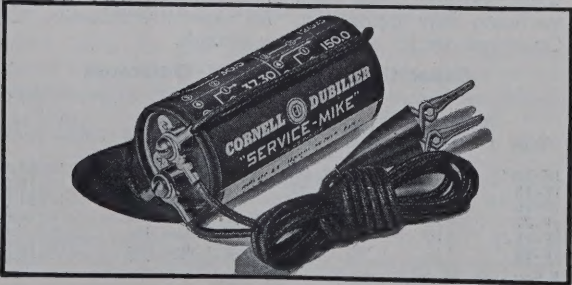
JDS130	130	3½ x 3½ x 2	3.79	**2.27**

Type ETB and JDS units are furnished with tightly fitted insulating tube or paper box casings with screw terminals. Type ETB units are available with black lacquered steel end caps, designated as Type ETBC, or with both end caps and black lacquered steel mounting bracket designated as Type ETBCB (see illustration above). Units must be designated accordingly upon ordering. (See note below.)

TYPE ETB—110 VOLTS A.C. 50-60 CYCLES

Cat. No.	Cap. Mfd. Min.–Max.	Dimensions—Ins. Dia. x Lgth.	List Price	Net Price
ETB-20	20–24	1⅜ x 2⅜	$1.70	**$1.02**
ETB-35	32–36	1⅜ x 2⅜	1.82	**1.09**
ETB-40	38–46	1⅜ x 2⅜	1.82	**1.09**
ETB-45	43–48	1⅜ x 2⅜	1.82	**1.09**
ETB-55	53–60	1⅜ x 2⅜	1.89	**1.13**
ETB-70	64–72	1⅜ x 2⅝	1.89	**1.13**
ETB-80	75–84	1⅜ x 3⅛	2.02	**1.21**
ETB-90	86–96	1⅜ x 3⅛	2.08	**1.25**
ETB-100	97–107	1⅜ x 3⅛	2.14	**1.28**
ETB-110	107–129	1⅜ x 3⅛	2.14	**1.28**
ETB-115	108–120	1⅜ x 3⅛	2.14	**1.28**
ETB-130	124–138	1⅜ x 3⅛	2.27	**1.36**
ETB-145	130–157	1⅜ x 4⅛	2.52	**1.51**
ETB-155	145–162	1⅜ x 4⅛	2.78	**1.67**
ETB-175	161–180	1⅜ x 4⅛	3.03	**1.82**
ETB-200	189–210	1½ x 4⅛	3.59	**2.15**
ETB-215	190–240	1⅜ x 3⅛	4.11	**2.47**
ETB-225	216–240	1¾ x 4⅛	4.11	**2.47**
ETB-340	324–360	2 x 4⅛	6.06	**3.64**
ETB-400	378–420	2 x 4⅛	6.83	**4.10**
ETB-450	432–480	2½ x 4⅛	7.59	**4.55**

NOTE—For units with metal end caps, Type ETBC, add 60c to list price. For units with metal end caps and mounting bracket, Type ETBCB, add $1.00 to list price.



SENIOR AND JUNIOR "SERVICE MIKES"

These capacitors are designed for emergency replacements of A. C. motor starting electrolytic capacitors from 18.75 to 300 mfds. They enable the motor repair man to determine correct capacity required for a given motor and eliminate necessity of carrying stock of assorted sizes.

Each capacitor provides a range of twelve separate capacities by means o changing external connections at four terminals, two at each end. Both units are for 110-120 V.A.C. 60 cycle duty.

JUNIOR "SERVICE MIKE", 18.75 to 150 mfds., size 1$\frac{13}{16}$" dia. x 3⅞" long. Complete with leads, clips and jumpers. Net Price **$4.65**

SENIOR "SERVICE MIKE", 37.5 to 300 mfds., size 2⅛" dia. x 4½" long. Complete with leads, clips and jumpers. Net Price **$5.50**

etal Tubular Dry Electrolytic Capacitors
ingle Section

PLICATION—For under-chassis mounting in filter and audio ypass circuits where long life and small size is desirable.

SCRIPTION—Single section dry electrolytic type encased in ermetically sealed aluminum tube with external insulating sleeve. or extreme dependability at high voltage, types TC82 and TC92 mploy the special Mallory balanced series unit construction.

RMINALS—One 3″ bare solid tinned copper lead at each end. ositive lead marked (+) on insulating sleeve.

UNTING—Designed for mounting by its own leads or with pplicable hardware listed on page 17.

CKAGING—25, 50, or 100 capacitors per display carton. Furished in individual display cartons on orders for less than 25 or hen specified.

Metal Tubular Dry Electrolytic Capacitors
Dual Section

APPLICATION—For under-chassis mounting in filter and audio bypass circuits where long life and small size is desirable.

DESCRIPTION—Dual section dry electrolytic type encased in hermetically sealed aluminum tube with external insulating sleeve. Type TCD is dual common negative, TCS dual separate section.

TERMINALS—Type TCD is supplied with 3″ bare solid tinned copper leads, both positive leads at one end and common negative lead at opposite end. Type TCS is supplied with soldering lugs, positive and negative of one section at one end and the other section at the opposite end.

MOUNTING—Type TCD is designed for mounting by its own leads or with applicable hardware shown on page 17. Type TCS is supplied with the Mallory TH clips for mounting, further described on page 17.

PACKAGING—Individual display carton.

Dual Common Negative

FP† Dry Electrolytic Capacitors

APPLICATION—For top chassis mounting in filter and audio bypass circuits. Extremely dependable under heavy ripple current, high surge voltage and high temperature (up to 185°F.) conditions.

DESCRIPTION—Single, dual, triple and quad section units encased in compact hermetically sealed aluminum cases with self-contained mounting feature. Type FP is supplied with famous Mallory Fabricated Plate (metalized cotton gauze) anodes, type WP with etched plate anodes. Special internal design provides low RF impedance and minimum coupling between sections. Case at negative potential.

TERMINALS—Solder lug type all at one end. Positive terminals identified by symbols in terminal board corresponding to case marking. Mounting ring provides negative terminal connection.

MOUNTING—Primarily designed for twist prong mounting through suitable chassis slots and may also be mounted as follows:

1. Type MP metal wafer providing the necessary slots without actually punching the chassis for grounded negative circuits.
2. Type BP bakelite wafer for insulated mounting, otherwise similar to Paragraph No. 1.
3. Type TH clip for horizontal mounting.
4. Type PS socket for plug-in mounting. (Remove blank ear with diagonal pliers to polarize unit in relation to socket.)
   See page 17 for applicable hardware.

PACKAGING—Individual display carton.

†Only Mallory can supply genuine Fabricated Plate (metalized cotton gauze) capacitors.

*For Photoflash Applications.

Surge Voltage Data

● Due to the many multiple section listings on FP capacitors, it is not practical to show surge voltage ratings without consuming considerable space in the chart. The surge voltage ratings are, therefore, given separately in the small chart.

Wkg. VDC.	Surge Volts
6	10
10	15
15	20
25	40
150	200

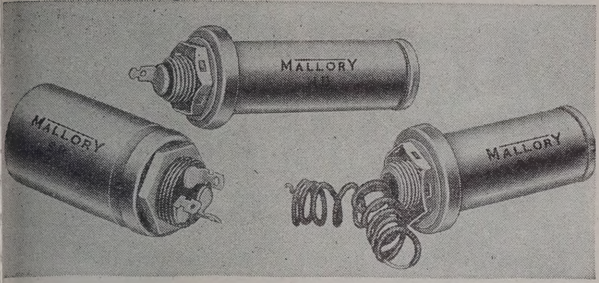
P.R. MALLORY & CO. Inc. MALLORY DRY ELECTROLYTIC CAPACITORS



Threaded Neck Dry Electrolytic Capacitors

APPLICATION—Designed for replacement of wet or dry electrolytic threaded neck type filter capacitors originally employed in any type of electronic filter or bypass circuit.

DESCRIPTION—Type RS are single section, RM multiple separate section capacitors encased in aluminum cans equipped with threaded necks for mounting. Both types are internally insulated from their aluminum can. Type HD is for heavy duty, type HS for high surge voltage conditions. Type SR638 is lug type dual. Type SR645 has special internal connections, one terminal common anode, one terminal negative to one section and case negative to the other section.

TERMINALS—RS, RM and HS have 8″ flexible insulated stranded copper leads all out through the threaded neck part of the case. Type HD has one solder lug terminal for positive and case is negative. Type SR has two positive lug terminals with case common negative.

MOUNTING—Types RS, RM, HD and HS have threaded necks (⅝ x 16 for 1″ dia.—¾ x 16 for 1⅜″ dia.) supplied with palnut and special washer providing installation in various chassis hole sizes. All 1″ diameter units in these types are also supplied with a special turned-over washer for 1⅜″ clamp mounting. Type SR has ⅞-16 thread molded necks with solid nut. See page 17 for other hardware.

PACKAGING—Individual display carton.

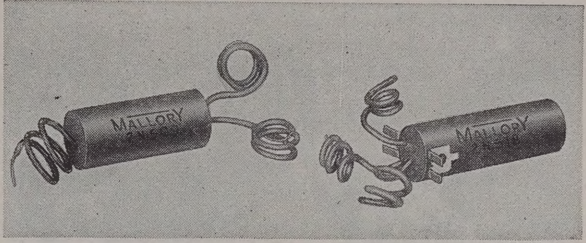
SR645	8-8	450	1⅜ x 2⅞



Cardboard Tubular Dry Electrolytic Capacitors

APPLICATION—Low cost filter and bypass units for above or below-chassis mounting where humidity conditions are not extreme.

DESCRIPTION—Single, dual, triple and quad section units in cardboard tubes with extra inner seal and ample wax seal at ends. Dual, triple and quad section units are common negative or separate section type, as indicated in chart.

TERMINALS—All types are supplied with flexible covered leads out one end except those marked (*) which have negative lead out opposite end.

MOUNTING—All units (except TN111) are supplied with an adjustable horizontal mounting strap (MS-1) and all units with leads out one end have special feet for vertical mounting in addition to the strap.
For other hardware, see page 17.

PACKAGING—Individual display carton.

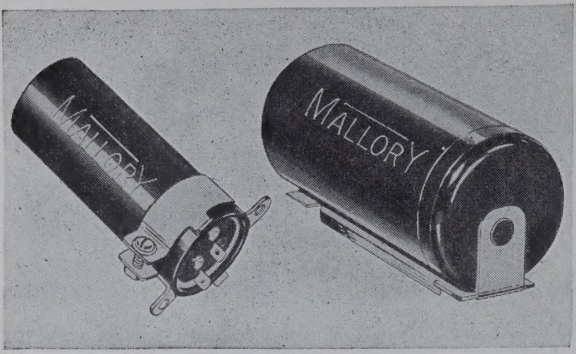
NOTE—Triple and Quad Separate Section units have first section separate, others common negative.

MALLORY DRY ELECTROLYTIC CAPACITORS



High Capacity Dry Electrolytic Capacitors and Non-Polarized Dry Electrolytic Capacitors

APPLICATION—Type HC are for filtering dry disc rectifiers and for electric fence controls, talking picture equipment, and other high-capacity low-voltage applications. Type HC1060A is especially designed for replacement in fence control equipment.

Type NP are non-polarized units for use where polarity may be applied in either direction, but are not suitable for continuous AC applications. Useful in welding and control equipment as a stored energy device.

DESCRIPTION—High quality etched plate electrolytic capacitors supplied in moisture-proof plastic cases requiring no external insulation. Type HC are polarized, and NP are non-polarized type.

TERMINALS—Two solder lug terminals at one end.

MOUNTING—Supplied with type VR bracket for vertical mounting, and design permits horizontal mounting with protector end cap (sold separately). See page 17 for hardware details.

PACKAGING—Individual display carton.

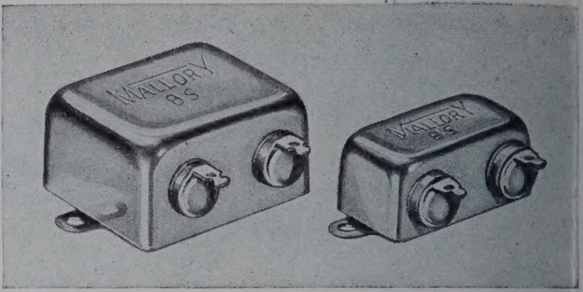
*This unit in Aluminum Case



Bathtub Dry Electrolytic Capacitors

APPLICATION—For filter and bypass circuits in marine, aircraft, geophysical and other applications where extreme operating conditions are encountered. BS81 and BS91 are ideal for power amplifier and other high voltage applications.

DESCRIPTION—Dry electrolytic capacitors where cartridges are first sealed in aluminum tubes and then encased in sturdy corrosion-resistant, hot-tinned steel cases providing complete hermetical seal under all weather conditions. All units internally insulated from outer case. BS81 and BS91 employ the special Mallory balanced series unit construction for extreme dependability at high voltage. Temperature range, −40°F. to +185° F.

TERMINALS—Two solder lug terminals on one side.

MOUNTING—Provided with mounting flanges at each end having 3/16″ holes.

PACKAGING—Individual display carton.

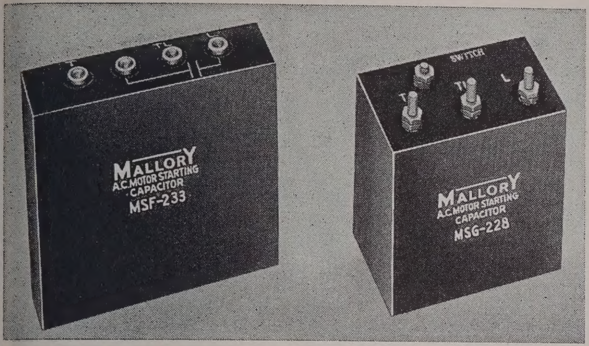
MALLORY VIBRATOR GUIDE

Long recognized as one of the most useful publications in the radio service field. Up-to-date, completely organized for quick, accurate reference. Contains all available information through 1947 automobile and battery-operated home radio receivers as well as vibrator power supplies. See your Mallory Distributor.



AC Motor Starting Capacitors Dry Electrolytic

APPLICATION—For replacement of rectangular case type motor starting capacitors.

DESCRIPTION—Dry electrolytic intermittent duty AC capacitors housed in rectangular cases and provided with terminal arrangement similar to the design of the original capacitors they replace.

TERMINALS—Equipped with two capacitor terminals and two dummy terminals. The L and unmarked terminal are the capacitors, while T and TL are dummies for convenience in wiring.

MOUNTING—Designed to mount in the original clamps or boxes used for the original capacitors.

PACKAGING—Individual display carton.

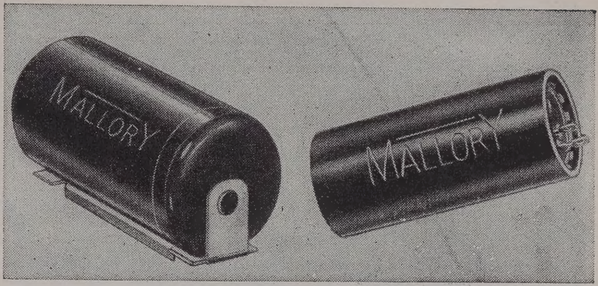
Capacitor Selector

For determining correct capacity to use in making replacements of defective motor starting capacitors which have lost their identity.

For checking capacity ranges from 26 to 161 mfd. 110-125 VAC **Catalog No. MSS-100.**

For checking capacity ranges from 25 to 645 mfd. 110-125 VAC **Catalog No. MSS-101.**



AC Motor Starting Capacitors Dry Electrolytic

APPLICATION—For intermittent duty in starting AC capacitor motors in any application where round type cases are required.

DESCRIPTION—Dry electrolytic non-polarized type capacitors housed in round cases. Rated at the minimum capacity value with a plus tolerance of 20% unless otherwise indicated by reference to old minimum-maximum capacity rating. Type P furnished in moisture-proof plastic containers, and type MSU in aluminum cases with external insulating sleeve.

TERMINALS—Two solder lug terminals at one end.

MOUNTING—Both type P and MSU may be mounted interchangeably in any original mounting for units of equivalent size. Type P may also be mounted by means of a plastic end cap (type PL) and sturdy metal snap-in type bracket (type HB) furnished separately when desired. See page 17 for these and other mounting hardware.

PACKAGING—Individual display carton.

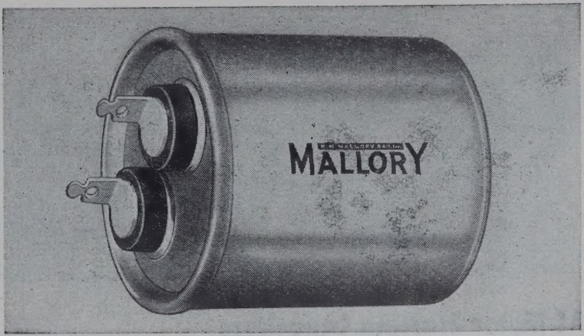
MALLORY PAPER CAPACITORS



Continuous Duty—Oil Impregnated—AC Capacitors

APPLICATION—Designed primarily for heavy duty AC applications. May be used as motor running capacitors, fluorescent light ballast, etc. where continuous duty and dependability are required.

DESCRIPTION—Supplied in metal cases, these units may be safely operated at voltages up to 10% above the rated values and at temperatures as high as 75°C. The impregnating oil is non-inflammable and non-oxidizable, which accounts for the high safety factor and long life of these capacitors.

TERMINALS—Two solder lug terminals at one end. Terminals feature a new all welded construction.

MOUNTING—Mounting may be accomplished by using the original housing or by means of type VR brackets. Complete description of available hardware is on page 17. Order separately as required.

PACKAGING—Individual display carton.

Tubular Paper Capacitors

APPLICATION—For use in radio and electronic circuits, especially RF bypassing, where low cost and small size are paramount. Well protected from moisture but not hermetically sealed.

DESCRIPTION—Both TP and OW are compact paper tubular construction. Type TP is wax impregnated and filled. Type OW is oil impregnated and wax filled.

TERMINALS—Two bare tinned copper leads, one at each end.

MOUNTING—By means of their lead wires or TH clips of applicable size. See page 17 for mounting hardware.

PACKAGING—25, 50 or 100 capacitors per display carton.

Metal Cased Oil Impregnated Paper Capacitors

APPLICATION—For vibrator buffer, coupling, and other circuits where highest quality tubular type capacitors are required.

DESCRIPTION—Mineral oil impregnated hermetically sealed aluminum tubulars with external insulating sleeves.

TERMINALS—Two bare tinned copper leads, one at each end.

MOUNTING—Designed for mounting by its own leads, may also be mounted by use of the TH clip furnished with each capacitor. See page 17 for description of the TH clip and other hardware.

PACKAGING—10 capacitors per display carton.

Vibrator Buffer Capacitors

APPLICATION—Intended for replacement of original vibrator buffer and hash suppressor capacitors of similar design.

DESCRIPTION—Type VB is oil impregnated and housed in small rectangular metal case. Section is insulated from case. Type VD is dual wax impregnated unit in small rectangular waxed cardboard case. Type VO is wax impregnated and filled in oval waxed tube.

TERMINALS—VB has two bare tinned copper leads out one end. VD has two bare tinned copper leads out one end and one similar common lead out the other end. VO has heavy copper braid at each end.

MOUNTING—In recess or clamp used in the original equipment.

PACKAGING—Individual display carton.

Miniature Metal Tubular Capacitors

APPLICATION—For hearing aid, personal radio, and other uses where very small size tubulars are desirable.

DESCRIPTION—Oil impregnated tubular capacitor in minute hermetically sealed metal tubes with insulating sleeve.

TERMINALS—Two bare tinned copper leads, one at each end.

MOUNTING—By means of its own leads.

PACKAGING—Ten to a display carton.

Automotive Noise Suppression Capacitors

APPLICATION—For suppressing radio interference emanating from auto generators, oil gauges, ammeters, and other automotive, aircraft, or marine equipment.

AM—For ammeter and gauge suppression.

FM—For Ford generator suppression.

DL—For domelight suppression.

RF—For vibrator hash suppression.

CA—For general suppression in aircraft and marine application.

DESCRIPTION—Wax impregnated cartridges assembled in various style housings, as pictured. Type AG is round type with flexible lead, well protected from moisture, but not hermetically sealed. Type AS is hermetically sealed, provides low impedance, and is ideal for extreme climatic conditions.

TERMINALS—Various, as pictured.

MOUNTING—Types AM 454 and RF 481 are held in place by the connecting wires or with TH clips. All others have own self-contained mounting features.

PACKAGING—Individual display cartons.

Steel Cased Oil Filled Capacitors

APPLICATION—For general use in aircraft, marine, geophysical and industrial electronic equipment where extreme dependability under severe conditions is desired.

DESCRIPTION—Oil impregnated single, dual, and triple section units housed in rugged, hermetically sealed, hot-tinned steel cases.

TERMINALS—Single section has two terminals. Dual section units have three terminals with left terminal common, and both are internally insulated from case. Triple units have three terminals with common grounded to case. All terminals protrude in a row on one long side of case.

MOUNTING—By means of flanges at each end.

PACKAGING—Individual display carton.

Uncased Wax Capacitors

APPLICATION—Designed for replacement of defective sections in large paper capacitor blocks or other applications where sealing pitch is applied for final seal.

DESCRIPTION—Wax impregnated section wrapped in varnish paper for moisture protection until finally potted when installed.

TERMINALS—Two flexible insulated leads out one end.

MOUNTING—Held in place by pouring with hot pitch.

PACKAGING—Individual display carton.

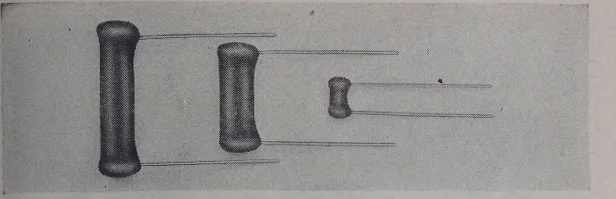
MALLORY CERAMIC CAPACITORS



Ceramic Capacitors

APPLICATION—The small size and rugged construction of these capacitors make them ideal for by-passing, coupling, and other AM and FM-TV applications. The general purpose types "UC" may be used in all receiver applications except frequency determining circuits. They are particularly suitable for general replacement of molded mica and paper tubular capacitors. The zero temperature coefficient types "ZT" are ideally suited for use in precision radio and electronic circuits where a truly stable capacitor unaffected by temperature change is required. Negative temperature coefficient types "NT" are designed for use in precision radio and electronic circuits requiring a negative temperature coefficient of capacity.

DESCRIPTION—All Mallory ceramic capacitors are of low-loss ceramic construction, having a dipped phenolic coating for maximum protection from moisture. Their small physical size makes them ideal for replacement purposes when space is at a premium. Type "ZT," while similar in construction to the general purpose types "UC" have the important additional characteristic that their nominal capacity rating is substantially unaffected by a change in temperature of from —55°C through 85°C.

Type "NT" have a negative temperature coefficient of capacity of 750 parts/million/°C. temperature change. As a matter of convenience, they are rated in micro-microfarads at a temperature of 25°C. A rise in ambient temperature above 25°C will result in a proportional decrease of rated capacity. With lowering of temperature an automatic increase of capacity will be observed. In practical applications these capacitors should be mounted adjacent to the circuit components which require capacity compensation.

TERMINALS—One radial bare tinned copper lead 1¼″ long at each end.

MOUNTING—By means of their wire leads.

PACKAGING—Five capacitors per display carton.

Voltage Rating—500 V DC

Capacity (mmfd)	General Purpose ±20% Tolerance		Zero Temperature Coefficient ±10% Tolerance		Negative Temperature Coefficient 750 Parts/Million/°C ±10% Tolerance

Ceramic Trimmer Capacitors

APPLICATION—Their small size and stable electrical characteristics make these capacitors ideal for use in high frequency FM-TV circuits.

DESCRIPTION—Each capacitor consists of fired silver electrodes on a ceramic rotor and base. They have a 360° rotor with a substantially constant capacity change and are completely sealed from dust and dirt. Single or dual units are available.

TERMINALS—Solder lug type at each end of capacitor.

MOUNTING—Two clearance holes are provided in each capacitor for screw mounting.

PACKAGING—One capacitor per display carton.

Single Units—Overall size 21/32″ x 27/32″ x ⅜″ thick.
Voltage Rating—500 VDC

Catalog No.	Capacity Range (mmfd)	Temperature Coefficient

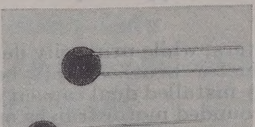
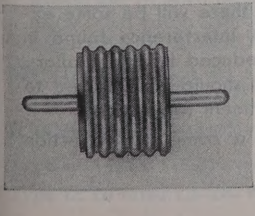
DT-557-N	7 to 45	Neg. 500 Parts/Million/°C.



Disk Ceramic Capacitors

Because of their small physical size, rugged construction, and excellent electrical characteristics these unique capacitors are particularly suitable for replacement of molded mica and paper tubular units. They have a dipped phenolic coating for maximum protection from moisture. Equipped with radial bare tinned copper wire leads they are easily and quickly mounted. Ten capacitors are packaged in each display carton.

Catalog Number	Capacity (mfd)	DC Working Volts	Size Dia. x Thickness	Length of Leads
DC-525	.005	500	19/32 x ⅛	1¾″
DC-511	.01	500	¾ x ⅛	2″



High Voltage Ceramic Capacitors

With a rating of 500 micro-microfarads at 15,000 volts, this capacitor may be used as an exact replacement in the high voltage power circuit in many TV sets. A rigid case and built-in corona shield give an added safety factor. The capacitor is supplied with No. 6 copper terminals ½″ long. Interconnecting leads may be soldered or clipped to these terminals without damage to the capacitor. Overall dimensions are 1⅛″ diameter by ⅞″ long excluding terminals. Each capacitor is packaged in an individual display carton.

Catalog number HV-15035.

(See Pages P-25 and P-26 for Mallory List Prices)

MALLORY CHOKE COILS AND NOISE FILTERS

MALLORY
RF-583
RF-CHOKE

Radio Frequency Choke Coils

APPLICATION—General purpose radio frequency choke coils for all circuits.

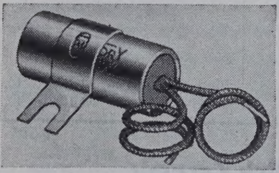
DESCRIPTION—Hour-glass wound for low distributed capacity and housed in compact insulating tubes.

TERMINALS—Two bare tinned copper wire leads, one at each end.

MOUNTING—By means of its leads or with TH clips, as described on hardware page. Also may be mounted by means of a stud through a hole provided through the core of the choke coil.

PACKAGING—Individual display carton.

Mallory Cat. No.	Turns	Wire	Inductance Microhenries	Size Dia. Length
RF581	90	16	430	1 x 1½
RF582	55	16	260	1 x 1$\frac{3}{16}$
RF583	55	12	25-30	1$\frac{5}{16}$ x 1⅝



Motor Brush Noise Filters (Type W)

APPLICATION—Type W filters, while primarily designed for installation on motor brushes, may be used wherever a permanently installed dual capacity filter is desired. Where un-grounded motor frames or appliance cases are involved, type WSP is recommended for elimination of possible shock hazard.

DESCRIPTION—Dual wax impregnated capacitors housed in sealed metal tubes and specially designed to have low RF impedance. Case is grounded to common terminal of the included sections except in SP type where a shock limiting capacitor is employed between the common lead and case.

TERMINALS—Two flexible covered leads, case common ground.

MOUNTING—By means of attached tangential strap.

PACKAGING—Individual display cartons.

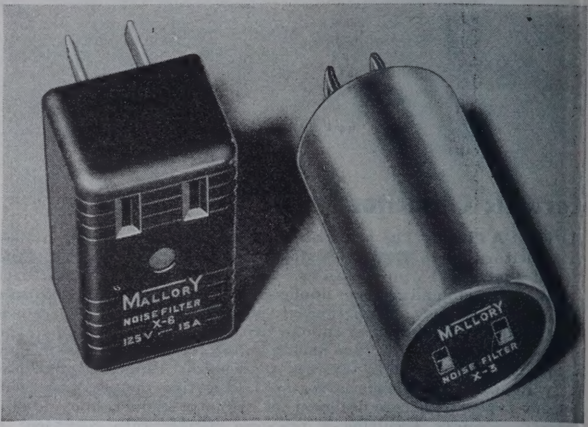
Type W7—115-220 Volts AC-DC for Light Interference Size ⅞" x 2"

Type W9—115-220 Volts AC-DC for Medium Interference Size 1" x 3"

Type W11—115-220 Volts AC-DC for Severe Interference Size 1⅜" x 3"

Type W7SP—115-220 Volts AC-DC for Light Interference Size ⅞" x 2"

Type W9SP—115-220 Volts AC-DC for Medium Interference Size 1" x 3"



Appliance Noise Filters (Type X)

APPLICATION—For use with plug-in type appliances where straight capacity type filters are sufficient to produce desired noise suppression.

DESCRIPTION—Single and dual type capacitor filters in round metal housings designed for insertion between appliance cord and wall outlet. X-6 is furnished in attractive compact brown plastic case.

TERMINALS—Male prongs for insertion into wall outlet and slots for appliance plug.

MOUNTING—Self-supporting by its prongs.

PACKAGING—Individual display carton.

Type X1 is for relatively slight interference. Size 1⅜" x 1¾", rated 110 volts, 5 amperes.

Type X3 is a capacitor type filter having greater efficiency than Type X1. Size 1⅜" x 2¼", rated 110-220 volts, 5 amperes.

Type X5 is a triple capacity filter with provision for return lead to appliance. Special safety feature prevents possibility of shock and makes this unit ideal for use with vacuum cleaners, food mixers, etc. Size 1⅜" x 2⅛", rated 110-220 volts, 5 amperes, and equipped with binding post for connection to appliance or motor frame.

Type X6 for medium interference. Furnished in an attractive, compact, rectangular brown plastic case. Size 1¼" x 2$\frac{1}{16}$" x 1". Rated at 110 volts AC-DC, 5 amperes.

Type X6D same as X6 except packaged on an attractive counter display card, six to a card.

IMPORTANT

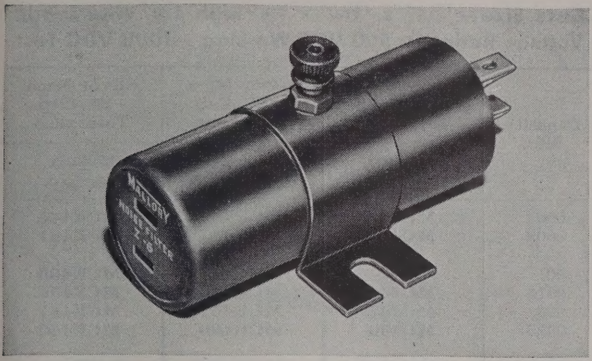
General Noise Elimination Information

- All radio noise suppression devices should be applied at the source of the noise. Filters inserted in radio receiver cords are usually ineffective.

The filters described herein are, therefore, designed for insertion at the offending device. They incorporate many improvements accomplished through the extensive research and war production experience of the P. R. Mallory Company. While there will be some exceptions, most of the types of interference found in the home can be effectively reduced by the Mallory filters described. Unusual cases should be referred to the Mallory Engineering Department for advice.

Each filter is supplied with a complete instruction sheet for proper installation.

MALLORY NOISE SUPPRESSION FILTERS



Appliance Noise Filters (Type Z)

APPLICATION—For use with plug-in type appliances where inductance-capacity continuation filters are necessary to accomplish desired noise suppression.

DESCRIPTION—Single and dual inductance-capacity filters housed in round metal containers designed for insertion between appliance cord and wall outlet.

TERMINALS—Male prongs and female receptacles. Types Z4, 6 and 8 have extra provision for return lead to ground or appliance frame.

MOUNTING—Self-supported by its prongs.

PACKAGING—Individual display carton.

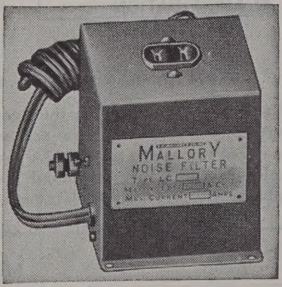
Type Z2 is a capacitor-inductance filter for medium interference. Use with electric razor or small appliances. Most effective on grounded line systems where reversal of plugs will affect operation. Size 1⅜″ x 2¾″, rated 110-220 volts, 3 amperes.

Type Z4 is a dual inductance-capacity filter for severe interference on appliances where a return lead from the filter is inconvenient. Ideal for electric razor, vibrators and household appliances. Size 1⅜″ x 3″, rated 110-220 volts, 3 amperes.

Type Z6 is a dual inductance-capacity filter with provision for return lead to ground. Recommended for suppressing severe interference. Size 1⅛″ x 3⅜″. Rated 110-220 volts, 3 amperes.

Type Z8 is same as Z6 but with provision for return wire connection to motor or appliance frame rather than ground. An efficient filter equivalent to box type within 3 ampere rating.

Heavy-Duty Appliance Noise Filters (Type LC)



APPLICATION—For portable plug-in applications where severe interference is involved and ampere rating exceeds that of type Z.

DESCRIPTION—Combination inductance-capacity filter housed in rectangular metal case.

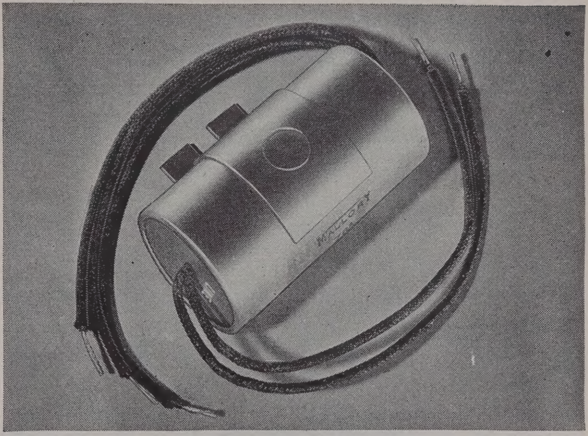
TERMINALS—Ample line cord with male plug for insertion in wall outlet. Female receptacle for appliance cord plug. Binding post for return wire lead to appliance or motor frame.

MOUNTING—Two metal flanges (when permanent mounting is desired).

PACKAGING—Individual carton.

Type LC5 rated 115-220 volts AC-DC, 5 amperes.

Type LC10 rated 115-220 volts AC-DC, 10 amperes.



Fluorescent Lighting Noise Filter

APPLICATION—Specially designed for fluorescent lights where permanent installation on or in the light fixture is desired.

DESCRIPTION—Dual inductance-capacity filter housed in round metal tubes. Contains shock limiting capacitor.

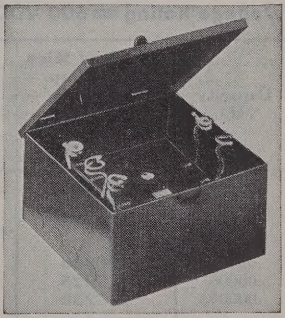
TERMINALS—Flexible covered wire leads, two at one end for input—three at other end for output of which the red lead is for grounding to light frame.

MOUNTING—By means of attached tangential strap.

PACKAGING—Individual display carton.

Type Z8A, 115-220 volts, AC-DC, 3 amperes. For fluorescent lights

Heavy-Duty Appliance Noise Filters (Type LB)



APPLICATION—For permanent installation wherever heavy-duty filters are required, such as outdoor signs, large motors, or at meter board.

DESCRIPTION—Heavy-duty choke-capacity combination filters sealed in rectangular case and housed in standard heavy gauge metal cut-out boxes.

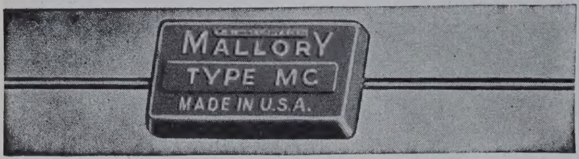
TERMINALS—Heavy, flexible insulated wire leads for splicing with house or motor wiring.

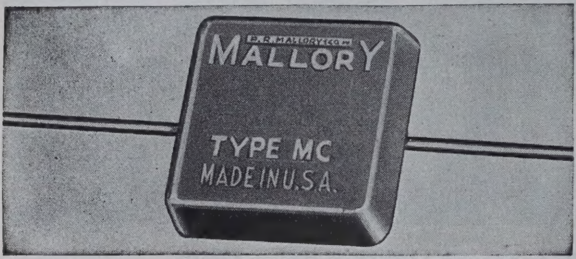
MOUNTING—Mounts by means of screws through bottom of cut-out box.

PACKAGING—Individual carton.

Type	Rating	Size
LB-10	220V-10 Amp.	6″ x 6″ x 4″
LB-20	220V-20 Amp.	10″ x 10″ x 6″
LB-40	220V-40 Amp.	12″ x 10″ x 6″

MALLORY MICA CAPACITORS





Mica Receiver Capacitors

APPLICATION—Designed primarily for radio receiving applications, they may be used in television and other electronic circuits within their voltage range.

DESCRIPTION—Made with carefully selected mica and foil and housed in high quality compact rectangular bakelite case with standard RMA color coding for identification.

TERMINALS—Bare tinned copper leads.

MOUNTING—By means of its leads.

PACKAGING—5 or 10 capacitors per display carton only.

Case Size—7/16″ x 25/32″ x 7/32″ with 1⅛″ Wire Leads
Voltage Rating = 500 VDC Working—1000 VDC Test

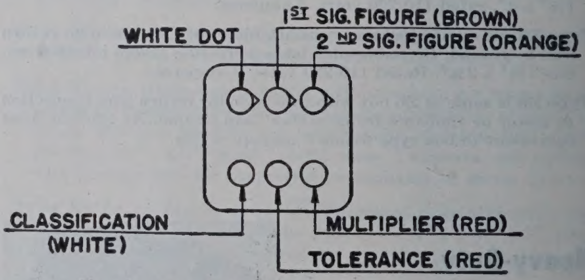
New RMA Color Code

● The new RMA color code, shown below, permits positive identification of the mica capacitors listed.

Reading across the top from left to right with the arrow pointing to the right, the first dot shall always be white to indicate standard RMA molded mica capacitor. The second and third dots become the first two significant figures in the capacitance. The second row is read from right to left. The lower right dot should be the multiplier. The lower second dot indicates the tolerance and the lower left dot indicates the class.

The key to color significance is as follows:



Example shown above = 1300 mmfd. ±2%, 500 V.W.

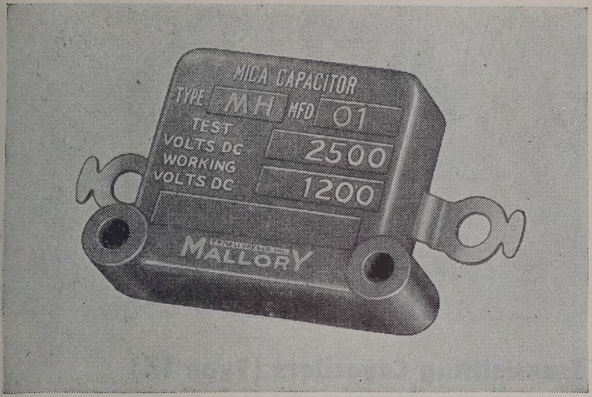
Note: When any Mallory mica capacitor has a white dot in the upper left hand corner (when the arrows point to the right) that capacitor is coded under the **new** RMA color code, as shown above. Any other color in the upper left hand corner indicates the **old** color code, which may be found in Catalogue No. 467-A.

Color	Sig. Fig.	Mult.	Tol.	Class.*
Black	0	1	±20%	A
Brown	1	10		B
Red	2	100	± 2%	C
Orange	3	1000	± 3%	D
Yellow	4	10000		
Green	5		± 5%	
Blue	6			
Violet	7			
Gray	8			I
White	9			J
Gold		0.1		
Silver		0.01	± 10%	

*Denotes various electrical characteristics.

Voltage ratings vary with capacitance as shown in RMA Specification—April, 1946.

MALLORY MICA CAPACITORS



Mica Transmitting Capacitors (Type MH)

APPLICATION—For use in transmitting and power amplifier circuits where voltage exceeds the 500-volt rating of type MC.

DESCRIPTION—Made with accurately gauged high-quality India mica in bakelite molded case providing insulated mounting. Capacity tolerance ±20%. Only size variation for various ratings is the thickness as shown in the chart.

TERMINALS—Short, heavy tinned copper solder lugs for minimum RF and contact resistance.

MOUNTING—Insulated mounting by means of screws through holes molded in case.

PACKAGING—Individual display carton.

Mica Transmitting Capacitors (Type MX)

APPLICATION—Ideal for amateur transmitting equipment. They may also be used in coupling, tank, and bypass circuits at radio frequencies within their rating. (Note that the maximum amperes for several radio frequencies are given in the chart. The operating current should be kept within these limits.)

DESCRIPTION—Heavy-duty mica construction, supplied in attractive rectangular porcelain cases.

TERMINALS—Two screw type with complete washer and nut assembly.

MOUNTING—Two flanges with ample holes for machine screw mounting.

PACKAGING—Individual display carton.

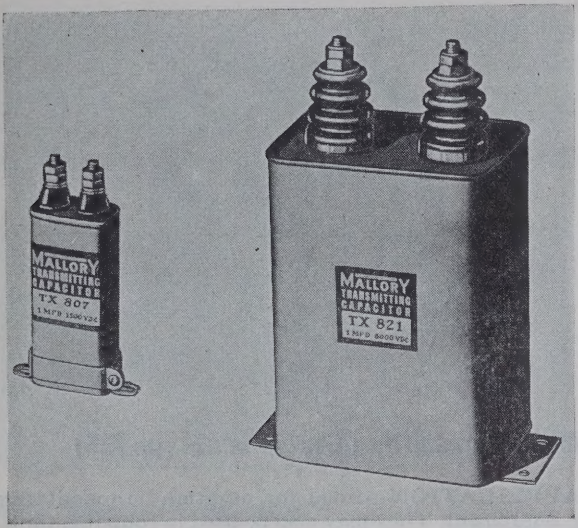
MALLORY OIL FILLED AND IMPREGNATED CAPACITORS



Transmitting Capacitors (Type TX)

APPLICATION—For radio, television, transmitting, and all circuits requiring high voltage capacitors.

DESCRIPTION—Compact rectangular oil filled capacitors of sturdy construction.

TERMINALS—Suitable standoff insulated terminals at one end to safely cover maximum voltage rating of each unit.

MOUNTING—Base dimensions less than 3½ x 5⅛, by rectangular clamp providing either upright or inverted position. Base sizes of 3½ x 5⅛ and above, by permanent flanges at the unit base.

PACKAGING—Individual carton.

Transmitting Capacitors (Type TZ)

APPLICATION—For filter and bypass circuits in power amplifiers, television and transmitting equipment where compact round can units are desired.

DESCRIPTION—Oil impregnated type capacitor furnished in round containers for upright or inverted mounting. All units internally insulated from case.

TERMINALS—The 1⅜″ diameter units have two solder lug terminals with ample insulation for the voltage ratings involved. The 2″ diameter units have special standoff insulated terminals.

MOUNTING—Supplied with type VR bracket for inverted or upright mounting.

PACKAGING—Individual carton.

MALLORY

TECHNICAL MANUAL

● This simply written, practical book bridges the gap between radio theory and practice. Designed for the radio serviceman, engineer, amateur or experimenter who wants the latest technical information . . . presented so that he can easily apply it to everyday problems. Contains page after page of information profusely illustrated. It's worth far more than its price.

MALLORY CAPACITOR HARDWARE

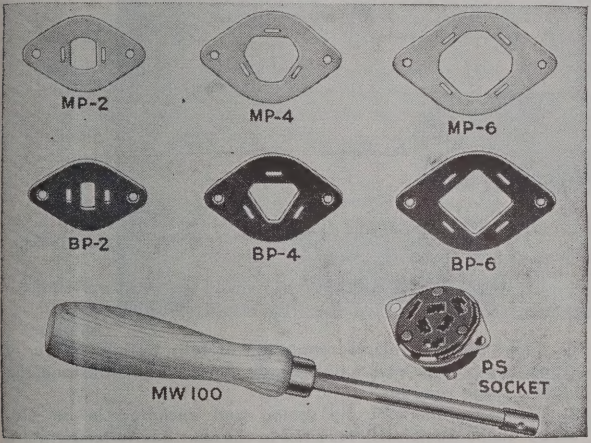
124-1	Bracket........................	2 x 4⅛



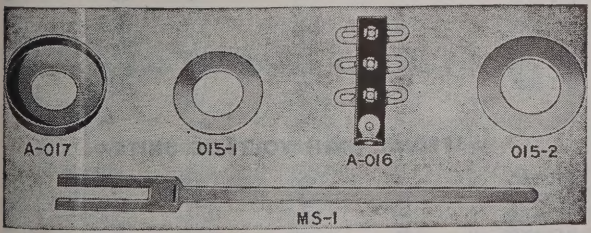
Type MP—Metal plates for grounded mounting of FP and WP capacitors.

Type BP—Bakelite plates for insulated mounting of FP and WP capacitors.

Type PS—Molded plastic sockets for plug-in mounting FP or WP capacitors. (Blank ear on capacitor should be removed to permit polarization with respect to socket.)

Type MW-100—Special wrench for twisting mounting ears on FP or WP capacitors.

Cat. No.	Description	Size
MP-2	Metal mounting wafer for FP......	¾
MP-4	Metal mounting wafer for FP......	1
MP-6	Metal mounting wafer for FP......	1⅜
BP-2	Bakelite mounting wafer for FP....	¾
BP-4	Bakelite mounting wafer for FP....	1
BP-4A	Bakelite mounting wafer for FP.... (To mount 1″ FP in chassis punched for 1⅜″ wafer)	1
BP-6	Bakelite mounting wafer for FP....	1⅜
PS-4	Plug-in socket for FP............	1
PS-6	Plug-in socket for FP............	1⅜
PSC-4	Retainer clamp for PS-4 socket....	
MW-100	Mounting wrench for FP..........	



Type MS-1—Adjustable metal strap for horizontal mounting tubular types up to 1⅜″ diameter.

Type A-016—Terminal connector or anchor strap for general use where required.

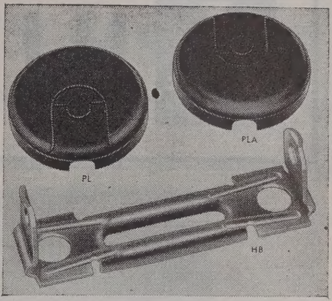
Type 015-1—Washer for RS type ⅝″ neck when used in over-size chassis hole.

Type 015-2—Washer for use with RS, RM or HS units where chassis hole is too large for regular mounting. Use two washers, one above and one below chassis.

Type A-017—Special washer with turned-over edge for ring clamp mounting 1″ RS type in 1⅜″ ring clamp.

Cat. No.	Description	Size
015-1	Washer for ⅝″ neck in ⅞″ hole.....	Var.
015-2	Washer for ¾″ neck in 1″ hole......	Var.
MS-1	Adjustable mounting strap	Var.
A-016	Terminal connector...............	Var.
A-017	Washer for clamp mounting neck cans	Var.

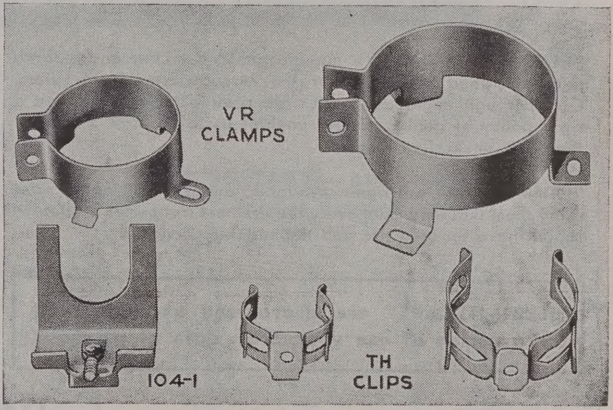
Type "P" Hardware



Types PL and PLA—Plastic end cap to protect terminals on HC or NP units when desired.

Type HB—Horizontal bracket for mounting HC and NP units. Using end cap type PL or PLA.

Cat. No.	Description		Size
PL-3	Plastic end cap	For "On Motor" mounting	1⁷⁄₁₆
PL-6	Plastic end cap		1¹³⁄₁₆
PL-8	Plastic end cap		2¹⁄₁₆
PLA-3	Plastic end cap	For "Off Motor" mounting	1⁷⁄₁₆
PLA-6	Plastic end cap		1¹³⁄₁₆
PLA-8	Plastic end cap		2¹⁄₁₆
HB-4	Horizontal bracket (plastic cases)...		3⅜
HB-8	Horizontal bracket (plastic cases)...		4⅜



Type TH—Special clips for horizontal mounting of any tubular or FP unit within the diameter range shown. Designed primarily to mount without tools under special chassis lances in original equipment, they may also be attached to chassis with 5-32 screw and nut in any ⅛″ hole.

Type VR—Brackets for vertical mounting round units.

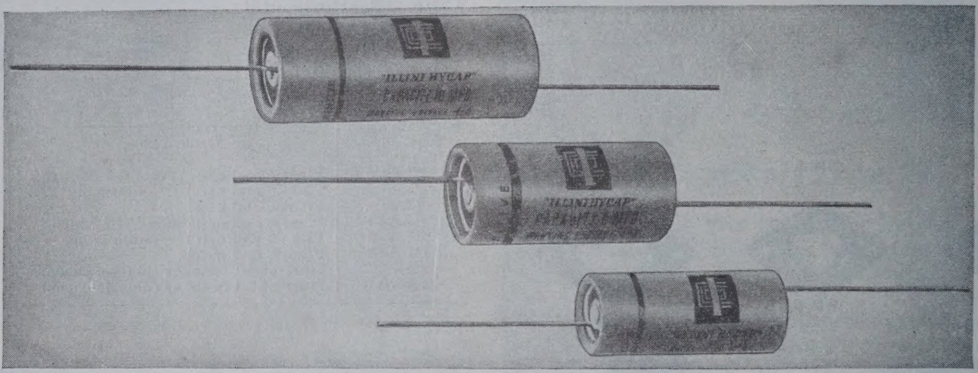
Type 104-1—Special bracket with spade bolt for mounting RS and RM units where spade bolt mounting was used.

Cat. No.	Description	Size
TH-13	Spring clip for TC................	⅜
TH-15	Spring clip for TC................	½ to ⁹⁄₁₆
TH-17	Spring clip for TC................	⅝ to ¹¹⁄₁₆
TH-19	Spring clip for TC and FP.........	¾ to ¹³⁄₁₆
TH-21	Spring clip for TC................	⅞ to ¹⁵⁄₁₆
TH-23	Spring clip for TC and FP.........	1 to 1¹⁄₁₆
TH-25	Spring clip for TC and FP.........	1⅜ to 1⁷⁄₁₆
VR-1	Clamp for vertical mounting.......	1 to 1¹⁄₁₆
VR-3	Clamp for vertical mounting.......	1⅜ to 1⁷⁄₁₆
VR-4	Clamp for vertical mounting.......	1½ to 1⁹⁄₁₆
VR-6	Clamp for vertical mounting.......	1¾ to 1¹³⁄₁₆
VR-8	Clamp for vertical mounting.......	2 to 2¹⁄₁₆
VR-10	Clamp for vertical mounting.......	2½
104-1	Spade bolt mounting for neck type cans..........................	Variable

OE and CE Insulating Sleeve

Cat. No.	Description	Size
OE-1	Open end FP insulating sleeve......	¾ x 2
OE-3	Open end FP insulating sleeve......	1 x 2
OE-4	Open end FP insulating sleeve......	1 x 3
OE-5	Open end FP insulating sleeve......	1⅜ x 2
OE-6	Open end FP insulating sleeve......	1⅜ x 3
CE-1	Closed end FP insulating sleeve.....	¾ x 2
CE-3	Closed end FP insulating sleeve.....	1 x 2
CE-4	Closed end FP insulating sleeve.....	1 x 3
CE-5	Closed end FP insulating sleeve.....	1⅜ x 2
CE-6	Closed end FP insulating sleeve.....	1⅜ x 3

ILLINOIS CONDENSERS
TIME TESTED QUALITY



"ILLINI-HYCAPS" are now manufactured in a new and modern plant designed especially for the manufacture of capacitors. Our thorough engineering, plus old manufacturing skills and a rigid policy of quality control enables us to produce a product that is of unexcelled quality.

"ILLINI-HYCAPS" are again available, and you will agree after using them that they meet every requirement a superior condenser should have for long life and dependable service.

"ILLINI-HYCAPS" are guaranteed unconditionally for a period of one year, from date of purchase.

1. Short proof — ample separation of foils by highest purity cellulose separator plus tough anodic film — will withstand the highest surge voltages.
2. Condenser hermetically sealed and anchored in an aluminum shell. Completely resistant to changes due to temperature and humidity. Built to withstand all kinds of vibrations and shocks.
3. Attractive kraft tube spun over condenser ends . . . prevents shorting of pig tail leads to condenser or other components. Aluminum lock-washers hold leads securely in place, will not loosen or break off.
4. Low power factor, low leakage, excellent shelf life.
5. Extremely longer life — due to our use of C. P. chemicals and highest purity foils and insulation materials available. A balanced non-corrosive electrolyte contributes to quiet, stable operation.

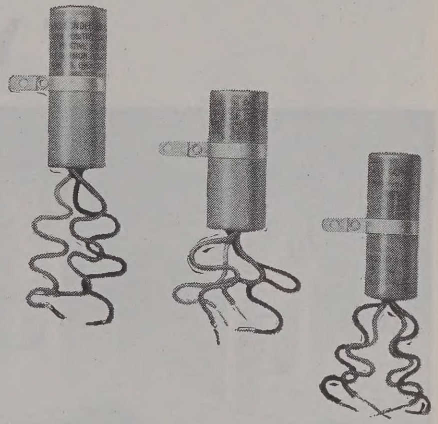
ILLINOIS CONDENSERS

TIME TESTED QUALITY

Clamp Mounting Tubulars
"ILLINI-HYCAPS"



Through careful selection of high temperature sealing compounds and superior engineering design, these completely hermetically sealed, compact tubular electrolytic condensers are the acme of dependabilty. They operate efficiently under high temperatures and wil give long life under all climatic conditions.

The small size and convenient mounting features of our Type IHC "ILLINI-HYCAPS" make them popular in both manufacturing and replacement work.

Leads are color-coded and securely anchored in the hard wax seal. Dual units have four leads for universal replacement work and are completely insulated.

Clamp may be moved to any position on tube for rapid mounting.

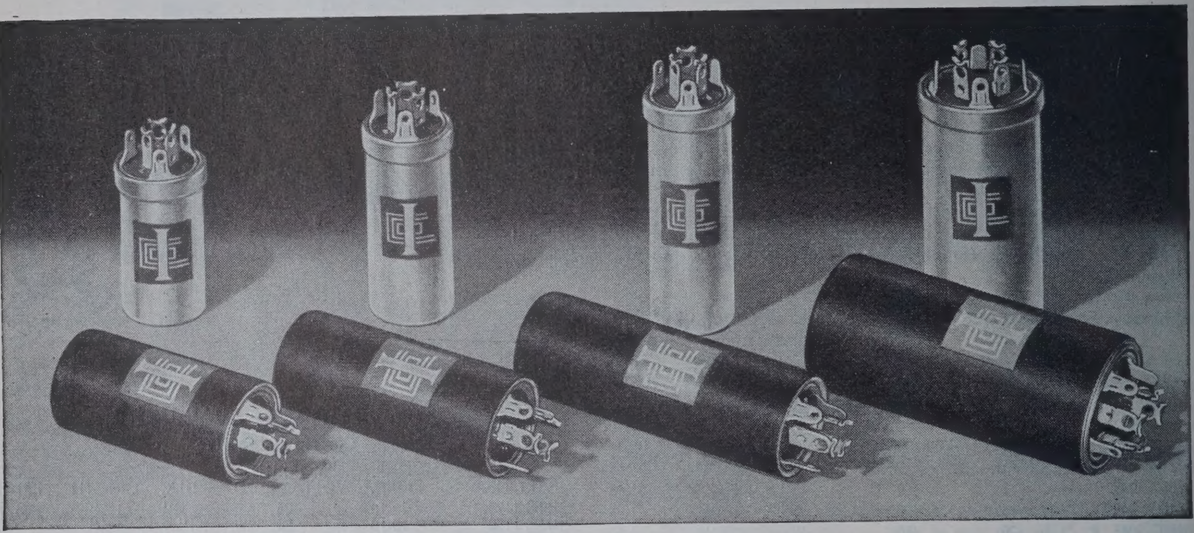
ILLINOIS CONDENSERS
TIME TESTED QUALITY

TYPE UMP



Illinois standard, twist prong mounting condensers offer a wider range of voltage and capacity types than have heretofore been possible in units of comparable size. They are designed to give maximum efficiency, both in operating characteristics and ease of mounting and wiring.

The electrical characteristics of our type UMP are superb. Capacities are always plus. This, coupled with low power factor and low leakage, makes them ideal for use in all electronic circuits.

Units are hermetically sealed in seamless drawn aluminum cans. Mounting and soldering lugs are sturdy and heavily tinned. Cathode tabs are electrically welded to mounting ring. Each unit is vibration proof—and they will stand up in any climate.

Arranged in a variety of can sizes and capacity combinations, the attached listing represents the majority of condenser types in use today.

Inverted Screw Mounting
ALUMINUM CAN CONDENSERS

Type LN aluminum can condensers are manufactured to operate satisfactorily under the severest conditions. Units are completely sealed in an inner impregnated tube then resealed. Correct design has allowed for maximum heat dissipation with resultant ability of the condensers to operate at higher temperatures and higher voltage surges.

Separate negative and positive leads for each section for universal replacement work. Palnut furnished with each condenser, individually packaged in attractive, varnished outer box. These units are ideal for long life and continuous service.

SPRAGUE CAPACITORS

SPRAGUE ATOMS

THE UNIVERSAL MIDGET DRY ELECTROLYTICS

Sprague Atom Capacitors—"Mightiest Midgets of All"—are the answer to 90% or more of all radio service requirements for replacement dry elctrolytic units. A small stock of different capacities and voltages equips you for quick, dependable service on practically every job.

Sprague atoms will fit anywhere. The smaller units can be mounted by means of their sturdy, tinned-copper leads. Metal mounting straps are provided with all dual units and are available for the larger single units. (See Hardware page P-62.) Or if desired, you can mount them by any other suitable means. Despite their extremely small size, Atoms will last longer and stand far more punishment than much larger, old-style dry electrolytics.

Atoms are guaranteed to have low leakage, to withstand high surge voltages, and to have exceptionally long shelf life. They are fully sealed against moisture and blow-ups by an exclusive Sprague process.

SPRAGUE UHC HIGH-CAPACITY, LOW-VOLTAGE TUBULARS

These miniature high-capacity, low-voltage tubular dry electrolytics are specifically constructed for use as cathode by-pass capacitors and as smoothing filters for low-voltage, high-current power supplies. Whereas ordinary high-capacity, dry electrolytics have high leakage current and relatively high power factor, Type UHC provides exceptionally low leakage current and low power factor. In by-pass applications, this means unusually high filtering action, without the introduction of shunt resistance across low-resistance bias units, and it is particularly important in controlled feedback amplifiers.

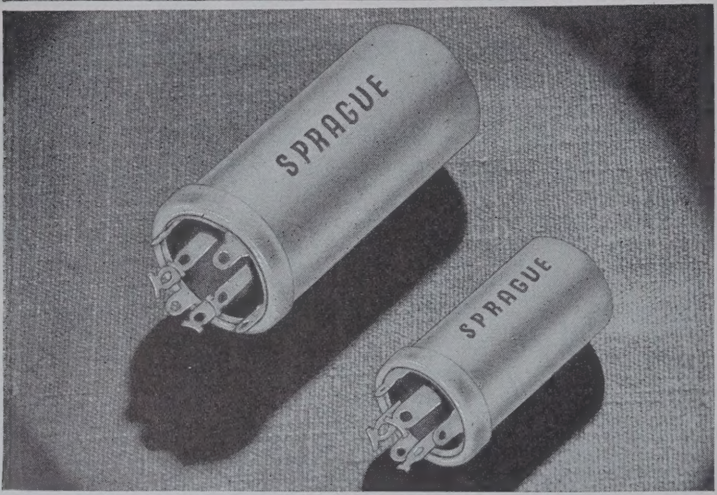
SPRAGUE CAPACITORS



SPRAGUE EL "TWIST-LOK" SELF - MOUNTING MIDGET CAN TYPE

The popularity of EL units is proved by their widespread use by leading manufacturers. They are easy to mount, and no other dry type gives so much dependability in such compact size. EL Capacitors are of highest quality etched-foil construction, hermetically sealed in aluminum cans and have twist-prong tabs for washer or direct to chassis mounting. Tabs have holes and are tinned for easy soldering. **Each unit is supplied to you with Bakelite and metal washers, making them ideal for above-chassis mounting.** The mounting tab ring, formed by the end of the metal container and serving as the negative terminal, is electrically welded to the capacitor cathode. Multi-Section EL Capacitors are concentrically wound and have common cathode construction.

SPRAGUE CAPACITORS

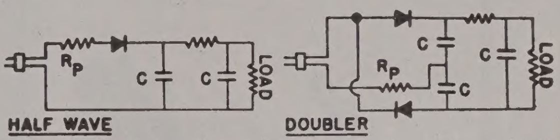
SPRAGUE ELS SELENIUM RECTIFIER ELECTROLYTICS IN "TWIST-LOCK" CANS

Elctrolytic Capacitors used in filter circuits for selenium rectifiers should be specifically designed for the job. As normally used in radio receivers, the use of selenium rectifiers results in the full 115 volts AC being applied to the filter for some 5 to 15 seconds each time the set is switched on. Even in normal operation, ripple currents as high as 400 milliamperes are not uncommon.

Conventional filter capacitors are not designed to handle these situations. High ripple current is detrimental to electrolytic capacitors because of heating due to power losses in the unit, and the tendency toward film formation on the cathode. Sprague Type ELS capacitors have been specifically designed to withstand the high ripple currents and reverse currents encountered in selenium rectifier circuits.

Catalog No.	Mfd.	DC Working Voltage	—Can Size— D	L	List Price
ELS-1	40	150	¾	2	$1.35
ELS-2	80	150	1	2	1.75
ELS-3	150	150	1⅜	2½	2.75
ELS-4	60	300	1⅜	2	2.15
ELS-5	80	300	1⅜	2½	2.50

TWO TYPICAL SELENIUM RECTIFIER CIRCUITS



The two circuits shown above are typical of the type often used with selenium rectifiers. To protect both the filter capacitors as well as the rectifier, a protective resistor, Rp, should be used as shown in the diagram. This is particularly necessary in replacement work where the original circuit used a tube as a rectifier. A normal value of Rp is 50 ohms, and with normal ratings of selenium rectifiers available should not be less than 10 ohms.

Even though the protective resistor is used, the filter capacitors are subjected to severe ripple currents. For safe performance of the circuit, it is essential that these capacitors be specifically designed and produced to withstand these extreme conditions.

SPRAGUE HLV HIGH-CAPACITY, LOW-VOLTAGE ALUMINUM CAN TYPES

These aluminum can low-capacity, how-voltage capacitors are specifically designed for tough filter applications, in "A" eliminators, talking movie equipment, plant telephone systems and similar low-voltage, high capacity filter circuits where it is essential to have absolute reliability, and to eliminate all hum. All units have outer insulating tube.

SPRAGUE WR

WET ELECTROLYTIC REPLACEMENTS

Sprague Type WR Capacitors are NOT SUBSTITUTES. They are dry electrolytics of very high voltage formation specifically designed for use wherever wet electrolytic capacitors may have been used. They will stand high peak voltages and they'll handle a-c ripples that might cause ordinary 450-volt drys to break down.

SPRAGUE TYPE TVL

TOPS FOR TELEVISION!

- Sprague serves the service industry first again with the most complete line of television electrolytics. Engineered especially for tough TV replacement applications, Sprague's new Type TVA Atom® and Type TVL Twist-Lok★ electrolytics stand up under the extremely high temperatures, high ripple currents and high surge voltages encountered in TV receivers.
- Like all Sprague Capacitors, Types TVA and TVL Television Electrolytics have the *extra* dependability that has helped make Sprague the largest capacitor supplier to the television and electronic industry.
- The most popular replacement units for RCA, Philco, Dumont, Admiral, General Electric, Motorola, Emerson, Zenith, Westinghouse and other leading set brands are in the comprehensive listings on this page.

TYPE TVA ATOMS®

Small sized, metal-encased dry electrolytic tubulars. . . . All are suitable for 85°C operation . . . . TVA-11 through TVA-14 are specially designed miniatures for TV and FM detector circuits. . . .

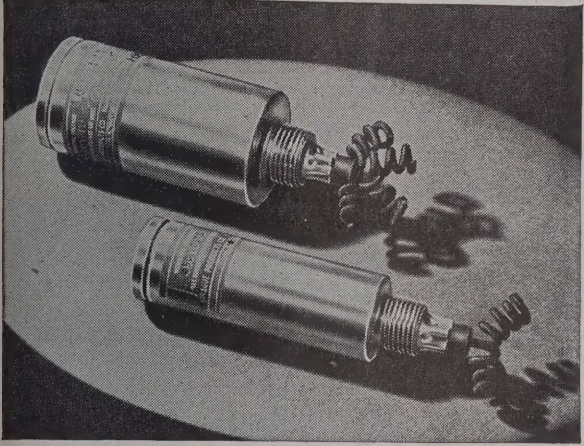
SPRAGUE CAPACITORS

SPRAGUE PLS "TINY MIKE" 450V



Type PLS Capacitors can be used with complete dependability on applications where much larger, old-style can-type dry electrolytics were previously necessary. Their exceptional quality and dependability in minimum size are made possible by the exclusive Sprague etched foil process which permits high capacity with very small leakage currents and low power factor. Aluminum cans have threaded bushing and locknut at one end for mounting. Separate positive leads and common negative leads are provided for capacitor sections.

Special ring clamps are available for upright mounting. (See Hardware, page P-62.)

SPRAGUE LS

ALUMINUM CAN TYPES, 450V

Popular units for replacing older can type capacitors. May be mounted in any position. Standard mounting through chassis by threaded bushing on can. Packed with mounting hardware and insulating washers for use where can must be insulated from chassis. Special ring mounting clamps are available for upright mounting with can partly extending through panels or chassis. (See Hardware, page P-62.)

TYPE LS UNITS have the can as negative terminal, and lug terminals for anode connections.

SPRAGUE SC INVERTED SCREW CAN MOUNTING TYPE, 475V

(WITH CAN AS NEGATIVE TERMINAL)

Can type dry electrolytics especially designed for the exacting continuous duty requirements of public address and power amplifier work. High surge voltage rating provides extra safety in high-current power supplies where high peaks often occur. Unexcelled for "extra tough" service replacement uses. Provided with threaded bushing for standard mounting in any position. Can is the negative terminal in all units. Positive terminal is lug connection. Supplied with mounting nut, and insulating washer to insulate can from chassis. Special ring clamps are available for upright mounting. (See Hardware, page P-62.)

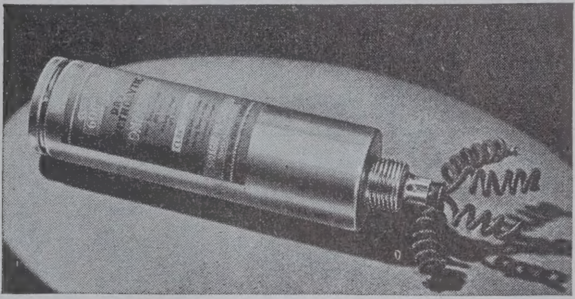
SPRAGUE CAPACITORS

SPRAGUE CL INVERTED SCREW CAN MOUNTING TYPE, 475V (WITH CAN INSULATED FROM SECTIONS)



These can-type dry electrolytics are similar to Type SC Capacitors except that the can is insulated from the filter sections. Separate positive and negative terminal leads for each section. Especially recommended for high gain, high power amplifiers where minimum inter-stage coupling through power supply is desired. Special ring clamps are available for upright mounting. (See Hardware, p. P-62.)

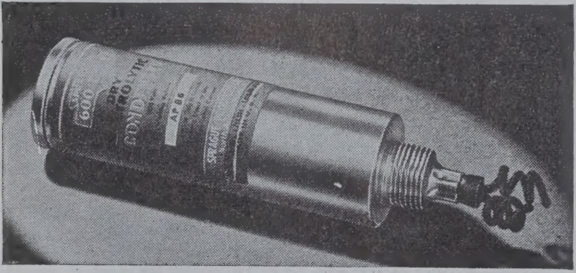
SPRAGUE AP HIGH-VOLTAGE CAN TYPES, 600V



These sturdy can-type units are outstandingly popular for all public address and theater applications where the working voltage is high and surges run well over 600 volts. These high capacities and high voltage ratings are obtained by use of balanced dry electrolytic sections connected in series, assuring long, trouble-free performance. Full capacity, full working voltage and low power factor are GUARANTEED.

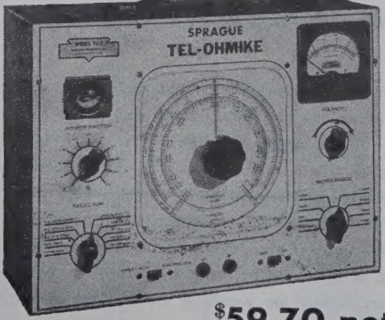
NEW! SPRAGUE TO-3 DELUXE TEL-OHMIKE

Universal Capacitance and Resistor Analyzer with Built-in DC Volt-milliammeter



$59.70 net

This fast, simplified operation is the keynote of the new TO-3 De Luxe Tel-ohmike. "Speedy check" locates open, intermittent, or shorted condensers WITHOUT REMOVING THEM FROM THE CIRCUIT. One pair of plainly marked binding posts and a total of only five controls assure quick, effective operation on all tests. Dial is of direct-reading, calibrated type, color coded to correspond to selector switch. It is easy to see, easy to read. In addition to all of its uses in radio work, Tel-ohmike checks motor-starting condensers, and measures insulation resistance of motors, transformers, etc.

SPECIFICATIONS

Capacity: .00001-2,000 MFD. in 4 ranges.

Power Factor: 0-50% at 60 cycles.

Insulation Resistance: 0-2500 Megohms (Direct reading on the meter).

Electrolytic Leakage: Measured in MA. at rated D.C. voltage. Capacity and power factor of electrolytic condensers measured with rated polarizing voltage applied.

Resistance: 2.5 Ohms-25 Megs. in 3 ranges.

D.C. Meter Range: 0-15, 150, 750 volts — 0-1.5, 15, 75 MA.

Size: 13¼" wide, 10⅛" high, — 5" deep.

Power: 35 watts at 115 volts — 60 cycle.

Shipping Weight: 15 lbs.

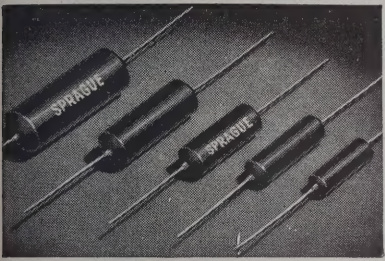
SPRAGUE CAPACITORS

SPRAGUE MOLDED TELECAPS

Greatest Paper Tubular Advance in 20 Years!

Highly Heat Resistant | **Conservatively Rated**
Moisture Resistant | **Small in Size**
Non-Inflammable | **Mechanically Rugged**
Completely Insulated



The new Sprague Molded Tubulars listed here are the result of more than four years' intensive research — and one of the largest retooling programs in Sprague history! The unique high - temperature molded construction of these units assures maximum dependability, even under extremes of heat, humidity, and physical stress. They're especially recommended for use in auto radios, in small ac-dc sets that get hot, or for any application which is "tough" on normal, waxed paper units.

SPRAGUE 68P MIDGET* TUBULARS

WHERE SPACE IS AT A PREMIUM

Sprague 68P type capacitors are the ultimate in extra small paper tubular capacitors. These midget capacitors are especially designed for miniature radio applications where space saving is a prime factor. These units are of fundamentally new engineering design and construction. The outstanding humidity performance which these capacitors exhibit is a result of this new construction.

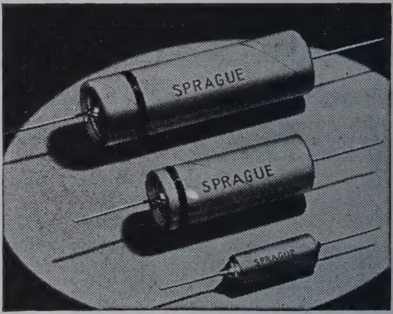
SPRAGUE CAPACITORS

SPRAGUE PX
HERMETICALLY-SEALED OIL-IMPREGNATED METAL TUBULARS, 600V AND 1000V DC



Here is your answer to every need calling for higher-voltage tubular capacitors in the smallest possible size for real dependability under difficult operating conditions. Sprague Type PX Capacitors consist of specially wound sections, impregnated with an exclusive Sprague oil and hermetically sealed in metal containers for long trouble-free service. **Each unit is supplied with an external sleeve to insulate it from the chassis and other metal parts.** Mounting may be made by means of the tinned copper leads 2½" long, or by standard Sprague Mounting straps (see Hardware page P-62).

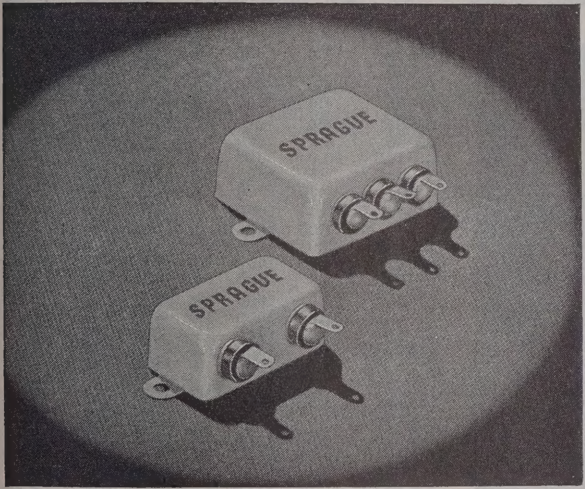
SPRAGUE CAPACITORS

SPRAGUE BP METAL-ENCASED BATHTUB UNITS (WITH SIDE TERMINALS)



These popular units are styled for use where the most severe conditions of heat and moisture must be met. They are oil impregnated and filled with KVO*. Mounting flanges or ears are integral parts of the containers.

* Trademark applied for.

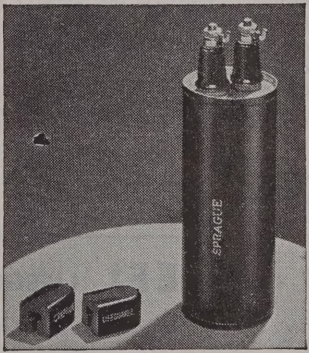
Long a favorite with amateurs, broadcasters, etc., throughout the world. Impregnated and filled with KVO*. Rated to conform with tube and circuit design requirements. As with other Sprague high-voltage transmitting types, each unit is equipped with ceramic terminals and LIFEGUARD Safety Caps. Mounting clamp is provided. Unconditionally guaranteed when used as specified.

*Trademark applied for.



OTHER SPRAGUE TYPES

SPRAGUE, largest supplier of capacitors to the television and electronic industry, manufactures many other designs of capacitors in addition to those shown here.

The most popular types for industrial and laboratory applications are shown in Sprague Products' 40-page Industrial Catalog No. C-551, available through Sprague Distributors Everywhere, or directly from Sprague upon letterhead request. In this catalog are listed such Sprague developments as PROKAR* high-temperature capacitors, carrier-current coupling capacitors, Vitamin Q* fluorescent lamp capacitors, high-voltage Vitamin Q* capacitors, resonant paper capacitors, etc.

* Trade Mark Reg. U. S. Patent Office.

SPRAGUE PRODUCTS COMPANY
North Adams, Mass.

SPRAGUE CAPACITORS

OIL-FILLED TRANSMITTING CAPACITORS

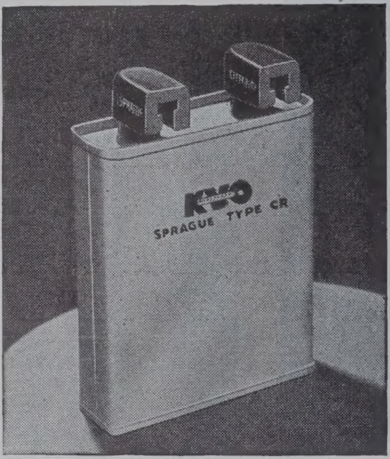
Filled with

KVO

(KILO-VOLT-OIL — The Sprague wartime research oil development)

SPRAGUE CR

(With Universal Mounting Feature)



An oil-filled transmitting capacitor is no better than the oil with which it is filled—and Sprague brings you the best! KVO*—Kilo Volt Oil—is the result of extensive laboratory research and engineering tests and has proved its excellence throughout the world during the war in capacitors used on practically every type of equipment. KVO retains its dielectric efficiency at low temperatures to a greater extent than any other type of oil in common use. High insulation resistance and low power factor are maintained over a very broad range of operating temperatures. **Oil-filled** capacitors are essential for high-voltage use, and you can rely upon Sprague KVO units under all conditions. Terminals are insulated from the cans for AT LEAST TWICE the working voltage. Capacitor sections are hermetically sealed in sturdy rectangular metal cans which can be automatically grounded through the mounting clamps.

For special **industrial** applications, where extremely high insulation resistance requirements must be met, Sprague can supply special dielectric materials.

CR Capacitors are of convenient rectangular shape and have handy adjustable universal flanges for mounting in any position. Each unit is labelled with operating information based on industry standards and, in accordance with Sprague custom, ALL RATINGS ARE CONSERVATIVE. No need to "play safe" by buying most costly, higher-voltage transmitting capacitors than you actually need.

Unconditionally guaranteed against breakdown when used as specified.

*Trademark applied for.

SPRAGUE PC INVERTED ROUND SCREW CAN TRANSMITTING TYPES, 600V TO 1500V

These popular Sprague TYPE PC inverted round screw can capacitors are filled (NOT just impregnated) with KVO*, the famous Sprague 500°F. flash protection oil that has the added advantage of retaining its dielectric efficiency at low temperatures. The PC Capacitors find a wide field of usefulness in such applications as public address systems, medium-voltage transmitters, television and high-gain amplifiers. THEY ARE RATED CONSERVATIVELY and labelled according to industry standards. Ample safety factor is assured. Units include spade washer and insulating lug to insulate the round metal can containers from the chassis. Ring clamp is available for upright mounting. (See page P-62.)

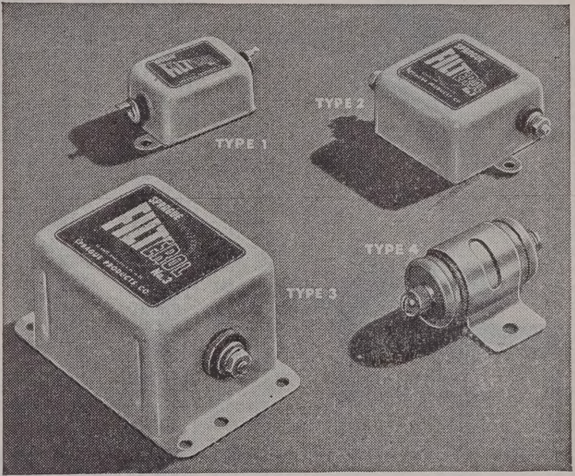
SPRAGUE CAPACITORS

INTERFERENCE FILTERS

Sprague †FILTEROL Radio Interference Filters are a direct outgrowth of highly successful Sprague wartime engineering research, and offer for civilian use a war-tested, practical filter that suppresses man-made radio noises and television "scrambles" on practically any application. They are small, completely self-contained, and easily installed. Applicable to any electrical device within their current and voltage ratings, they provide maximum noise suppression on radio broadcast bands. A study of the Attenuation Curve (available on request) illustrating typical FILTEROL noise suppression performance will show that this surpasses anything normally available in the past.

SPRAGUE FILTEROL TYPES 1, 2 and 3 are designed for connection in series with power supply lines to interference-producing devices. Their basic circuit is a special three-terminal network of which the can is one terminal. The filter selected should have a rating higher than the continuous running current of the device. A single FILTEROL connected in one side of the line is usually sufficient. However, in severe interference cases a FILTEROL in each power line may be necessary. For three-or-four wire systems, a FILTEROL in each wire is necessary.

FILTEROL TYPE 4 is a new, exclusive Sprague invention incorporating a Sprague *HYPASS capacitor and provides exceptionally high attenuation at frequencies above 5MC. It is effective up to 150 MC or more. Intended for all small devices with continuous current ratings up to 20 amperes. Applied by mounting directly on the frame of the device to be filtered, and connecting the power supply line in series through the filter. In severe cases, a FILTEROL may be necessary in each line wire.



SPRAGUE IF TYPES

IF-15—A TRIPLE-SECTION FILTER for all small motor-operated devices. Especially designed to prevent accidental shocks from discharge of filter capacitors.

IF-21—COMPACT DUAL METAL-ENCASED TUBULAR FILTER for use across brushes of fractional horsepower motors with can grounded to motor frame. Also across line terminals of motors.

IF-11—A DUAL HIGH-CAPACITY FILTER with completely enclosed safety construction. Designed for motors over 1 horsepower and up to 220 volts AC or DC. Also used on high-current arcing or sparking devices.

IF-S1—SINGLE 2-LEAD FILTER SECTION with can completely insulated. For use across make-and-break contacts.

IF-37—3-SECTION DELTA-CONNECTED FILTER. Only one IF-37 required for each fluorescent lamp fixture.
Also effective on make-and-break governor-type motors.

*Trademark Reg. U.S. Pat. Off.
†Trademark applied for.

SPRAGUE MICA CAPACITORS

Twice Tested for R-F Characteristics

Sprague Mica Capacitors provide maximum quality for R-F applications where exacting requirements involving low-power factor and high-insulation resistance at high frequencies must be met. The line includes types for every requirement ranging from the tiny "toothpick" 1FM types to the giant ceramic-jacketed types 4CC. Each type incorporates outstanding developments based on far-reaching Sprague wartime engineering.

Mica units are perhaps the most critical of all capacitor types to produce properly—and it is in the handling of these essential details that Sprague engineering and production excels. Beginning with selection and handling of the mica itself, extreme care is taken in every operation to assure completed units which, although they look like conventional units on the surface, will far surpass ordinary mica capacitors in actual service.

Stocks of raw mica are carefully selected. So critical are Sprague requirements that far more mica is rejected than is actually selected for use. The selected mica is then hand split and each piece electrically graded by exclusive Sprague methods.

Particular care is exercised in the interleaving of section foils and in connecting them to terminals through specially designed low-resistance R-F bonds. Perhaps most important of all is the fact that each and every Sprague Mica Capacitor section receives a painstaking radio frequency test before being encased in its mold. After this test, each section is carefully impregnated and moisture-proofed prior to the molding operation.

Upon completion, all Sprague Mica Capacitors required to carry large R-F currents are actually R-F current tested for their peak ratings. This test combined with thorough testing before molding assures the serviceman, amateur, experimenter or industrial user of units of utmost dependability for any application or any condition of use.

SPRAGUE HARDWARE

Sprague Mounting Clamps and Straps provide quick, dependable means for securing a wide variety of capacitors and resistors to a mounting surface. All clamps and straps are made from plated steel.

CMC Vertical Mounting Clamps for Cylindrical Capacitors (Figs. 1 and 2) are ideally suited for vertical or "above chassis" mounting of Sprague Capacitor Types AP, CL, DR, EL, HLV, LM, LS, OT, PC, PLS, RW, SC or other round can units.

The RMC Wrap Around Clamps for Rectangular Capacitors (Fig. 3) are designed for mounting Type CR Capacitors or other rectangular units.

Type TMS Mounting Straps for Tubular Capacitors (Fig. 4) fit any tubular capacitor or resistor having a diameter of between ¼" and 1⅜", inclusive. They may be used with Sprague Types AT, PX, SW, TA, TC, TR, TU, UHC, UT or other tubular units and with Sprague *Koolohm Resistor Types 5KT/5NIT, 10KT/10NIT, 25KT/25NIT, 50KT/50NIT and 120KT/120NIT.

THE RESISTORS WITH THE CERAMIC-COATED WIRE INSULATION

Sprague Koolohm Wire-Wound Resistors are wound with wire that is insulated before it is wound with a flexible, ceramic coating that is impervious to heat as high as 1000° C. In addition, each resistor is doubly protected by a glazed ceramic coating and new type of end seals which guard it effectively against any moisture or other climatic conditions. Ordinary resistors may be designed to provide some degree of "tropicalized" protection at extra cost. STANDARD Koolohms give FULL protection at regular prices!

No Other Resistors Have These Features

Because of the complete protection afforded by both their wire insulation and outer ceramic shells, Koolohms may be mounted anywhere, even flat against a chassis or against grounded parts. They can safely be used at full wattage ratings, even on the high-resistance values because of the excellent insulation at high temperatures. No danger of shorts or current leakage! Thanks to their ceramic wire insulation, Koolohms can be wound in layers. This means higher ratings in much smaller physical sizes. Even more important, larger, sturdier wire sizes can be used. Actually, the wire sizes in Koolohm Resistors average 2¼ times greater in cross-sectional area than those in ordinary resistors of the same size!

High Insulation Resistance

Also standard Koolohms have the high insulation resistance to ground required for television and other high-voltage uses—10,000 volts from the surface of their sturdy ceramic jackets to their resistance elements!

The following listings include only the Sprague Koolohm Wire-Wound Resistor types commonly supplied for radio repair service and amateur radio applications. Various other types are also regularly produced in large quantities and to the most exacting standard or special applications. All have been thoroughly proved and tested for the most exacting military, naval and aircraft applications.

Other types not listed in this catalog include:

Hermetically-Sealed, Ferrule Terminal, Power Wire-Wound Resistors, with power ratings of 15, 20, 40, 50, 90, 120 and 150 watts. These are the famous Sprague Koolohm "Grade 1, Class 1" resistors that are impervious to salt water, thermal shock, and corrosive atmospheres.

Precision Meter Multiplier Resistors, Wire-Wound, Hermetically-Sealed. Resistance values up to 7.5 megohms per unit. Three types, MFA, MFB, and MFC. Resistance tolerances of ±0.5% and stability of ±0.1%. The most rugged meter multipliers in the world!

Voltage Divider Resistors. Wire-wound power resistors with ratings of 10, 15, and 25 watts. Designed for through bolt mounting as individual units, or in multiple sections of any size to provide tapped voltage dividers.

***MEGOMAX. High-resistance, High-Voltage, Resistors.** Ferrule terminal, hermetically-sealed, composition resistors of pressed and sintered ring construction, capable of high-temperature operation to 150° C. Three types with resistance values to 1000 megohms; power ratings of 6, 12 and 22 watts and voltages up to 20,000 volts.

BOBBIN Wire-Wound, Semi-Precision Resistors. Wound with ceramic-insulated wire on high-temperature plastic forms. Five high stability types with power ratings of 1, 2, 2.5, 3 and 5 watts, and resistance values to 500,000 ohms. Resistance tolerance down to ±0.5%.

Complete details on the above and other new types are contained in the Sprague Koolohm Industrial Catalog No. C-551, copy of which will gladly be sent on request by industrial users. Sprague engineers welcome the opportunity to be of assistance regarding industrial resistor applications.

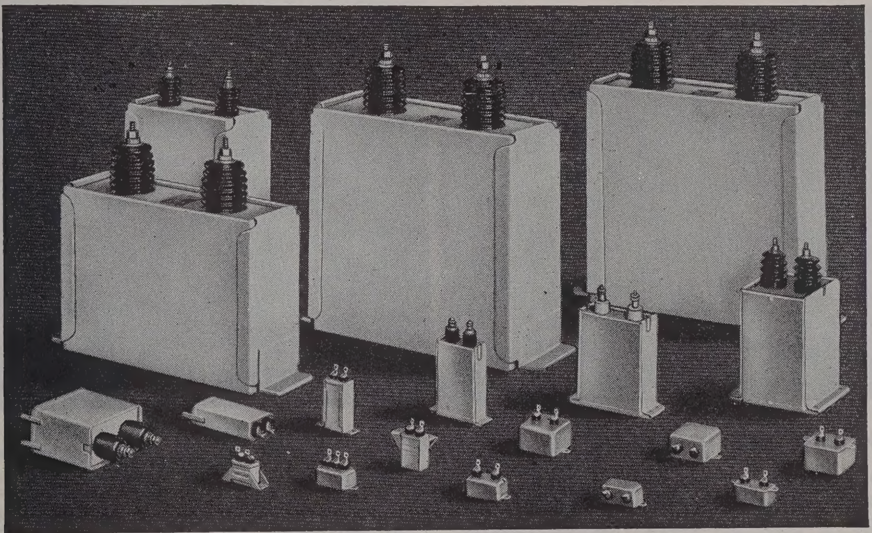
Cut-away view of Sprague Koolohm Resistor showing unique construction. Ceramic-coated wire simplifies layer winding.

PYRANOL* CAPACITORS

*Trade-mark reg. U. S. Pat. Off.

In accordance with Joint Army-Navy Specification JAN-C-25 Amendment-1.



Case styles CP 53, 54, 55—Bathtub Style
CP 70—Large Rectangular
CP 61, 63, 65—Miniature Rectangular

All case styles are available in characteristic E and F. Single-section units are supplied with a capacitance tolerance of ±10 per cent (K), and two- and three-section units with a capacitance tolerance of +20 per cent, —10 per cent (V). Spade-lug and footed mounting brackets are available for use with capacitors on which the mounting bracket is not an integral part.

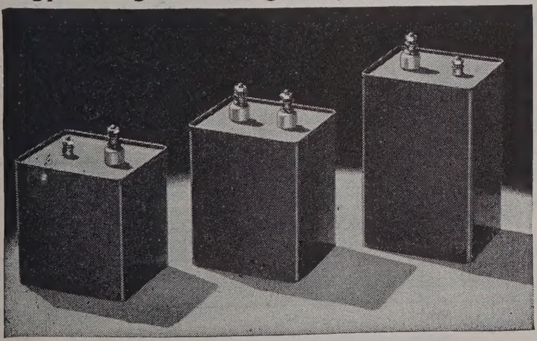
Energy-storage discharge capacitors



G-E light-duty energy-storage capacitors are made in a wide range of ratings to fit practically every requirement of high-speed flash photography, as well as home and industrial welders for light metals. Careful construction, high-quality materials, and skillful design contribute to long life and efficient operation.

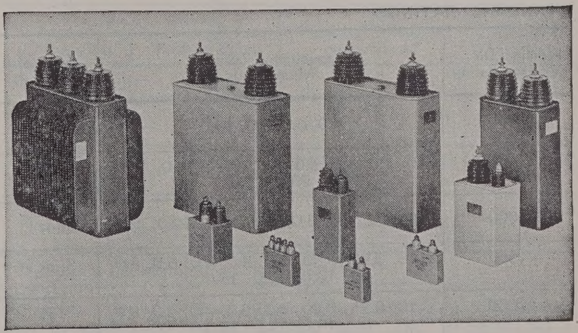
Capacitor networks



General Electric pioneered in the development of mineral-oil-treated paper dielectric capacitor networks for air, sea, and land radar, and was a prime supplier for the government services. The products supplied varied from the miniature types used with aircraft radar to the large land station designs.

All of the general facilities and the highly specialized test equipment involved are being retained for further work in this field and inquiries on new requirements are solicited.

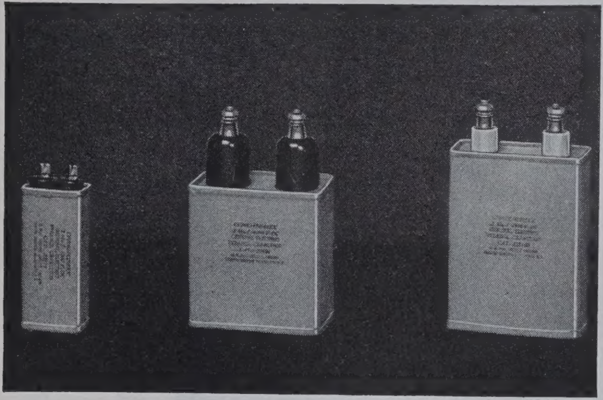
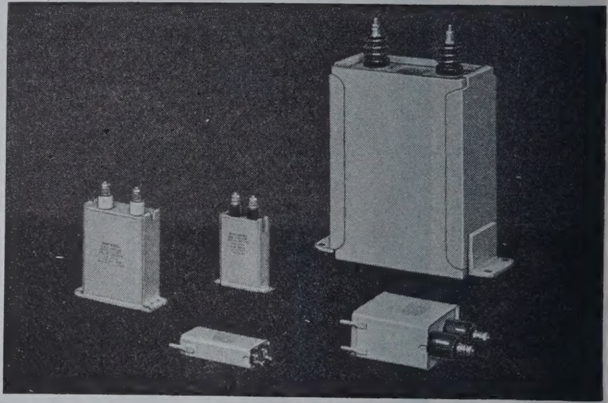
Case Style 70



Case style 70 units with various types of terminals.



Case style 70 units with various types of removable mounting brackets.

These Pyranol fixed-paper-dielectric capacitors in case style 70 are hermetically sealed in rectangular cases. This line includes standard ratings, ranging from very small units weighing only three ounces to large high-voltage units weighing up to 175 pounds.

All are of single-section construction, with a capacitance tolerance of ±10 per cent. Cases are isolated and the two bushings are brought out through the cover. Units are available with either solder-lug terminals or with pillar-insulator terminals in 600-, 1000-, and 1500-volt ratings. All higher-voltage ratings have pillar-insulator terminals. These units may be operated in altitudes up to 7500 feet.

* Solder lug. † Pillar insulator.

Bushings with solder-lug terminals are made of molded Textolite, and those which have pillar-insulator terminals are of the highest-quality porcelain. All bushings are thoroughly bonded to the container to provide a permanent liquid-tight seal.

All units can be supplied with removable mounting brackets, as illustrated above. In addition to the screw-spade-lug brackets, two types of footed brackets are also available—one with a straight "L"-shaped foot and the other with a "U"-shaped foot that grips the bottom of the unit. The brackets can be attached to either the top or bottom of the unit, permitting either upright or inverted mounting.

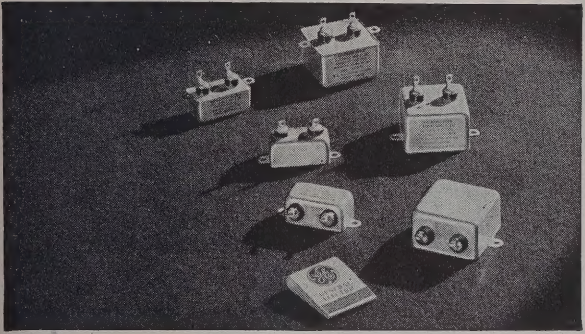
Case styles 50, 51, and 52



These fixed-paper-dielectric "bathtub" capacitors are of small and compact construction, and will fit into very restricted places in radio and electronic equipments.

All three case styles are constructed with solder-lug terminals, and are available in single-section, two-section, or three-section construction for all circuit diagrams.

The hermetically sealed metallic containers are of drawn construction and include two integral mounting lugs.

The only difference in construction of the three case styles is in the location of the bushings, which are brought out through the side for case style 50 units, through the top for case style 51 units, and through the bottom for case style 52 units.

Write for Bulletin GEA-2621.

STANDARD RATINGS

Type of Construction	Nominal Direct Voltage Rating	Capacitance Ratings, Microfarads*	Capitance Tolerance

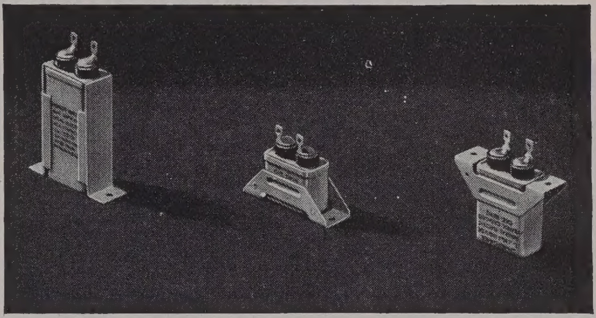
	1000	.05, .10, .25	

* Capacitance per section of two- and three-section units.

Case styles 60, 62, and 64



These small rectangular-case fixed-paper-dielectric units are of narrower width than the "bathtub" units, and will fit into a very restricted panel surface, where case height is not the limiting dimension. Mounting lugs, of either the removable or attached type, are of very sturdy construction.

All three case styles are constructed with solder-lug terminals, and are available in either single-section or dual-section construction for all circuit diagrams.

The metallic containers are hermetically sealed, and of deep-drawn construction.

Case style 60 units have no brackets, but removable brackets of either the footed or screw-spade-lug type can be supplied, while the case style 62 and case style 64 units have soldered-on brackets for upright or inverted mounting, respectively.

STANDARD RATINGS

Type of Construction	Nominal Direct Voltage Rating	Capacitance Ratings, Miscofarads*	Capacitance Tolerance

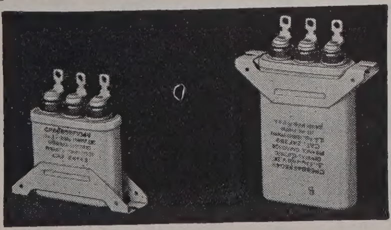
	1000	.01, .02, .05, .10, .25	—10%

* Capacitance per section of two-section units.

Case styles 66-68



Case styles 66 and 68 units are similar to the case style 62 and 64 designs but slightly greater in width to accommodate three terminals.

Both case styles are constructed with solder lug terminals and are available in single-section, two-section, or three-section units. The metallic containers are deep-drawn construction and are hermetically sealed.

Case style 66 units have integral mounting brackets for base mounting, and case style 68 units integral mounting brackets for inverted mounting.

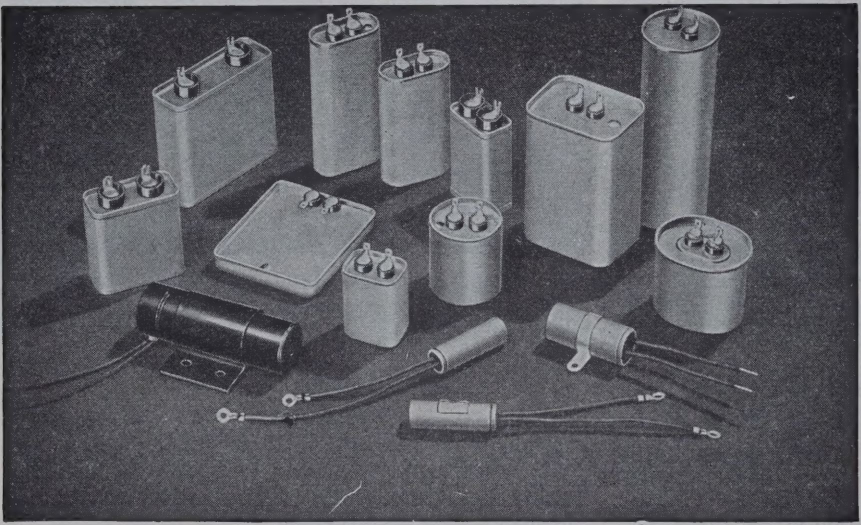
PYRANOL* CAPACITORS

*Trade-mark reg. U. S. Pat. Off.

FOR GENERAL-PURPOSE A-C APPLICATIONS



Small a-c Pyranol capacitors are recommended for use with motors, luminous-tube transformers, industrial control, and other equipment.

The use of Pyranol* as a treating material, because of its high dielectric strength, high permittivity, and exceptional stability, has made possible a marked reduction in physical size, as well as a capacitor far superior to those formerly available.

Design advantages

(1) Small and compact units, because of the use of Pyranol.

(2) Wide range of ratings available in rectangular, cylindrical and oval cases.

(3) Three styles of mounting brackets are available and supplied separate from the units. Units may be operated in any position.

Write for Bulletin GEA-2027

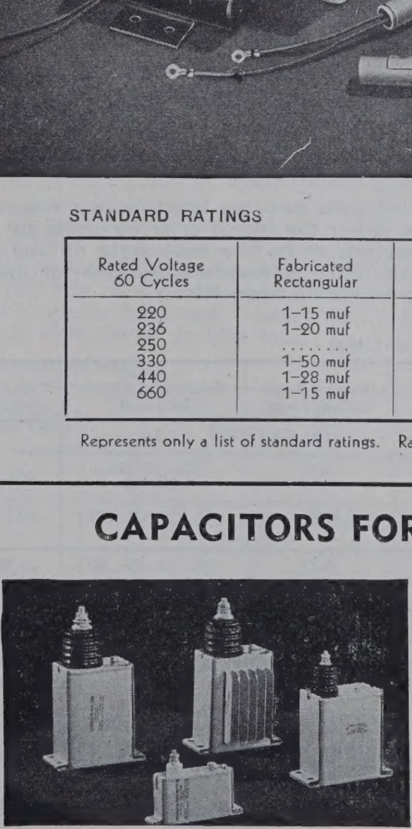
CAPACITORS FOR OSCILLATOR TANK CIRCUITS



This line of fixed-paper-dielectric capacitors has been developed primarily for grid and plate blocking service in the electronic oscillator circuits of high-frequency induction-heating equipments. They can also be used to advantage in other high-frequency oscillator circuits of a similar nature.

G-E high-voltage paper-dielectric capacitors are of relatively high capacitance (0.01 mu f) for high-frequency units, and yet they are more economical than conventional high-frequency units of considerably smaller capacitance values. They can, therefore, be applied with savings in cost as well as reduced losses and lower voltage drop across the capacitor.

features

- Hermetically sealed in metallic cases.
- Single-bushing construction for minimum size.
- Removable mounting brackets.
- Internal lead connections arranged for minimum inductance.

Hermetically sealed in round aluminum tubes, these DC dry tubular electrolytics have heavy insulating sleeves on which polarity is clearly indicated. Double pure paper spacers assure adequate breakdown characteristics and all sections are tightly held in place within the container. Multiple staking connects the terminal tabs to the electrodes and provides permanent low resistance contact throughout the life of the capacitor. Low voltage units utilize etched cathodes to maintain uniform capacity when these capacitors are subjected to heat and high ripple currents.

COLOR CODE OF WIRE LEADS FOR TYPES CF, CS AND SL ELECTROLYTIC CAPACITORS

Black	Common Negative
Orange	Positive, Highest voltage or capacity
Red	Positive, next highest voltage or capacity
Blue	Positive, next highest voltage or capacity
Yellow	Positive, next highest voltage or capacity
Brown	Negative, in separate section unit

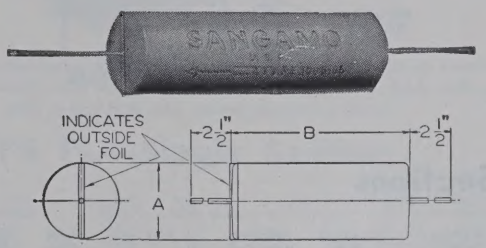
NOTE: Lead colors are determined by the rated working voltages. Where there are two or more sections of different voltages and the same capacity, the lead color will be determined by the voltage; with the same voltages and unequal capacities the lower capacity takes the next color in the sequence.

NOTE: Based upon proposed R.M.A. color code.

SANGAMO CAPACITORS

TYPE 30 PLASTIC MOLDED PAPER TUBULAR CAPACITORS

"Molded Like Micas"



Here is an entirely new concept in paper tubular construction: capacitors which are molded in plastic—just like micas! The immediate results are obvious: more stable capacity values, excellent seal characteristics, and application at higher ambient temperatures. In the long run, too, the result is obvious: a new standard of permanence. Halowax impregnation is suitable for operation in ambient temperature ranges from —55° C. to +55° C.

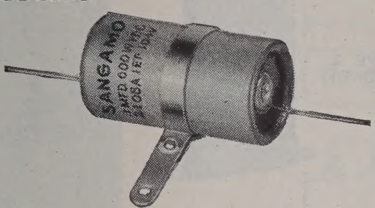
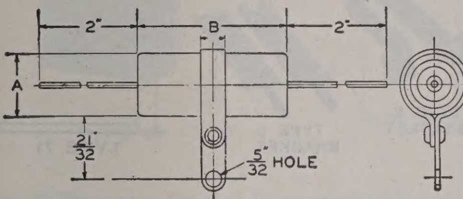
SANGAMO CAPACITORS

TYPES 20 AND 21 METAL CASED MINERAL OIL PAPER CAPACITORS





TYPES 20 AND 21

Designed for by-pass and coupling applications, Types 20 and 21 capacitors are non-inductively wound paper capacitors impregnated in mineral oil of greatest stability and housed in metal tubes. The Type 21, having terminals insulated from the case, is covered with a cardboard sleeve. The Type 20, having one terminal grounded to the case, is similarly covered unless specified without sleeve. The Type 20, priced the same as the Type 21, has the same diameter as the Type 21 but is ⅛" shorter in length.

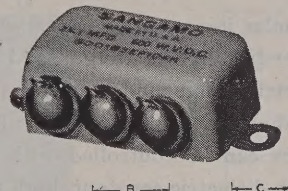
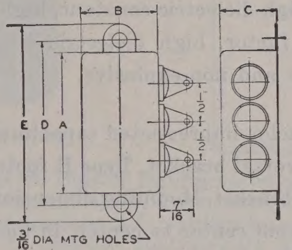
TYPES 50 AND 59 BYPASS PAPER CAPACITORS





TYPES 50 AND 59

Types 50 and 59 paper capacitors are non-inductively wound paper dielectric sections sealed in seamless containers. Primarily intended for bypass applications, their characteristics are excellent for R.F. and A.F. bypass, audio frequency coupling and A.C. circuits. The Type 50 capacitors are vacuum impregnated and filled with the finest mineral oil available for use; the Type 59 capacitors are vacuum impregnated and filled with diaclor; a chlorinated dielectric providing maximum capacity and voltage in minimum space.

Standard tolerance +20% —10%. Types 50 and 59 standard capacitors supplied with side terminals or to customer spec. When ordering non-standard terminals specify design, R—Rivet, S—Screw; specify position, T—Top, B—Bottom, E—End.
Inquiries should be directed to the factory for capacities and voltages other than those listed above.
Prices subject to change without notice.

SANGAMO CAPACITORS

TYPE 71 DIACLOR IMPREGNATED TRANSMITTING CAPACITORS

Sangamo Diaclor impregnated capacitors have the advantage of longer life, lighter weight, and smaller size. Diaclor is a specially compounded, chemically purified chlorinated liquid dielectric. This synthetic impregnant, whose characteristics can be controlled with great uniformity, assures a high dielectric constant, high volume resistivity, low power factor, high dielectric strength, and is non-inflammable and non-explosive.

Type 71 Diaclor impregnated capacitors are supplied with Type A universal bracket, Type B footed bracket, or Type C spade lug bracket. Mounting dimensions of these brackets are given from center to center, in inches, in column "F" below. Terminals: composition rivet or screw; pyrex glass; or, stand-off porcelain. Prices include choice of brackets and terminals.

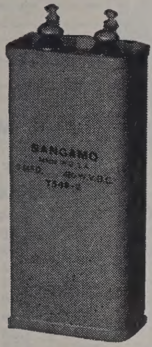
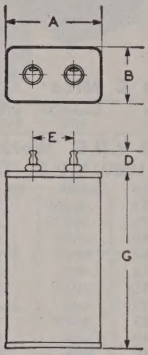
SANGAMO CAPACITORS

TYPE 75 DIACLOR IMPREGNATED A.C. CAPACITOR



TYPE 75



Type 75 Sangamo Diaclor Impregnated Capacitors are designed for continuous A.C. duty in ambient temperatures up to 75 degrees centigrade. These capacitors are recommended for use with capacitor motors—as power factor correction capacitors—and other similar A.C. applications. They are supplied with either the composition rivet or screw terminal, or with stand-off porcelain terminal. Type mounting bracket desired should be specified when ordering.

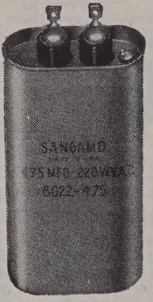
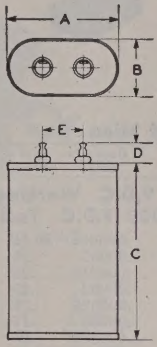
TYPE 80 DIACLOR IMPREGNATED A.C. CAPACITOR



TYPE 80



Sangamo Type 80 Diaclor Impregnated capacitors are especially recommended for fluorescent use but can be employed for numerous A.C. applications. These units are designed to operate continuously at 75 degrees centigrade.

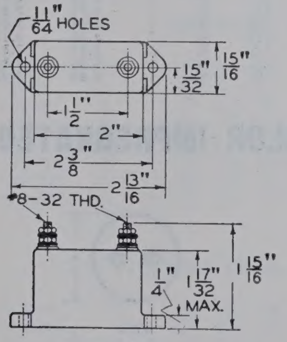
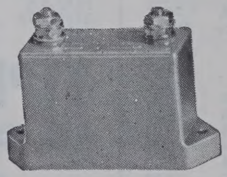
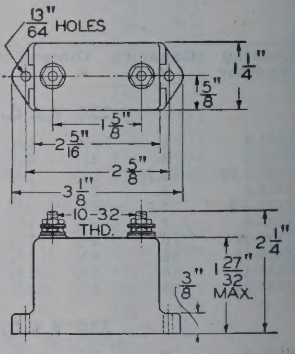
TYPES F1 AND F2 MICA CAPACITORS



TYPE F1





TYPE F2

Types F1 and F2 capacitors, the smallest of the Sangamo line of transmitting types, possess a range of voltage and current ratings suitable for many applications. They are housed in low loss molded bakelite cases. The mica and foil sections are permanently clamped, vacuum impregnated, and installed in the case in such a manner as to provide stable characteristics and adequate moisture proofing.

Type G ceramic cased capacitors are intended for service where highest voltage and R.F. current ratings are required, such as in commercial transmitting or induction heating applications. All possible steps are taken in design and manufacturing operations to insure permanence of quality. Current ratings of these four sizes as well as detailed information on the Type G5 will be supplied upon request. Terminal plates are designed to permit any usual connecting or mounting practices.

AOCE4M24	200	4000	8x4 9/16x3¾″	66.00

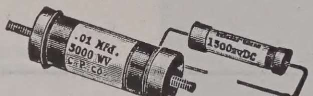
PLASTICONS

By the use of synthetic plastic film dielectrics, PLASTICONS can be made smaller, lighter, more efficient and more economical than older types of capacitors made with paper and mica insulation. Plasticon films are chemically purer and more uniform. Plasticon capacitors have a longer life and can operate under more severe conditions.

SPECIAL PLASTICONS

Taking advantage of the wide variety of plastic film dielectric characteristics, Plasticons are engineered to meet many special applications. We can furnish capacitors for 200°C for pulse network duty; close tolerances; ultra high resistance. Send us your specifications.

GLASSMIKES ASG



Type ASG are Plasticon A dielectric-silicone fluid impregnated capacitor elements in hermetically sealed glass tubes. Temperature range — 60° C to ± 125° C. The smallest and lightest high voltage capacitors made. Type ASG are ideal for DC and low frequency AC applications.

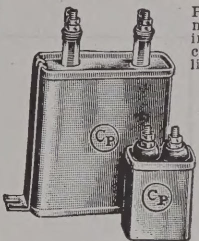
INDUSTRIAL and TRANSMITTING



Plasticon A element, mineral oil impregnated in sturdy lead coated steel containers. Smaller, lighter and more economical than paper capacitors. Temperature range —40°C to +105°C. Type AOC-rectangular; Type AOCO-flattened oval. Type ASC and ASCO (not listed) have Plasticon A element, silicone impregnated. Same dimensions as corresponding AO types. Temperature range — 60° C to + 125° C; greater capacitance stability. Prices on application.

LABORATORY CAPACITORS

Type LAG (Glassmike style) and Type LAC (Rectangular can) have the lowest dielectric absorption of any capacitor made. Residual charge is .01 — .02%. Dissipation factor at 1 MC is .0002 to .0003. Capacitance and Q is constant from DC to 100 KC. Resistance averages one million megohms per microfarad. Standard capacitance tolerance is ± 5%. Type LA units are used for timing and integrating circuits.

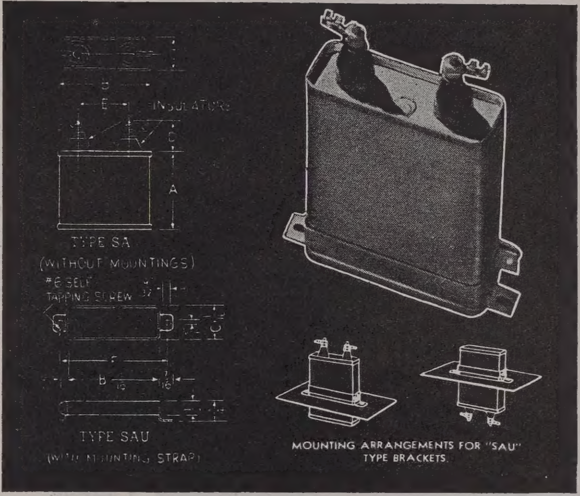
INDUSTRIAL CONDENSER

INDUSTRIAL
CONDENSER CORPORATION

TYPE "SA" OIL FILLED

1. INCCO OIL "A" IMPREGNATED AND FILLED—permitting efficient operation over widest range of temperatures.
2. HERMETICALLY SEALED CASE—is unaffected by time, humidity, or operating temperatures.
3. Use of HIGHEST GRADE CONDENSER TISSUES insures a long uninterrupted life.
4. HIGH-GLAZE PORCELAIN INSULATORS—insure low moisture absorption and high terminal to case flash over.
5. CONSERVATIVELY RATED—SAFE FOR CONTINUOUS OPERATION AT 10 PER CENT OVERLOAD.
6. Use of "SPACE SAVER" UNIVERSAL MOUNTING BRACKET provides adjustable capacitor heights.
7. LEAD COATED STEEL CASE—IS NON-CORROSIVE and lacquer finished.
8. TESTED FOUR TIMES BEFORE SHIPMENT—guarantees a 100 per cent perfect product electrically and mechanically.

If riveted terminal construction is wanted in place of porcelain stand-off insulators add "R" to catalog number. For example, 6SA50 changes to 6SAR50. Submersion proof terminal construction to meet Army and Navy Specifications is optional; specify on order. Standard capacity tolerance plus or minus 10 per cent. Mounting brackets supplied in accordance with following catalog designations: **TYPE SA**—No mounting brackets. **TYPE SAU**—"Space Saver" universal bracket. **TYPE SAJ**—Soldered vertical mounting bracket. **Type SAL**—Reversible mounting foot bracket. **TYPE SAH**—Reversible spade bolt bracket.



For example: The 8mfd. 600V. type with "Space Saver" bracket has catalog number 6SAU800.

NOTE: To facilitate delivery we have standardized on container heights. In many cases units can be supplied in shorter containers if required.

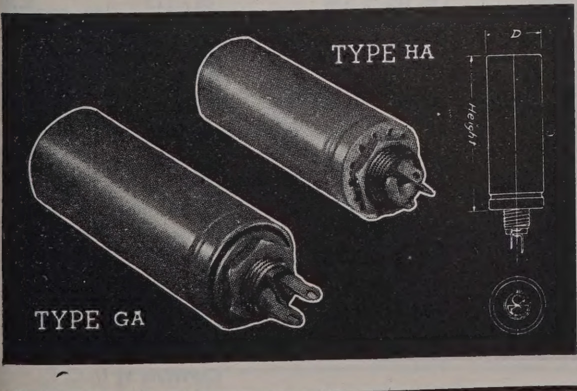
* Where G dimension is given, two spade lugs or mountings holes are supplied on each bracket.

TYPES "GA" and "HA" OIL FILLED

These inverted mounting capacitors fill a definite need where chassis space is the prime factor.

Types "GA" and "HA" are INCCO Oil "A" impregnated and filled.



The case is a one-piece metal extrusion with a "locked-in" molded neck. This construction meets and surpasses the Army and Navy requirements for a submersion-proof capacitor.

Type "GA" is available in the seven standard rating listed below, but can also be supplied in other capacities and/or voltages to manufacturers' specifications.

In the standard "GA" and "HA" types the container is insulated. A grounding lug can be supplied for connecting one terminal to the case. Fiber washer for insulating container from chassis, when case is grounded, and insulating cover for insulating the container from adjacent equipment, can also be supplied on special order.

Type "HA" differs from "GA" in container and mounting neck size, and also in the fact that it has three insulated terminals. Primarily, type "HA" is supplied to manufacturers specifications, to meet special requirements of multiple-section and multiple-terminal capacitors, with either insulated or grounded container.

Type	Case Diameter	Size of Mounting Neck
GA — GE — GW	1½"	¾" x 16 thread
HA — HE — HW	1⅜"	⅞" x 16 thread

TYPE "BA" OIL FILLED

1. INCCO OIL "A" permits efficient operation of these compact units over the widest range of temperature.
2. The use of the HIGHEST GRADE CONDENSER TISSUE insures greater safety factor and longer life.
3. Specially PROCESSED RIVETED TERMINALS are designed to withstand total submersion in salt water and changes in temperature from 50° below zero Centigrade to 90° above zero Centigrade without loosening or losing their integrity.
4. CONDENSER MOUNTINGS form an integral part of these drawn shell containers insuring permanent and rigid fastenings.
5. All units are NON-INDUCTIVELY WOUND providing efficient operation over the widest range of frequencies.
6. HERMETICALLY SEALED, they are unaffected by time, temperature or humidity.
7. CONSERVATIVELY RATED for safe and continuous uninterrupted operation at 10% above rated voltage for the lifetime of associated equipment.
8. Tested at twice the rated voltage between terminals and twice the rated voltage plus 1000 from each terminal to case.

DRY ELECTROLYTICS

Type "B" electrolytic capacitor is the first commercially available unit of this type with the reliability of the total submersion type, oil filled capacitors.

Wound with the highest purity aluminum foil and cellulose separators available; impregnated in electrolyte having excellent temperature characteristics, these units will outlive their associated equipment.

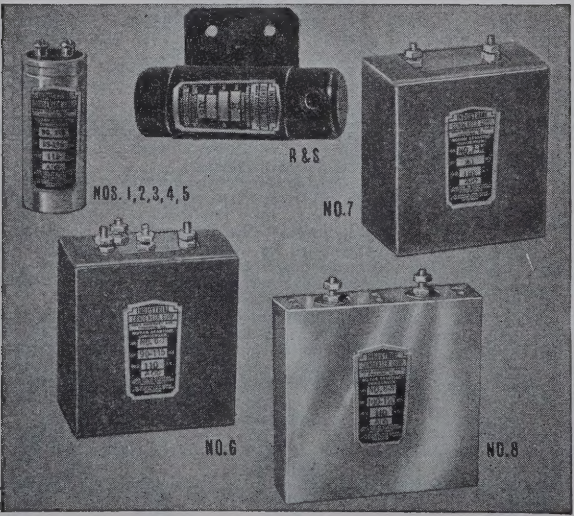
NOTICE—Most units are available with TERMINALS ON TOP, BOTTOM, OR ENDS. When ordering, add "T" for top terminals, "B" for terminals on bottom, or "E" for end terminals, i.e., 6BAT100 for terminals on top. Type "B" also available in WAX FILLED. When ordering, change catalog number A to W, i.e., 6BW100. If terminal position is not designated, side terminals are furnished. STANDARD CAPACITY tolerance of plus 20 per cent minus 10 per cent furnished on oil filled and wax filled units unless otherwise specified when ordering. Can be furnished in plus or minus 1 per cent capacity tolerance on special request.



MOTOR STARTING CONDENSERS

These motor starting condensers are all heavy duty three second start. Built of the finest materials obtainable, these capacitors are engineered to the Nth degree of perfection. They are used by all the leading manufacturers of high quality motors.

The listings shown will take care of 90% of all your replacement requirements.

SEND FOR BULLETIN No. 1075 WHICH LISTS OUR OIL FILLED MOTOR RUNNING CAPACITORS

INDUSTRIAL CONDENSER

INDUSTRIAL CONDENSER CORPORATION

CAPACITORS TO 250,000 V.D.C.W.

INCCO OIL "A" IMPREGNATED AND FILLED assures smaller size, low power factor, and widest range of operating temperatures.

ELECTRIC ARC WELDED HEAVY GAUGE HOT TINNED STEEL CASES are non-corrosive—finished in durable lacquer.

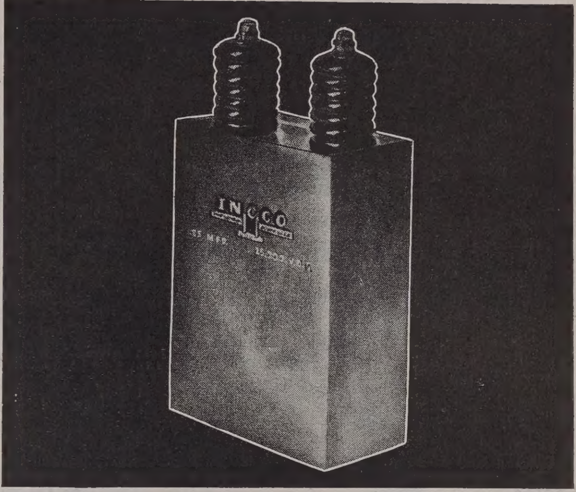
GLAZED WET-PROCESS PORCELAIN INSULATORS—low moisture absorption and high terminal to case flash over.

WOUND WITH HIGHEST GRADE CONDENSER TISSUES—insures a long, uninterrupted life.

CONSERVATIVELY RATED—Safe for continuous operation at 10 per cent overload.

HERMETICALLY SEALED STEEL CASE — unaffected by time, humidity or operating temperatures.

AVAILABLE TO MEET U. S. SIGNAL CORPS AND NAVY SALT WATER SUBMERSION REQUIREMENTS.



TYPE "WA" — HIGH VOLTAGE OIL FILLED CAPACITORS

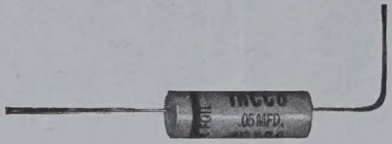
"ET" series capacitors have been designed for ease in installation and reliability. They are constructed to withstand the most severe operating conditions encountered in industrial and electronic equipment. Especially controlled manufacturing processes insure that the equipment in which these capacitors are used will function without interruption. Capacitors can be supplied for operation at temperatures ranging from minus 40 to plus 85 degrees Centigrade. Mounting is effected by inserting the capacitor through the slots in either the chassis or mounting plate, and twisting the mounting prongs 90 degrees.

INDUSTRIAL CONDENSER

INDUSTRIAL
CONDENSER CORPORATION

TELEVISION AND TUBULAR PAPER CONDENSERS



TYPE PT

INDUSTRIAL By-Pass Capacitors are non-inductively wound and designed for maximum efficiency up to the highest frequencies. The units themselves are completely impregnated and sealed with a special non-hygroscopic sealing compound, thus preventing moisture penetration under the most humid conditions.

RADIO INTERFERENCE ELIMINATORS

INDUSTRIAL CONDENSER CORP. has made a special study of the suppression of noises caused by fluorescent lighting. No. 7249 capacitor is designed with three leads, two leads to be connected across the 110 volt line and the single lead to be grounded. No. 4219 is housed in a metal container and is self grounding. It is supplied with strap mounting for easy installation. No. 4252 and No. 4253 are flat type units designed to mount on the ballast support of circline ballasts. The convenient mounting flap grounds the unit when the stem of the lamp is placed through the mounting hole.

4252	2⅛ x ⅝ x 11/32	1.50

DIRECT REPLACEMENT

For Either Dry or Wet Types

No Drilling — No Changes

The "IL" type capacitor is a dry electrolytic assembled in an aluminum container having a threaded mounting neck which is an integral part of the container.

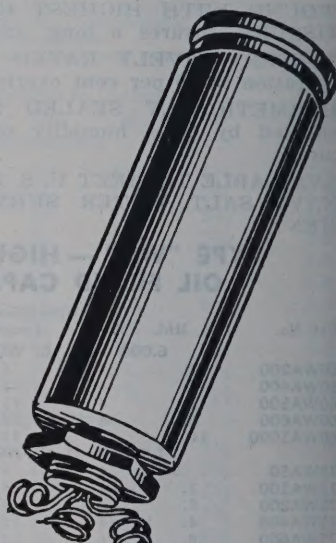
Our "IL" type capacitors may be used as replacements for the old type wet or dry electrolytic capacitors and will mount in the same mounting hole as the part replaced, eliminating the use of adaptors or auxiliary workmanship.

Electrically and mechanically this condenser is designed for heavy duty service. It incorporates the exclusive INDUSTRIAL etched foil process of construction.

Although these capacitors are not hermetically sealed, they are highly superior to the paper type units generally used for this kind of replacement.

These units are supplied with Underwriters Approved 75° C rubber covered leads.

Individually boxed in attractive carton with instructions.



To replace 1⅜" diameter screw neck type

600, SM605, SM601, SM608, SM607, SM610: ads.

606, SM609, SB550, SB552: 4 leads.

An extremely popular type of condenser due to its exceptional high quality and midget size. Hermetically sealed in a small metal case and scientifically vented, to protect against adverse operating conditions of voltage, temperature and humidity. Container is insulated by a high grade tube which is spun over the ends of the can to eliminate shorts when wires are bent close to container. Easily mounted by their rigid wire leads.

Type MM

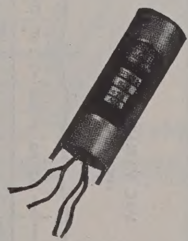
All Type "MM" units are available with mounting strap. Recommended in cases of extreme vibration or when advisable to have unit solidly anchored. When ordering add the letter S before the catalog number.

Type MMS

Each unit is completely embedded in a high grade wax and then sealed in an impregnated carton to insure efficient operation under the most adverse conditions. New, high voltage formation, gives complete protection against surges and high peak voltages. Supplied with color coded, Underwriters' Approved, rubber covered leads. Universal lugs permit easy mounting in any position.

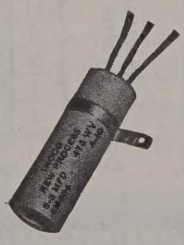
Type MC

Spade bolt type "SB" of mounting has been very popular due to its wide use in many radio sets. Each unit is embedded in a high temperature wax and then sealed in a thoroughly impregnated cardboard tube, affording complete immunity to moisture penetration. New high voltage formation gives complete protection against surges and high peak voltages.



Type SB

Type "SM" has identical characteristics as "SB". The addition of the strap mounting bracket has proved favorable in its use due to its wide application in AC-DC and portable sets in the replacement field. The strap can be moved to the best mounting position and then bolted or soldered.



Type SM

Supplied with color-coded, Underwriters' Approved, rubber covered leads.

TYPE TRONAD

TRONAD... It's New, It's Complete, It Simplifies

1 Combines tube, variable or fixed vacuum condenser with coil.
2 Reduces and simplifies wiring. **3** Saves space and weight.
4 Increases circuit efficiency. **5** Eliminates circuit parasitics.
6 Makes practical Split-Stator operation for harmonic supression.
7 Tronad is designed for single ended units but available in Split-Stator. **8** (Air cooled or water cooled). **9** (Tube is replaceable).

EL-MENCO CAPACITORS

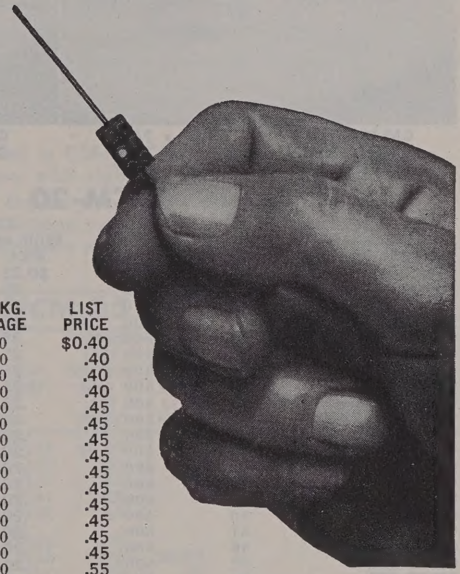
MINIATURE MICA CAPACITORS

SMALLER THAN YOUR FINGERNAIL BUT SKY HIGH IN PERFORMANCE

Known the world over for their reliability under all operating conditions, El-Menco Capacitors are chosen by manufacturers who want successful performance and long life from their products.

El-Menco fixed mica dielectric capacitors are compact, precision made Manufactured in accordance with American military standards to meet Army and Navy JAN-C-5 Specifications. All impregnated and JAN, RMA and RCM color coded. Standard specification limits are shown below.

Moulded in low loss bakelite, tested at double the working voltage. Tests for dielectric strength, insulation resistance, temperature co-efficient and capacitance drift, humidity and life tests according to JAN and RCM STANDARDS. All units are wax dipped for salt water immerison seal.



Actual Size
9/32" x ½" x 3/16".
For Television, Radio and other Electronic Applications.
2 - 420 mmf. cap. at 500v DCA.
2 - 535 mmf. cap. at 300v DCA.
Temperature Co-efficient ±50 parts per million per degree C for most capacity values.

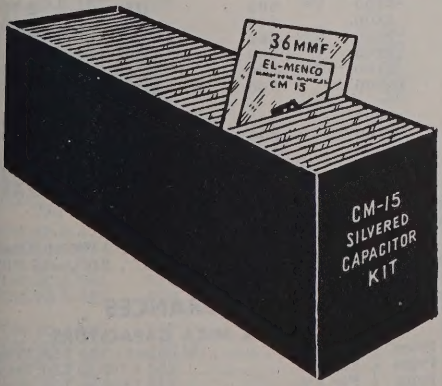
All the above are silver mica only. Temperature Co-efficient: 50 Parts per Million per degree C. (Characteristic "E"). Standard Tolerance: ±5%. Closest Tolerance: ±.5 mmfd.

Special! —HANDY KIT

FOR EXPERIMENTAL WORK

Don't Get Caught Short...



ALWAYS HAVE THE CORRECT CAPACITY ON HAND

This Handy Kit consists of 46 most commonly used Capacitors . . . five of each capacity packed in moisture-proof transparent cellophane envelope, properly identified for permanent use.

YOUR PRICE ONLY $50.00

THESE MINIATURES FIT INTO THE SMALLEST AREA CAPACITOR SIZE (9/32" x ½" x 3/16")

The complete set of capacitors amounts to $106.00 at list prices. You get the entire set during this introductory offer, *for only* $50.00 net. On orders of 5 or 10 sets you get corresponding discounts *on this reduced cost!*

5 sets (5% discount) Only $47.50 each!
10 sets (10% discount) Only $45.00 each!

ARCO ELECTRONICS, INC.

EL-MENCO CAPACITORS

TELEVISION • TRANSMITTING • INDUSTRIAL HIGH VOLTAGE MICA CAPACITORS

DC WORKING VOLTAGES: FROM 1000 TO 3000 VOLTS

Molded in CM-20, CM-35, and CM-40 Cases

Demand for smaller units in higher voltages designed to meet the requirements for Television, Power Amplifiers, Low Power Transmitters, and various Industrial Uses has increased. EL-MENCO designed and produced units listed below are especially adaptable to compact circuits where space is an important factor. Their acceptance has been overwhelming by the various manufacturers of Television Receivers.

In many cases, these units will do the work of capacitors molded in CM-45, CM-50, and CM-55 cases without breaking down. No Special Mountings Are Necessary; just wire right into the circuit.

The capacitors are molded in low-loss bakelite and tested at double the branded voltage. They are tested for dielectric strength, insulation resistance, temperature coefficient, capacitance drift, susceptibility to humidity, and length of life, according to RCM Standards. All units are wax-dipped for protection against salt water immersion.

EL-MENCO CP-1

MINERAL OIL IMPREGNATION
NON-INDUCTIVE WINDING
SYNTHETIC RESIN END SEALS
STEATITE CASE

EL-MENCO CP type paper tubular capacitors are sealed into STEATITE CERAMIC TUBES which serve to insulate the capacitor electrically as well as against moisture and heat. The capacitor insert is impregnated with MINERAL OIL, thereby assuring long life at 85° C operating conditions. This feature insures successful operation at the high ambient temperatures existing in small, compact enclosures.

The NON-INDUCTIVELY wound paper and foil units are sealed in the CERAMIC TUBES by means of baked SYNTHETIC RESIN END FILLS which cannot melt at any conceivable operating temperature. The end fills will not dissolve in wax, permitting the capacitors to be potted without damage to the insert. Leads are of tinned copper wire 2¼″ long.

Many of the large TELEVISION, TRANSMITTER AND HIGH VOLTAGE AMPLIFIER manufacturers have found these capacitors to be of highest quality. Breakdown tests have exceeded the required standards.

EL-MENCO CAPACITORS

Single and Dual PADDERS

El-Menco Padding Condensers have been acclaimed by engineers as the finest development in adjustable mica condensers.

The construction is such as to completely enclose and protect the delicate edges of the mica films, made of the finest quality clear India ruby mica.

The phosphor bronze adjusting plates assure permanent resilience and freedom from mechanical fatigue. All parts are heavily plated to resist corrosion.

ARCO ELECTRONICS, INC.

EL-MENCO CAPACITORS

TYPE 46 TRIMMER

The base is made of the lowest dielectric loss ceramic material available and the mica is clear India Ruby.

The soldering lugs may be bent in any position without affecting capacity setting due to the rigid construction of adjusting plates.

El-Menco Trimming Condensers are treated for resistance to humidity and for permanence of capacity setting.

Trimmers shown here are standard sizes and capacities.

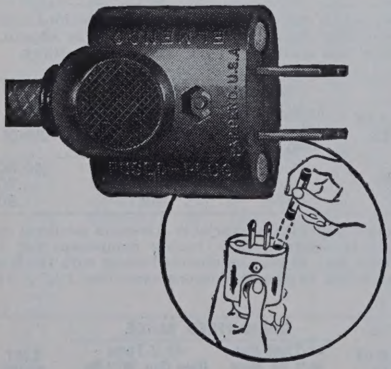
EL-MENCO FUSED PLUG

They're all saying again, "It's a wonder no one thought of it before." Here's a plug *that carries its own fuses.*

It attaches to the cord just as any standard plug, looks pretty much the same, light-weight, but easier to handle because of finger grips. However, it contains two small fuses, which provide complete protection against damage to the appliance and to the main line.

Blown fuses are easily removable; replacements are available up to 10 amperes.

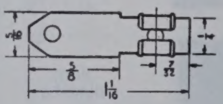
Fuses Available Wherever Electrical Supplies Are Sold



REMOVE FUSES IN A JIFFY

•

REPLACE FUSES INSTANTLY



POLARIZED BLADE can be supplied instead of regular blades, upon request—no extra cost.

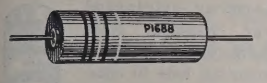
AEROVOX Latest Aerovox Items

DURANITE MOLDED TUBULAR CAPACITORS



Type P 88

Toughest capacitors ever offered critical operators of radio-electronic equipment. Not just another plastic tubular, DURANITE capacitors are entirely new — in design, impregnant, processing, and casing. New technique provides glove-fitting contact and seal throughout. No danger of voids.

DURANITE provides a permanent, non-varying, rock-hard casing. Smooth clean surface. DURANITE does not dry out, does not develop cracks or fissures. Pigtail leads firmly imbedded, won't pull out, won't work loose. Pull tests no longer are a problem. Wire will break before it can be loosened.

DURANITE capacitors are really moisture-proof. They stand up at high temperatures. Operation from sub-zero to over 212°F. Exposure to temperatures of 250°F will not impair life or performance. Temperature co-efficient of capacities similar to wax and oil capacitors. The new AEROLENE impregnant eliminates necessity of stocking and using both wax and oil capacitors. One impregnant does the work of both. DURANITE capacitors show no deterioration in stock, may be stored in advance of actual use, with corresponding economy and convenience. Smaller dimensions than the usual paper tubulars.

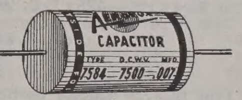
HIGH-VOLTAGE TUBULAR PAPER CAPACITORS OIL-IMPREGNATED WAX-SEALED



Type 84

These Type 84 capacitors, rated from 2500 to 10,000 volts D.C. Working, are designed to meet the elevated peaks and transients encountered in television and other cathode-ray tube applications, and to reduce the effects of corona.

This series of high-voltage, oil-impregnated units is an extension of the wax-impregnated, lower-voltage Type 84 line described on Page 9, rated up to 1600 volts d.c. working.

Although these high-voltage units are similar in general appearance — with impregnated capacitor sections encased in tubular paper jackets and supplied with tinned wire leads — they have an improved wax end-seal for longer life under the operating conditions to which they are subjected.

Type 84 is obtainable with a radial mounting band at no extra cost.

HIGH VOLTAGE HERMETICALLY SEALED OIL-FILLED TUBULARS

4000
AEROVOX

Type 89

Type 89 capacitors are immersion-proof, oil-impregnated, oil filled units in handy space-saving tubular form. They are ideal for use in vibrator applications, coupling and by-pass functions in transmitters, high-voltage amplifiers, in r.f. by-pass circuits, radar, television, sonar, broadcast transmitters, interference eliminators for motors and generators, and in test equipment.

The oil-impregnated paper section is enclosed in a corrosion-proof metal case filled with oil and hermetically sealed against oil leakage or moisture penetration.

For voltages above 3500 to 6000 volts inclusive DCW, special terminals are used to provide the necessary creepage distance without increasing the length.

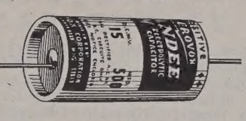
High-Capacitance Low-Voltage Capacitors in Miniature Tubular Aluminum Cases



Type PRS*

These high-capacitance low-voltage units of the Type PRS miniature tubular aluminum-cased line are especially suitable in electric fence control and similar applications.

They are compact units, tightly sealed, and provided with a vent which operates to relieve excessive gas pressure. An external wax-impregnated cardboard insulating tube is supplied.

Type PRS is available with either etched or plain foil, although it is normally constructed with etched foil — Type PRS-EP. High-purity aluminum is used throughout the internal construction to avoid corrosion which may be caused by contacts between dissimilar metals.

Radial or tangible mounting bands for rigidly mounting the capacitor can be supplied.

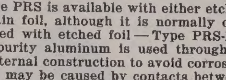
HIGH VOLTAGE TUBULAR ALUMINUM CAN ELECTROLYTICS



Type PRS*

Type PRS capacitors are tightly sealed tubular units in aluminum containers, with solid wire leads. These high-quality units are especially suitable for use in compact assemblies. The higher voltage ratings are intended to meet the stepped up potentials in certain radio and electronic circuits, particularly those using cathode-ray tubes such as oscillographs and television receivers.

Type PRS is normally supplied with etched foil but plain foil is available. PRS capacitors use high-purity aluminum throughout the internal construction to avoid corrosion which may be caused by contacts between dissimilar metals. The container is tightly sealed and is provided with a vent which operates to relieve excessive gas pressure

AEROVOX Electrolytic Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

UPRIGHT OR INVERTED MOUNTING CAPACITORS

TYPE E

These units are widely used in highest-quality radio, communications, electronic and similar types of apparatus. Type E capacitors are hermetically-sealed. Ring-type clamp provides rigid and convenient method of mounting unit inverted or upright, beneath, on, or through mounting surface. Available with single or multiple elements. Single unit has two terminals, dual unit has three terminals, and triple unit has four terminals. Cathode connections made through one terminal in cover.

INSULATED SCREW-MOUNTING CAPACITORS

TYPE G

These capacitors are highest quality hermetically-sealed aluminum can units, used in all quality electronic, radio and communications equipment. Constructed with threaded cover, provided with lock washer and hexagonal nut to provide simple means of mounting capacitor through hole in mounting surface. The capacitor may also be insulated from chassis by use of an insulating washer. Terminals are molded in cover. Single element units have two terminals; dual-element units have three terminals. Cathode connection in made through one terminal in the cover.

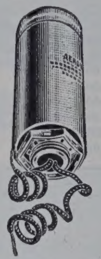
SCREW-MOUNTING WIRE-LEAD CAPACITORS

TYPE GL



These inverted mounting, aluminum can capacitors are made in single, double and triple section units with two separate color-coded leads 3½" long brought out from each section. The threaded neck and palnut provide a simple means of mounting the unit through a hole in the mounting surface. *Suitable for replacement of wet electrolytics.

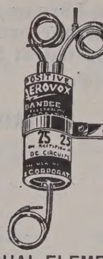
DANDEES

Miniature Tubular Aluminum Can DRY ELECTROLYTICS

TYPE PRS

AEROVOX
DANDEE

SINGLE-SECTION
Two Leads



DUAL-ELEMENT
Three Leads

Tightly sealed aluminum-can dry electrolytics for use where money- and space-saving considerations are paramount. Smallest proportions consistent with full-rated capacity and voltage, operating under normal-duty conditions.

Excellent for crowded assemblies, DANDEES are favorites for use in midget sets, AC-DC sets, autoradios, etc. Also many servicing jobs where low cost is important.

Electrically insulated with special waxed paper jacket. Ends spun over can rim, eliminating possibility of shorts if leads are bent close to unit. Generous length tinned wire leads. DANDEES are thoroughly aged, ready for immediate use. Each unit is thoroughly tested. Individually packed with guarantee slip. Dual-element units have three leads (common negative).

AEROVOX Electrolytic Capacitors

IF IT'S MARKED 'AEROVOX' IT'S A QUALITY CAPACITOR

AEROVOX
DRY ELECTROLYTIC
CAPACITOR
AF44J4A

TYPE AF TWIST-PRONG BASE CAPACITORS

These capacitors are tightly sealed round aluminum can uits. They are mounted by means of prongs which extend through the mounting surface and are twisted to hold the unit in place. These are high-quality units especially suitable in compact assemblies where space is limited All connections, except the cathode, are made through terminals in the cover. The cathode is connected to the container. Base prongs slip into fibre or metal elliptic washer that is riveted or eyeletted on chassis, and are bent over. Fibre washer provides insulated can; metal elliptic washer, grounded can. **Metal or fibre washer supplied at 5c each net.** The terminal lugs slip through holes in washers for soldered connections.

AEROVOX Electrolytic Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

TYPE AEP PLUG-IN ELECTROLYTIC CAPACITORS

Quick change dry electrolytics. Facilitate testing and replacement in equipment where continuity of service is important. Install merely by plugging into standard octal socket. Unit can be inserted **only the right way.** Key of octal base fits octal socket. Ultra-compact due to use of etched foil for higher capacities in the small can sizes. Aluminum internal construction. Non-corrosive due to use of similar metals throughout. Fully vented for safety.

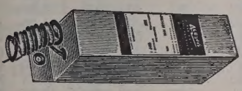
PAPER-WOUND REPLACEMENTS FOR ELECTROLYTICS



TYPE PWP

TYPE PWC

High-grade paper sections in standard inverted screw mounting aluminum can (PWC) or cardboard case (PWP) similar in appearance to electrolytics. Used as replacements for standard electrolytics indicated; applications subjected to high AC component or ripple particularly in first stage of filter circuit; or where excessive surges are encountered. No polarity to be observed. Actual capacity indicated in each case. Capacity is less than electrolytic being replaced but will be found adequate in most filter circuits since filtering capacity in electrolytics is more than generous. PWP has cardboard mounting flanges; PWC similar to the inverted dry electrolytic types.

HIGH-VOLTAGE MOLDED-IN-BAKELITE MICA CAPACITORS

Type 1450

1000v D.C. Test–600v D.C. Work.

Intended for the more critical service of low-powered transmitting circuits, buffer stages, power amplifiers, and laboratory equipment, etc. Non-magnetic parts are used to reduce r.f. losses to minimum, and heavy terminals provide minimum r.f. and contact resistance. Intended for point-to-point wiring, being supported entirely by its soldered connections. 1¼" x 1¼". $\frac{5}{16}$" or ¾" thick (see below).

Types 1455-57

Size 1¼" x $1\frac{25}{32}$" x $\frac{11}{32}$"

Types 1455-57, have insulated mounting holes, independent of soldering lugs, for connections. 1½" spacing between mounting hole centers. If $1\frac{5}{16}$" spacing is preferred specify Types 1445-47. Large meter-mounting brackets permitting use of this type of unit for shunting meter windings may be obtained at 45c added to list price. Specify by adding suffix (A) to type number. Small brackets are also available at 25c additional. Specify by suffix (E). Both brackets have universal slots for either mounting hole spacing. Standard tolerance ±20%; for ±10% add 10% to list price; ±5% add 20%; ±2% add 75%.

Types 1650-54

Heaviest-duty molded in bakelite mica capacitors of the AEROVOX line. Provided with threaded holes taking the roundhead screw terminals. Also available with plain holes through which screws or rods may be slipped. Same price as 1650 series, but specify 1650A, etc. when latter is desired. $\frac{7}{16}$" or ¾" thick (see * below). Types 1650, 1651 and 1652 are supplied in brown bakelite. Types 1653L and 1654L are supplied only in low-loss (yellow) XM Bakelite. Standard tolerance ±20%; for ±10% add 10% to list price; ±5% add 20%; ±2% add 75%.

AEROVOX Mica Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

SILVERED MICA CAPACITORS

For most critical applications where precise capacity values must be attained and maintained, AEROVOX silvered mica units are generally available. Encased in red molded XM bakelite. Similar in external appearance to standard bakelite molded mica units.

Unique construction. Only plus .0022 per degree F.—a remarkably low temperature coefficient. Excellent retrace characteristics. Practically no capacity drift with time. Exceptionally high "Q". Mechanically protected against physical damage and changes in electrical characteristics due to varying atmospheric conditions. Wax impregnated externally. Ideal for use in circuits where inductance and capacity product must remain constant under all operating conditions. Specifically designed for use in push-button tuning, oscillator padding circuits, fixed tuned circuits, and as capacitance standards, etc., where accuracy and stability are of prime importance.

Standard tolerance ±5%. For ±20% deduct 10% from price. For ±10% deduct 5%. For ±3% add 10%. For ±2% add 15%. For ±1% add 25%.

Commercial Grade MICA TRANSMITTING CAPACITORS

Extra-heavy-duty Capacitors for

- **Commercial Communication Companies**
- **Broadcasters**
- **Builders of Quality Radio and Electronic Equipment**
- **Amateurs, Experimenters**

With these capacitors Aerovox is contributing its share towards narrowing still more the small remaining gap between professional and amateur radio practices.

Due to the normally limited demand for these extra-heavy-duty mica capacitors, as well as the considerable number of capacitance and voltage ratings in which they are made, this line is made to special order. However, your Authorized Aerovox Jobber is now able to order these commercial-grade capacitors for you.

Consult your Aerovox Jobber for specifications and quotations.

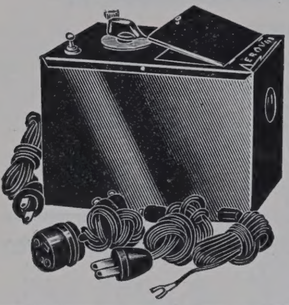
AEROVOX Interference Filters and Auto-Radio CONDENSERS

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

AEROVOX INTERFERENCE FILTER SELECTOR



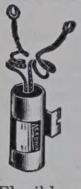
TYPE ANL-37

Plugs between interfering device and outlet. Selector switch adjusted until noise is eliminated or minimized. Dial indicates which type filter to use. Handsome, sturdy metal cabinet. Compartment contains necessary test leads and attachment plugs and clips. Size 5½ x 5½ x 8 inches.

TYPE ANL-37

Dealers Net Price............$17.50

AEROVOX Type IN-23

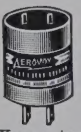


For elimination of interference caused by neon lamps or fractional horsepower motors. Mounting bracket for attaching to neon fixture (one eliminator needed for each fixture) or for attaching to frame of motor. Flexible leads for connecting across motors such as in hairdriers, fans, mixers, etc. .5-.5 mfd. 1 x 2⅛ in.

TYPE IN-23

List Price $1.25 **Net Price $0.75**

AEROVOX Type IN-27

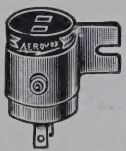


Simple, inexpensive noise filter. Inserted between set and outlet when interference is slight. Also used with appliance causing low-intensity interference. Keeps troublesome noises out of house wiring and power line. Size 1⅜ x 1½ inches.

TYPE IN-27

List Price $1.50 **Net Price $0.90**

AEROVOX Type IN-28

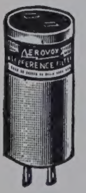


Intended for cases where ground is considerable distance from point of application. Most efficient when mounted directly on interfering device by bracket. Size 1⅜ x 2 inches.

TYPE IN-28

List Price $2.00 **Net Price $1.20**

AEROVOX Type IN-29

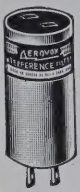


Provides additional filtering action over IN-27 and IN-28. Especially effective for local sources of interference of variable character but strong intensity. Very effective for electric razor and other vibrating devices. Plugs between device and line. Size 1⅜ x 3 inches.

TYPE IN-29

List Price $1.75 **Net Price $1.05**

AEROVOX Type IN-30

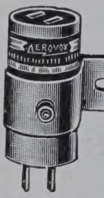


Similar to IN-29 but with additional inductance. Handles more severe interference. Plugs between set and outlet, or preferably between noisy appliance and outlet. Size 1⅜ x 3 inches.

TYPE IN-30

List Price $2.50 **Net Price $1.50**

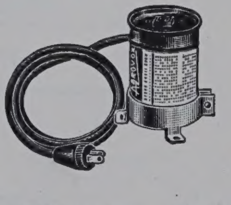
AEROVOX Type IN-31



Plugs in between attachment cord and electric outlet, either of set or preferably at appliance. Additional inductance for better filtering. Works best mounted by bracket directly on interfering appliance. Size 1⅜ x 3 inches.

TYPE IN-31

List Price $3.00 **Net Price $1.80**



AEROVOX Type IN-42

Designed for use in the more serious cases of radio interference from power lines and appliances. Provided with inductance as well as capacitance for thorough filtering action. Plugs into electric outlet. Radio set or interfering device plugs into receptacle of the filter. Recommended for use between interfering device and power line. Size 2½" x 3¾". Provided with mounting ring. Rated at 6 amps. for 110-220v. A.C..

TYPE IN-42

List Price $7.50 **Net Price $4.50**

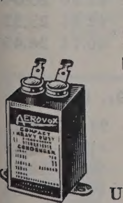
METAL-CASED Ultra-Compact PAPER CAPACITORS



Type 80

Ultra-compact heavy-duty capacitors. Wax-impregnated, wax-filled. Used as replacements in sound equipment, high power radio receivers, electronic devices, and communication equipment. Housed in a rust-proof container with soldering terminals conveniently located.

Type 1080—1000v. D.C. Work.

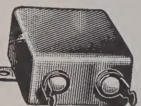
DRAWN-CASE OIL FILLED "HYVOL" CAPACITORS

TYPE 30



For applications requiring a compact superior-grade oil-impregnated, oil-filled capacitor. Non-inductive paper sections encased in a one-piece drawn metal case with soldered bottom plate for hermetic seal. Absolutely immersion-proof terminal assembly. Meets severe operating conditions encountered in aircraft, police, broadcast, p.a., and other types of communications equipment.

MIDGET TUBULAR METAL-CASED "HYVOL" CAPACITORS

Type 38

These units are hermetically-sealed and are exceptionally compact. Originally designed as alternates for mica capacitors but have since become a standard item in the Aerovox oil-filled capacitor line. Not only used as replacements in existing equipment, but are especially suitable for newly-designed equipment particularly where allowable weight of the finished assembly and allotted space is at a minimum. Despite unusual ultra-small size for oil-impregnated, oil-filled capacitors, constructional and electrical characteristics meet many of the exacting conditions to which molded-in-bakelite mica capacitors are normally subjected. Type 38 units are normally supplied with case insulated, and are provided with outer insulating tube.

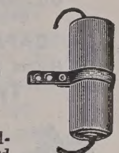
TUBULAR CAPACITORS OIL-IMPREGNATED OIL-FILLED

Type 89



Immersion-proof, oil-impregnated, oil-filled units in handy, space-saving tubular form. Ideal for use in vibrator applications, coupling and by-pass functions in transmitters, high-voltage amplifiers, in r.f. by-pass circuits, interference eliminators for motors and generators, and in test equipment. Fully sealed against oil leakage or moisture penetration. Case is insulated, not connected to the capacitor section. Mounting strap and outer insulating tube are supplied.

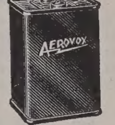
COMPACT ENERGY-STORAGE CAPACITORS

TYPE PX



For high-speed flash photography, capacitor discharge welding, flash signaling equipment, pulsing and other energy storage uses requiring extremely high currents during short discharge periods. Compact, minimum weight, solder lug terminals, terne plate containers.

AEROVOX "HYVOL"
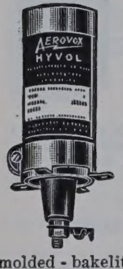
VERTICAL-MOUNTING HIGH-VOLTAGE CAPACITORS

Type 14



Particularly applicable for use in high-voltage filter circuits such as cathode-ray tube power supplies, high-voltage by-pass circuits in transmitters and high-powered public address equipment. Type 14 units are made in the standard 1⅜" diameter. Grounded can, with one-piece immersion - proof molded - bakelite pillar insulator which provides maximum spacing between live terminal and can. Mounting ring furnished for upright or inverted mounting.

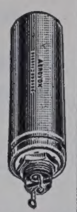
AEROVOX "HYVOL"
OIL-IMPREGNATED OIL-FILLED CAPACITORS
In Round Aluminum Cans —Inverted Mounting

Type 10



This is an improved design, replacing the former single terminal type. This new design is physically interchangeable with the old. Ideal for crowded assemblies; a logical choice in filter circuits of power supplies, high-gain high-fidelity amplifiers, and small transmitters. Hermetically-sealed. Has one-piece molded bakelite terminal assembly. Both terminal lugs are insulated from container.

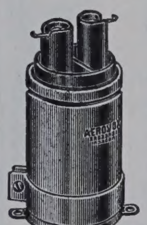
AEROVOX "HYVOL"
VERTICAL-MOUNTING HIGH-VOLTAGE CAPACITORS OIL-IMPREGNATED OIL-FILLED

Type 12



This is an immersion - proof capacitor designed to meet high - voltage operating requirements. Suitable for such high - voltage circuit applications as in television, cathode-ray tube power supplies, high-voltage rectifiers, or, as a high - voltage by - pass capacitor. Recommended where long leakage path between terminals is required. Barrier in bakelite top increases insulation and creepage path between terminals. For certain applications, the ceramic insulators may be removed if desired. Supplied with adjustable mounting ring for vertical mounting.

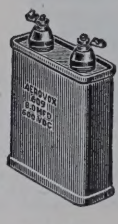
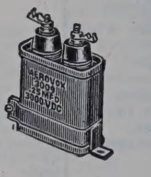
AEROVOX "HYVOL"
OIL-IMPREGNATED OIL-FILLED CAPACITORS
In Rectangular Metal Cans

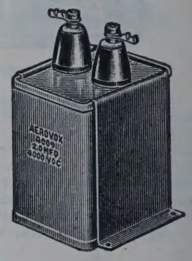
Type 09



Type 09
(Basic)



Type 09MB
(Mounting Bracket)



Type 09MS
(Strap Mounting)

Hermetically-sealed in sturdy can, leakproof and seepageproof. High tension pillar terminals fitted with locknuts and soldering lugs. Exceptionally compact dimensions for given capacity, working voltage—and safety factor due to use of "Hyvol." Intended for heavy-duty continuous service in transmitters, amplifiers, etc. Type MB bracket is normally supplied as standard equipment, unless otherwise specified, on all units having base sizes other than 3¾" x 3 3/16" and 3¾" x 4 9/16". Type MS is normally supplied as standard with these latter base sizes.

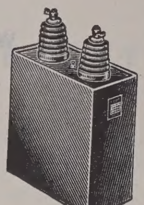
AEROVOX Paper Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

HIGH-VOLTAGE TRANSMITTER TYPE D.C. CAPACITORS

Type 20



6,000v. D.C. Work. to 50,000v. D.C. Work.

These capacitors meet the exacting requirements of radio transmitter service and other applications requiring high-voltage, heavy-duty, transmitter-type oil capacitors. Available in ratings from 6000 volts to 50,000 volts D.C. working. These are single-section or parallel-section capacitors. Type 20 units are critically checked to close standards of physical and electrical perfection. Capacitor sections consist of multi-layered capacitor tissues and high-purity aluminum foil, uniformly and accurately wound under critically-controlled tension, then vacuum-impregnated with Aerovox Hyvol to insure stability of full-rated capacitance, even at zero temperatures. Welded steel containers finished in non-corrosive, dark grey lacquer. Heavy-duty porcelain insulator assembly is cork-gasketed and pressure sealed to prevent leakage of oil or entrance of moisture at the terminals. Single-section units rated at 30 KV or less are normally supplied with capacitor section insulated from ground. Additional information on Type 20 units rated at 37,500 volts and 50,000 volts, as well as voltage-doubler units rated at 25,000 volts output is available on application.

All Type 20 units are built to special order—not carried in stock. Submit full application information when ordering.

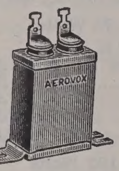
COMPACT HERMETICALLY-SEALED OIL-IMPREGNATED, OIL-FILLED "HYVOL" CAPACITORS

Type 16T

(Terminals on Top)



Compact, oil-filled, hermetically-sealed units for use where least space and minimum weight are essential. Corrosion-proof metal container. Special immersion-proof terminals designed for equipment subjected to severe atmospheric and climatic conditions. Suitable for by-pass and filter applications in receivers and low-power transmitters.

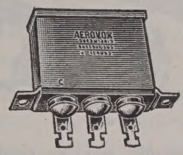
COMPACT HERMETICALLY-SEALED OIL-IMPREGNATED, OIL-FILLED "HYVOL" CAPACITORS

Type 18B

(Terminals on Bottom)



Compact, oil-filled, hermetically-sealed units. Type 18 is smaller in height and depth than Type 16. However, greater width makes Type 18 adaptable for applications where small-sized dual- and triple-section capacitors with three terminals are required. Otherwise, similar to Type 16 with respect to construction and application.

CUSTOM-BUILT PAPER CAPACITORS TO MEET YOUR SPECIAL NEEDS —

If your paper capacitor needs are most unusual, AEROVOX will work with you in designing and producing special types. With many basic types to draw upon—a wide choice of containers, terminals, mountings, sizes, etc.—we can quickly and economically produce out-of-the-ordinary capacitors to meet those extraordinary requirements. Address your inquiry to Aerovox Engineering Department, New Bedford, Mass.

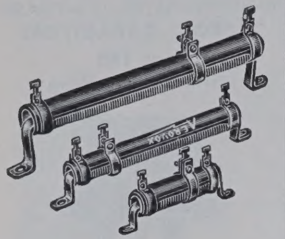
AEROVOX Vitreous-Enameled and Carbon RESISTORS

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

"SLIDEOHM" Wire-Wound Vitreous-Enameled ADJUSTABLE RESISTORS



Adjustable resistors combining adjustment to any resistance value within unit's range, with positive, permanent, non-fluctuating qualities of wire-wound resistor. Each Slideohm Resistor is provided with horizontal mounting brackets and one adjustable contact slider.

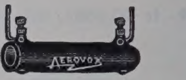
"PYROHM JUNIOR" Wire-Wound Vitreous-Enameled FIXED RESISTORS

Types 931 and 933



Compact, genuine wire-wound units. Covered with vitreous-enamel. Highest quality materials used throughout. Correctly designed. Note these features:

1. Crack-proof refractory tubing for the support. Adequate heat dissipation.

2. Quality resistance wire precisely space wound under tension.

3. Copper terminal band clamped to tubing. Wire ends wrapped about raised ear and brazed to same.

4. Heavy vitreous-enamel coating for permanent seal against moisture, oxidation and mechanical damage.

5. Pig-tail of stiff wire 2 in. long soldered to terminal band for positive, non-breakable connection.

Type 931—10 Watts

Size—Ins. $\frac{5}{16}$ x 1¾

INSULATED MOLDED CARBON RESISTORS

Types 1097 and 1098

Small, noiseless, vibration-proof. Crack-proof molded casing around molded carbon resistance element. Tinned copper pig-tail leads 2 in. long. Resists humidity effects. Ideal for AVC circuits, high-gain amplifiers. RMA color - coded; stamped with resistance value. Precision tested. Standard tolerance 10%. These types may come thru for some time in slightly larger sizes until complete changeover is achieved.

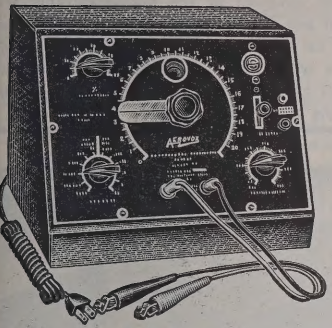
AEROVOX TEST INSTRUMENTS

AEROVOX CAPACITANCE AND RESISTANCE BRIDGE



Model No. 76
$44.75
Net, Each

AEROVOX MODEL 76 Resistance Capacitance Bridge is the new postwar general-utility instrument combining simplicity of operation, remarkable degree of accuracy, and modest price. Extreme ruggedness makes it equally suitable out on the job, in the shop, or in the laboratory.

Sloping panel 10″ x 6″. Aluminum, etched and anodized. Steel cabinet, black crackle finish. All readings taken from main 4″ dial. Same calibrated scale eliminates trouble and chances for errors in reading. Linear scale, also an exclusive feature, means no crowding at high end to make readings difficult and inaccurate. Both the resistance and the capacitance readings are covered by six overlapping ranges, as aginst two or three in usual service instruments, for maximum sensitivity and accuracy. Positive "magic eye" indicator.

Here is what Model 76 Bridge does: (1) Measures capacitance from 100 mmf. to 200 mfd. in six ranges. (2) Measures resistance from 10 ohms to 20 megohms in six ranges. (3) Measures power factor from 0 to 50%. (4) Provides D.S. polarizing potential for leakage measurements, from 0 to 600 V. D.C., continuously variable and calibrated in volts. (5) Checks leakage or insulation resistance.

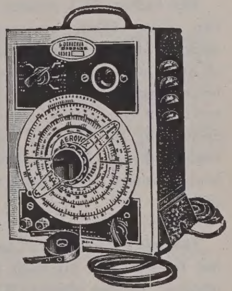
Instrument is provided with shockproof, color-coded test leads fitted with banana plugs for panel jacks, and with clips. Instructions. Measures 10″ x 7¾″ x 8¼″. Weight 8 lbs. 3 oz.

AEROVOX L-C CHECKER

★ This exclusive Aerovox development has no counterpart, much less an equal. Basically, it determines the effectiveness of any capacitance or inductance while actually connected in its circuit. Testing efficiency is greatly increased. Components may be tested singly or in combinations whereby to determine resonant frequency and effectiveness of given circuits. Circuit or systems may be adjusted by this checking means for proper operating efficiency. Certainly a "must" instrument for the radio worker.

HERE'S A PARTIAL LISTING OF WHAT THE AEROVOX L-C CHECKER DOES:

It checks capacitance of capacitors at radio frequencies without removing them from circuit. • It checks alignment of r.f. circuits; also tracking of super-het. oscillator. • It checks alignment of broad and narrow band i.f. amplifiers. • It checks the tuning of wave traps and of image-rejection circuits; frequency ranges of receivers; frequency ranges of signal generators; calibration of wave meter. • Identifies harmonics of frequency standard in precision frequency calibration of radio equipment. • It checks natural resonant points of r.f. chokes making sure they are beyond operating range. • It traces resonant absorption trouble in "all-wave" receiver circuits—locating dead spots, etc. • It locates resonant points in shorted windings (unused coils) in multi-range oscillators, etc. • Locates resonant frequency of r.f. coupling chokes, making certain of placement to secure enough gain balance over tuning range of r.f. stage • It checks natural period of antennae and transmission lines in order to have resonant peaks at certain frequencies. • It checks quartz crystals for frequency, false frequency, operation at harmonics, and for activity. • Checks FM i.f. transformers. • Checks alignment of FM i.f. channels. • Checks leakage of paper capacitors. And it checks many other functions when used with auxiliary equipment. This checker operates from AC or from DC 120 volts source. It has a frequency range from 100 KC to 44 MC as follows:



Model No. 96
$44.75
Net, Each

Range:	A — 75 — 225 KC	D —1.5 —5 MC
	B — 200 — 600 KC	E —4.5 —14.5 MC
	C — 550 — 1650 KC	F —13 —44 MC

Capacitance Range: .00025 mfds. — 1 mfd.

Inductance Range: 0 — 500 MH

Tube Complement: 6J5G, 25Z5, 6E5, VR105

Accuracy: Capacitance and Inductance ± 10%

Frequency Ranges A, B, C: ± 1%

Other Ranges: ± 2.5%

Dimensions: 10½ x 7½ x 5½

This new model L-C Checker has provisions for determining the insulation resistance of capacitors in addition to the measurements described in bulletin 995A.

Weight: (shipping) 6 lbs.

AEROVOX

Special-duty Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

P. S.

● This is a postscript. This page contains several new Aerovox products recently introduced and not as yet cataloged. These special-duty capacitors are of particular interest to advanced radio workers, builders of special equipment, experimenters and engineers.

Other new products are being announced from time to time. Aerovox engineering is keeping abreast of the rapid advances of the radio-electronic art. Therefore, if you do not see what you need in these pages, tell us about your unusual needs. Aerovox either has a type already developed and in production, or will consider an entirely new type if warranted by the anticipated demand.

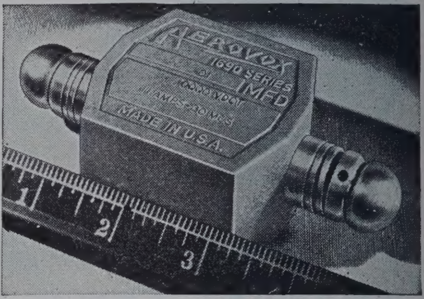
LOW-INDUCTANCE MICA CAPACITOR

AEROVOX SERIES 1690 is a molded-in-bakelite mica capacitor designed for exceptionally low loss operation at ultra high frequencies. External evidence of its efficiency is offered by the rounded hardware—round nuts, round washers and spherical lock nuts eliminating sharp edges and corners that cause corona losses. The use of fine threads for the terminal studs insures maximum contact and minimum r.f. resistance. Silver plating of all conducting members minimizes skin resistance. The body is of XM or yellow low-loss bakelite. Internally, the mica stack is designed for a straight-line path for high frequencies.

This type is several times larger than the conventional molded-in-bakelite transmitting micas. Body dimensions are 2⅜" wide x 2-3/16" deep x 1⅜" high, and 4¾" overall between rounded terminal tips.

Units are available in ratings up to 20,000 volts D.C. Test or 10,000 volts operating, and in capacitance values up to .001 mfd. at the highest voltage rating.

This type has been developed specifically for lower r.f. resistance and impedance, thereby providing increased KVA ratings for given size. Such units can be advantageously applied as blocking capacitors in transmission lines, as tank capacitors for high-frequency oscillators, as by-pass capacitors for ultra-high-frequency energy, and as coupling or by-pass capacitors in induction-heating circuits.



WATER-COOLED MICA CAPACITOR

AEROVOX SERIES 1780 water-cooled mica capacitor is available for extra-heavy duty service such as high-power transmitters and induction furnaces. The water-cooling feature boosts the KVA rating by a factor of five or more, or conversely, greatly reduces the bulk for given rating.

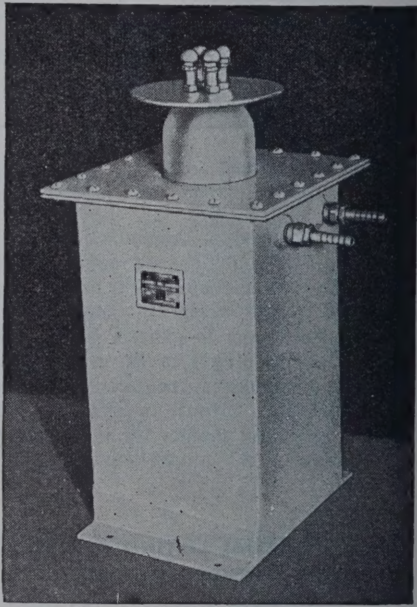
The higher KVA ratings are obtained in two ways: First, by exceptional design such as critical arrangement and location of mica sections; critical selection of materials; specially-plated parts; large cross-section of conductors; attention to details. Second, by the use of a water-cooling system so designed as to provide maximum heat transfer from capacitor to cooling coils.

The mica stacks are in an oil bath. Cooling coils in the oil bath provide for the efficient transfer of heat. What this cooling system means may be judged from the fact that a unit handling 200 KVA for air-cooled operations steps up to 1000 KVA with water-cooling.

The series-parallel mica stack is designed for uniform current distribution throughout. There is a large factor of safety. Silver-plated hardware minimizes skin resistance. Terminals are furnished with large radii of curvature to minimize and even eliminate corona. The steatite insulator is shaped to hold gradients below corona limits.

Heavy non-ferrous welded metal case, hermetically-sealed and grounded. Side-mounted nipples for connecting water-cooling hose. Sturdy mounting flanges. Provisions for making connections with high-current-capacity conductors. Four-stud terminal for low-loss connections.

Available in ratings up to 25,000 volts A.C. Test, and in capacitances up to .01 mfd.



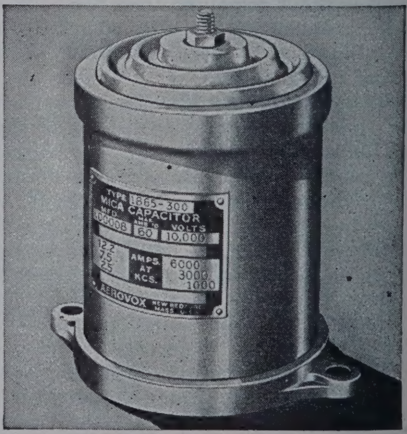
ULTRA-HIGH-FREQUENCY CAPACITORS

AEROVOX SERIES 1860 and 1865 are engineered and especially recommended for use in ultra-high-frequency radio equipment such as television and FM transmitter, as well as other miscellaneous applications in the u.h.f. field. In such applications they are readily adaptable for use as fixed-tuning capacitors, by-pass, blocking, coupling, neutralizing and antenna-series capacitors.

Losses are extremely low, due to the highly refined sulphur dielectric. Corona losses are avoided by the unique construction design, the grounded case and the terminal on each type.

Series 1860 (not illustrated) is the smaller unit in an aluminum can, intended more for the radio amateur and experimenter, and for low-cost assemblies. It has a suitably plated brass terminal mounted on a mica insulating plate. Available in four types: .0001 mfd., 10,000 v..; .000025 mfd., 10,000 v.; .00005, 5000 v.; .00005, 10,000 v. Voltage is Peak Working Volts.

Series 1865 (illustrated) is the larger unit, in a cast aluminum case with steatite insulator supporting the higher-voltage terminal. Available in capacitances from .00002 to .000125 mfd., at 10,000 v.



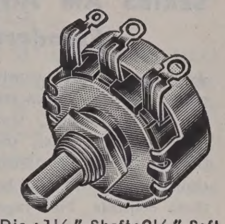
CLAROSTAT

SERIES "M" COMPOSITION-ELEMENT CONTROLS

★ Compactness—yet without sacrificing operating efficiency and long service life. Only 1⅛" dia. by $\frac{9}{16}$" deep (with switch, ⅞" deep).

Utilizes the exclusive Clarostat stabilized element, insuring the control's constancy in all weather and in all climates. Many years of painstaking research and experience are incorporated into the design of Clarostat Series "M" controls, assuring the user of the best results at all times.

The original Clarostat "Ad-A-Switch" feature makes it possible to adapt any of the Series "A" switches quickly to any M, AM, T and AT controls. Furthermore, for high-voltage television, oscillograph or other electronic circuits, the new Clarostat Series 60 High-Voltage Coupling Unit can be attached to all Clarostat controls (illustrated below) to assure safety at elevated voltages. The cost of this added feature is quite moderate. High-voltage couplers are installed at factory only.



Dia.: 1⅛". Shaft: 2⅛". Soft metal. ⅜-32 brass bushing.

SERIES "T" TAPPED CONTROLS

With the Original Ad-A-Switch Feature

★ There are many circuits in which the use of a tapped control affords special functional operation not possible or attainable with any other type of control. These standard units listed herewith permit replacement of tapped units with the assurance that the total overall resistance value as well as the taps satisfactorily substitute for the original.

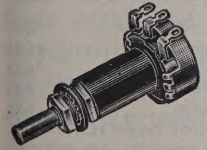
LIST PRICE $1.85 (Without Switch)

For Power Switch, see Series SW listed below.

Standard Packing — 10 (ten) per carton



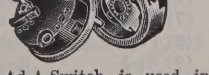
High-Voltage Coupler

Fitted to any Clarostat control, at factory, on special order.

Cat. No.		List Price
60-3-2	3,000 v.	$1.25
60-3-4	10,000 v.	1.85

THE ORIGINAL "AD-A-SWITCH" FEATURE FOR SERIES "M", "AM", "T" "AT" CONTROLS

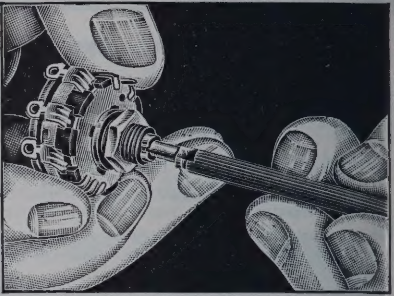
Cat. No.	Wiring	List Price
SW-A	Single-Pole Single-Throw	$0.60
SW-A1	Three-Way, No "Off" position S.P.D.T.	.75
SW-A2	Double-Pole, Single-Throw	.75
SW-A4	Four-wire (to control A, B and C voltages)	.75
SW-A5	S.P.S.T. (reverse action)	.75
SW-A6	S.P.S.T. with dummy lug	.75



Ad-A-Switch is used in place of usual dust-protection cover, and lugs bent over to hold it in place.

SERIES "AM" AND "AT" UNIVERSAL PICK-A-SHAFT CONTROLS

Standard and Tapped for Every Service Need



★ These universal controls are built to the same exacting specifications as Series "M" and "T". However, instead of having the usual integral shaft, these controls include the Clarostat "Pick-A-Shaft" feature whereby a choice of shafts may be used with any of these controls. This ingenious feature eliminates the stocking of special-shaft units. Instead, the Series "AM" or Series "AT" (tapped unit) takes the particular type of shaft desired by merely inserting such a shaft so that the spring washer snaps into the groove provided in the shaft.

One selected shaft furnished **FREE** with each Pick-A-Shaft control.

LIST PRICE **$1.85** (Without Switch)

Standard Packing—10 (ten) per carton.
For Power Switch, see Series "SW" listings on Page R-1.

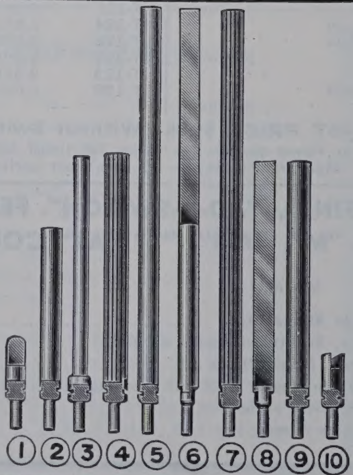
Choice of Pick-A-Shafts

★ A choice of Pick-A-Shafts (shown at right) covers all requirements, as follows:

Cat No.	Description
(1) SS-3/8" length	(Male) to take female fitting
(2) RS-2	Round shaft, 2" long
(3) RS-3/16" diam.	Round shaft, 3" long
(4) KSS-3	Knurled, split shaft 3" lg.
(5) RS-5	Round shaft, 5" long
(6) FS-5	Flatted shaft, 5" long
(7) KSS-5	Knurled, split shaft, 5" lg.
(8) FS-3	Flatted shaft, 3" long
(9) RS-3	Round Shaft, 3" long
(10) DFS-½	Double flatted Philco Type ½" long

List price of each shaft $0.30

One selected shaft furnished **FREE** with each Pick-A-Shaft control.



PICK-A-SHAFT SLIP DRIVE CONTROL (Clutch Type)

Available with your choice of Pick-A-Shaft

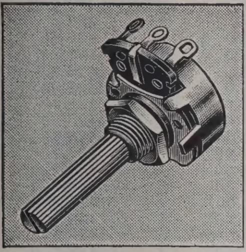
CLAROSTAT

MIDGET (15/16" dia.) CONTROLS



★ Yes, sir — Clarostat has it first — the smaller, handier $\frac{15}{16}$" control for tight spots. And it's a beauty. Note the trim lines. Nothing sacrificed by way of electrical and mechanical sturdiness and dependability. This is an entirely NEW control, developed from scratch, to meet the need of a more compact control of standard performance. Dimensions: $\frac{15}{16}$" diameter x 29/64" deep. With switch, 49/64" deep. ¼" long, ⅜-32 threaded bushing. Knurled shaft 1" long beyond bushing. Switch units attached at factory.

Cat. No.	Resistance	Taper	Cat. No. with Switch	LIST PRICE (no switch)	LIST PRICE (with switch)
15/16-64-Z	250,000 ohms	Audio	15/16-S-64-Z	$1.25	$1.85
15/16-60-Z	500,000 ohms	Audio	15/16-S-60-Z	1.25	1.85
15/16-63-Z	1,000,000 ohms	Audio	15/16-S-63-Z	1.25	1.85
15/16-66-Z	2,000,000 ohms	Audio	15/16-S-66-Z	1.25	1.85

Standard packing 10 (ten) per carton.

DUAL SERIES DC CONTROLS

★ The Series DC controls are dual units — two controls of the same resistance values and tapers, connected in tandem for joint operation.

Cat. No.	Panel Unit	Rear Unit
DC-34-S	10,000-S	25,000-S
DC-23-S	10,000-S	50,000-S
DC- 5-S	50,000-S	50,000-S

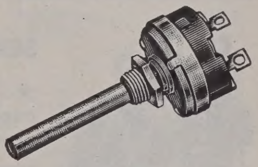
DC-29-S	250,000-S	250,000-S
DC- 8-Z	250,000-Z	250,000-Z
DC-10-Z	500,000-Z	500,000-Z
DC-11-Z	1,000,000-Z	1,000,000-Z

LIST PRICE $3.10

Standard packing—Individual carton

ROTARY SWITCHES



★ Compact, positive contact, bakelite molded and Underwriters' approved. Rated 1 Amp. 250 volt; 3 Amp. 125 volt. The physical dimensions of the switch are as follows:

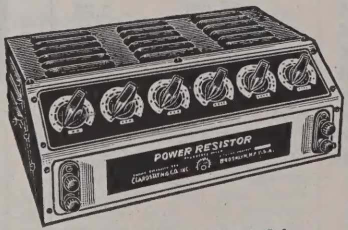
Diameter 1$\frac{3}{32}$", body depth $\frac{9}{16}$", lug protrusion ¼", locking projection on a $\frac{17}{32}$" radius, rotation for actuation 30 degrees.

All standard stock numbers have ⅜" bushing, 1½" length shaft, and one locking projection.

Cat. No.	Switch Description	List Price
8590	Single Pole Single Throw	$0.60
8591	Single Pole Bussing Lug	.75
8592	Double Pole Single Throw	.75
8593	Single Pole Double Throw	.75
8594	Single Pole Reversed Action	.75
8595	Four Wire Single Throw	.75

Standard packing 10 (ten) per carton.

POWER RESISTOR DECADE BOX



NET PRICE **$90.00***

★ A "Must" for Every Laboratory. Power resistance measurements under actual load conditions. Just imagine being able to obtain ANY VALUE OF RESISTANCE from 1 ohm to 999,999 ohms IN STEPS OF ONE OHM, and at a POWER RATING OF 225 WATTS using a maximum of 1000 volts DC (660 volts AC)!

Intended primarily for laboratory use and development engineering. Simplifies and expedites the selection of correct resistance values for given circuits and functions. These instruments are in daily use in laboratories, engineering offices, plants, maintenance and service departments, and in schools.

Finish: Heavy-gauge metal case finished in frosted gray wrinkle, with etched black-and-aluminum front panel.

Dimensions: 13 in. long; 8½ in. deep; 5¾ in. high. Weight, 11 lbs.

Suggested Uses: Resistance determination. Load Resistance. Meter Multiplier. Calibrating Meters. Providing any desired ohmage as a universal power resistor.

CLAROSTAT

SERIES 43 MIDGET WIRE-WOUND CONTROLS

★ A space-saving control of the wire-wound type. Similar in mechanical details and dimensions to the composition-element Series M control (page R-1). Precision-wound alloy wire on bakelite strip. Rotor sweeps over inside face of winding. Special lubricant for minimized frictional drag and wear. Molded bakelite casing—high resistance to leakage. Protective metal cover (as shown in illustration). Only 1⅛″ dia. Body Depth, $\frac{9}{16}$″; ⅞″ deep with switch. ⅜″ bushing. Shaft 1½″ long. All switches permanently attached at factory.

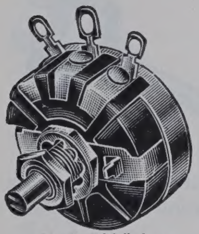
SERIES 58 WIRE-WOUND CONTROLS



Shaft 1½″ long.
⅜″ bushing.

★ Sturdy and reliable in construction yet capable of use for delicate control work, Series 58 Controls are without equal. Noiseless in operation, these units are standard equipment in laboratories, fine instruments, electronic equipment, and especially in the control rooms of radio stations and networks.

The switch is located to operate at extreme counter-clockwise rotation of the shaft. Moving element is insulated from mounting bushing and shaft, and is tested at 500 volts A.C. There is no danger of accidental shock or short-circuit.

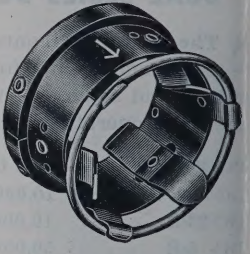
If power switch is desired, the type of switch must be specified (See page R-1). Order as 58S and add to list the price of switch selected. The S.P.S.T. switch is supplied as standard where no type is specified. All switches are permanently fastened to the control at the factory.

Standard packing — 10 (ten) per carton.

* These units are 1″ in depth and are the Clarostat Series 10.

BEAM BENDER



★ Simplicity and economy mark use of the Clarostat Beam Bender in connection with television cathode-ray tubes requiring some external means of controlling loose ions. Entirely self-contained. Applied without tools. Three spring fingers provide frictional yet adjustable fit on neck of usual 10″ tube. Permanent ring magnets provide magnetic flux proportional to required beam-bending function in the tube. Individually packaged. Cat. No. TV-1 — List Price **$3.00**

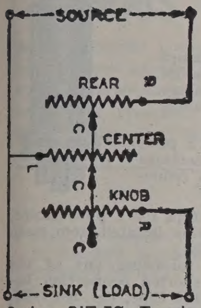
★ Most replacements for least parts stock! Fastest moving items. No duds. Every item a "must" in everyday servicing. Neatly packed in handsome green steel box with hinged top. Handy as filing cabinet, strong box, odds-and-ends box, etc. Contains 6 ballast tubes; 12 volume controls; 4 AD-A-Switches; 5 Greenohms; Dural Hand-D-Wrench; Authorized Service plaque; Data. A $30.15 value for only:
Kit No. 5 .... **$15.07 Net Cost***

CLAROSTAT



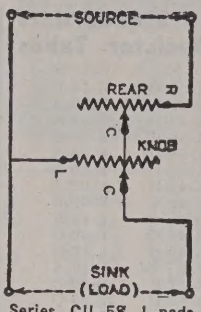
Series CIT-58 T-pads are connected as here shown.

CONSTANT IMPEDANCE CONTROLS

★ Self-compensating volume controls or attenuators known as L-pads and T-pads are essential in eliminating the distortion that arises from the mismatching of impedances in broadcast transmission, sound recording or public address systems. With Clarostat constant-impedance L-pads and T-pads the input and output impedances of associated equipment in a circuit can be kept within the limits of a constant required value.

These pads have a continuous range from 0.5 to 30 decibels attenuation in 90% of rotation, the last 10% affording infinite attenuation. Employable at either the source or the load in a circuit (see diagrams) these units are readily one-hole mounted. They afford a wide range of uses as mixers, faders, multiple-speaker controls, etc. Such controls can be used as individual volume controls for multiple-speaker systems, without affecting or changing the source impedance.

These units are rated at 2½ watts when used on DC or constant frequency signals. However, they have successfully been used up to 10 watts on audio circuits.



Series CIL-58 L-pads are connected as here shown.

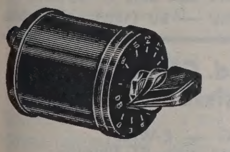
CONSTANT IMPEDANCE OUTPUT ATTENUATORS



db steps are 3, 6, 9, 12, 15, 18, 21, 24 and 30. Absolutely noiseless and distortionless in operation.

★ Developed to meet the need for a constant-impedance attenuator capable of handling considerable power without measurable insertion loss, Series CIB attenuators provide linear attenuation with ample power-handling capacity.

These units are rated at 10 watts when used on DC or constant frequency signals. However, they have successfully been used up to 30 watts on audio circuits.

Compact, capable of safely handling the rated wattages at any setting of the dial, these units are recommended as an output level control for power amplifiers or as an input attenuator for individual or group speakers in a public address system. Linear attenuation is provided in steps of 3 decibels up to 30, with final step to infinity.

Unit is furnished in black baked-enamel metal casing, 2″ in diameter by 2¾″ long, equipped with dial plate and bar knob. Not available with power switch. One-hole mounting ⅜″ diameter bushing. Shaft 1″ long.

★ Clarostat developed and pioneered the tube-type resistor for voltage-reducing purposes and for supplying needed voltage for pilot lamp operation in AC-DC receivers. Strictly non-inflammable, with the resistance element wound on a mica form firmly secured in the metal tube and connected with the base prongs, the Clarostat construction is notably superior to others.

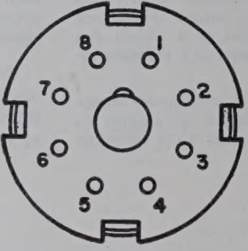
To simplify servicing of receivers using tube-type resistors, Clarostat has selected the most popular values for so-called Universal numbers serving most replacement needs. Standard resistor tubes of the most popular types are also listed below.

In connection with listings, the following nomenclature applies: Prefixes: K denotes 6.3 volt 150 ma. No. 40 pilot lamp.

L denotes 6.3 volt 250 ma. No. 46 pilot lamp.

M denotes 6.3 volt 200 ma. No. 51 pilot lamp.

The numeral indicates total voltage drop across resistance unit.



Suffixes designate:
A—No pilot lamp taps.
B—1 pilot lamp tap for 1 lamp.
C —1 pilot lamp tap for 2 lamps.
D —2 pilot lamp taps for 2 lamps.
E —3 pilot lamp taps for 3 lamps.
E1—1 pilot lamp tap for 3 lamps.
F —1 pilot lamp tap for 1 lamp.
G —1 pilot lamp tap for 2 pilot lamps. (Tapped sections isolated from main reducing body.)
H —2 pilot lamp taps for 2 pilot lamps. (Tapped section isolated from main reducing body.)

The letter "J" following any of the suffixes denotes a shorted connection between 2 prongs of the tube, i.e., K-67-BJ, the short is located between Nos. 3 and 4 prongs.

Care must be exercised when replacing any tube whose number ends in "J", as the shorted pins are not always as in above example. Some are betwen Nos. 6 and 7 prongs, and others between 5 and 3.

When replacing any plug-in resistor tube with a Clarostat Universal type, note prongs missing on replaced tube and cut off corresponding prongs on the Universal Replacement tube.

The numeral indicates total voltage drop across resistance unit.

UNIVERSAL RESISTOR TUBES

Universal Tube No.	Replaces AC-DC Tubes Beginning with Letters	Having Numbers From	Ending in Letter
10*23-A	BK, BL, K, L, M	10 to 23	A, B, C, D
10*23-E	BK, BL, K, L, M	10 to 23	E

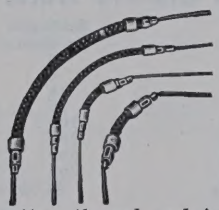
TELEVISION BALLASTS

*17A470303 for Motorola Television **Set No. VT-71. List Price $3.00**

397021 for Emerson Television **Set No. 571-606. List Price $3.00

★ This Emerson ballast tube is used as a protective resistor and any internal failure in the circuit may cause this unit to burn out and therefore this unit is expendable.

Standard Packing — 10 (ten) per carton



GLASOHMS*

Glass-Insulated Flexible Resistors

★ This is a new development in resistors which has found instant acceptance in widespread applications.

Glasohms consist of a wire winding on a fibreglass core, with a covering of braided fibre-glass, Each strand of glass is no thicker than usual cotton thread and just as flexible, so that the complete units can be bent or twisted and even knotted without breakage or weakening. Clarostat is the only manufacturer of Glasohms. These units are ideal for resistance boxes, attenuators, voltage-dividers, multipliers, step-by-step rheostats, and for use in point-to-point wiring jobs. Handy, inexpensive and very durable, these units can withstand heavy overloads without damage. There is nothing in them to burn or char. Glasohms are also suitable for use as miniature heating elements serving in hair curlers, immersion heaters, soldering irons, electrically-heated ovens for crystal oscillators, etc., especially in longer lengths obtained on special orders.

*Registered trade-mark.

Standard Glasohm Resistors

AUTOMATIC LINE VOLTAGE REGULATORS

★ To maintain constant line voltage and thus prevent burning out the tubes of a radio receiver or other tube-using device, this handy unit, operating effectively on 110-volt A.C. or D.C. by simply plugging into the usual socket or outlet, safeguards against line voltage surges or increases even up to 140 volts. At the normal 110-volt, the resistance of the unit is low and the voltage drop across it is negligible. However, as the line voltage increases the resistance of the unit increases proportionately, with a constant increase in voltage drop across it. This automatic voltage control or ballast action insures a steady, practically constant and always safe operating potential.

Dimensions are 1¾″ dia. x 1¾″ long.
Prongs ⅝″ long.

Type No.	Rating Watts	For Use With Sets Consuming	No. of Tubes Used

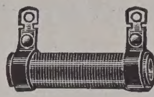
CLAROSTAT

FAMOUS GREENOHMS — WIRE-WOUND FIXED POWER RESISTORS

★ The toughest power resistors made. Will dissipate heat without change in resistance value. Will withstand heavy overloads, humidity, high-heat, and severe heat shock (frequent on-and-off operation). Due to the exclusive CLAROSTAT inorganic-cement coating, these resistors can be given the toughest assignments and will come through with flying colors. Greenohms are found in the finest electrical, radio and industrial assemblies — in equipment that must stand up — for functions where failure cannot be tolerated.



SERIES PR-5-F—5-WATT

Dimensions: $\frac{5}{16}$" dia. x 1" long.

The baby member of the famous Clarostat Greenohm family. Available in standard resistance values from 1 ohm to 7500 ohms (See exact values in listings for Series AC-10-F up to 7500).

All ohmages ....List Price $0.50
Standard Packing — 10 (ten) per carton.

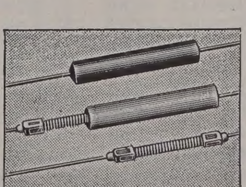
GREENOHM JR. WIRE-WOUND RESISTORS

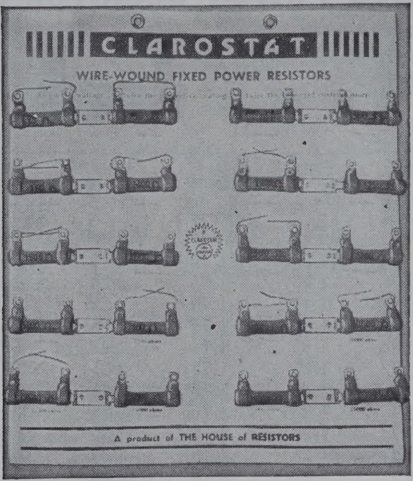
★ Handy, inexpensive, ceramic-cased midget wire-wound resistors for tight spots, especially with point-to-point wiring. These tiny resistors take the place of more cumbersome and costlier bracket-mounted units. This "junior" version of the well-known Greenohm power resistors features a wire winding on fibre-glass core, 1½" axial pigtail leads, and a steatite protective casing sealed with exclusive Greenohm cold-setting inorganic cement. This resistor will not blister, crack, or change shape. Type C7GJ, 1¾" long by $\frac{5}{16}$" dia., rated at 7 watts. Smaller Type C4GJ, 1" long by $\frac{5}{16}$" dia., rated at 4 watts. In characteristic Greenohm green, with printed values on casing.



Cat. No.		List Price
Type C7GJ	(1 to 5000 ohms)	$0.55
Type C4GJ	(1 to 1000 ohms)	.55

CLAROSTAT

FAMOUS GREENOHMS - WIRE-WOUND ADJUSTABLE POWER RESISTORS



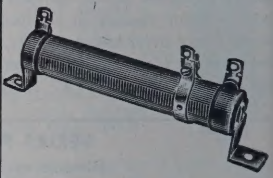
CLAROSTAT
WIRE-WOUND FIXED POWER RESISTORS
A product of THE HOUSE of RESISTORS

★ These power resistors feature the exclusive Clarostat inorganic cement coating and are similar in rugged construction to the fixed types on page R-7, except for the bared section of the winding contacted at any ohmage by the adjustable slider band. This band is permanently locked in place at the required resistance value by simply tightening a screw.

GREENOHM KIT

★ Here's a simple means of keeping 20 of the most popular 10-watt power resistors always at your finger-tips. Each Greenohm is held by metal clip on the wall chart. Slide off unit and value appears on wall chart, for handy reordering.

Cat. No. GK-1..........LIST PRICE **$11.00**



DIMENSIONS

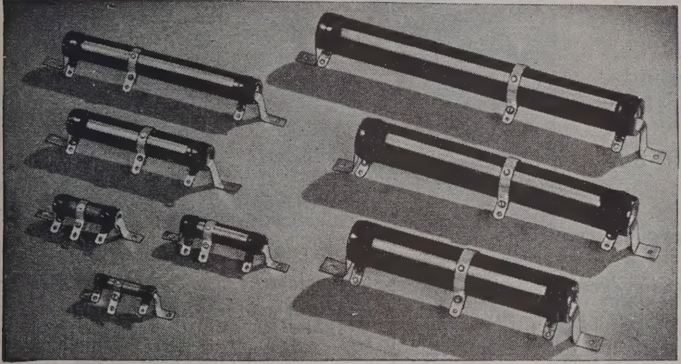
All resistors furnished with mounting brackets at no extra cost.
Standard Packing — Indiviually Boxed.

LECTROHM *Vitreous Enameled* RESISTORS

Quality—Accuracy—Dependability—Long Life



WIRE WOUND ADJUSTABLE TYPES

The same high quality and construction are used for LECTROHM Adjustable Resistors as are incorporated in LECTROHM fixed units.

These resistors are used for replacing voltage dividers in radio receivers, for radio transmitter power supply, and for general experimental work.

LECTROHM *Vitreous Enameled* RESISTORS

Quality—Accuracy—Dependability—Long Life

WIRE WOUND—FIXED TYPES

LECTROHM Resistors are manufactured from the highest quality materials obtainable and are rated according to R.M.A. standards. LECTROHM Resistors are rugged—dependable — accurate — quality components that will give long trouble-free service. (Mounting brackets available for 20, 50, 80, 100, 160 and 200 watt units.)

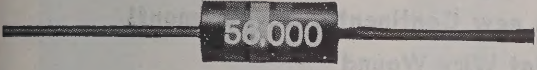
CONTINENTAL RADIO Certified COMPONENTS CARBON INC

"CARBOMITE" M-TYPE RESISTORS

(Actual size as Illustrated)

M1-1 WATT



M2-2 WATT

M½-½ WATT

- **Meet JAN-R-11 Army-Navy Specification**
- **Low Noise Level; Low Voltage Coefficient**
- **Stamped With Value**
- **Extra Small Size**
- **High Insulation 1000 volt Breakdown**

Continental's New "CARBOMITE" bakelite insulated carbon composition resistors are now the standard of Electronic components used in the Radio and Electronic Industries. They meet all specifications of the joint Army-Navy-Jan-R-11 including the toughest of all tests the "Salt water immersion cycling." The "CARBOMITE" M type resistor consists of a solid molded carbon core, outer molded bakelite insulated shell and molded in leads. These resistors being well insulated can be mounted side by side or against any metal surface without shorting or grounding. They are recommended where space limits and insulating quality require a rugged reliable and small resistor capable of withstanding severe service. The lead wires are straight and are tinned with a tin composition heavy enough to give instant soldering with the touch of the heated soldering iron tip. The resistor values are easily identified by the bright non-rubbing off color code bands and the white ink stamped numbers of the value on the body of the resistor.

The M2-2 watt, M1-1 watt and the M½-½ watt are made in all the standard preferred RMA values as listed in the table below and are packed in quantities of 10 or 50 of each value to the box. Order in these quantities or multiples thereof.

Type	Size	List Price 5%	Tolerance 10%
M½	⅜" x $\frac{9}{64}$" Dia.	$0.33	$0.17

- **Heavy Duty Carbon**
- **Operate safely on overloads**
- **Non-inductive**

The D-Type resistor with radial leads is made with solid molded carbon rods, copper sprayed on the ends to which are soldered No. 18 copper tinned leads. The soldered contact construction insures a noise-free and stable resistor. They are known as the heavy duty type units because of their size—having a larger radiating area they operate safely on overloads. A baked-on insulation is a protection against shorts to subpanel and wiring.

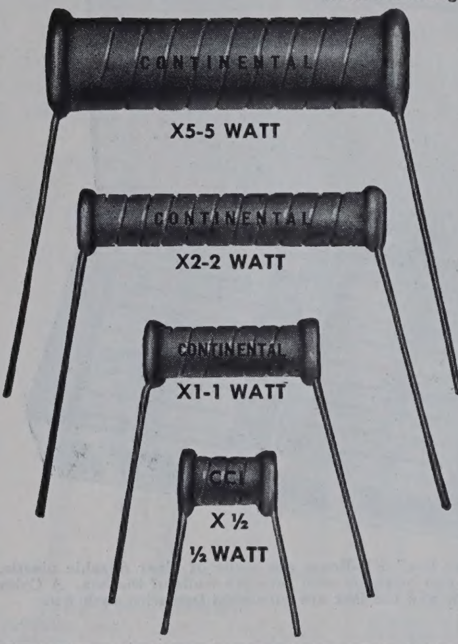
Type	Wattage	Size	List Price Tolerance ±5%	±10%
D 3	3 Watt	2" x ⅜"	$0.60	$0.40
D 4	4 Watt	2½" x ½"	.75	.50
D 5	5 Watt	3" x $\frac{9}{16}$"	.80	.60
D 5ST2*	5 Watt	3" x $\frac{9}{16}$"	1.25	1.00

*D5ST2 units have heavy copper eyeletted and soldered strap terminals ⅜" wide with holes of 2$\frac{9}{16}$" spacing. The outer holes can be used with either 6-32 screw mounting or solder wire loops, while the inner holes are for 8-32 screw mounting. The outer section of the terminal can be cut off or bent to any angle desired.

PRECISION RESISTOR

"Nobleloy" X-Type Resistors

Trade Mark Reg.



- **A new Continental Development!**
- **Not Wire Wound**
- **Not carbon!**
- **Stability of Wire Wound and Equivalent**

After several years of research work CONTINENTAL e gineers have developed a new resistor involving the meta film principle, having the accuracy of a wire wound uni Absolutely no carbon whatever is used in the fabrication o these resistors. The metallic resistance film is formed on th surface of a low loss ceramic tube using a patented pyr chemic process.

The metal film thus formed is hermetically sealed by a laye of vitreous enamel specially developed and patented by CON TINENTAL. The ceramic tube with its associated film is the spiralled to give a long resistance path and to accuratel calibrate the unit to value.

Since the ceramic tubes are hollow they allow a large surface for heat radiation, thus permitting the resistor t withstand overloads of 200% or better.

The copper-tinned lead terminals are soldered to extremel low resistance metal contact films which in turn are integra with the resistance film, thereby reducing contact resistanc to a minimum. This type of construction produces a resisto unit having not only excellent resistance stability but also negligible noise characteristic.

ELECTRICAL CHARACTERISTICS OF CONTINENTAL "NOBLELOY X" TYPE RESISTORS

Voltage

The recommended voltage rating of Continental "NOBLELOY X" type resistors is the maximum r.m.s. voltage which the resistor is expected to withstand in continuous use and is determined from the formula: $E = \sqrt{WR}$ Where E = rated D.C. or r.m.s. A.C. Voltage, W = watts rating, R = resistance.

In no case shall the D.C. or r.m.s. A.C. voltage be greater than the maximum voltage shown in the table.

Load Characteristics

Irrespective of value, Continental "NOBLELOY X" type resistors will not change more than 5.0% when the load is increased from 2% of rated wattage to 200% of rated wattage, and on cooling to room temperature returns to the original value. This is practically the temperature coefficient effect.

Voltage Characteristics

Voltage coefficient does not exceed $\frac{1}{10}$ of 1%.

Normal Load Life Characteristics (All Values)

The permanent change in resistance will not be more than 1.0% when the resistor is subjected to a normal life test of 1000 hours.

Overload Life Characteristics (All Values)

The permanent change in resistance will not be mor than 2.0% when the resistor is subject to 200% o rated wattage for a period of 1000 hours.

Temperature Coefficient (All Values)

The temperature coefficient of resistance will no exceed 0.0005 (.05 per degree Centigrade) Negativ

Humidity Characteristics (All Values 1.0 Ohm to 1 Megohms)

Continental "NOBLELOY X" type resistors will no change more than 1.5% when conditioned in an at mosphere of 100% relative humidity at 40°C. ambient for a period of 1000 hours.

Shelf Life

When stored under normal conditions, the resistanc will not change more than 0.1% during a period o 2000 hours. This is a negligible change.

Noise Characteristic

When tested for noise according to standard R.M.A procedure, the inherent noise level will not excee ¼ microvolt per volt, irrespective of resistance valu This level is equal to wire wounds.

Finish

All "X" type resistors possess a smooth, unifor coating of a special rubberized enamel capable o resisting deterioration up to and including 400°F

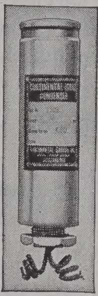
FILTERNOYS Paper Condensers

EE TYPE



IE TYPE

CONTINENTAL Carbon Model E condensers are high quality, paper dielectric capacitors built in shapes and sizes equivalent to electrolytic capacitors commonly found in radio receivers. They are flash tested at 3 times their d.c. working voltage and have the advantage of low power factor at 60 cycles. They are non-inductive, non-polarized, and are of permanent capacity. No active chemicals are used which could cause corrosion of the foil or leakage. The tabulations below show the actual capacity in microfarads and the rated sizes of electrolytic condensers occupying the same dimensions. Recommended for use on d.c. and rectified a.c. only. Model E, d.c. working volts, 600; peak volts, 1000.

FILTERNOYS F02GH

Most Popular and Universal Plug-in Type FOR ELECTRIC RAZORS

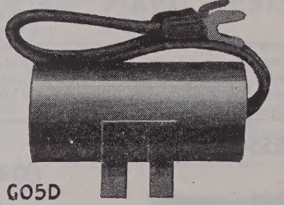
SUPPRESSION TYPE

Handy plug-in type suppressor with two r-f chokes, two condensers, and a ground lead for use on electrical devices of 300 watts or less, creating interference of intermitten or temporary character, such as a sewing machine motor, small electric washing machines, electric shavers, drink mixers, cash registers, adding machines, or electric typewriters. Size 2⅝" by 1⅜" diameter. 300-Watt capacity on 120 volts, a.c. or d.c.

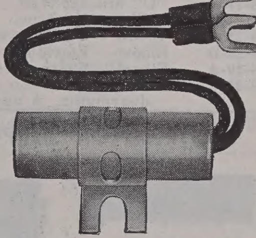
Filternoys F02GH..................List Price $2.00

FILTERNOYS G05D, G01D

Designed to Be Mounted Directly on Small Electrical Devices



G05D



Filternoys G05D has two 0.5 Mfd. condensers, one connected to each lead and the other ends grounded to the can at a common point. This Filternoys can be connected across each pair of brushes of generators, motors and the line wires of all stationary electric devices. Rating: 115-230 Volts a.c. or d.c.

G05D—Size 2¼x1, List Price $1.50

Filternoys Diverter G01D—Dual capacitors in a grounded container for any size electric motor operating on 120 v. or less. Through making use of the field coils as chokes, this is a most effective method to silence a noisy a.c. or d.c. motor. Size 1⅞" x ⅝" diameter. Shock Proof.

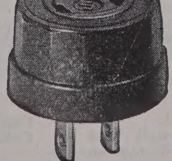
G01D....List Price $0.75

Oil Burner Suppressor

Filternoys Suppressor OB15, carbon element type, intended for use only with the high tension spark ignition of oil or gas burning heating systems. Must be connected in series with each line to the spark gap. Size of the suppressor 3½" x ¾" diameter. Universal connections at both ends for solderless contact.

OB15...............List Price $1.80

FILTERNOYS F18



Filternoys Diverter F18 is a compact 0.1 mfd capacitor in a conveniently small bakelite plug-in coupler for use across domestic power lines in which the neutral wire is grounded. The capacitor diverts interference from the high potential side of the power line to the grounded neutral side. Use on floor or table lamps, cigarette lighters, and the radio.

F18..............List Price $0.75

SUPPRESSORS SUPPRESSOR

ALL SPARK PLUG SUPPRESSORS AND DISTRIBUTOR SUPPRESSORS EACH LIST PRICE $0.30

CONTINENTAL SUPPRESSORS have been subjected to years of laboratory development and actual road service. They effectively remove noise interference from spark discharge at the plugs and high-tension distributor—yet do not in any way affect the motor car ignition system.

They have mechanical strength to stand the most severe service. The resistance value of 10,000 ohms has been scientifically determined. Sparking across the terminals is eliminated by careful shaping of the electrodes and cases.

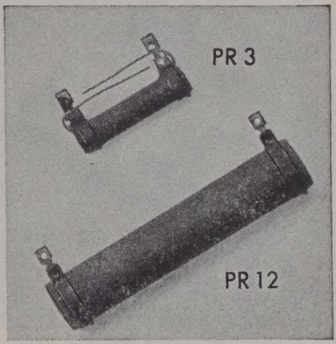
WIRT WIRE WOUND FIXED RESISTORS

WIRE WOUND FIXED RESISTORS



To satisfy the most exacting needs of the Radio and Electronic Industries, Wirt Fixed Wire-wound Resistors are regularly furnished in PHENOCOTE protective coatings, developed and steadily improved over a period of many years in the Wirt Laboratories. The resistor wire is space wound on low loss ceramic tubes. The PHENOCOTE covering is an exclusive organic cement coating offering maximum protection to the resistance winding against the detrimental effects of moisture, humidity and electrolysis. Absolutely inert chemically, it will not effect the most delicate windings. It is particularly recommended for fine wire sizes and all applications where the maximum temperature of the unit will not exceed 300° F. These Resistors are universally used in the Radio, Electronic, Instrument, Public Address and Test Equipment fields.

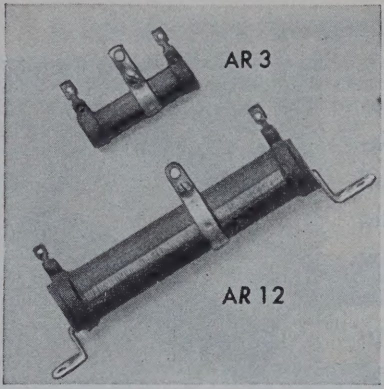
WIRT

WIRE WOUND ADJUSTABLE RESISTORS



WIRE WOUND ADJUSTABLE RESISTORS

WIRT Adjustable Resistors are space wound on low loss ceramic tubes to which the resistance wire is bonded, resulting in dependability and long life. Protection of the windings is afforded by the PHENOCOTE covering which is described fully on the preceeding page. One adjustable Slider Band, screw driver type, is furnished as standard. Bakelite knob type bands can be furnished on special order at slightly higher prices as shown below. These bands are made with small contact buttons located on the inside of the band so that a number of taps may be made without shorting out excessive resistance.

TABLE OF SPECIFICATIONS OF ADJUSTABLE RESISTORS

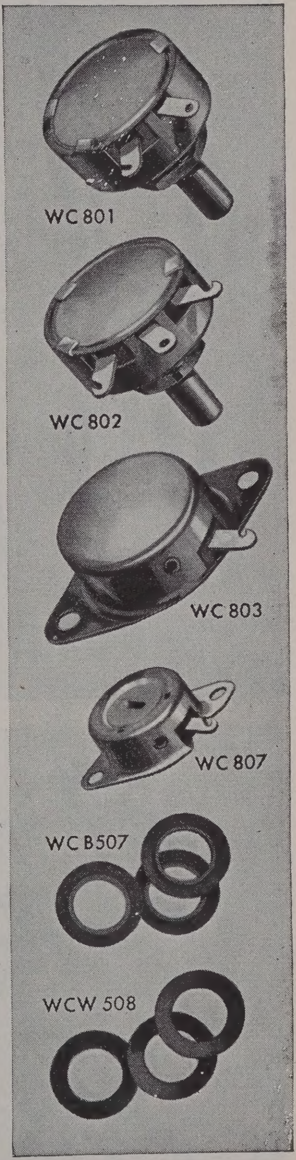
WIRT MINIATURE RHEOSTATS and POTENTIOMETERS

MINIATURE RHEOSTATS AND POTENTIOMETERS



General: WIRT Metal Housed Rheostats and Potentiometers are rugged and compact affording high quality and dependability in operation. Due to size and construction these controls are moderately priced. Housings are made of tin-plated steel. Highest quality resistance wire is space wound on specially treated laminated phenolic strips. The Phosphor Bronze contact-arm is grounded to the metal casing and all terminals are silver plated. Switches cannot be furnished. These Rheostats and Potentiometers are adaptable to a wide variety of uses in the Radio Instrument, Electronic and Test Equipment fields. The types available are listed below:

Cat. No. WC801—Two Terminal Rheostat, 2 Watt rating. Resistance Range: 5 ohms to 10,000 ohms with linear winding and standard tolerance of ±15%. Diameter is 1⅛″ and thickness ½″. Shaft is Cadmium plated steel, grounded to housing. 5/32″ from end of bushing and slotted for screw driver adjustment. Brass mounting bushings, ⅜″-32 x ¼″ long are standard. Each control is equipped with one 9/16″ hex mounting nut. **List Price**........ **$0.90 Each**

Cat. No. WC802—Three Terminal Potentiometer. 2 Watt rating. Resistance Range: 5 ohms to 10,000 ohms with linear winding and standard tolerance ±15%. All other specifications are the same as those listed under the WC801 control shown above. **List Price**........ **$1.25 Each**

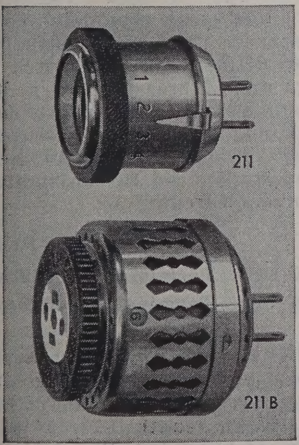
Cat. No. WC803—Sensitivity Control, 2 Watt rating. Resistance Range: 5 ohms to 12,000 ohms with linear winding and standard tolerance of ±15%. Diameter is 1⅛″ and thickness is ½″. A slot is provided in the Rotor mechanism allowing for screw driver adjustment from front only. **List Price**........ **$0.50 Each**

Cat. No. WC804—Sensitivity Control. Identical with WC803 Control, except provided with an opening in back of control to permit screw driver adjustment from either front or back. **List Price** .... **$0.55 Each**

Cat. No. WC807—Miniature Sensitivity Control, 1.5 Watt rating. Resistance Range: 5 ohms to 3000 ohms with uniform winding and standard tolerance of ±15%. A slot is provided in the Rotor mechanism allowing for screw driver adjustment from either front or back. **List Price**........ **$0.50 Each**

Cat. No. WCB507—Insulating Bushing for ⅜″ Brass bushing and used with Cat. Nos. WC801 and WC802 Controls. **List Price**........ **$.095 Each**

Cat. No. WCW508—Insulating Washer for ⅜″ Brass bushing and used with Cat. Nos. WC801 and WC802 Controls. **List Price**........ **$0.075 Each**



VARIABLE VOLTAGE REGULATOR

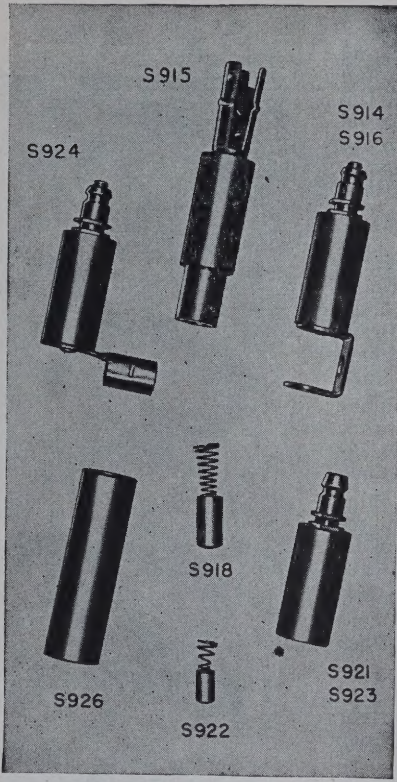
Cat. No. 211 — Variable Voltage Regulator is wound with high quality alloy wire on an insulated metal core with the winding encased in Di-El-Ite. It can be used as a Radio Voltage Regulator where the Receiver draws not more than 65 watts. For industrial use it can be wound up to 600 ohms maximum and will dissipate up to 8 watts. It is adjustable to 5 positions.
List Price .... **$3.00 Each**

Cat. No. 211-B—Regulator has air-cooling features which promote rapid heat dissipation. When used as a Radio Voltage Regulator the Receiver must not draw more than 150 watts. In industrial use for control of voltage and to regulate speed or heat it can be wound with a maximum resistance of 300 ohms and can dissipate up to 20 watts with maximum resistance setting. It is adjustable to 8 positions. **List**...... **$5.00 Each**

UTILITY CABINET

Cat. No. UC—Utility Cabinet is constructed of bass wood with corners dadoed and glued for strength; varnished and rubbed to give a beautiful finish. It has six drawers, each one having three removable partitions. The upper five drawers are 1″ deep and the lower one is 1½″ deep. Overall dimensions of the cabinet are 7″ wide by 5⅝″ deep by 9″ high. Drawer guides, bottom and partitions are made of three ply laminated wood to prevent warping. Knobs are of wood and securely fastened. It is ideal for the storage of such parts as resistors, condensers, bolts, nuts, washers, small tools, etc. **List**.......... **$8.00 Each**

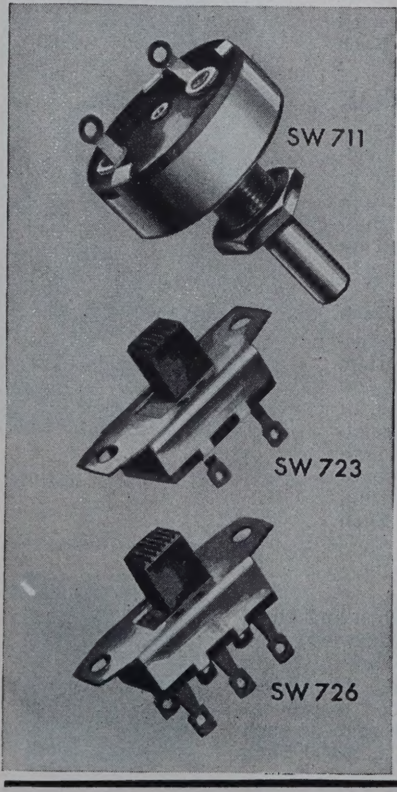
WIRT SUPPRESSORS and SWITCHES



AUTO RADIO IGNITION SUPPRESSORS

Wirt Suppressors are made with moulded black bakelite housings. All metal parts are made of rugged unfinished brass. Terminals are securely fastened to casings and sealed with special moisture and neat resisting dielectric cement. Resistor pills are sprayed with zinc and then double impregnated with a special moistureproofing compound. Resistance value of all standard types is 10000 ohms ±20%; for FV8 types 50000 ohms ±20%. The distributed capacity is less than 1.5 mmf. Resistance values will not change more than 7% after being submerged in water for 100 hours. Test by sparking 1800 times per minute at 10,000 volts for 100 hours produces resistance change of not more than 3%. Wirt Suppressors are impervious to heat, oil, moisture and mild acids, and will not change in resistance more than 10% in 50,000 miles of operation.

Cat. No.	Type	List Price
S914	Bracket—Standard	$0.30 Each
S916	Bracket—For FV-8	.30 Each
S915	Distributor—Slip Fitting	.30 Each
S918	FV-8 Brush—Years 1933-34-35	.30 Each
S922	FV-8 Brush—Years 1936 to 1940	.30 Each
S921	Universal Screw—Standard	.30 Each
S923	Universal Screw—For FV-8	.30 Each
S924	Snap-on Plug	.30 Each
S926	Cable—Screw Fitting	.30 Each



WIRT ROTARY AND SLIDE SWITCHES

Rotary Switches

General: Wirt Rotary Switches are of the quick break type, have positive contact, are rugged and neat in appearance. They are constructed with tin plated steel housings. The outside diameter of the switch is 1⅛" and thickness ½". Standard bushings are of brass, ⅜"-32 x ⅜" long. Steel shafts are ⅝" from end of bushing, and made with a flat. Wiping contacts and terminals are silver plated. Terminals are securely fastened in place. Activating spring is positive in action. One 9/16" hex. nut is furnished. These switches are successfully used in conjunction with Radio, Phonograph, Signal and Instrument Circuits.

Cat. No.	Type	List Price
SW711	SPST Rotary Switch, 3A-125V-AC-DC 2 Terminals	$0.90 Each
SW711A	SPDT Rotary Switch, 3A-125V-AC-DC 3 Terminals	1.00 Each

Slide Switches

General: All Wirt Slide Switches are compact and sturdy. Housings are made of steel and are cadmium plated. The physical dimensions of the switches have been standardized, width 35/64", length 1-13/32" and mounting centers 1⅛". Standard buttons are of black bakelite. All contacts and terminals are silver plated. Switches SW723 and SW725 are supplied with a dot which indicates the "On" position. These switches are used in the Radio, Signal, Phonograph and Instrument industries.

Cat. No.	Type	List Price
SW723	SPST Slide Switch, .75A-125V-AC-DC, 2 Terminals	$0.31 Each
SW724	SPDT Slide Switch, .75A-125V-AC-DC, 3 Terminals	.37 Each
SW725	DPST Slide Switch, .50A-125V-AC-DC, 4 Terminals	.44 Each
SW726	DPDT Slide Switch, .50A-125V-AC-DC, 6 Terminals	.55 Each

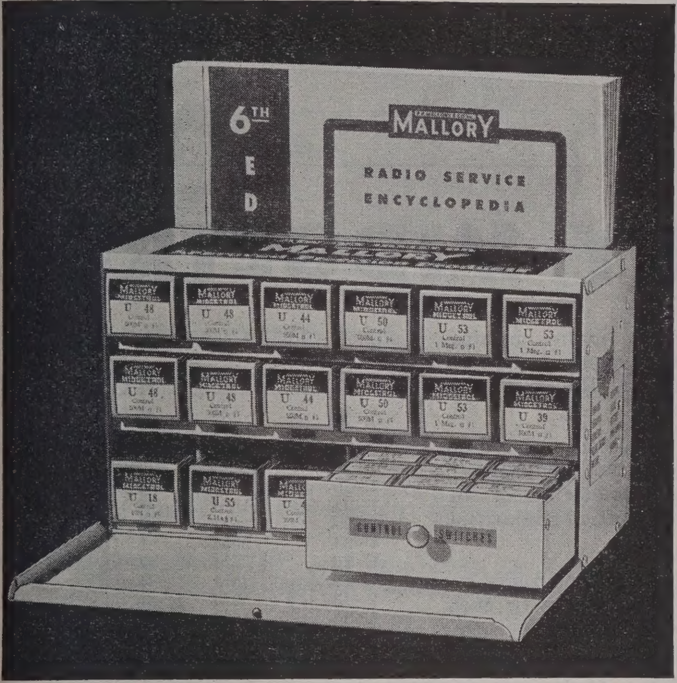
MALLORY CONTROL DEALS



You Get This Cabinet at no Extra Cost When You Purchase the Controls and Switches at Your Regular Discount

● Treat yourself to a neat, heavy-duty stock cabinet, and simplify your inventory at the same time, with a Mallory Control Deal! Here's how:

You buy a carefully selected assortment of 15 fast-moving controls and 9 popular AC switches *all at your regular price.* Then, you get the handsome steel cabinet shown above *at no extra cost to you!* This cabinet contains 15 compartments for your controls, and a roomy drawer to hold your switches, extension shafts, idler pulleys and other accessories. A special built-in rack holds your Mallory Radio Service Encyclopedia which is purchased separately. And a hinged lid snaps shut to hold the controls in place during service calls.

When you use a Mallory Control Deal you get maximum coverage with minimum stock. In more than 9 out of 10 service jobs you will have *on hand* the control you need. And you can see at a glance which controls you immediately need to re-order.

Best of all—the revolutionary new Mallory Midgetrol is now available in a Mallory Control Deal. And a Mallory Midgetrol improves performance in *any* set where a 1⅛" control was originally used. With your Mallory Midgetrol Deal you get, in addition to the cabinet, extra spring clips, extra U-clips, extra idler pulleys and extra extension shafts. Get started today with the Mallory Midgetrol. Order your deal today!

THE MALLORY MIDGETROL

APPLICATION: For volume and tone control in audio circuits. Tapped controls provide tone compensation when required. Special controls are for use as recommended in the Mallory Radio Service Encyclopedia.

DESCRIPTION: A very small diameter control (15/16) to service radio sets requiring small parts. Available in full line of resistances, tapers, and taps. Special resistance element gives ample safety factor for current-carrying ability. New type contact makes control smoothest and quietest on market by laboratory tests.

SHAFT DESCRIPTION: New Type flat shaft easily cut to any required length with a pair of side snips. Clips furnished with each control permits its use with all three knob types—Set Screw, Push-On, and Knurled.

ACCESSORIES: One hex nut, one lock washer, one U-clip and one spring steel clip furnished with each control. Idler pulleys, extension shafts and AC switches are available when needed as listed hereon.

PACKAGING: One control plus accessories and complete instructions in each display carton.

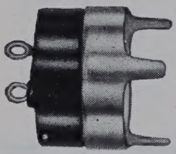
Attachable Mallory Midgetrol Switches



Entirely designed and manufactured by Mallory especially for use with Mallory Midgetrols. Can easily and quickly be attached without disassembling control.

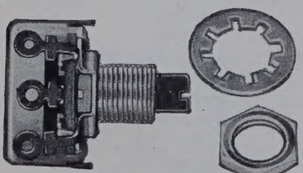
Catalog Number	Description
US-26	Single pole—single throw
US-26T	Single pole—single throw Has dummy terminal
US-27	Double pole—single throw
US-28	Single pole—double throw
US-23	Four pole—single throw, shorting

Accessories

UE-50 Shaft—Extends shaft length on each Mallory Midgetrol an additional 4″ with each extension. Two self-tapping screws furnished with each extension.

UP-10 Pulley—Fits over the Mallory Midgetrol flat shaft to permit its use as an idler for the dial cord where necessary.

MALLORY MIDGETROLS FOR SPECIAL APPLICATIONS



● Special Mallory Midgetrols for use as exact replacements. These Midgetrols meet exact physical and electrical requirements for special applications. Except for the shaft, these Midgetrols are of the same basic construction as the standard Midgetrol. A fixed, knurled, and slotted bakelite shaft protrudes ¼″ beyond the bushing. The AC switches listed above will fit these Midgetrols.

1⅛″ Dia. · Fixed Shaft Controls

APPLICATION—For volume or tone control in audio circuits.

DESCRIPTION—1⅛″ carbon control, available in a wide range of resistances and tapers. Has an excellent safety factor in current-carrying capacity. Uses Mallory's special resistance element insuring a long, quiet life.

SHAFT DESCRIPTION—An accurately finished channel shaft is permanently attached; measures 3″ from lock ring.

ACCESSORIES—One hex nut, one lock washer, and one shim is furnished with each control. An external adjustable resistor is furnished where required, as indicated below. AC switches are available as a special item. (See page 8).

PACKAGING—One control, plus accessories and complete instructions per display carton.

1⅛" Dia. · Fixed Shaft · Special Application · Single & Dual Controls

APPLICATION—Special single and dual controls to be used as recommended in the Mallory Radio Service Encyclopedia.

DESCRIPTION—Type SM are single and type SMD are dual 1⅛" diameter carbon controls. Both types are made in a wide range of resistances and tapers and with taps for special applications. The controls and their shafts are designed to exactly replace the original equipment control. Switches are provided as indicated.

SHAFT DESCRIPTION—Type SM have fixed shafts while type SMD have fixed concentric shafts. Each shaft varies according to the requirements of the control and its recommended application.

ACCESSORIES—One hex nut and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

1⅛" Dia. · Plug-In Shaft Controls

APPLICATION—For volume or tone control in audio circuits.

DESCRIPTION—1⅛" carbon control, available in a wide range of resistances and tapers. Has an excellent safety factor in current-carrying capacity accomplished by the use of Mallory's special resistance element, which also insures a long, quiet life.

SHAFT DESCRIPTION—The control is provided with a socket which will take 30 different types of shafts insuring maximum flexibility of stock. One SS-1 4" channel shaft furnished with each UM control. (See page 8 for other universal and special plug-in shafts available.)

ACCESSORIES—One hex nut, one lock washer, one shim, one lock ring, and one SS-1 shaft furnished with each control. An external variable resistance is furnished where required, as indicated below. AC switches available as a special item. (See page 8.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

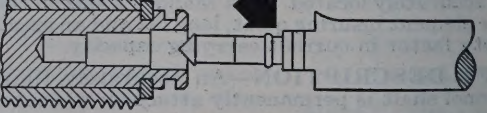
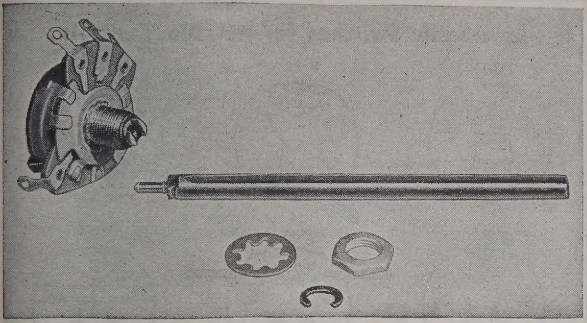
*Clutch type controls—no provision for attachable switch.
§External adjustable resistor included.
‡Right hand switch action.

NO WOBBLE—*this ring prevents it!*



All Mallory plug-in shafts are now made with a small ring as shown in the drawing above. That's why they can't wobble or work loose—why they fit as securely as a fixed shaft.



1⅛″ Dia. · Plug-In Shaft · Single Tapped Controls

APPLICATION—For use as a volume control with tone compensation in audio circuits.

DESCRIPTION—1⅛″ carbon controls with a single tap. Available in a wide range of resistances. Taps are accurately located. Uses Mallory's special resistance element insuring quiet, long life and an excellent safety factor in current-carrying capacity.

SHAFT DESCRIPTION—The control is provided with a socket which will take 30 different types of shafts insuring maximum flexibility of stock. One SS-1 4″ channel shaft furnished with each TM control. (See page 8 for other universal and special plug-in shafts available.)

ACCESSORIES—One hex nut, one lock washer, one lock ring, one shim, and one SS-1 shaft furnished with each control. AC switches available as a special item. (See page 8.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

Explanation of Mallory Tapers

● Taper Number 1 is a modified logarithmic left hand taper in the carbon type of control and an approximation to this logarithmic taper in the wire-wound type. This taper should always be used in shunt circuits, as in usual antenna and audio circuits, or where only the center and left hand terminals are used.

Taper Number 2 is a right hand logarithmic taper in the carbon and an approximation in the wire-wound type. Used in series circuits, as in cathode voltage controls, or where only the center and right hand terminals are used.

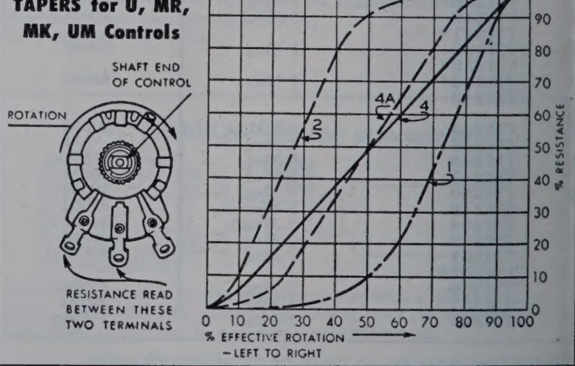
Taper Number 3 is a combination left and right hand taper. Has a limited use in circuits where the control must perform both as a shunt and as a series circuit control as in combination antenna shunt plus bias circuits. This is the most common use for such a taper.

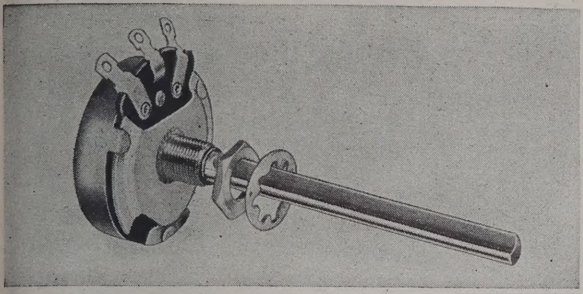
Taper Number 4 is a linear taper. Strictly speaking it is not a "taper" although commonly referred to as such. A linear "taper" is used wherever a control should be such that voltage change is proportional to the degree of rotation.

Taper Number 4A is a modification of the regular linear taper Number 4.

Taper Number 7 is made only in the wire-wound type of control and is a form of left hand taper. This taper is desirable for the antenna shunt plus bias control, wherein greater attenuation is obtained by increasing the bias voltage. The slight left taper then suffices to gradually reduce the signal to zero volume by the shunting action in the antenna circuit.

TAPERS for U, MR, MK, UM Controls





1½″ Dia. · Fixed Shaft · Carbon Controls

APPLICATION—For volume or tone control in audio circuits.

DESCRIPTION—1½″ carbon control made available in a range of resistances and tapers to satisfactorily cover the field. Mallory's exclusive element curing process is used in the manufacture of these controls, as well as in the 1⅛″ dia. line.

SHAFT DESCRIPTION—A fixed channel or slotted shaft is provided, measuring 3″ from lock ring, except as indicated below.

ACCESSORIES—One hex nut, one lock washer, and one shim furnished with each control. An external adjustable resistor is furnished where required, as indicated below. AC Switch available as special item. (See page 11.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

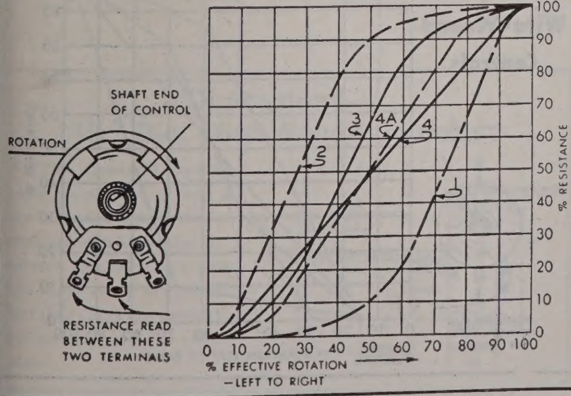
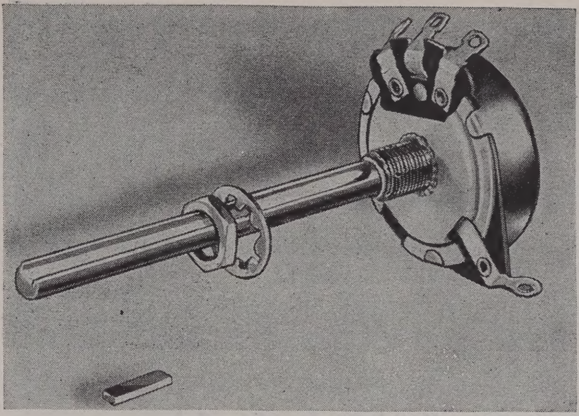
TAPERS for 1½″ Dia. Controls





1½″ Dia. · Fixed Shaft · Single & Double Tapped Controls

APPLICATION—For volume control with tone compensation in audio circuits.

DESCRIPTION—1½″ carbon controls made available in a wide range of resistances, single and double tapped as indicated.

SHAFT DESCRIPTION—An accurately finished shaft is permanently attached, measuring 3″ from lock ring.

ACCESSORIES—One hex nut, one lock washer, and one shim furnished with each control. AC switches available as a special item. (See page 11.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

1½″ Dia. · Fixed Shaft · Special Application Controls

APPLICATION—For special applications, as recommended in Mallory Radio Service Encyclopedia.

DESCRIPTION—1½″ carbon or wire-wound controls, as indicated, available in a variety of resistances and constructions to meet the special requirements necessary in replacement, as recommended in Mallory Radio Service Encyclopedia.

SHAFT DESCRIPTION—A special shaft is permanently attached. It is machined to the exact dimensions necessary to meet replacement requirements.

ACCESSORIES—One hex nut, and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

Special Dual Controls

APPLICATION—For special applications, as recommended in Mallory's Radio Service Encyclopedia.

DESCRIPTION—Special controls of wire-wound and /or carbon construction available in a range of resistances and types as required by recommendations of Mallory Radio Service Encyclopedia. They are designed to provide exact physical and electrical characteristics of the original control.

ACCESSORIES—One hex nut and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

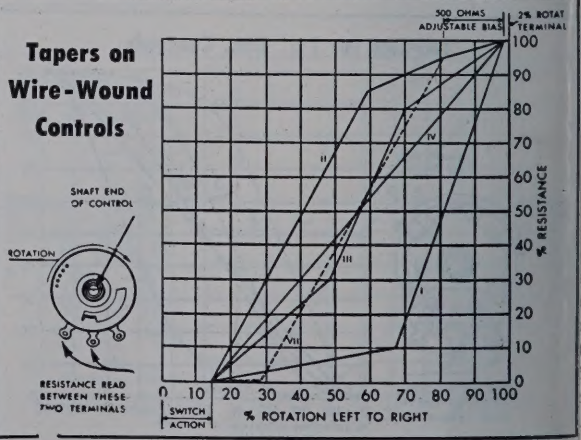
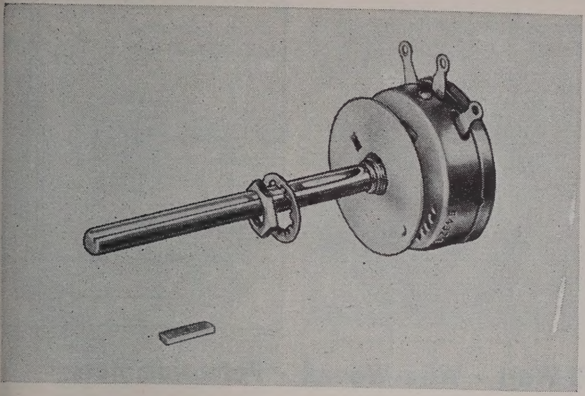
Tapers on Wire-Wound Controls



MALLORY WIRE-WOUND CONTROLS • 1½″ ATTACHABLE SWITCHES



1½″ Dia. · Fixed Shaft · Wire-Wound Controls

APPLICATION—Used as bias controls and voltage dividers in bridge circuits and test instruments.

DESCRIPTION—Rugged resistance strip and contactor assemblies are completely enclosed in a dust-proof case. Will carry 4 watts of power.

SHAFT DESCRIPTION—Furnished with a fixed channel-type shaft, measuring 3″ from lock ring.

ACCESSORIES—Mallory Dial Plate No. 396 is available for use with these controls. One hex nut, one lock washer, and one shim furnished with each control. An external variable resistor is furnished where required, as indicated below. Has adjustable stop plate for bias feature, as indicated below. AC switches available as a special item. (See this page.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

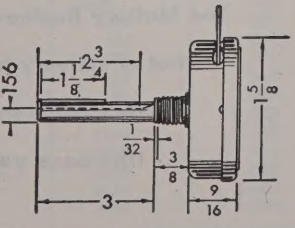
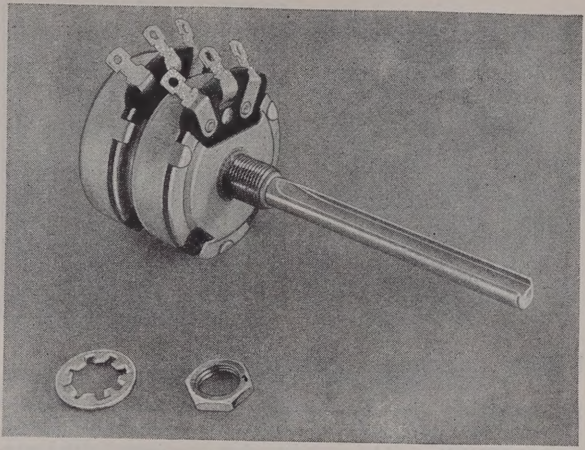
§Have exclusive Mallory adjustable bias feature, providing 500 ohms in 100 ohm steps in all values over 1,000 ohms.

Dimensions—
1½″ Dia. Wire-Wound Controls

NOTE: Controls having taper numbers 1, 2 and 7 are intended primarily for replacement in radio receivers. Be sure to check the taper curve and its effect (see chart on page 31) before ordering for other uses.





(Type LL Illustrated)

Universal Dual Controls

APPLICATION—See "General Use" column below.

DESCRIPTION—Consists of two 1½″ Dia. wire-wound or carbon controls driven by a single shaft.

SHAFT DESCRIPTION—Furnished with fixed channel shaft; measuring 2½″ from lock ring.

ACCESSORIES—One hex nut and one lock washer furnished with each control. AC switches available as a special item. (See this page.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

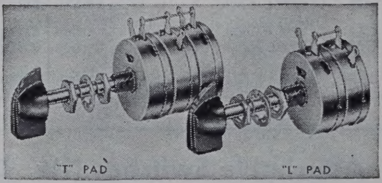
T and L Pad Attenuators



APPLICATION—For controlling the level of low impedance audio circuits and for volume control of microphones, talking picture amplifiers, and many varied sound amplifying and audio distribution systems.

DESCRIPTION—A high quality "T" and "L" pad that may be used with audio amplifiers having a peak audio rating of 15 watts. These attenuators have a continuous DC dissipation rating of 4 watts in any position. Bushing ⅜″ Dia. by ⅜″ long.

SHAFT DESCRIPTION—2″ long shaft, grooved at popular lengths for easy cutting.

ACCESSORIES—No. 366 Bar Knob, No. 395 Dial Plate with matched rotation, one nut and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

2 Watt · Wire-Wound · Potentiometers

APPLICATION—For use in test and special instruments, bias control and bridge circuits, etc.

DESCRIPTION—1¹⁄₁₆″ diameter small resistor that will dissipate 2 watts over the entire element for continuous operation. No. 4 linear taper. Contact arm is grounded. Total rotation 284°; effective electrical rotation 266°.

SHAFT DESCRIPTION—A short shaft with a milled screw-driver slot is provided for quick and easy adjustment. Shaft will also take standard knobs.

ACCESSORIES—Dial Plate No. 393 is available for use with these controls. One hex nut furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

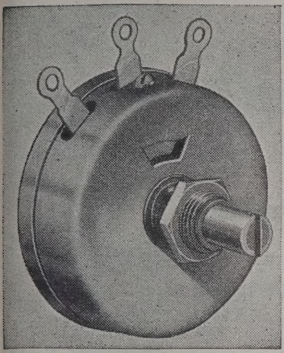
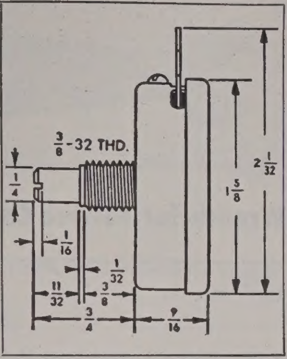
MALLORY WIRE-WOUND POTENTIOMETERS





4 Watt · Wire-Wound Potentiometers and Rheostats

APPLICATION—Used on bias controls and voltage dividers in bridge circuits and test instruments.

DESCRIPTION—Precision wire-wound potentiometers and rheostats with a 4-watt rating for use in instruments where reliability is paramount. Rugged construction. Rheostats feature "off" position (no connection) type of construction, saving the cost of a switch. Furnished with insulated contact arm. Potentiometers have three terminals. Rheostats have two terminals. Total rotation 294°; effective electrical rotation 279°. No. 4 Linear Taper.

SHAFT DESCRIPTION—A short shaft is provided with a slot for easy screw-driver adjustment. Shafts will take standard knobs.

ACCESSORIES—No. 395 Dial Plate is available for use with these controls. One hex nut furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

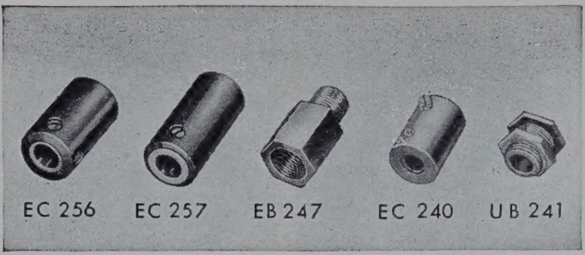
MALLORY
TECHNICAL MANUAL

● This simply written, practical book bridges the gap between radio theory and practice. Designed for the radio serviceman, engineer, amateur or experimenter who wants the latest technical information . . . presented so that he can easily apply it to everyday problems. Contains page after page of information profusely illustrated. It's worth far more than its price.

MALLORY CONTROL HARDWARE



Shafts · Couplers · Bushings

Cat. No.	Description
EC240	**Universal Combination Extension Shaft Coupling and Reducer:** Will couple two ¼″ shafts or one ¼″ shaft and one ³⁄₁₆″ shaft.
	Universal Insulated Shaft Couplers: Designed to connect fixed shaft controls to remote drive couplings popular in automotive radio equipment.
EC256	Slotted Insacup.
EC257	Square Insert Insacup (Motorola type).
EB247	**Universal Extension Bushing:** Designed to screw on the present bushing of Mallory controls and switches, so that the body of the control or switch will be held ⅝″ away from the mounting surface. For example, it is used with the correct Universal Control to service Philco Models 28, 29, 45 and 45C.
UB241	**Universal Bushing and Nut:** Designed to accommodate ¼″ shaft wherever a panel bushing is desired. Includes one No. 232 nut.

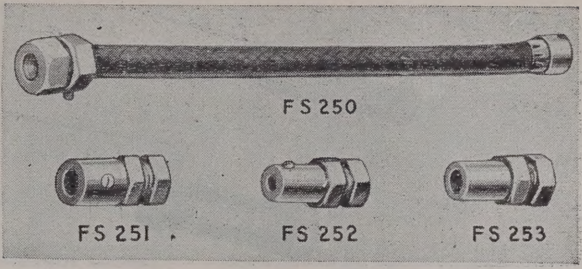
Web Removing Tool

Cat. No.	Description
201	Special tool for removing web from web type knobs to adapt them for use with the Mallory Midgetrol.



Universal Flexible Coupling Shafts

Cat. No.	Description
FS250	For Universal replacement of all flexible wire shafts, coupling to ¼″ solid shafts.
FS251	Shaft Coupling has 7/32″ hole, ½″ deep, with transverse pin, and is for use (with the correct Mallory control) as a replacement for Philco Models 805, 806, 808, 809 and PHD and PHXD, Studebaker AC266, Pierce-Arrow MT-3, Reo RT-3, etc.
FS252	Shaft Coupling has 5/32″ hole, approximately ½″ deep, and has 2 set screws opposite each other. It is used as a replacement for Philco Model D, Nash AC-989 (Code 122).
FS253	Shaft Coupling has ¼″ dia. hole, ½″ deep, equipped with 2 screws at 90 degrees. This is to be used with the correct Mallory Control as a replacement for Chevrolet No. 364441.

THE MALLORY INDUCTUNER*

A continuously and infinitely variable inductance unit that supplies the need for a method of tuning the wide range of frequencies covered by the television-FM band. Provides unequaled simplicity, performance, and stability in service. For more complete information turn to Page 9, Mallory Special Components, of this catalog.

Inductuner*—Registered trade mark for Mallory variable inductance tuning devices. Manufactured and sold under one or more of the following Paul Ware and Mallory patents: 2,163644, 2,163645, 2,163646, 2,163647, 2,260877, 2,377789,2,377790. Other patents applied for.

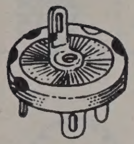
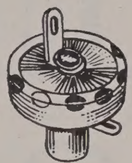
ERIE BUTTON STYLE SILVER MICA CAPACITORS



STYLE CB

These are midget silver-mica capacitors, for use where compact size, minimum external inductance, and high internal series resistance are essential. Erie button silver-mica capacitors are unmatched for V.H.F. and U.H.F. work. "Q" at 1 MC is not less than 1000 above 100 mmf; not less than 700 between 50 and 100 mmf; not less than 500 below 50 mmf. Type 370-CB has ring type metal shell with three soldering ears. High potential terminal at either end for feed-thru connection. Type 370-FA is fastened to chassis with 3-48 screw.



STYLE FA

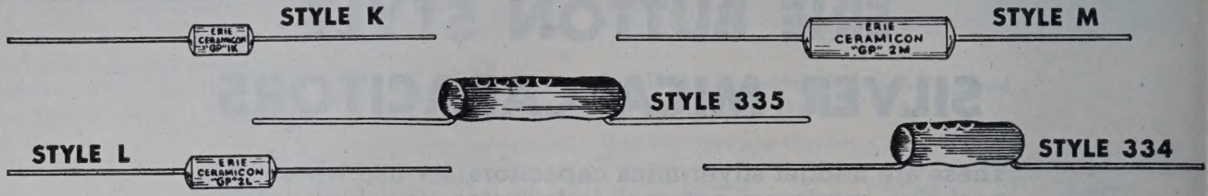
ERIE CERAMICONS®



ERIE CERAMICONS* are small fixed capacitors consisting essentially of a ceramic dielectric with silver electrodes which are fired on at a very high temperature. Erie Ceramicons are outstanding because of their excellent high frequency characteristics, small size, rugged construction and availability in a wide range of capacity values.

Physical dimensions of styles illustrated are:

Style K length .562" diameter .250"	Style 334 length 1.213" diameter .415"
Style L length .812" diameter .250"	Style 335 length 1.650" diameter .415"
Style M length 1.328" diameter .340"	

"GP"® General Purpose CERAMICONS®

"GP" general purpose Ceramicons are ideally suited for such applications as coupling and by-passing, in circuits where temperature coefficient is not important — in other words for all receiver applications *except* in frequency determining circuits. Working voltage — 500 volts D.C. Use Erie "GP" Ceramicons as replacements for molded mica and paper tubular capacitors.

NPO Zero Temperature Coefficient CERAMICONS®

NPO zero temperature coefficient Ceramicons are highly recommended for frequency applications where no capacity change with change in temperature is desired. "Q" for NPO Ceramicons above 30 mmf is 1000 or higher. Below 30 mmf "Q" decreases slightly as capacity decreases. Working voltage — 500 volts D.C. Can be used as replacements for silver mica condensers.

STYLE 811

ERIE DISC CERAMICONS®

Erie Disc Ceramicons consist of a flat Hi-K ceramic dielectric with silver fired on to the dielectric. Lead wires are firmly soldered to the silver electrodes, and the unit is given a protective coating of phenolic. Very efficient at high frequencies.

SPECIFICATION CHART

Style	Size	Value	List Price

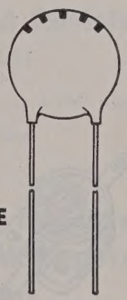
821	3/4″ Dia.	.01 min.	.30



STYLE 821

STYLE 324

ERIE STAND-OFF CERAMICONS®

Stand-Off Ceramicons, an original Erie development, are now widely used for the dual purposes of by-passing R.F. current to ground, and of mechanically supporting other circuit elements. They are especially suited for V.H.F. and U.H.F. applications, due to their low-inductance electrical paths and resultant high resonant frequency.

SPECIFICATION CHART

Style	Capacity (MMF)	Tolerance	List Price
323	50	20%	.60

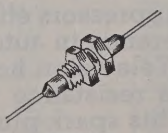
STYLE 323

ERIE FEED-THRU CERAMICONS®

This very practical feed-thru capacitor is highly recommended for by-passing R.F. to ground in feed-thru applications. Wire terminals are sufficiently rugged to serve as tie points for several connections, for supporting other circuit elements, and long enough for point to point wiring.



STYLE 362

SPECIFICATION CHART

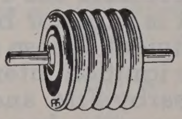
362	1500	20%	1.00

ERIE HIGH VOLTAGE CERAMICONS®



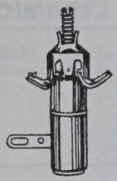
STYLE 410

15 KV Ceramicon specially designed for television receiver power supply filter application. The only ceramic condenser on the market with these two extra features: (1) Ridges on *all* surfaces to give extra creepage path, and (2) ceramic dielectric with built-in corona shields for extra protection against internal flashover. Capacity range — 500 mmf minimum. 1⅛″ diameter x ⅞″ long. Approved by leading television manufacturers for original equipment.

SPECIFICATION CHART

Style	Capacity (MMF)	Tolerance	List Price
410	500	20%	2.25

ERIE TUBULAR TRIMMERS



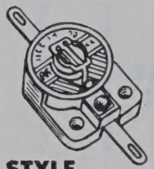
STYLE 532

Here is a compact, economical tubular trimmer that is ideal for applications calling for a low minimum capacity and a high ratio of maximum to minimum capacity. Has molded plastic dielectric. Can be mounted on panels having a thickness of .040" to .065"

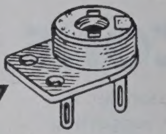
SPECIFICATION CHART

Style	Capacity Range (MMF)	List Price
532-08	0.5-5	.55
532	1-8	.55

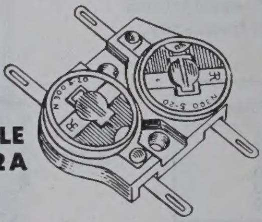
ERIE CERAMICON® TRIMMERS



STYLE TS2A



STYLE 557



STYLE TD2A

Erie Ceramicon trimmers give maximum stability and ease of adjustment. Capacity change is constant per degree of rotation. Silver electrodes are fired on to ceramic rotor and base. 360 degree rotor completely covers entire track on stator thus preventing dust and other foreign matter from affecting characteristics of the unit.

SPECIFICATION CHART

Style	Capacity Range (MMF)	Temperature Coefficient	List Price

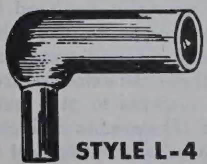
ERIE SUPPRESSORS



STYLE L-4

Erie Suppressors use a special resistance element that is superior because of its low voltage coefficient. These suppressors effectively eliminate ignition interference in auto radios, and in nearby F.M. and Television home sets. Erie Suppressors have a resistance value of 10,000 ohms. Style L-4 fits spark plugs, style L-7 for distributor cables.

INSULATED RESISTORS

Preferred for Performance

IRC

TYPE BTS INSULATED FILAMENT RESISTOR

(½ watt)

13/32″ x ⅛″—470 ohms to 22 meg
350 volts max.

List 17¢

TYPE BTA INSULATED FILAMENT RESISTOR

(1 watt)

23/32″ x ¼″—330 ohms to 22 meg
500 volts max.

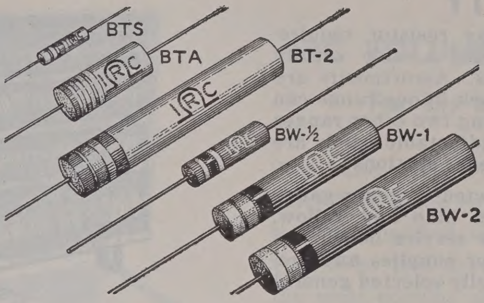
List 25¢

TYPE BT-2 INSULATED FILAMENT RESISTOR

(2 watt)

1¾″x21/64″—470 ohms to 22 meg
500 volts max.

List 50¢



TYPE BT INSULATED FILAMENT RESISTORS are completely insulated with bakelite and unexcelled for stability, low-noise level, low voltage coefficient and mechanical strength. Insulation breakdown of Type BTS is 750 volts to ground; all other type BT's, 1000 volts. Standard tolerance ±10%. Special tolerance ±5% at slightly higher cost.

TYPE BW INSULATED WIRE WOUND RESISTORS are furnished with the same bakelite insulation as BT resistors. The wire resistance element is wound tightly around a special insulated core. Standard tolerance ±10%. Special tolerance ±5% at slightly higher cost.

Type BW-½ Insulated Wire Wound Resistor

(½ watt)

⅝″ x 3/16″—0.47 to 820 ohms

List 17¢

Type BW-1 Insulated Wire Wound Resistor

(1 watt)

1¼″ x ¼″—0.47 to 4,700 ohms

List 25¢

Type BW-2 Insulated Wire Wound Resistor

(2 watt)

1¾″ x 21/64″—1.0 to 6,800 ohms

List 50¢

STANDARD RANGES

Standardization pays dividends! It can be an important profit factor for you, too.

The great majority of radio parts manufacturers were quick to see the advantages in standardization and adopted the RMA Preferred Ranges some years ago. IRC has pioneered standardization of resistors because close contact with the radio industry has convinced us that such standardization is not only desirable but absolutely essential to carry out the tremendous development and production program of the industry.

This IRC policy will help servicemen prepare for better, faster and more profitable business.

Type BT and BW Resistors, in 10% tolerance, are carried in stock in the RMA ranges listed below. Figures in heavy type are the standard RMA 10% tolerance values. Using 10% tolerance BT's and BW's, these 93 ranges give complete coverage of all values with the smallest resistor stock. Standardization of your stock on these values is recommended for economical, complete coverage, faster turnover . . . more profit for you!

However, the intermediate values listed below also are carried in the IRC stockroom, so that every RMA value is available to servicemen when desired.

JOBBERS' STOCK IN PREFERRED RMA RANGES

Subject to the minimum and maximum values for each of the various types of BT and BW Resistors.

IRC INSULATED RESISTORS

Preferred for Performance

BASIC KIT

Designed to meet your day-to-day resistor requirements, the IRC Basic Kit provides a wide variety stock in carefully selected values. Assortments are so arranged that a shortage of stock in one range can usually be compensated for by using two other ranges in series or parallel. Additional adjustable bands are included for use in making up bleeder sections.

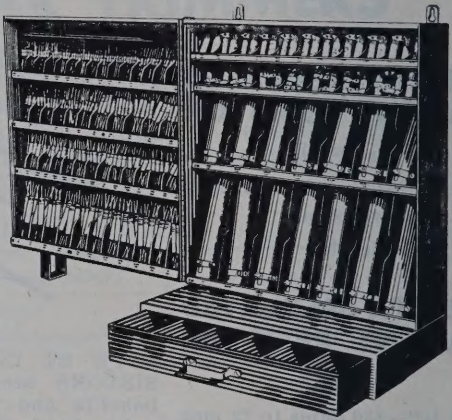
The Basic Kit is sturdily constructed of heavy-gauge steel, and beautifully finished in blue and yellow. Hung on your wall or set on your service bench, the Basic Kit saves countless trips for supplies and provides your shop with a neat, carefully selected general purpose resistor stock.

The IRC Basic Kit is factory-packed with the following wide-variety resistor stock:

BTS —10 each—1,000, 2,200, 4,700, 10,000, 15,000, 22,000, 27,000, 47,000, 75,000 ohm; 0.1 meg., 0.22 meg., 0.47 meg., 1.0 meg., 2.2 meg., 10.0 meg. 15.0 meg.
BTA —5 each—470, 1,000, 1,500, 2,200, 3,600, 4,700, 22,000, 36,000, 75,000 ohm.
10 each—10,000, 15,000, 47,000 ohm; 0.1 meg., 0.24 meg. 0.47 meg., 1 meg.
BW-½ —10 each—100, 150, 220, 330, 470, 560 ohm.
BT-2 —5 each—1,000, 2,200, 4,700, 10,000, 22,000, 47,000 ohm; 0.1 meg.
BW-1 —5 each—47, 82, 100, 270 ohm.
BW-2 —5 each—47, 82, 100, 270 ohm.
AB —2 each—100, 250, 500, 750, 1,000, 1,500, 2,500, 5,000, 10,000 ohm.
2 each—15,000, 25,000 ohm.
ABA —2 each—100, 250, 500, 1,000, 1,500, 2,500, 5,000, 10,000 ohm.
EPA —1 each—1,000, 1,500, 2,500, 5,000 ohm.
1 each—10,000, 25,000 ohm.
ESA —1 each—1.000, 1,500, 2,500, 5,000 ohm.
1 each—10,000, 25,000, 50,000 ohm.
6 "X-3" Bands.
MW-2J—2 each—10, 20, 50, 100 ohm.
M1034—2 each.

All-Metal Cabinet Furnished at No Extra Cost

List Price: $160.53



Serviceman's Special Assortment

Available in Basic Kit

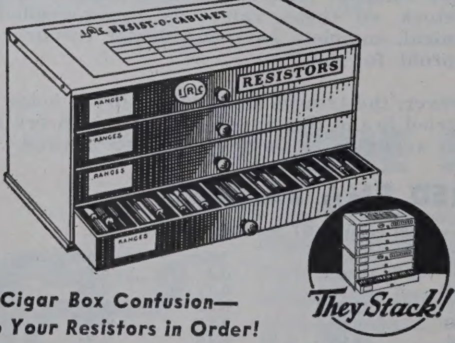
The Basic Kit is also available stocked with a special "Serviceman's Assortment." This assortment contains a complete stock of ½, 1 and 10 watt resistors, plus a selection of controls, shafts and switches. The heavy-duty power wire-wound resistors are not furnished in this assortment—leaving space in the compartments and drawers for capacitors, lamp bulbs, solder, small tools and spare parts.

The "Serviceman's Assortment" is factory-packed with the following:

160—BTS resistors
115—BTA resistors
60—BW½ resistors
20—BW-1 resistors
22—AB power resistors
2—#41 switches
1—#42 switch
4—D13-133 controls
1—D13-133X control
1—D13-137 control
1—D13-137X control
1—D13-139 control
2—"E" shafts
1—"H" shaft

List Price: $99.54

RESIST-O-CABINET



End Cigar Box Confusion—
Keep Your Resistors in Order!

The sturdy, IRC Resist-O-Cabinet is specifically designed to hold resistors systematically and safely without the bending of leads. It puts an end to "cigar box confusion!" Its four "non-spill" drawers have seven ample-sized compartments in each which readily accommodate resistor sizes from ½ to 10 watts.

Attractively finished in blue, yellow and silver. Ohm's Law formulas neatly and permanently lithographed on top of cabinet for handy reference. Cabinet measures 11" long, 5½" high and 5½" deep. Bases of Resisto-O-Cabinets are arranged for stacking so that several cabinets may be used to increase stock capacity. This handy Resist-O-Cabinet is FREE with the purchase of any of the three well-balanced IRC resistor assortments listed. (Cabinet is not sold separately.)

ASSORTMENT No. 1—59 Resistors

Type BTS—One each 1,000, 4,700, 10,000, 27,000, 47,000 ohms; 0.1 meg, 0.27, 0.47 megs.

Type BTA—One each 39,000, 68,000 ohms; 0.15, 0.22 megs. Two each 1,000, 1,500, 2,200, 2,700, 4,700, 15,000, 27,000 ohms; 1.0, 2.2 megs. Three each 10,000, 47,000 ohms; 0.1 meg, 0.27, 0.47 megs.

Type AB 10 Watt—One each 1,000, 1,500, 2,500, 5,000 ohms. Two each 10,000 and 25,000 ohms.

Type ABA, 10 Watt Adjustable—One each 1.000, 2,500, 5,000, 10,000.

List price of Resistors, **$22.87**
(Cabinet furnished at no extra charge)

ASSORTMENT No. 2—100 Resistors

Type BW-½—Two each 47, 100, 270 ohms.

Type BTS—Two each 3,300, 6,800, 33,000, 68,000, 82,000 ohms; 0.22, 0.33 megs. Three each 470, 1,500, 15,000, 22,000, 39,000 ohms; 0.15, 1.0, 2.2 megs. Five each 2,200, 2,700, 27,000 ohms; 0.27 megs. Six each 1,000, 4,700, 10,000, 47,000 ohms; 0.1, 0.47 megs.

List price of Resistors, **$17.00**
(Cabinet furnished at no extra charge)

ASSORTMENT No. 3—83 Resistors

Type BW-1—Two each 47, 100, 270 ohms.

TYPE BTA—Two each 470, 1,500, 2,700, 3,300, 6,800, 33,000 39,000, 68,000, 82,000 ohms; 0.15, 0.22, 0.33, 1.0, 2.2 megs. Three each 15,000, 22,000, 27,000 ohms. Five each 1,000, 2,200, 4,700, 10,000, 47,000 ohms; 0.1, 0.27, 0.47 megs.

List price of Resistors, **$20.75**
(Cabinet furnished at no extra charge)

IRC VOLUME CONTROL CABINET

For the Modern Service Shop

This handy stock of IRC Type D Universal Controls, quickly attached switches and easily installed shafts is factory-packed in an attractive all-metal cabinet. Proved by IRC Service Records to be a selection of the most popular controls—you can actually service over 87% of all replacements right from this cabinet. Here is your answer to speedier, more efficient servicing—reduction of costly exact-duplicate inventories —and modern appearance for your shop.

Cabinet measures 14½″ long, 7⅜″ high and 4½″ wide. It is handsomely finished in yellow, blue and silver and provides separate compartments for controls and three handy drawers for switches, special shafts and spare parts. Each compartment and drawer is individually marked for identification. The hinged front cover snaps securely shut. The cabinet is furnished at no extra charge when factory- packed with the IRC controls, switches and shafts listed on the left. It is not sold separately.

ORDER YOUR IRC VOLUME CONTROL CABINET TODAY

List Price: $30.90

NEW IRC ALL-PURPOSE KIT

Here's how to sharpen the appearance of your shop without an additional outlay of cash! 9 "hot-number" IRC ½, 1 and 2 meg. controls are available pre-packed in the **All-Purpose** Kit with 4 switches and 4 special shafts. Every one a fast mover . . . and you pay only the standard net cost of the merchandise. At no extra cost you receive this attractive 12 compartment utility cabinet.

Buy your "hot-number" controls this way each week and accumulate a shelf of these neat cabinets—each pre-packed with the following IRC merchandise:

	IRC Control Type No.	Resistance	Purpose
5	D13-133	500,000	A
1	D13-133X	500,000	B
1	D13-137	1.0	A

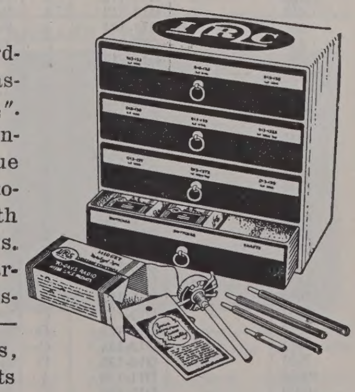
SHAFTS

1 Type "A" double-flatted tap-in shaft is included with each control—plus:

3 Type "E" with universal knurl for special type push-on knobs.

1 Type "H" with universal groove for many Delco, RCA, Sears-Roebuck and Westinghouse models.

Sturdy utility cardboard cabinet measures 7¾″x7¾″x4½″. It is attractively finished in yellow, blue and silver, and provides 4 drawers with 12 compartments. Ideal stocking arrangement for miscellaneous parts — hardware, knobs, capacitators, shafts and dial fittings.



Cabinet furnished at no extra cost.

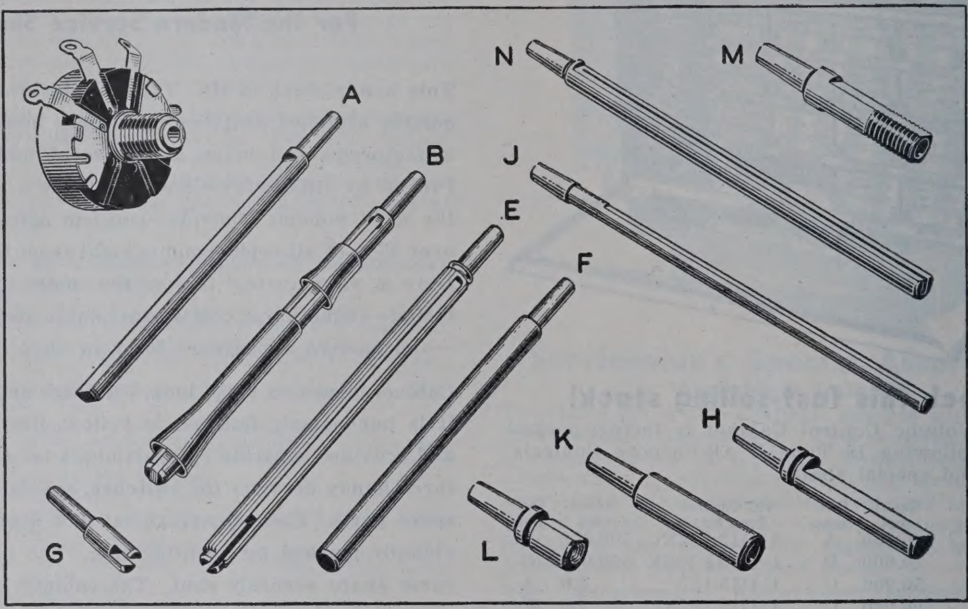
List Price $16.20

IRC VOLUME CONTROLS

Preferred for Performance

THE IRC "CENTURY" LINE

114 IRC CONTROLS THAT SOLVE 90% OF YOUR REPLACEMENT PROBLEMS



For miscellaneous service needs, 71 all-purpose controls are available for use with the popular IRC tap-in shafts. An A shaft is included with each control and shafts B, E, F, G, H, J, K, L, M and N may be had at slight extra cost.

Each D Control accommodates any of the eleven Tap-in Shaft types shown. Shaft flats may be located in any position. A few extra shafts greatly increase the utility of your D Control stock at a small investment. Of unusual convenience is the "Double-Flatted" A shaft, included with each D Control. Accommodates popular push-on knobs requiring either 1/32″ or 3/32″ flats and all set-screw knobs without filing of shaft or use of inserts. Dimensions: 1⅛″ x 17/32″.

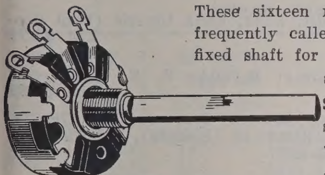
THE IRC "CENTURY" LINE

114 QUALITY CONTROLS THAT OFFER YOU THESE EXCLUSIVE FEATURES

- METALLIZED ELEMENT — harder, smoother, moisture-proof, permanent.
- FIVE FINGER CONTACTOR—assures positive, more uniform contact.
- SILENT SPIRAL CONNECTOR—a positive connection between contactor and its terminal.
- STEEL COIL SPRING THRUST WASHER — eliminates shaft wobble and end-play.

16 POPULAR DS TYPES

With Fixed Shafts



These sixteen numbers have been the most frequently called for and are furnished with fixed shaft for convenient, easy use. Dimensions: 1⅛″ x $\frac{17}{32}$″.

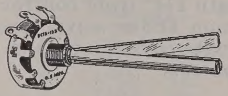
8 CLUTCH-TYPE DC CONTROLS

With Tap-in Shafts



Practical for auto radio use and many other applications. Controls have friction clutch drive-arm and are equipped with a special shaft for use where either a slotted or tongued type shaft is required. Instructions tell how to cut shaft for either application. **Switches cannot be used with friction clutch controls.** Size same as Type D.

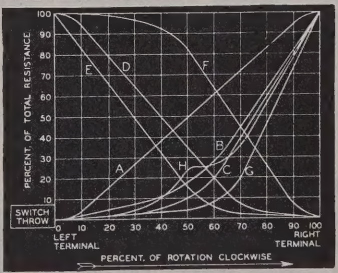
8 STANDARD TAPERS



A—Used as potentiometer or rheostat in any circuit where uniform resistance change is required.

B—A semi-logarithmic curve used as tone control or audio circuit control.

C—A logarithmic curve. Used as audio circuit control or antenna shunt control.

D—Tapered at both ends to provide control of grid bias and antenna circuit. Used where control of grid bias is of prime importance in controlling volume.

E—Used as a rheostat in cathode circuit to control grid bias.

F—Tapered at both ends to provide control of grid bias and antenna circuit. Used where control of grid bias is essential in controlling volume. Generally used where the control changes the grid bias of only one or two tubes. Must not be used with heavy currents.

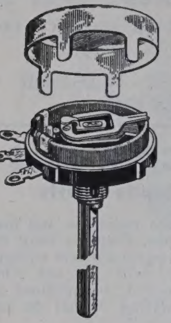
G—A logarithmic curve with very gradual change in resistance from left terminal. Used as audio circuit control or antenna shunt control.

H—A tapped logarithmic curve used as audio level control for automatic bass compensation.

IRC VOLUME CONTROLS

Preferred for Performance

TYPE W WIRE WOUND CONTROLS



A dependable wire wound control of uniform resistance change for power requirements up to 2 watts. Tight, uniform windings assure utmost accuracy. Spiral Spring Connector between rotor arm and center terminal eliminates noise. Diameter 1¼"; depth behind panel $\frac{9}{16}$"; shaft length $2\frac{15}{16}$" from control face. Illustration shows cover removed, although covers are supplied with controls.

POWER RESISTORS

IRC

Preferred for Performance

"PREFERRED FOR PERFORMANCE"

Not only do these famous resistors excel electrically, but their "climate-proofed" cement coating provides the most dependable protection yet devised for resistors for heavy duty work. Both fixed and adjustable types are available. Mounting Brackets are packed with all resistors from 25 watts and up. One Adjustable Band is furnished with each adjustable resistor. The new Type X Band (described below) is included as standard on units of 25 watts and above. Extra bands supplied at prices indicated.

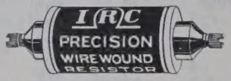
PRECISION Wire Wound RESISTORS

IRC
PRECISION
WIREWOUND
RESISTOR

Type WW-3
$\frac{9}{16}$" x $\frac{9}{16}$"
Type WW-4
$\frac{9}{16}$" x 1"
Type WW-5
¾" x 1¼"



Type WW-2
⅞" x 2$\frac{15}{16}$"

IRC Precision Wire Wound Resistors are scientifically designed and constructed of highest quality materials to combine the utmost in accuracy with dependability. Winding forms are of a non-hygroscopic ceramic having high insulation qualities, high mechanical strength and low-coefficient of expansion. Because of the special sectional construction which permits the winding of adjacent sections in opposite directions, a noninductive winding is made possible. Minimum temperature coefficient of .002% per degree C. now available on all IRC Precisions at no extra cost.

These units are used by the leading instrument manufacturers for dependable precision meter multipliers and shunts, decade boxes and calibrated gain controls. 1% accuracy is standard. Closer tolerances available at slightly higher prices as follows: for ½% tolerance, add 10%: for ¼% accuracy, add 15%; and for 1/10 of 1%, add 25% to list prices. Tolerances of 1/10 of 1% are measured to new International Ohm, and so indicated on label.

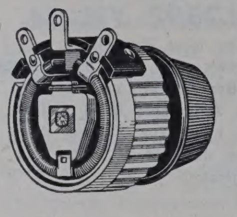
ALL-METAL RHEOSTATS



PR-25 (25 Watts)
1$\frac{21}{32}$" diam. Depth
behind panel, $\frac{31}{32}$"

PR-50 (50 Watts)
2⅜" diam. Depth
behind panel, 1⅜"

Operating temperatures are cut almost in half by the unique, all-metal aluminum construction of these new IRC Rheostats. They dissipate heat more rapidly—give ample safety factor. Ratings based on hottest spot temp. rise of only 140 degrees C. with max. load distributed over entire element. With full load applied to as little as 25% of element, rise is only 160 degrees C. Exclusive IRC Spiral Connector gives positive contact between rotor arm and center terminal.

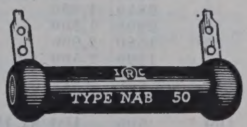
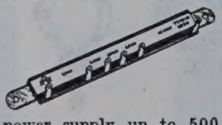
Type NAB Parasitic Suppressors



IRC Type NAB Non-Inductive Wire Wound Resistors are designed for use, one in each grid of audio driver or power amplifier tubes when paralleled, to prevent parasitic oscillations. 10 watts.

Type NAB—50 ohms.
List $1.20 each

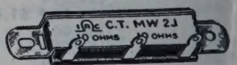
Bleeder Resistor



Type M-1034—25,000 ohms, overall resistance, tapped at 7,500, 10,000, 12,500 and 15,000 ohms. 18 watts rating attached flat to chassis, 9 watts free air rating. Used as bleeder in any power supply up to 500 volts. Sealed in bakelite and insulated for 1,000 volts to ground. Bracket supplied.

M-1034—IRC Bleeder Resistor.................................**List $1.25 each**

Center Tap Insulated Wire Wounds

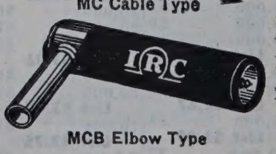


Completely enclosed in molded bakelite and capable of standing high temperatures. Due to high power rating, these resistors may be used in balancing circuits for radio receivers or transmitters. They will carry up to five watts if mounted on chassis, using the detachable mounting bracket and heat-dissipating metal strip; or two and one-half watts if mounted in open air. May be mounted anywhere without danger to units from heat or grounding. **Dimensions:** Length of molded unit 2". With bracket mounting centers 2½". Six standard ranges: 10 ohms, [illegible] ohms, 50 ohms, 75 ohms, 100 ohms and 200 ohms.

Type MW-2J—Center Tap Resistors.................................**List 35c each**

Type MC and MCB Suppressors

MC Cable Type



MCB Elbow Type

IRC Suppressors are designed for the elimination of ignition noise in automobile and motorboat radio installations—and oil burner interference in home receivers.

Either Type ....List 30c

OHMITE RHEOSTATS

All-Porcelain — Vitreous-Enameled

The design and construction of these sturdy, compact Ohmite Rheostats insure permanently smooth, gradual, close control. The wire is wound over a porcelain core, bonded to porcelain base, and permanently locked in place by special Ohmite Vitreous Enamel. Nothing to smoke, char, shrink, or shift. Dissipates heat rapidly. Insulated shafts and bushings. Copper graphite contacts. Ratings are for "free air" use. Time-proved through long trouble-free service in countless installations the world over. Underwriters' Laboratories Listed.

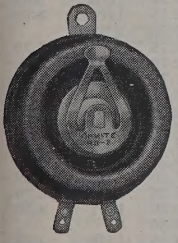
DIRECTION INDICATOR

POTENTIOMETER—MODEL RB-2



A compact, low cost unit which is used in a simple 6 volt potentiometer circuit as a transmitting element, to indicate, remotely the position of a rotary beam antenna, or other device. The indicating meter can be any ordinary 0-1 M.A., 0-1.5 M.A. or 0-2 M.A. direct current milliammeter (with marked scale). The potentiometer is 2-5/16" in diameter and extends 1⅜" behind the mounting surface. Single hole mounted by means of a ⅜-32 threaded bushing. Complete 360° rotation.

Stock No. RB-2, Potentiometer

List Price $8.13

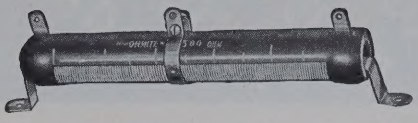
OTHER OHMITE RHEOSTATS

Ohmite Rheostats are also available in Model G, 75 Watt; Model P, 225 Watt; Model R, 500 Watt; Model T, 750 Watt; and Model U, 1,000 Watt units, in many resistance values. Special Rheostats with tapered windings, etc., can be supplied; also Special Rheostats for Model Train Control. Cages and other accessories also available.

For more complete information on OHMITE PRODUCTS, ask for Ohmite Stock Catalog.

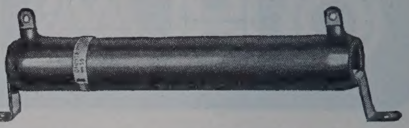
OHMITE DIVIDOHM RESISTORS

OHMITE FIXED RESISTORS



All-Porcelain

Vitreous-Enameled



You can adjust the resistance or secure odd resistance values quickly with these Dividohms; easily put on more taps where needed. Ideal voltage dividers. With one adjustable lug and with mounting brackets.

Extra-sturdy, wire-wound, all-porcelain resistors with the permanent protection of Ohmite Vitreous Enamel. Widely used for heavy duty applications to assure continuous trouble-free service. With mounting brackets.

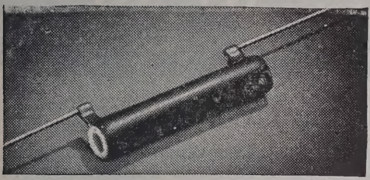
Popular OHMITE "BROWN DEVIL" RESISTORS



High quality, small size, wire-wound resistors ideal for voltage dropping, bias units, bleeders, etc. They're extra-sturdy, all-ceramic, vitreous enameled. They give time-proved protection against shock, vibration, heat and humidity. Their long record of continuous trouble-free service—their wide use in all climates of the world—prove their complete reliability and economy. All units can be conveniently mounted by means of their 1½″ tinned wire leads. The standard resistance tolerance is ±10%.

The all-welded construction of the 5 watt unit makes it possible to extend the resistance range to 10,000 ohms, an unusually high value for a vitreous enameled stock unit.

5 Watt—1″ x 5/16″ Core Size

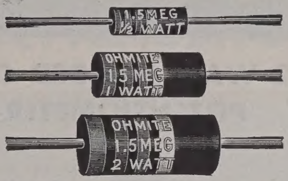
OHMITE "LITTLE DEVIL" RESISTORS



Ohmite "LITTLE DEVILS" are full ½ Watt, 1 Watt and 2 Watt Insulated Composition Resistors and can be used at their full wattage ratings at 70° C. (158° F.) ambient temperature. They meet requirements of specification JAN-R-11. All units are color coded. Each resistor is marked with the resistance value, wattage rating and the Ohmite trade-mark. "LITTLE DEVILS" are available from stock in ½, 1 and 2 watt sizes with ±10% or ±5% tolerance. The standard RMA values, 10 ohms to 22 megohms can be furnished.

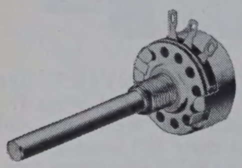
BE RIGHT WITH OHMITE ★ RHEOSTATS RESISTORS SWITCHES CHOKES

2 WATT MOLDED COMPOSITION POTENTIOMETER—TYPE AB



The Type AB Potentiometer is an exceptionally high quality unit designed especially for industrial, laboratory, radio service and other uses where reliability is particularly important. Because the resistor element is molded, the unit has an exceptionally large safety factor. The power rating of 2 watts is unusual for a unit of such small size. The unit has a very low noise level and low voltage coefficient. It will pass the Army-Navy 200 hour salt spray test, specification AN-QQ-S-91. The unit is 1 1/16″ diameter and extends 9/16″ behind the panel. The standard shaft length is 2″ including the ⅜″ long mounting bushing. A SPST switch, to be attached to the back of the control, can be supplied extra.

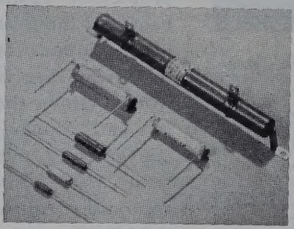
OHMITE R.F. PLATE CHOKES



The new series of seven Ohmite single layer wound solenoid radio frequency plate chokes covers the entire frequency range of 3 to 520 megacycles. The new chokes replace the former series of chokes, Z-0, Z-1, Z-2, and Z-3 with units that accomplish the same results but are much smaller in physical size with one exception, the new Z-7 choke, which is identical to the former Z-3, the number only having been changed.

The four highest frequency chokes are wound on low power factor plastic cores while the other three units are wound on steatite tubes. Windings are insulated and protected by a moisture-proof coating. The single layer winding is designed to avoid adverse harmonic effects within the recommended operating range and also prevents breakdown from high r.f. potentials.

Stock Number	Operating Range Megacycles	Micro-henries	Core Dimension	List Price
Z-7	3 to 20 Mc.	84.0	6″ x 9/16″	**$1.56**
Z-14	7 to 35 Mc.	44.0	2″ x 7/16″	**.68**

Z-460	320 to 520 Mc.	0.20	½″ x 5/32″	**.33**

Non-magnetic Brackets Furnished with Z-7.
All chokes 1000 ma. rating except Z-14 and Z-28. These are rated at 600 ma.

OHMITE POWER LINE CHOKES

Prevents high-frequency currents of radio transmitters, diathermy and therapeutic equipment from going out over the power lines and interfering with nearby radio receiving sets. Used as a filter in connection with two grounding condensers of 0.1 microfarad capacity each. The Z-20 Choke is also used at radio receivers to keep out interference. All chokes consist of two single-layer windings on a single ceramic core—insulated and protected by moisture-proof coating. Recommended for use in suppressing radio (not audio) frequency interference.

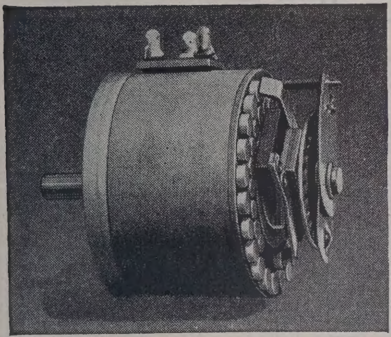
SHALLCROSS MANUFACTURING CO.

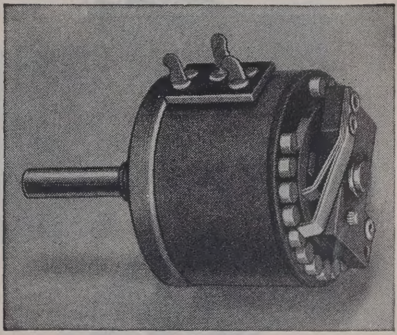
COLLINGDALE, PENNSYLVANIA

SHALLCROSS AUDIO ATTENUATORS



◄ SHALLCROSS ATTENUATOR NO. 420-2B2

SHALLCROSS ATTENUATOR NO. C720-2A3 ►



These Shallcross Features Mean

✓ BETTER PERFORMANCE

✓ BIGGER VALUE

- ✓ Off position attenuation well in excess of 100 db.
- ✓ 25% to 50% fewer soldered joints.
- ✓ Noise level ratings that are factual. (130 db or more below zero level).
- ✓ Non-inductive Shallcross precision resistors used throughout assure flat attenuation to and beyond 30 kc.
- ✓ Types and sizes engineered for all needs. Attenuation accuracies of 1%, resistor accuracies of 0.1%, on special order.

Shallcross Audio Attenuators are available in either variable or fixed units, the former often being referred to as a "control" and the latter, as a "pad".

Controls are available with as few as 5 steps or as many as 52 steps with an attenuation as small as 0.1 db per step. The total attenuation for a single control does not exceed about 125 db since such high attenuation approaches the noise level of the switching mechanism.

The complete story of Shallcross attenuators may be found in Shallcross Engineering Bulletin #4, copies of which are available on request. Specifications and prices are given below for a few of the most popular variable attenuators.

IMPEDANCE: 150, 500, 250/500, 600 ohms, except potentiometers, which are 100,000 and 250,000 ohms.

RESISTORS: All non-inductively wirewound, ±5% tolerance, except types preceded with "C", which are composition selected to ±5%.

ATTENUATION: Increases for counter-clockwise rotation of knob end of shaft.

FREQUENCY RESPONSE: Flat over entire audio range.

SWITCH MECHANISM: Multi-leaf wiper arms collector rings and contacts available in tarnish resistant silver alloy or brass. Noise level -130 db.

DETENT: Indexing mechanism available on any unit for $0.50 list. Back of panel depth is then increased 5/16".

DIALS: $1.00 list each additional.

KNOBS (VA-16906): $0.50 list each additional.

120-2A3 **$8.00 silver** **7.00 brass**	Ladder attenuator, 20 steps, 2 db per step, tapered on last 3 steps to off. MOUNTING: single hole, ⅜"-32 threaded bushing or two hole, 6-32 screws, 1⅜" centers. DIMENSIONS: 1¾" diameter, 1¾" back of panel depth. CONTACT SPACING: 15°.
C720-2A3 **$8.00 silver** **7.00 brass**	Potentiometer, 20 steps, 2 db per step, tapered on last 3 steps to off. MOUNTING: single hole, ⅜"-32 threaded bushing or two hole, 6-32 screws, 1⅜" centers. DIMENSIONS: 1¾" diameter, 1¾" back of panel depth. CONTACT SPACING: 15°.
132-1.5B3 **$13.50 silver** **12.00 brass**	Ladder attenuator, 32 steps, 1.5 db per step, tapered on last 3 steps to off. MOUNTING: two hole, 6-32 or 8-32 screws, 1¼" or 1½" centers. DIMENSIONS: 2⅛" diameter, 1¾" back of panel depth. CONTACT SPACING: 10°.
430-1C1 **$21.00 silver** **19.00 brass**	Bridged T attenuator, 30 steps, 1 db. per step, 30 db total. MOUNTING: two hole, 6-32 or 8-32 screws, 1¼" or 1½" centers. DIMENSIONS: 2½" diameter, 1¾" back of panel depth. CONTACT SPACING: 11¼°.
432-1.5C3 **$21.00 silver** **19.00 brass**	Bridged T attenuator, 32 steps, 1.5 db per step, tapered on last 5 steps to off. MOUNTING: two hole, 6-32 or 8-32 screws, 1¼" or 1½" centers. DIMENSIONS: 2½" diameter, 2-5/16" back of panel depth. CONTACT SPACING: 10°.
420-2B2 **$16.00 silver** **14.00 brass**	Bridged T attenuator, 20 steps, 2 db per step, attenuation linear with off on last step. MOUNTING: two hole, 8-32 or 6-32 screws, 1¼" or 1½" centers. DIMENSIONS: 2⅛" diameter, 1¾" back of panel depth. CONTACT SPACING: 15°.
C820-2B2 **$16.00 silver** **14.00 brass**	Dual potentiometer, each section 20 steps, 2 db per step, attenuation linear with off on last step. MOUNTING: two hole, 6-32 or 8-32 screws, 1¼" or 1½" centers. DIMENSIONS: 2⅛" diameter, 1¾" back of panel depth. CONTACT SPACING: 15°.

SHALLCROSS V.U. METER RANGE EXTENDING ATTENUATORS

IMPEDANCE: Available with input impedances of 3900-7100-7500 ohms. Output impedance is 3900 ohms to match Weston Type 30B or General Electric Type DO 61 V.U. meters.

TOLERANCE: ±1% except "C" types which are ±5%.

INSERTION LOSS: Zero.

DETENT: All units supplied with indexing mechanism; back of panel depth includes detent.

C35-4A4 **$12.00 silver** **11.00 brass**	T attenuator, +4 to +24 V.U., 5 steps, 4 V.U. per step. MOUNTING: single hole, ⅜"-32 threaded bushing. DIMENSIONS: 1¾" diameter, 2-1/16" back of panel depth. CONTACT SPACING: 30°.
C35-4A5 **$12.00 silver** **11.00 brass**	T attenuator, +4 to +20 V.U. and OFF, 5 steps, 4 V.U. per step. MOUNTING: single hole, ⅜"-32 threaded bushing. DIMENSIONS: 1¾" diameter, 2-1/16" back of panel depth. CONTACT SPACING: 30°.
320-2C4 **$21.50 silver** **20.50 brass**	T attenuator, +4 to +44 V.U., 20 steps, 2 V.U. per step. MOUNTING: two hole, 8-32 screws, 1½" centers. DIMENSIONS: 2½" diameter, 2-1/16" back of panel depth. CONTACT SPACING: 15°.
320-2C5 **$21.50 silver** **20.50 brass**	T attenuator, +4 to +42 V.U. and OFF, 20 steps, 2 V.U. per step. MOUNTING: two hole, 8-32 screws, 1½" centers. DIMENSIONS: 2½" diameter, 2-1/16" back of panel depth. CONTACT SPACING: 15°.
412-2B4 **$16.50 silver** **14.50 brass**	Bridged T attenuator, +4 to +28 V.U., 12 steps, 2 V.U. per step. MOUNTING: two hole, 8-32 screws, 1½" centers. DIMENSIONS: 2⅛" diameter, 2-1/16" back of panel depth. CONTACT SPACING: 12°.
412-2B5 **$16.50 silver** **14.50 brass**	Bridged T attenuator, +4 to +26 V.U. and OFF, 12 steps, 2 V.U. per step. MOUNTING: two hole, 8-32 screws, 1½" centers. DIMENSIONS: 2⅛" diameter, 2-1/16" back of panel depth. CONTACT SPACING: 12°.

SPECIAL TOLERANCE

Resistors to closer tolerances can be supplied at higher prices. Add to list prices as follows:

±½%, add 5%
±¼%, add 10%
±2/10%, add 15%
±1/10%, add 25%
±.05%, add 50%

BX impregnated resistors will be furnished unless order specifies "without BX". Following price reductions will be made from the list price for resistors furnished without vacuum impregnation:

Type 110, 116 & 160	$.40
" 196	.25
" 183	.15
" 100, 140 & 193	.25

Prices shown are for Manganin Wire used in resistances to 1,000 ohms and for Nickel-Chromium-Iron Wire used in resistances above 1,000 ohms.

TYPES BX183A AND BX193—±1% IN COMMON VALUES—IN STOCK

In addition to the popular standard types listed here, Shallcross Akra-Ohm Resistors are made in a complete line of standard and special designs for precise electronic equipment demanding great stability and long life even under difficult conditions of temperature and humidity.

Shallcross achievements include the development of really practical hermetically-sealed units; BX processed resistors "tropicalized" against moisture and fungus; the use of spun glass insulated wire for applications where considerable power must be dissipated; bifilar wound resistors, 1000 ohms or less, for exacting instrument use; heavy-duty surge resistors; accurate heavy-duty power resistors, and various others. Write for the Shallcross "Engineering Data" wall and file Chart.

ACCURATE FIXED WIRE-WOUND TYPES (JAN R93) PRICES ON REQUEST.

Shallcross Type	** JAN Style	Wattage	* Maximum Ohms	Std. Terminal	Mounting	Dimensions Length—Diam.
100	RB21	1	750,000	#8 screw	5 amp. fuse clip	2 1/16" x 9/16"
110	RB22	2	2 Meg.	#8 screw	5 amp. fuse clip	2⅞" x ¾"
116	RB14	1	2 Meg.	Solder lugs	#6 screw	2 5/32" x ¾"

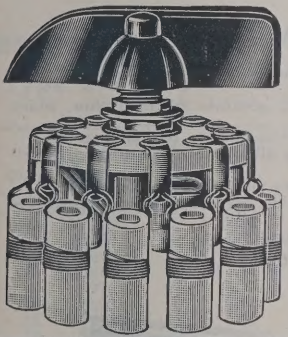
UNMOUNTED DECADE RESISTANCES



In response to a demand from engineers, manufacturers and physicists who design and construct their own electrical measuring instruments, we have made the Shallcross Unmounted Decade Resistances available. They are of the same construction as those used in the popular Shallcross Resistance Decades described above and consist of ten Shallcross Resistors mounted on a ceramic instrument switch.

SPECIFICATIONS

Type No.	Total Resistance Ohms	Unit Resistance Ohms	Switch No.	Accuracy	Price
435	1.0	.1	536	1.0%	$9.00
436	10	1.0	531	0.25%	9.00
437	100	10	531	0.1	9.00
438	1,000	100	531	0.1	9.00
439	10,000	1,000	531	0.1	12.00

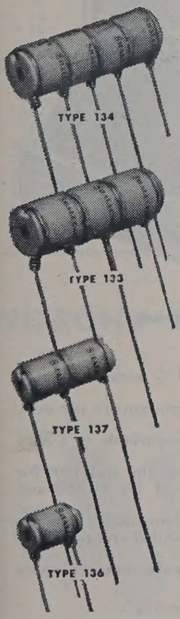
441	1 Meg.	100,000	531	0.1	22.50
442	10 Meg.	1 Meg.	531	0.1	45.00

Mounting: Single ⅜″ Hole Mounting—Panels Up to 3/16″ Thick. Any of the above may be obtained with aluminum dust cover and shield at $1.50 additional cost.



SHALLCROSS AKRA-OHM PRECISION RESISTORS

for "Miniaturization" applications

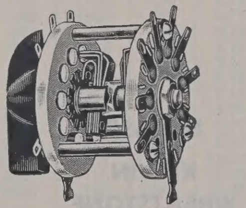
UNUSUAL ACCURACY IN SMALL SPACE

These new Shallcross Okra-Ohm Wire-Wound Precision Resistors have been designed to meet the needs of modern, miniature equipment. Standard tolerance is 1%. Closer tolerances can be furnished on special order.

The units offer unusually high and accurate resistance values in small space and are light enough to be suspended by their own tinned copper leads, or may be secured with mounting screw.

Type	Sections	Size	Watts	Maximum Resistance per section Ohms	Minimum Resistance per section Ohms
136	1	13/32″ x ¼″	0.25	150,000	1.
137	2	45/64″ x ¼″	0.25	150,000	1.
133	3	1 5/32″ x ⅜″	0.25	550,000	1.
134	4	1¼″ x ⅜″	0.25	375,000	1.

Prices on application.



SHALLCROSS ROTARY SELECTOR SWITCHES

Like other Shallcross instrument components, these Rotary Selector Switches are designed to cover a very wide field of application in both shorting and non-shorting types, and can be modified to control a variety of circuits. Details on any type for practically any application on request. Suffixes B and S denote Brass and Silver contacts and contact arms.

Poles	Positions	Contact Plate Material	Shorting	Non-Shorting

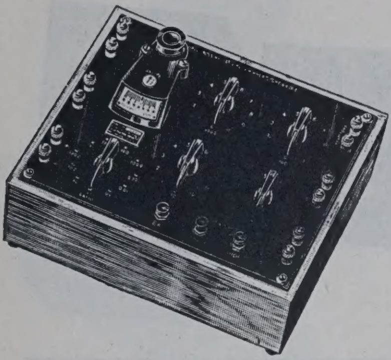
COLLINGDALE, PENNSYLVANIA

SHALLCROSS D-C BRIDGES



No. 638-2-4

KELVIN WHEATSTONE BRIDGE

Resistance range 0.0001 ohm to 11.11 megohms

SPECIFICATIONS

ACCURACY—0.3% between 1.0 ohm and .1111 megohms. Below and above this range—2%.

GALVANOMETER—Built-in—sensitivity 1 micro-ampere per millimeter division.

RHEOSTAT ARM—Four decades—1.0 ohm steps in Wheatstone and 1.0 micro-ohm steps in Kelvin ranges.

RESISTANCE BOX—Binding posts allow using rheostat as Resistance Box.

SEPARATE KEYS—Provided for battery and galvanometer circuits.

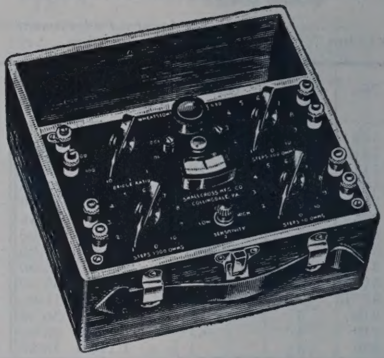
CASE—Carrying type with removable cover (not illustrated) and compartment for 4½ volt battery (not supplied) for Wheatstone range measurements.

DIMENSIONS—Length 12¼″, width 10⅛″, height 6½″.

WEIGHT—Approx. 9 lbs. Price $195.00.

No. 630

WHEATSTONE BRIDGE



Resistance range from 0.1 ohm to 11.1 megohms

SPECIFICATIONS

ACCURACY—1.0% between 10 ohms and 1.0 megohm—2% over 1 megohm.

COMPONENT RESISTORS—0.1% accurate except 1 ohm, which are 0.25%.

RHEOSTAT ARM—Three decades—variable in 10.0 ohm steps.

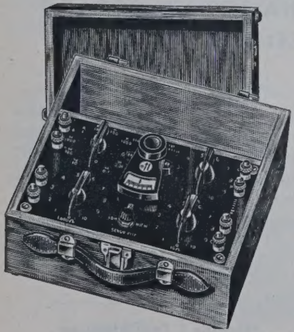
RESISTANCE BOX—Binding posts allow using rheostat as Resistance Box.

CAM SWITCH—Provided for battery and galvanometer circuits.

CASE—Carrying type with removable cover and compartment for batteries and leads (not supplied).

DIMENSIONS—Length 10″, width 9¾″, height 5¼″.

WEIGHT—Approx. 6 lbs. Price $110.00.



No. 637

KELVIN WHEATSTONE BRIDGE

Resistance range 0.001 ohm to 11.1 megohms

SPECIFICATIONS—Same as No. 638-2 except:

ACCURACY—1.0% between 1.0 ohm and 1.0 megohm; 2.0% above 1.0 megohm; and 3.0% below 0.1 ohm.

GALVANOMETER—Sensitivity 1.0 micro-ampere per millimeter division. Built-in.

RHEOSTAT ARM—Three decades—10 ohm steps in Wheatstone and 10 micro-ohm steps in Kelvin ranges.

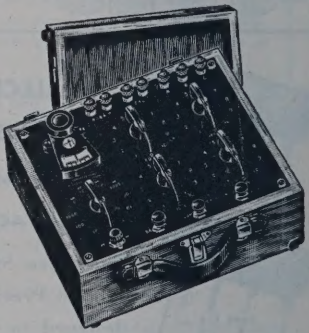
CANNOT be used as Resistance Box.

DIMENSIONS—Length 10″, width 9¾″, height 5¼″.

WEIGHT—Approx. 7 lbs. Price $140.00.

No. 629

FAULT LOCATION BRIDGE



Resistance range 0.1 ohm to 11.11 megohms

SPECIFICATIONS

ACCURACY—COMPONENT RESISTORS—0.1% accurate except 1.0 ohm, which are 0.25%.

GALVANOMETER—Built-in—sensitivity 1.0 micro-ampere per mm. division.

RHEOSTAT ARM—Four decades—11,110 ohms—variable in 1 ohm steps.

RATIO DIAL—Marked 0.001, 0.01, 0.1, 1.0, 10.0, 100 and 1000 for resistance measurements and Varley tests. M1, M 10, M 100 and M 1000 for Murray tests.

SEPARATE KEYS—Provided for battery and galvanometer circuits.

CASE—Carrying type with removable cover, concealed compartment for 4½ volt battery (not supplied).

BINDING POSTS—Provided for use of external galvanometer where required.

DIMENSIONS—Length 10⅜″, width 8⅝″, height 5⅝″.

WEIGHT—Approx. 7 lbs. Price $130.00.

VOLTAGE DIVIDERS (DECADE POTENTIOMETERS)

No.	Dials	Total Resistance	Price	No.	Dials	Total Resistance	Price

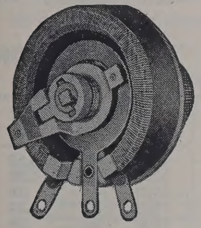
836	4	100,000 ohms	**110.00**	846	3	10,000 ohms	**79.50**
837	4	1,000 ohms	**95.00**	850	3	100,000 ohms	**92.50**

VITROHM RING TYPE RHEOSTATS



The core and base of Ward Leonard Ring Type Rheostats are made of the highest grade ceramic materials. The resistance wire is wound toroidally on the core, and is coated with a tough, heat resistant, acid resistant, crazeless vitreous enamel.

The contact is a special alloy and is of large area to avoid sticking, pitting, local heating, or oxidation when setting remains fixed for a long period of time.

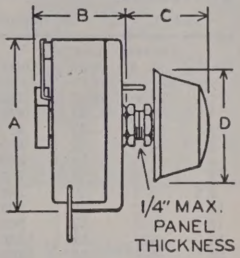
Watt Ratings

Based on continuous operation in free air with a temperature rise not to exceed 300° C, which is within the limits specified by Underwriters' Laboratories and NEMA.

Number of Steps

Each turn of resistance wire on the core of a Vitrohm Ring Type Rheostat constitutes a step of change in the resistance value.

Vitrohm Ring Type Rheostats are made with three terminals with no "off" position, and can be used as potentiometers or rheostats, as desired. Rheostats with an "off" position can be furnished on special order.



Heavy Duty Rheostats

Pressed steel plate type.

300 watts — 1 to 2500 ohms, 20 steps, 6″ diameter.
500 watts — 1 to 5000 ohms, 33 steps, 8″ diameter.

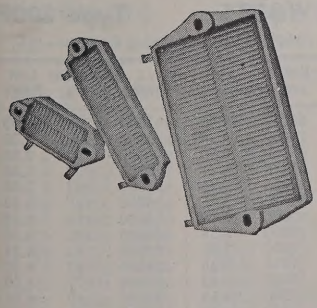
VITROHM PLAQUE RESISTORS



Vitrohm Plaque Resistors are flat in form. The resistance wire is arranged on a rectangular ceramic base to give the lowest obtainable values of inductance and distributed capacitance. Inductance at frequencies up to 1000 kilocycles and distributed capacitance up to 5 megacycles are so low in value that they are negligible.

Vitrohm Plaque Resistors are rated 20, 40, and 125 watts with full ventilation. Since full ventilation is usually impossible to attain, the watt rating should be decreased to compensate for the reduction in ventilation. A single plaque resistor mounted on a panel should operate safely about 80% of the full watt rating.

ADJUSTABLE RESISTORS -- ADJUSTOHMS

Adjustohm Resistors are for use in any application where it is necessary or desirable to have one or more intermediate resistance values; or in circuits that need to be changed from time to time to meet varying electrical conditions.

Adjustohm Resistors are built of the highest grade low temperature coefficient materials, and are coated with Ward Leonard's tough crazeless Vitreous Enamel.

WATT RATINGS

Nominal watt ratings for Adjustohm Resistors apply when the entire resistor is in the circuit. For most practical purposes the watt rating for each part of the resistor is approximately proportional to the amount of the resistance that is in the circuit.

Mounting brackets are furnished with all Adjustohm Resistors, except the 10-watt size, Type 10A.

Price of resistor includes brackets and one adjustable band.

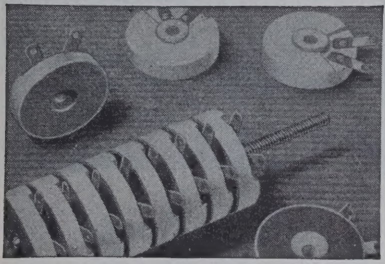
WARD LEONARD • VITROHM RESISTORS and RHEOSTATS

DISCOHM RESISTORS

18 WATTS Type 18D



Discohms are flat refractory discs having resistance wire arranged to minimize the values of inductance and distributed capacitance.

Discohm Resistors are especially useful in equipments where space is limited and where a power resistor having low value of inductance and distributed capacitance is required.

They are mounted by means of a No. 8 wood screw or bolt through the countersunk hole cast in the refractory base. Two or more units can be mounted together to obtain various resistance values and watt ratings.

Discohm Resistors are rated at 18 watts with free ventilation. A single Resistor mounted on a panel should operate safely at 80% of the full watt rating or 90% of the full current rating.

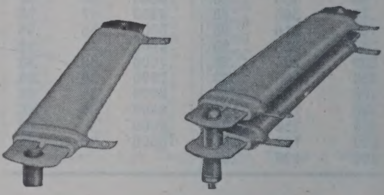
VITROHM STRIP RESISTORS

Vitrohm Strip Resistors lend themselves readily to applications where space is limited, such as aircraft control circuits, radio instruments, and similar apparatus.



Vitrohm Strip Resistors are built on a strong flat reinforced core that has no sharp angular surfaces, providing a smooth continuous form of the resistance winding. The resistors are vitreous enamel coated.

Each unit is fitted with a self-sustained mounting bracket and spacer, the end pieces being riveted to a metal strip that passes through the core and serves as a conductor for the internal heat generated while the resistor is in service.

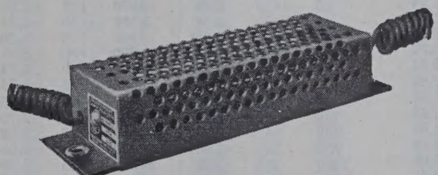
3½	4¼	0.70	35,000	55
4¾	5½	1.00	50,000	65
6	6¾	1.40	66,000	75

FLUORESCENT LAMP RESISTORS



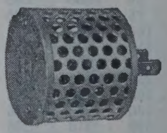
Ward Leonard Fluorescent Lamp Resistors are designed for use in buorescent lamps operating on direct current. They meet the requirements of lamp and fixture manufacturers and are listed as standard by the Underwriters' Laboratories, Inc., and by the New York City Department of Water Supply, Gas and Electricity.

Ward Leonard Fluorescent Lamp Resistors are mounted in well-ventilated metal enclosures for installation on standard fixtures. They are made for use on 115-volt, 120-volt and 220-volt circuits and in various resistance values to meet the requirements of the lamps with which they are to be used.

Long, flexible asbestos covered leads facilitate connections.

Plug-In Type

For Portable Fixtures



Ward Leonard also provides a Fluorescent Lamp Resistor in a metal enclosure for use with portable lamps operating on 120-volt circuits. It is fitted with a plug on one end for inserting into the line receptacle and a receptacle on the other end into which the plug on the figure is placed.

The Plug-In Resistor is made for use on 15-watt and 20-watt lamp fixtures.

LINE VOLTAGE REDUCERS

Ward Leonard Line Voltage Reducers protect radio sets, soldering irons, Christmas tree lamp strings, and other electrical appliances within the ratings of the Reducers, from high line voltage.

Line Voltage Reducers consist of a resistor network encased in a perforated metal enclosure provided with standard parallel prongs on one end and a standard receptacle on the other. Connection is made by plugging the Reducer into a receptacle and then inserting the plug on the appliance in the receptacle on the enclosure.

AUTOMATIC AMPERITE REGULATOR

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

AUTOMATIC
REGULATOR
AMPERITE
BALLAST RESIS
FOR AUTOMATIC R
ULATION OF CURRE
AND VOLTAGE

AMPERITE is an automatic rheostat designed to keep the current in a circuit at a definite value, for example, 0.5 amps. Should the supply voltage increase, the Amperite will automatically increase in resistance enough to take up the increase in supply voltage — keeping the voltage on the load constant.

PRICES: The proper AMPERITE Replacement may be determined by looking up the number under column "FOR" and noting corresponding Amperite in the column "USE AMPERITE". Numbers in "FOR" column run consecutively and then alphabetically.

★The letter code in the center column is interpreted as follows:

c—For 110V. A.C. Sets.............................. 2.25
h—For 220V. A.C.-D.C. Sets......................... 2.25
r—For 110V. A.C. Sets having 70-95V. Primary....... 1.25
s—For special apparatus............................ 3.00

A C. - D. C. SETS

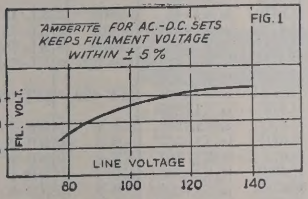

FIG. 1

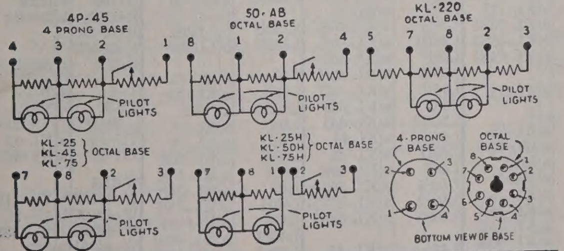
For A.C.-D.C. Sets

The Amperite Regulators are designed to pass only 0.3A through tube filaments. Filament voltages will be kept within ±5% with line voltage variations of 85 to 140 volts. Due to the fact that Amperite is a real regulator, 2 types of Amperite with four prongs and 2 with octal bases will replace 150—90% of all—so-called ballasts or resistors used in AC.-D.C. sets. No extra resistor required.

Pilot Lights—None, one or two of either 0.150A or 0.250A can be used with same Amperite. Should a pilot light burn out, the set will continue to operate properly without any damage to the Amperite, tubes or other parts. The patented starting resistor in the Amperite prevents overloading and premature burning-out of tubes and pilot lights.
In some sets the ballast socket is purposely wired in such a way that the Pilot Light Resistors of standard ballasts would be burned out if inserted. In such sets special Amperites are required, as shown in table. Avoid burnouts—use proper Amperite.

BASE WIRING OF AMPERITES FOR A.C.-D.C. SETS



AMPERITES
FOR 2-VOLT BATTERY SETS

Two-volt tube filaments are delicate and easily overloaded. Keeping the tube filaments at their proper voltage with a real regulator like Amperite invariably results in considerably more battery and tube life. The same Amperite can be used for dry cell, air cell, or 2 volt storage battery operation. The proper Amperite is determined by the total filament-current drain of the set. e.g.—for 0.5A use Amperite 5E1. etc

PRICES

The proper AMPERITE Replacement may be determined by looking up the number under column "FOR" and noting corresponding Amperite in the column "USE AMPERITE". Numbers in "FOR" column run consecutively and then alphabetically.

★The letter code in the center column is interpreted as follows:

	List Price
a—For 110V. A.C.-D.C. Sets	**$1.25**
b—For 2V. Battery Sets	**2.25**
c—For 110V. A.C. Sets	**2.25**
h—For 220V. A.C.-D.C.Sets	**2.25**
r—For 110V. A.C. Sets having 70-95V. Primary	**1.25**
s—For special apparatus.	**3.00**

RESISTORS by RESISTORS, INC.

RESISTORS, INC.

Chicago 16, Illinois

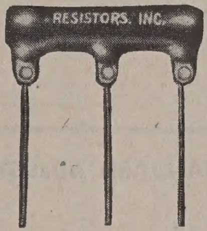
Resistors by RESISTORS, INC. — the choice of engineers and hams alike — enjoy wide acceptance because they are wound right — rated right — merchandised right. The complete range of fixed and adjustable resistors assures you maximum profits and service. Resistors are attractively packaged for eye appeal, a decided sales aid. Silver soldered connections — selected materials —precision fabrication. RESISTORS' Resistors are designed and produced under close personal supervision.

FIXED RESISTORS

RESISTORS, INC.

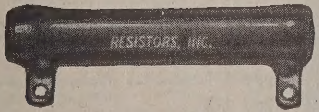
5 WATT
TYPE 1¼F - FIXED
1 thru 10,000 Ohms
$ .50

10 WATT
TYPE 1¾M - FIXED
1 thru 50,000 Ohms
$ .56



10 WATT
TYPE 1¾M - CENTER TAPPED
10 to 200 Ohms
$ .72

Prices do not include mounting brackets



20 WATT - TYPE 2K - FIXED

1 thru 15,000 Ohms	$ .91
20,000 thru 50,000 Ohms	1.07
*60,000 thru 100,000 Ohms	1.42

25 WATT - TYPE 2B - FIXED

1 thru 5,000 Ohms	$1.04
6,000 thru 15,000 Ohms	1.17
20,000 thru 50,000 Ohms	1.42
*60,000 Ohms	1.63
*70,000 thru 80,000 Ohms	1.82
*100,000 Ohms	2.47

50 WATT - TYPE 4½C - FIXED

1 thru 5,000 Ohms	$1.56
6,000 thru 25,000 Ohms	1.77
30,000 thru 80,000 Ohms	2.05
100,000 Ohms	2.08

80 WATT - TYPE 6½C - FIXED

1 thru 5,000 Ohms	$1.95
6,000 thru 25,000 Ohms	2.28
30,000 thru 50,000 Ohms	2.60
60,000 thru 100,000 Ohms	2.93

100 WATT - TYPE6½R - FIXED

1 thru 5,000 Ohms	$2.13
6,000 thru 25,000 Ohms	2.48
30,000 thru 50,000 Ohms	2.85
60,000 thru 80,000 Ohms	3.20
100,000 Ohms	3.55

160 WATT - TYPE 8½R - FIXED

1 Ohm	$3.77
2 Ohm	3.41
3 Ohm	3.02
4 Ohm	3.06
5 thru 10,000 Ohms	2.85
12,000 thru 50,000 Ohms	3.41
60,000 thru 100,000 Ohms	3.84

200 WATT - TYPE 10½R - FIXED

1 Ohm	$4.68
2 Ohm	4.33
3 Ohm	3.98
4 Ohm	3.77
5 thru 10,000 Ohms	3.58
12,000 thru 100,000 Ohms	4.26

*Supplied with low temperature coating. Vitreous enamel coating at higher prices.
20 WATT to 200 WATT inclusive, listed above, supplied with mounting brackets.
PRICES SUBJECT TO CHANGE WITHOUT NOTICE

ADJUSTABLE RESISTORS

(Supplied with mounting brackets)

10 WATT - TYPE 1¾MA - ADJUSTABLE

1 thru 10,000 Ohms	$ .85

25 WATT - TYPE 2BA - ADJUSTABLE

1 thru 5,000 Ohms	$1.21
6,000 thru 15,000 Ohms	1.35
20,000 thru 25,000 Ohms	1.56

50 WATT - TYPE 4½CA - ADJUSTABLE

1 thru 5,000 Ohms	$1.91
6,000 thru 25,000 Oms	2.13
30,000 thru 50,000 Ohms	2.42
60,000 thru 100,000 Ohms	2.86

80 WATT - TYPE 6½CA - ADJUSTABLE

1 thru 5,000 Ohms	$2.48
6,000 thru 25,000 Ohms	2.85
30,000 thru 50,000 Ohms	3.20
60,000 thru 100,000 Ohms	3.55

100 WATT - TYPE 6½RA - ADJUSTABLE

1 thru 5,000 Ohms	$2.85
6,000 thru 25,000 Ohms	3.20
30,000 thru 50,000 Ohms	3.55
60,000 thru 100,000 Ohms	3.90

160 WATT - TYPE 8½RA - ADJUSTABLE

1 Ohm	$4.68
2 Ohm	4.33
3 Ohm	3.98
4 Ohm	3.77
5 thru 10,000 Ohms	3.55
12,000 thru 50,000 Ohms	4.12
60,000 thru 100,000 Ohms	4.55

200 WATT - TYPE 10½RA - ADJUSTABLE

1 Ohm	$5.47
2 Ohm	5.19
3 Ohm	4.84
4 Ohm	4.55
5 thru 10,000 Ohms	4.26
12,000 thru 100,000 Ohms	4.98

STANDARD ADJUSTABLE LUG — SCREW DRIVER TYPE

For 10 Watt	$ .13
For 25 Watt	.13
For 50 and 80 Watt	.20
For 100, 160 and 200 Watt	.20

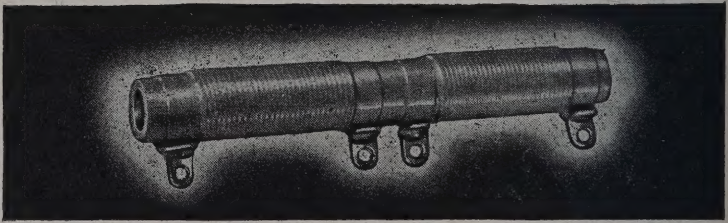
RESISTORS, INC

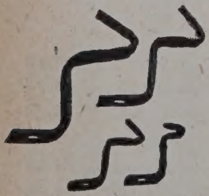
R. F. PLATE CHOKES

Type L-1	$ .33
Type L-2	1.04
Type L-3	1.56
Type L-4	2.15

POWER LINE CHOKES

Type L-10	$2.15
Type L-11	3.58
Type L-12	5.20





MOUNTING BRACKETS

No.	Use with Resistor Type	I. D. of Tube
2	M	3/16"

8	H, R	3/4"

CENTERING WASHERS

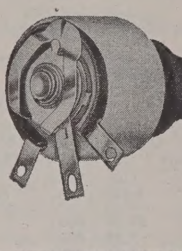
Type No.	I. D. of Tube
1	3/16"
2	5/16"
3	1/2"
4	3/4"

Manufactured by RESISTORS, INC., Chicago 16, Illinois

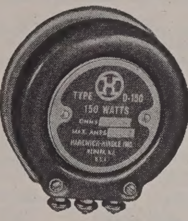
HARDWICK-HINDLE INC.

VITREOUS ENAMELED RHEOSTATS
INSULATED SHAFTS and MOUNTING BUSHINGS

TYPE 2462-F—Designed for relatively low wattage requirements. Resistance wire is wound upon a heat resisting phenolic strip. The wound strip is rigidly attached to a refractory base. Contact arm of beryllium copper—gives uniform pressure, smooth action and long life.



TYPE M (Style 2879-3TC)—Rugged and compact. Has exceptional heat dissipation. Resistance wire is wound on a pure mica form, in a refractory base and embedded in vitreous enamel, bonding winding and base together. A small area of winding is free of enamel for contact purposes. Smooth action metallic contactor.



TYPES B-50, C-100, D-150, E-300 and F-500 embody the latest developments. Contact system separates current handling and contact pressure. Copper-graphite contact brush in porcelain holder travels on inside of winding. Wound ring and contact system assembled to metal base—gives great rigidity, lower panel temperatures.

TABLES OF SIZES AND RATINGS OF RHEOSTATS

TYPE 2462-F—10 W. RHEOSTAT

Stock No.	Total Ohms	Max. Amps.*	List Price
0101	1	3.16	$3.85

ADJUSTABLE VITREOUS ENAMELED RESISTORS
WITH MOUNTING BRACKETS

Embodying features originated by Hardwick, Hindle, Inc., resulting in a Resistor possessing the many advantages of Vitreous Enamel Construction, plus an adjustable feature.

The winding is closely and evenly spaced, assuring ample insulation between turns. Where the winding appears exposed in the track, its underside is tightly embedded in the enamel, the upper surface only being exposed for contact with the adjustable band.

All sizes of Adjustable Resistors listed herein are furnished complete with mounting brackets and with one adjustable contact band.

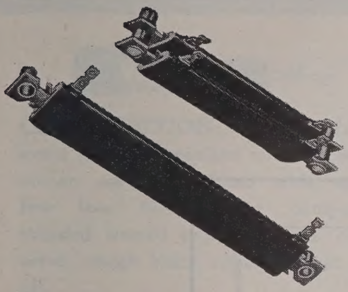
HARDWICK-HINDLE INC.

BLUE RIBBON RESISTORS



The standard method of mounting Blue Ribbon Resistors is by means of an aluminum thru-bar, which is in intimate contact with the entire internal surface of the ceramic core. The presence of this thru-bar distributes the heat generated by the Resistor uniformly along its entire length, substantially spreading the hot spot normally encountered in tubular resistors with conventional mounting. Mounting studs riveted to the ends of the thru-bar further tend to conduct the heat to the mounting surfaces. These mounting studs are also designed to act as spacers when two or more units are stacked.

In comparison with tubular units of equivalent wattage rating Blue Ribbon Resistors have the following advantages: Higher wattage rating per unit space requirement. Substantial reduction in depth behind mounting surface. Ease and economy of mounting—either singly or stacked. Lower Inductance. Light weight. Resistor and mounting integral unit; cannot rotate or become loose.

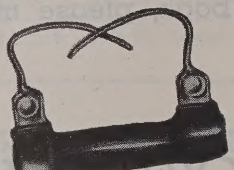
									B617	50000	3.30

*This rating based on a maximum temperature rise of 250 degrees C. with the Resistor mounted horizontally on a 10″ x 10″ x .040″ steel plate supported horizontally ½″ above a wooden surface.

When Resistors are mounted on a non-metallic base the nominal watt rating should be reduced by approximately 15%.

All stock numbers in each type listed above are available with adjustable feature complete with one movable contact band.

10 and 20 WATT FIXED VITREOUS ENAMELED RESISTORS



Designed particularly for radio service and replacement use—conservatively rated—wound upon Steatite Tube—combination lug and pigtail terminal connections — Hardwick, Hindle vitreous enamel insulation, insuring permanence of value and proof against moisture. 10 watt and 20 watt sizes available in the range of resistance values shown.

* Low Temperature Enamel.

MADE TO ORDER PRODUCTS

In addition to the standard line of resistor and rheostat products, which are in stock for immediate shipment, Hardwick, Hindle, Inc., is always pleased to receive orders for made to order products, such as, Non-inductive vitreous enameled resistors, Radio frequency chokes, Power line chokes and Soldering Iron controls.

Non-inductive resistors are available in three standard sizes: 25, 50 and 100 watt.

Radio frequency chokes and Power line chokes are also available in three standard sizes.

Soldering iron controls and Photographic lamp controls are made to order in ten different sizes.

Data on the above products can be furnished upon request.

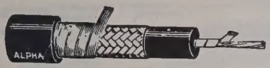
Thank You!

When writing for additional information or when ordering from sources of supply listed in this book, please mention

RADIO'S MASTER

ALPHA WIRE PRODUCTS

CRYSTAL MICROPHONE CABLE

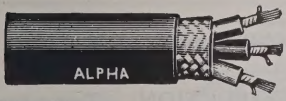


CONSTRUCTION: Single conductor, extra flexible stranded tinned copper, cotton serve, insulated with special low loss SIC rubber compound, braided tinned copper shield, cotton serve, tough black rubber jacket overall.

GENERAL PURPOSE: Low loss design for use with crystal, ribbon, dynamic and velocity microphones, photo-electric cells. Use No. 1248 FOR LAPEL MICROPHONES and phonograph pick-ups.

No.	Put-up	Size	Strand	Max. Capacity Per Ft. Between Cond. & Shield	O.D.
1248	100 Ft. Spool	20	26/34	40 mmf.	.175"
1249	100 Ft. Spool	20	26/34	30 mmf.	.245"

SHIELDED MICROPHONE CABLE

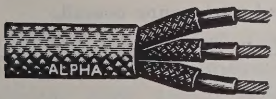


CONSTRUCTION: Each conductor flexible stranded tinned copper, cotton wrap, 1/64" "Hi-Tension" low capacity rubber, color coded, conductors twisted, cushioned with cotton fillers, braided tinned copper shield, cotton wrap, tough black rubber jacket overall.

GENERAL PURPOSE: Adaptable for all indoor and outdoor crystal, carbon and condenser microphones as well as public address systems.

No.	Put-up	Size	Conduc-tors	Max. Capacity Per Ft. Between Cond. & Shield	Conds.	O.D.
1250	100 Ft. Spool	20	2	70 mmf.	38 mmf.	.270"
1250/18	100 Ft. Spool	18	2	75 mmf.	40 mmf.	.300"
1251	100 Ft. Spool	20	3	65 mmf.	38 mmf.	.305"
1252	100 Ft. Spool	20	4	65 mmf.	36 mmf.	.345"
1253	100 Ft. Spool	20	5	60 mmf.	32 mmf.	.350"
1254	100 Ft. Spool	20	6	60 mmf.	30 mmf.	.375"
1255	100 Ft. Spool	20	7	60 mmf.	30 mmf.	.380"
1255/8	100 Ft. Spool	20	8	60 mmf.	30 mmf.	.400"

SHIELDED MULTIPLE CONDUCTOR CABLE



CONSTRUCTION: Each conductor No. 20-10/30 stranded tinned copper, 1/64" rubber, color coded cotton braid, conductors twisted, tinned copper shield overall.

1262—1263—1264—Same specifications except with cotton braid over shield.

GENERAL PURPOSE: For indoor permanent or portable P.A. systems, photo electric cell circuits, sound recording and auto radios.

TINNED SHIELD OVERALL

No.	Put-up	Conduc-tors	Maximum Capacity Per Ft. Between Cond. & Shield	Conds.	O.D.
1256	100 Ft. Spool	2	60.5 mmf.	32 mmf.	.215"
1257	100 Ft. Spool	3	54.0 mmf.	29 mmf.	.240"
1258	100 Ft. Spool	4	48.0 mmf.	26 mmf.	.270"
COTTON BRAID OVER SHIELD					
1262	100 Ft. Spool	2	60.5 mmf.	32 mmf.	.225"
1263	100 Ft. Spool	3	54.0 mmf.	29 mmf.	.245"
1264	100 Ft. Spool	4	48.0 mmf.	26 mmf.	.275"

SHIELDED TWISTED PAIR CABLE

CONSTRUCTION: Two conductors twisted, each #24 16/36 tinned copper, .015" vinyl insulation, color coded, very fine tinned copper shield overall.

GENERAL PURPOSE: Where small diameter is required for sound recording, photo electric cell circuits, public address systems, etc.

No.	Put-up	Conductors	O.D.
1261	1000 Ft. Spool	2	.115"

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

NOTE: See Page S-12 for ALL ALPHA Prices and Other Information.

ALPHA WIRE PRODUCTS

SHIELDED DUPLEX SPEAKER CABLE

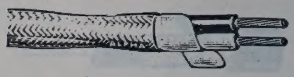
GENERAL PURPOSE: For P.A. systems, photo-electric cell circuits, master control sound systems, etc.

TINNED SHIELD OVERALL

No.	Put-Up	Conductors	Maximum Capacity Per Ft. Between Cond. & Shield	Maximum Capacity Per Ft. Between Conds.	O.D.
1265	500 Ft. Spool	2	65 mmf.	23 mmf.	.250"

WAXED COTTON BRAID OVER SHIELD

No.	Put-Up	Conductors	Maximum Capacity Per Ft. Between Cond. & Shield	Maximum Capacity Per Ft. Between Conds.	O.D.
1266	500 Ft. Spool	2	65 mmf.	23 mmf.	.280"



CONSTRUCTION: Two conductors twisted, each No. 18-16/30 stranded tinned copper, 1/32" "Hi-Tension" rubber, color coded, paper wrap over both conductors, close tinned copper shield overall.

CONSTRUCTION: Same as #1265 except with waxed cotton braid over shield.

SHIELDED TRANSMISSION LINE

GENERAL PURPOSE: For inter-communication, short wave, P.A. systems, etc.

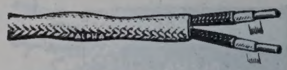
TINNED SHIELD OVERALL

No.	Put-up	Max. Capacity Per Ft.	O.D.
1267	500 Ft. Spool	25 mmf.	.135"

WAXED COTTON BRAID OVER SHIELD

No.	Put-up	Max. Capacity Per Ft.	O.D.
1268	500 Ft. Spool	25 mmf.	.165"

Surge impedance is one-half the above when using shield as common conductor in dual transmission line.



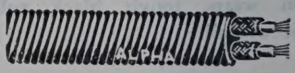
CONSTRUCTION: Two conductors twisted, each No. 20 solid tinned enameled copper, insulated, color coded, shielded braid overall.

CONSTRUCTION: Same as #1267 except with waxed cotton braid over shield.

ARMORED DUPLEX SPEAKER CABLE

GENERAL PURPOSE: For P.A. systems, oil burner installations, automotive wiring, etc.

No.	Put-up	O.D.
1272	500 Ft. Spool	.132" x .182"



CONSTRUCTION: Two conductors parallel, each No. 18-16/30 stranded tinned copper, rubber insulated, color coded, lacquered cotton braid, galvanized steel armor overall.

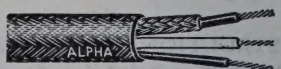
INTER-COMMUNICATION CABLE

3 CONDUCTORS

(1 SHIELDED — 2 UNSHIELDED)

GENERAL PURPOSE: This cable is ideal for general wiring from station to station where a shielded single conductor is essential to eliminate cross talk.

No.	Put-up	O.D.
1242	500 Ft. Spool	.155"

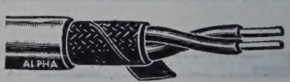


CONSTRUCTION: Three conductors, each conductor No. 22 stranded tinned copper wire, vinyl plastic insulation, color coded; one conductor tinned copper shield and two conductors unshielded; cotton braid overall.

LEAD SHEATHED CABLE

GENERAL PURPOSE: For P.A. systems, communications, traffic control, mines, railroads and many other uses where severe moisture conditions are encountered. For all outdoor use including underground and underwater.

No.	Put-up	O.D.
1271	1,000 Ft. Reel	.325"



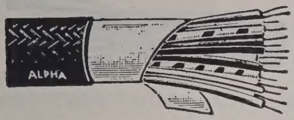
CONSTRUCTION: Two conductors twisted, each No. 19 solid tinned copper, 1/32" "Hi-Tension" rubber, color coded; overall is a pure lead sheath.

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

NOTE: See Page S-12 for ALL ALPHA Prices and Other Information.

BRAIDED COMMUNICATION CABLE

(TWISTED PAIRS)



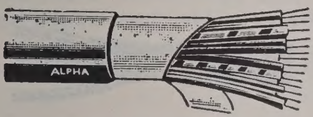
CONSTRUCTION: Each conductor solid tinned copper wire, two cotton reverse serves paraffined, color coded, conductors twisted into pairs, then covered with an impregnated double paper wrap, and overall a cotton braid saturated with a moisture-proof, flame retarding, rodent-proof compound.

GENERAL PURPOSE: For interior use designed for connecting inter-communication systems, annunciators, telephones, etc.

No.	Put-up	Size	Pairs	O.D.
1276/2	1,000 Ft. Reel	22	2 (4 Conductors)	.185"
1276/3	1,000 Ft. Reel	22	3 (6 Conductors)	.210"
1276	1,000 Ft. Reel	22	6 (12 Conductors)	.240"
1277	1,000 Ft. Reel	22	10 (20 Conductors)	.300"
1277/13	1,000 Ft. Reel	22	13 (26 Conductors)	.360"
1277/15	1,000 Ft. Reel	22	15 (30 Conductors)	.380"
1277/25	1,000 Ft. Reel	22	25 (50 Conductors)	.445"

LEAD-COVERED COMMUNICATION CABLE

(TWISTED PAIRS)



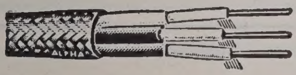
CONSTRUCTION: Similar to Communication System Cable above, but with lead antimony sheath instead of cotton braid over the twisted pairs.

GENERAL PURPOSE: For use indoors, outdoors, underground and in pipes for connecting inter-commnication systems, annunciators, telephones, etc.

No.	Put-up	Size	Pairs	O.D.
1289	1,000 Ft. Reel	22	6 (12 Conductors)	.375"
1291	1,000 Ft. Reel	22	10 (20 Conductors)	.450"
1293	1,000 Ft. Reel	22	15 (30 Conductors)	.510"
1295	1,000 Ft. Reel	22	25 (50 Conductors)	.560"

INTER-COMMUNICATION CABLE

(BRAIDED)

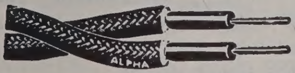


CONSTRUCTION: Each conductor solid bare copper wire, thermo-plastic insulation, color coded, conductors twisted, waxed cotton braid overall.

GENERAL PURPOSE: Designed for interior use for connecting inter-communication systems, annunciators, thermostat controls of oil burners, air conditioners, etc.

No.	Put-up	Size	Conductors	O.D.
1274	500 Ft. Spool	18	2	.150"
1275	500 Ft. Spool	18	3	.165"
1275/4	500 Ft. Spool	18	4	.180"
1275/5	500 Ft. Spool	18	5	.200"
1275/6	500 Ft. Spool	18	6	.220"

OUTDOOR INTER-COMMUNICATION WIRE



CONSTRUCTION: Each conductor 19 solid tinned copper, 1/64" telephone compound rubber, heavy cotton braid with specially treated compound to make it weather-proof for resistance against rain, snow, hail and cold.

GENERAL PURPOSE: For outdoor and indoor use or in any damp location, for connecting communication systems, telephones, etc.

No.	Put-up	Size	Conductors	O.D.
1279	500 Ft. Spool	19	2	.200"
1280	500 Ft. Spool	19	3	.300"

UNSHIELDED TRANSMISSION LINE

CONSTRUCTION: Two conductors twisted, each No. 20 solid tinned copper, insulated, color coded.

GENERAL PURPOSE: For short wave, inter-communication, annunciator systems, etc., where shielding is not required.

No.	Put-up	O.D.
1269	500 Ft. Spool	.125"

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

NOTE: See Page S-12 for ALL ALPHA Prices and Other Information.

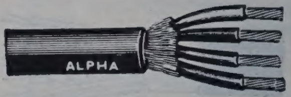
ALPHA WIRE PRODUCTS

MULTI-CONDUCTOR FLEXIBLE CABLE

(RUBBER JACKETED)

GENERAL PURPOSE: For indoor and outdoor speakers, permanent or portable P.A. systems, sound recording and auto radios.

No.	Put-up	Conductors	Capacity Per Ft. Between Conductors	O.D.
1244	100 Ft. Spool	2	22 mmf.	.250"
1245	100 Ft. Spool	3	20 mmf.	.300"
1246	100 Ft. Spool	4	18 mmf.	.320"
1247	100 Ft. Spool	5	17 mmf.	.370"
1247/6	100 Ft. Spool	6	16 mmf.	.400"
1247/8	100 Ft. Spool	8	16 mmf.	.460"



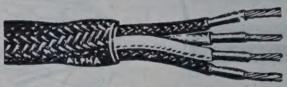
CONSTRUCTION: Each conductor No. 20-26/34 flexible stranded tinned copper, cotton wrap, 1/32" "Hi-Tension" rubber, color coded, conductors twisted, cushioned with cotten fillers, cotton wrap, tough black rubber jacket overall.

MULTI-CONDUCTOR FLEXIBLE CABLE

(COTTON BRAID)

GENERAL PURPOSE: For connecting speakers, analyzers, remote control units, P.A. systems or wherever a multiple circuit hook-up is required.

No.	Put-up	Conductors	Capacity Between Conductors	O.D.
1182	100 Ft. Spool	2	31.5 mmf.	.135"
1183	100 Ft. Spool	3	31.0 mmf.	.170"
1184	100 Ft. Spool	4	30.0 mmf.	.180"
1185	100 Ft. Spool	5	29.5 mmf.	.205"
1186	100 Ft. Spool	6	29.2 mmf.	.225"
1187	100 Ft. Spool	7	28.8 mmf.	.240"
1188	100 Ft. Spool	8	28.5 mmf.	.255"
1189	100 Ft. Spool	9	27.9 mmf.	.275"
1190	100 Ft. Spool	10	27.6 mmf.	.310"
1192	100 Ft. Spool	12	27.0 mmf.	.340"



CONSTRUCTION: Each conductor No. 20-10/30 stranded tinned copper, 1/64" thermoplastic insulation, color coded, conductors twisted, glazed brown cotton braid overall.

RUBBER SHEATHED SERVICE CORD

(UNDERWRITERS APPROVED)

GENERAL PURPOSE: For amplifiers, sound systems, speakers, vacuum cleaners, electric tools, washing machines, refrigerators, appliances, trouble lights, garage lamps or wherever a rough usage power line is required.

No.	Put-up	Size	Conductors	Type	Current Carrying Capacity	Voltage Rating	O.D.
1951	250 Ft. Spool	18	2	SV	5 amps	300	.250"
1952	250 Ft. Spool	18	2	SJ	5 amps	300	.310"
1953	250 Ft. Spool	16	2	SJ	7 amps	300	.340"
1954	250 Ft. Coil	18	2	S	5 amps	600	.390"
1955	250 Ft. Coil	16	2	S	7 amps	600	.410"
1956	250 Ft. Coil	14	2	S	15 amps	600	.540"
1957	250 Ft. Coil	12	2	S	20 amps	600	.605"
1958	250 Ft. Coil	10	2	S	25 amps	600	.640"

Also Available with Additional Conductors.

CONSTRUCTION: Each conductor stranded bare copper, cotton separator, 1/32" "Hi-Tension rubber, color coded, conductors twisted, cushioned with jute fillers, 40% tough rubber jacket overall.

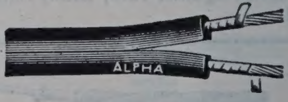
TYPE POSJ—E-Z STRIP LAMP CORD

(UNDERWRITERS APPROVED)

GENERAL PURPOSE: For line cord on radios, lamps, electric clocks, food mixers and other small devices.

No.	Put-up	O.D.
1966	100 Ft. Spool	.235" x .130"
1967	250 Ft. Spool	.235" x .130"

Standard Colors: Brown, Black and Ivory



CONSTRUCTION: Two conductors parallel, each conductor No. 18-41/34 extra flexible bare copper, color coded cotton serve, 40% tough rubber jacket overall. Slit in jacket to permit "E-Z" separation.

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

NOTE: See Page S-12 for ALL ALPHA Prices and Other Information.

ALPHA WIRE PRODUCTS

KINKLESS TEST LEAD WIRE

GENERAL PURPOSE: As test leads in analyzers, oscillators and all other types of testing apparatus or wherever an EXTRA FLEXIBLE insulated wire is required.

CONSTRUCTION: Very flexible tinned soft annealed copper, concentric strand, cotton wrap, 3/64" "Super Hi-Tension" rubber, satin finish.

No.	Put-up	Size	Strand	Voltage Breakdown (60 Cycles)	D.C. Insulation Resistance Per Ft. (Megohms)	O.D.
1633	100 Ft. Spool	20	41/36	10,000 V.	710	.140"
1635	500 Ft. Spool	20	41/36	10,000 V.	710	.140"
1636	500 Ft. Spool	18	65/36	12,000 V.	800	.150"

Heavy Duty Type

GENERAL PURPOSE: For television, therapeutic equipment, analyzers, oscillators, etc., or wherever a heavy duty EXTRA FLEXIBLE high voltage line is required.

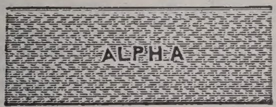
CONSTRUCTION: No. 18 - 65/36 tinned soft annealed copper, concentric strand, cotton wrap, 7/64" "Super Hi-Tension" rubber, satin finish.

No.	Put-up	Voltage Breakdown (60 Cycles)	D.C. Insulation Resistance Per Ft. (Megohms)	O.D.
1637	100 Ft. Spool	22,000 V.	Over 1,000	.245"
1638	500 Ft. Spool	22,000 V.	Over 1,000	.245"

Stock Colors: Red and Black

TINNED COPPER SHIELDING

GENERAL PURPOSE: For shielding speaker leads, lead-ins, amplifier wires, auto radio installations. Also for bonding.



CONSTRUCTION: Composed of very fine soft annealed tinned copper wires braided and rolled flat.

No.	Put-up	I.D.
1229	50 Ft. Spool	1/8"
1230	50 Ft. Spool	3/16"
1231	50 Ft. Spool	1/4"
1232	50 Ft. Spool	3/8"
1233	50 Ft. Spool	5/8"
1234	50 Ft. Spool	3/4"
1235	50 Ft. Spool	1"

SHIELDED PHONO AND GRID WIRE

GENERAL PURPOSE: Extreme flexibility and limpness make this an ideal wire for phonograph pick-up arm cable and grid wire.

CONSTRUCTION: No. 1200 - 24 gauge flexible stranded copper conductor, vinyl plastic insulation, close tinned copper shielded braid overall.

No. 1201 same as No. 1200 plus cotton braid over shield.

No. 1202 same as No. 1200 except two conductor with shield overall.

No.	Put-up	Insulation	O.D.
1200	1000 Ft. Spool	.010"	.080"
1201	1000 Ft. Spool	.010"	.095"
1202	1000 Ft. Spool	.010"	.080" x .115"

SHIELDED LOW LOSS CABLE

GENERAL PURPOSE: For auto radios, lead-ins, short wave receivers and for grid leads in the input stages of P.A. amplifiers.

CONSTRUCTION: Single conductor No. 20 - 10/30 stranded tinned copper, insulated with low loss rubber compound, white silk braid, tinned copper shield overall.

No.	Put-up	Capacity Per Ft.	O.D.
1241	100 Ft. Spool	26.6 mmf.	.225"

SHIELDED HOOK-UP AND LEAD-IN WIRE

GENERAL PURPOSE: To reduce interference caused by motors, high tension wires, x-ray machines or other apparatus that radiates electrical impulses. Ideal for grid-lead use.

CONSTRUCTION: Stranded tinned copper, low loss insulation, highly lacquered braid, close tinned copper shield overall.

No.	Put-up	Size	Strand	O.D.
1194/22	1000 Ft. Spool	22	7/30	.105"
1194	1000 Ft. Spool	20	10/30	.110"
1196	1000 Ft. Spool	18	16/30	.145"
1197	1000 Ft. Spool	16	26/30	.160"
1198	1000 Ft. Spool	14	41/30	.180"

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

NOTE: See Page S-12 for ALL ALPHA Prices and Other Information.

ALPHA WIRE PRODUCTS

PLASTIC SRIR HOOK-UP WIRE

STRANDED

SOLID

CONSTRUCTION: Single conductor, stranded and solid tinned copper wires with thermoplastic (Vinylite) insulation. High dielectric strength; 80°C (176 F) acid, alkali, oil and moisture resistant. Underwriters approved.

Standard Colors: Black, Red, Green, Yellow, Light Blue, Brown, White, Orange, Slate, Purple, Tan, Pink and Dark Blue

GENERAL PURPOSE: For radio, radar, electronic devices, transmitters, aircraft instruments, fluorescent fixtures, rectifiers, electrical toys, etc.

No.	Put-up	Size	Strand	Insulation	Volt. Breakdown (60 cycles)	D.C. Insulation Resistance per ft. (Megohms)	O.D.

TYPE WL HOOK-UP WIRE

CONSTRUCTION: Single conductor, stranded tinned copper, vinyl plastic insulation, cotton or glass braid, lacquered, flame retarding and fungi proof.

(*Specification* JAN-C-76)

GENERAL PURPOSE: For aircraft instruments and lighting and power, radio, electronic devices, radar, transmitters, rectifiers, etc.

COTTON BRAID

LACQUERED HOOK-UP AND LEAD-IN WIRE

(HIGH GLOSS LACQUERED BRAID)

CONSTRUCTION: Stranded tinned conductor, free stripping insulation, single braid highly lacquered. Bright colors.

Standard Colors: Black, Red, Green, Yellow, Blue, Brown, White

GENERAL PURPOSE: For point to point soldering connections on transformers, amplifiers, panel hook-up, etc., where a low loss dielectric is required. It is not a pushback wire but will strip easily.

No.	Put-up	Size	Strand	Insulation	Volt. Breakdown (60 cycles)	D.C. Insulation Resistance per ft. (Megohms	O.D.

1983	100 Ft. Spool	10	19/23	1/32"	.208"

CONSTRUCTION: Stranded soft annealed tinned copper, insulated with rubber, over which is a highly lacquered braid. Oil, heat, and moisture resistant.

7 MM LACQUERED CABLE

GENERAL PURPOSE: For high voltage leads in television receivers, cathode-ray tubes, oscilloscopes, etc.

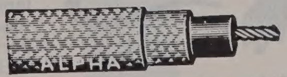
No.	Put-up	O.D.
1981	100 Ft. Spool	.275"

CONSTRUCTION: Single conductor No. 16-19/29 stranded tinned copper, rubber insulated, cotton braid highly lacquered.

7MM SHIELDED IGNITION CABLE

GENERAL PURPOSE: For automotive and aircraft ignition systems requiring grounding to overcome interference.

No.	Put-up	O.D.
1193	100 ft. spool	.300"



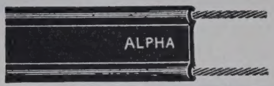
CONSTRUCTION: Single conductor No. 16-19/29 stranded tinned copper, rubber insulated, cotton braid highly lacquered, braided tinned copper shield overall.

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

NOTE: See Page S-12 for ALL ALPHA Prices and Other Information.

ALPHA WIRE PRODUCTS

TELEVISION AND FM TWIN-LEAD CABLE

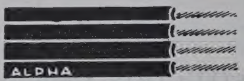


CONSTRUCTION: Two conductors parallel, each conductor 7/28 bare copper flexible stranding, low loss polyethylene plastic insulation, smooth satin finish. Standard color: brown.

GENERAL PURPOSE: For use especially in television and FM as the lead-in from the antenna to the receiver.

No.	Put-up	Impedance (Ohms)	Capacity Per Ft.	O.D.
1150	1000 Ft. Spool	300	4.5 mmf.	.070" x .395"
1151	1000 Ft. Spool	150	9.5 mmf.	.060" x .190"
1152	1000 Ft. Spool	75	20.0 mmf.	.070" x .120"

ROTARY TV-FM CABLE

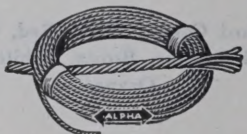


CONSTRUCTION: Conductors flat parallel, each conductor 7/30 stranded copper with one conductor bare and other conductors tinned. Durable rubber insulation.

GENERAL PURPOSE: Designed for use with TV or FM antenna rotators.

No.	Put-up	Conductors	O.D.
1150/3	1,000 Ft. Spool	3	.085" x .265
1150/4	1,000 Ft. Spool	4	.085" x .345"

GUY WIRE



CONSTRUCTION: Stranded galvanized steel wires with great tensile strength.

GENERAL PURPOSE: To prevent sway of F.M., T.V. and radio receiver masts, poles or towers.

No.	Put-up	Strand	Breaking Strength	O.D.
1168	1,000 Ft. Spool	6/18	650 Lbs.	.156"
1169	1,000 Ft. Spool	6/20	470 Lbs.	.105"
1170	100 Ft. Coil	6/20	470 Lbs.	.105"
1171	50 Ft. Coil	6/20	470 Lbs.	.105"

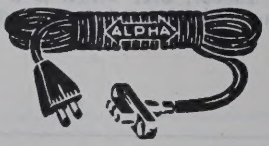
CO-AXIAL CABLE (RG-59U)

CONSTRUCTION: Single conductor No. 22 solid copperweld, polyethylene insulation, bare copper shield, black vinyl plastic jacket overall.

GENERAL PURPOSE: Co-axial cable is ideal for television, FM and facsimile reception. Is suitable for very high frequency and ultra high frequency ranges.

No.	Put-up	Nom. Imp. (Ohms)	Nom. Cap.	Max. Oper. Volts RMS	O.D.
1157	1000 Ft. Reel	73	21 mmf./F+	2300	.242"

TELEVISION POWER CONNECTOR CORD

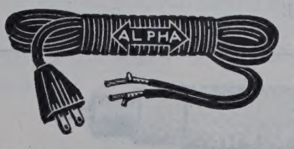


CONSTRUCTION: 6 feet E-Z Strip cord (Type POSJ-64), molded-on rubber plug attached to one end, TV molded-on rubber connector attached to other end.

GENERAL USE: For replacement of worn out or damaged TV cords.

No.	Length
2126	6 Ft. Cord

ALPHA E-Z STRIP LINE CORD

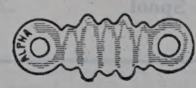


This is the modern and ideal power supply cord for replacement on radios, lamps, fans, etc. It is made of E-Z strip rubber parallel cord (UNDERWRITERS APPROVAL) with a small unbreakable soft rubber attachment plug. Free end stripped and tinned ready to attach.

No.	No.	No.
2106 - 6 Ft.	2109 - 9 Ft.	2112 - 12 Ft.

Cords Available in Any Length

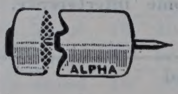
GLASS INSULATOR



Will withstand great strain.

No.	Per Carton
2020	100

NAIL KNOB



A 2 piece knob of glazed porcelain and a heavy nail for secure holding.

No.	Per Carton
2031	100

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

ALPHA WIRE PRODUCTS

AERIAL KITS

Alpha Aerial Kits are designed to meet the requirements of the various types of radio installations. Each kit is complete and boxed attractively.

No. 301

50 Ft. 7 Strand Copper Aerial
25 Ft. Lead-in Wire
2 No. 2022 Insulators
2 No. 2031 Nail Knobs

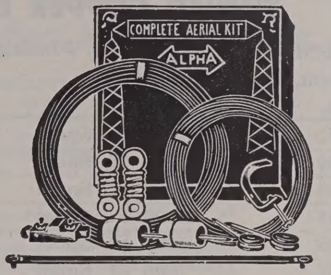
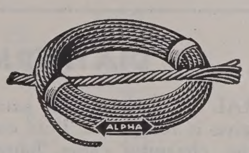
75 Ft. 7/24 Copper Aerial Wire
25 Ft. Lead-in Wire
1 No. 2001 Lightning Arrester
1 No. 2002 Lead-in-Strip
2 No. 2031 Nail Knobs
1 No. 2012 Ground Clamp
2 No. 2022 Insulators



PHOSPHOR BRONZE AERIAL WIRE

GENERAL PURPOSE: Recommended especially for ship, short wave and transmitting aerials where high tensile strength is required.

No.	Put-up	Strand	Breaking Strength	O.D.
1160	500 Ft. Spool	7/22	420 Lbs.	.075″
1161	500 Ft. Spool	7/20	650 Lbs.	.100″
1163	500 Ft. Spool	7/18	1000 Lbs.	.122″
1164	500 Ft. Spool	7/16	1600 Lbs.	.150″
1165	500 Ft. Spool	7/14	2140 Lbs.	.190″
1166	500 Ft. Spool	7/12	3670 Lbs.	.240″

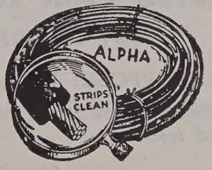


CONSTRUCTION: 7 strands Phosphor Bronze.

LEAD-IN AND GROUND WIRE

GENERAL PURPOSE: Lead-in, ground, hook-up, all purpose wire.

No.	Put-up	Size	Strand	Insulation	O.D.
1114	1000 Ft. Spool	20	10/30	1/32″	.105″
1114E	500 Ft. Spool	20	10/30	1/32″	.105″
1131	500 Ft. Spool	18	16/30	1/32″	.125″



CONSTRUCTION: Stranded tinned or solid tinned copper conductor, insulated with live free stripping rubber, jet black waxed finish overall.

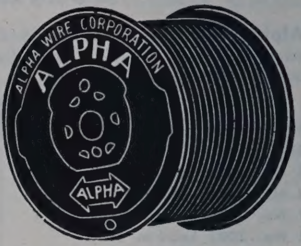
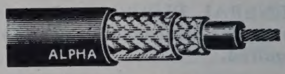
297	1000 Ft. Spool	20	.033"
298	1000 Ft. Spool	22	.025"



DIATHERMY CABLE

GENERAL PURPOSE: Its extreme flexibility and tough rubber jacket give it long life. This cable is used as a lead on therapy apparatus, charging cable, battery lead, underground cable, etc.

No.	Put-up	O.D.
1623	100 Ft. Spool	.300"
1625	1000 Ft. Reel	.300"



CONSTRUCTION: Single conductor extra flexible No. 14-104/34 copper, paper serve, 3/64" ASTM performance grade rubber, double cotton braid, .040" oil resistant neoprene rubber jacket.

TWISTED PAIR TRANSMISSION LINE

(WEATHERPROOF BRAID)

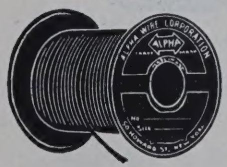
GENERAL PURPOSE: For inter-com. hook-up. Also suitable for low loss coupling between antenna and receiver as doublet style twisted lead-in.

No.	Put-up	Capacity Bet. Conds. Per Ft.	Frequency (KC)	Power Factor Per Cent	O.D.
1146	500 Ft. Spool	21.8 mmf.	3,500	3.75	.175"
1148	100 Ft. Coil				
1149	50 Ft. Coil				
1135	500 Ft. Spool	21.8 mmf.	3,500	3.75	.190"

CONSTRUCTION No. 1146: Two conductors No. 22-7/30 stranded tinned copper, 1/32" "Hi-Tension" rubber, color coded, conductors twisted, cotton braid overall, saturated weather-proof finish.

CONSTRUCTION No. 1135: Two conductors No. 18-16/30 stranded tinned copper, 1/32" "Hi-Tension" rubber, color coded, conductors twisted, cotton braid overall, saturated weather-proof finish.

PHOSPHOR BRONZE DIAL CABLE



CONSTRUCTION: Made of 42 strands (6 x 7 x .004) genuine phosphor bronze wire with a linen center for extra flexibility. Is guaranteed not to warp or stretch.

No.	Put-up	Tensile Strength	O.D.
1689	25 Ft. Spool	50 lbs.	.036"
1691	100 Ft. Spool	50 lbs.	.036"
1692	500 Ft. Spool	50 lbs.	.036"

BRAIDED LINEN DIAL CABLE

ALPHA WIRE CORPORATION
ALPHA

CONSTRUCTION: Made of the finest linen obtainable. Composed of a very strong linen center over which is a smooth black braid.

HEAVY

No.	Put-up	Tensile Strength	O.D.

ALPHA WIRE PRODUCTS

ALPHA
SPAGHETTI

FLEXIBLE VARNISHED TUBING AND SLEEVING

RADIO VARNISHED TUBING — (Spaghetti). A sleeving with a heavy coat of varnish, in high gloss vivid colors. Average dielectric strength: 4,000 volts.

SATURATED SLEEVING — A fibre yarn sleeving saturated with high grade insulating varnish. Cuts clean and has a smooth interior wall. Average dielectric strength: 2,000 volts.

MAGNETO VARNISHED TUBING—The production of this type of tubing is under rigid control so as to insure a maximum in quality. It is thoroughly impregnated with a varnish of maximum insulating value. It is resistant to heat, oil, gas and acids. Colors are bright and vivid. Average dielectric strength: 7,000 volts.

2	.263"
1	.294"
0	.330"
3/8"	.375"
7/16"	.438"
1/2"	.500"
5/8"	.625"

Tolerances: Sizes:
0 to 2—plus or minus .005"
3 to 13—plus or minus .004"
14 to 20—plus or minus .002"
Lengths—Standard 36"

Standard Colors: Black, Red, Yellow, Green and Brown
Sizes follow the B & S System of gauging wires. For instance, a No. 10 tubing will fit over a No. 10 bare wire or any wire with an insulation of which the O.D. is equivalent to No. 10 B & S gauge. If in doubt, it is best to submit a sample of the wire or product to be covered.

Longer Lengths Available.

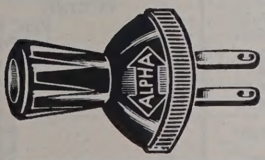
SPAGHETTI TUBING

A superior varnished tubing for radio work. It will retain its dielectric and flexibility indefinitely. Takes up to No. 14 wire.

Colors: Black, Red, Yellow, Green and Brown

No. 2091 — 36" Lengths

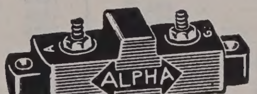
UNBREAKABLE SOFT RUBBER PLUG



Made of sturdy live soft rubber. Brass blades. Unbreakable, easy to attach.

No.	Per Carton
1964	100

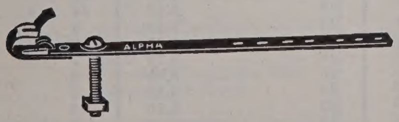
RADIO LIGHTNING ARRESTER



Made of high quality glazed porcelain with nickeled screws and nuts. For indoor or outdoor use.

No. 2001 Individually boxed

GROUND CLAMP



Heavy gauge strap, Fahnestock terminal and brass screw and nut. This ground clamp makes a quick and positive connection. Fits a 3/8" to 2" pipe.

No.	Type	Per Carton
2012	Strap	50

LEAD-IN STRIP-CLIP TYPE

Strips are waterproofed being fully covered with a heavily lacquered braid. Fahnestock clips are riveted to strap for firm contact.

No.	Length	Per Carton
2002	12"	50

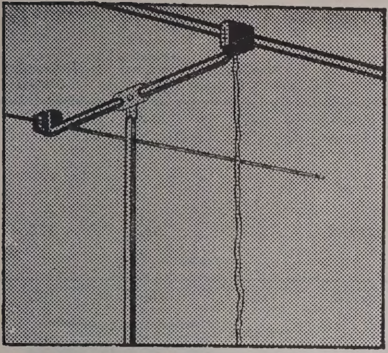
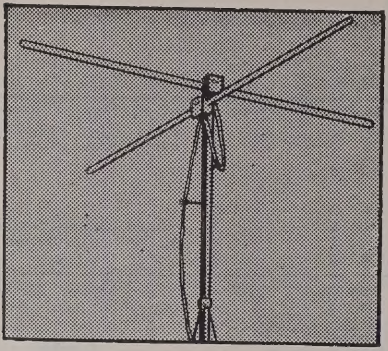
BELDEN • FM antenna systems





- Highly efficient
- Broad response
- Low standing wave ratio
- Perfect matching
- Mechanically strong
- Light in weight
- Factory assembled
- Weather resistant
- Wind resistant

Trade Number	†Pkg.	Description	Net Weight in Lb	Contents
8320	1K	**FM DIPOLE ANTENNA** The Belden FM Dipole Antenna System is scientifically engineered and may be used on all FM radios. It can be used for Standard Broadcast as well as FM reception. Its performance has been proven in laboratory and field service tests. Careful electrical design has resulted in excellent response over the entire FM band. Maximum signal and trouble-free reception are assured.	2.5	1—65′ 300-OHM Transmission Line 8225 1—Aluminum Antenna Element 1—Porcelain Junction Block 1—5′ Aluminum Standard 2—Stand-off Insulators 8126 2—Mounting Straps 1—Instruction Sheet
8321	1K	**FM REFLECTOR** For greater radio signal strength, use the Belden FM Reflector with the No. 8320 Belden FM Dipole Antenna to form an antenna-reflector array. The addition of a reflector improves FM reception for any installation and is necessary in locations where the radio signal is weak, for example, due to its distance from radio stations or its location among buildings. Also, a reduction in interference may be effected to the rear or reflector side of the antenna.	.8	1—Aluminum Reflector Element 1—Porcelain Junction Block 1—Aluminum Cross Member 1—Instruction Sheet

BELDEN • microphone cables

Performance and appearance are the outstanding features built into Belden microphone cables. Polyethylene insulation is used for outstanding dielectric properties and vinyl plastic jackets for protection.

Dielectrically, Belden microphone cables have low capacitance, high insulation resistance, and low attenuation at audio frequencies. In addition, they provide resistance to physical abuse, aging, and moisture.

shielded multiple conductor cables

Belden multiple conductor cables are developed for long service life, excellent mechanical and electrical characteristics, and uniform quality. These cables are used for a multitude of applications including power and interconnecting cords on radio receivers, electronic devices, speakers, analyzer test equipment, remote control circuits, and press-to-talk microphone circuits.

†CK—Coiled in carton K—Carton CR—Crate reel S—Spool C—Coil SK—Spooled in carton

Belden transmission cables are available for every receiving and low power transmitting antenna application. Coaxial, twisted pair, and parallel type lines are represented.

These cables are designed to meet exacting electrical requirements and are mechanically strong, weather resistant, and give long service life. Cables constructed with polyethylene insulation are especially suitable for very high frequency (VHF) and ultra high (UHF) ranges where the losses in ordinary types of transmission line cables are excessive.

TRANSMISSION LINE CABLE APPLICATIONS	Lengths and †Package	A. W. G.	Trade Number	ILLUSTRATION AND TYPE
72-Ohm cable for use with receiving and low power transmitting antenna at low frequencies. Also for heavy-duty high-voltage leads.	50′ S 250′ S	14	**8216**	 Coaxial
72-Ohm cable for use with doublet receiving antenna at low frequencies.	500′ S	18	**8204**	 Twisted Pair
72-Ohm shielded cable for use with doublet receiving antenna at low frequencies to reduce noise pick-up. Also used for long runs in extension speaker installations.	500′ S	18	**8209**	 Twisted Pair (Shielded)
Inexpensive cable for use with doublet receiving antenna at low frequencies. Also used for extension speaker and control circuits.	500′ S	22	**8205**	 Twisted Pair
72-Ohm cable for use with receiving antenna at high frequencies.	100′ S 500′ S	20	**8222**	 Parallel
100-Ohm cable for use with receiving antenna, matching transformer, connecting link between electronic units, and experimental applications at high frequencies.	100′ S 500′ S	20	**8223**	 Parallel
150-Ohm cable for use with receiving antenna, matching transformer and experimental applications at high frequencies.	100′ S 500′ S	20	**8224**	 Parallel
300-Ohm cable especially recommended for use with television and FM receiving antenna. Exceptionally low losses at high frequencies.	100′ S 500′ S 1000′ S	20	**8225**	 Parallel
300-Ohm heavy-duty cable especially recommended for use with television and FM receiving antenna. Also for low power transmitting antenna. Exceptionally low losses at high frequencies.	100′ S 500′ S	18	**8235**	 Parallel
72-Ohm cable for use with low power transmitting antenna at high frequencies.	100′ S 500′ S	13	**8210**	 Parallel
100-Ohm shielded cable for use with television and FM antenna to reduce noise pick-up.	100′ S 500′ S	20	**8226**	 Parallel (Shielded)
100-Ohm shielded cable for use with television and FM antenna in extremely noisy locations.	100′ S 250′ S	20	**8227**	 Twisted Pair (Shielded)
72-Ohm cable for use with television antenna.	100′ S 500′ S	22	**8229**	 Coaxial
52-Ohm cable for radio frequency transmission, video, test equipment, and pulse transmission.	100′ S 500′ S	20	**8228**	 Coaxial

BELDEN • hookup and lead wires

There is a Belden hook-up and lead wire construction for every service requirement—for receivers, transmitters, amplifiers, rectifiers, aircraft radio, geophysical instruments, and in all other types of electric equipment.

General-use hook-up wire and as leads for radio components such as transformers, chokes, and controls. Furnished in the eight following colors: **Black, Blue, Green, Red, Yellow, White, Brown,** and **Orange.** SPECIFY COLOR.

PLASTIC INSULATED

Wires with 1/64″ plastic insulation are designed for use within the chassis of radio receivers, amplifiers, instruments, controls, and other electronic devices. Wires with .025″ plastic insulation are designed for use inside or outside the chassis but within the radio cabinet. The operating temperature limit for these wires is 80 C (176 F).

 For Station-to-Terminal Wiring (Unshielded)	**8747**	100′ S	22-12	6	Tinned copper, flexible stranding; vinyl plastic insulation, color coded; conductors cabled in pairs; over-all brown cotton braid	None	7x30	.010	.305
	8748	100′ S	22-18	9		None	7x30	.010	.350
	8749	100′ S	22-30	15		None	7x30	.010	.445
	8750	100′ S	22-54	27		None	7x30	.010	.565
	**8751**	100′ S	25-12 16-2	Not paired	Bare copper, flexible stranding; vinyl plastic insulation, parallel thread for color coding; 12 conductors 25-ga individually shielded, cabled (not paired) with 2 conductors 16-ga unshielded; over-all brown cotton braid	Over each 25-ga conductor only	7x33 19x29	.015 .012	.335
For Station-to-Terminal Wiring (Shielded)	**8752**	100′ S	25-22 16-2	Not paired	Same construction as 8751 except 22 conductors 25-ga individually shielded	Over each 25-ga conductor only	7x33 19x29	.015 .012	.485
 P. A. Cable—Amplifier-to-Speaker	**8799**	100′ S 500′ S	18-2	1	Bare copper, solid; heavy formvar enamel coating; cotton wrap; cotton braid; waxed; color coded; conductors cabled; tinned copper braid shield	Over 2 cabled conductors	solid		.165
	**8432**	100′ S 500′ S	20-2	Not paired	Tinned copper, flexible stranding; paper wrap; rubber insulation; cotton braid; lacquer coating; color coded; conductors cabled; tinned copper braid shield	Over-all	10x30	.015	.215
	8433	100′ S 500′ S	20-3	Not paired		Over-all	10x30	.015	.230
